NEW PRODUCTS 2021/2022

UL CERTIFICATION FOR TYPE F STARTERS

Our entire range of SM...R motor protection circuit breakers (from 0.1 to 100A) has obtained Type F UL certification for combined installation with contactors. The combination of motor protection breaker and contactor, tested for its coordination in short circuit, covers the main functions demanded of a starter, i.e. short circuit protection, overload protection and motor control.

PAGE 1-4

160 TO 230A CONTACTORS IN AC3 BF SERIES

These are very compact units: 105mm wide for the three-pole versions and 140mm for the four-pole versions; motor current at 400V from 160 to 230A and Ith thermal current from 250 to 350A. The control coil operates in both AC and DC with electronic control and a wide supply voltage range. The AC/DC coil also features low power consumption, only closes at the correct supply voltage, and has a built-in noise filter. A wide range of accessories is available, including front- and side-mounting auxiliary contacts, mechanical interlocks, power terminal protection and a connection kit for configuration as star-delta starters or remote switches.

PAGE 2-4

CONNECTIONS FOR STARTER AND CHANGEOVER CONTACTOR

LOVATO Electric's range of connections for starter and changeover contactor has been greatly expanded. These accessories offer fast cabling, prevent errors, and make the starters both compact and attractive. They are made as a single unit, with the live components completely isolated.

Kits are available for reversing contactors, star-delta starters and changeover contactors in both 3- and 4-pole versions.

The reversing contactor connections are available for contactors up to 230A AC-3 400V, the star-delta connections enable configuring motor starters up to 400A AC-3 400V, while changeover connections are available for contactors up to 350A in category AC-1.

PAGE 2-23

REVERSING AND CHANGEOVER CONTACTORS ASSEMBLIES

Ready for use, these units are ideal for quickly configuring power grid switching panels for nominal currents from 32A to 165A in category AC-1.

They are equipped with a mechanical interlock with 2 NC contacts which implement the electrical interlock.

PAGE 4-5

SOFT STARTERS ADXN SERIES

Simple and quick to configure, these units are equipped with an extended power range, from 208 to 600VAC, control two phases and feature an integrated bypass relay.

Their extremely compact footprint (45mm wide) makes them ideal for installation in restricted spaces. They have many applications, including pump, compressor, fan, mixer and belt conveyor control.

The range covers nominal currents from 6 to 45A, and includes 3 variants: a basic version with potentiometer regulation, a programmable version featuring NFC technology and an advanced version with both potentiometers and NFC plus integrated current thermal protection. The advanced version can also be equipped with an optional RS485 communications port module.

PAGE 5-2

SINGLE-PHASE VARIABLE SPEED DRIVES VT1 SERIES

These new units round out our range of variable speed drives with single-phase 200 to 240VAC power rated 0.2 to 2.2kW, a compact footprint and integrated RS485 port.

Simple and versatile, VT1 drives can be used for many applications including control of pumps, fans, air conditioning systems, belt conveyors and packaging machinery, to name just a few. Their compact footprint makes them ideal for installation in enclosures with limited space. Their integrated RS485 ports enable them to be controlled remotely and monitored by a supervision system.

They are programmable with the front-panel keyboard, or using a PC with the dedicated software and a USB connection.

PAGE 6-4

PLATINUM SERIES Ø22MM METAL PUSH BUTTONS (LPS)

The Platinum series has been expanded with new Ø22mm metal buttons and switches. The system has a very high IP protection rating against the ingress of dust and water: IP66, IP67, IP69K. The operating temperature range reaches as high as +70°C. And the new metal construction is compatible with all plastic Platinum accessories (electrical contacts, lamp holders, caps, label holders, protections, disks, etc.). The range is composed of spring-return and push-push button actuators, spring-return mechanical button actuators, mushroom head button actuators, double- and triple-touch spring-return button actuators, lever, knob and key selector switch actuators, pilot light heads, USB and RJ45 interfaces and lever manipulators.

PAGE 7-2

PLATINUM SERIES FLUSH-MOUNTED Ø30MM METAL PUSH BUTTONS (LPF)

The Platinum series has been expanded with the new Ø30mm flush mounted metal series with protection ratings IP66, IP67 and IP69K. The spring-return button actuators are available in flush (including illuminated) and protruding (including illuminated) versions, and with extended guards. The push-push button actuators are available in flush (including illuminated) and protruding (including illuminated) versions. The selector switch actuators are available in the lever version (including illuminated) as well as key and knob versions. The pilot light heads are available in green, red, yellow, blue and transparent. Finally, both USB and RJ45 communications interfaces are available.

PAGE 7-2

ASSEMBLED BUTTON PANELS

Platinum series assembled button panels are built of a wide range of actuators, plastic housings and contacts. The actuators are pre-assembled to the cover with a threaded collar. The contacts are snap-mounted to the base of the panel to enable quick cabling and reduce labour should they need to be replaced or upgraded. Further to the catalogue models, we also offer custom versions with the client's choice of actuators, panel and contacts.

PAGE 7-53

PALM SWITCHES

LP9 mushroom head buttons, designed for machine stop and immediate control applications, have an ergonomic design with a large surface for easy actuation with the hand, elbow or foot. The button's large area ensures immediate actuation of machinery and equipment even if the operator already has his hands full. The range is divided into two versions: one with a rocker shaft with jog button, and one with an axial shaft and latching button which releases when pulled out.

PAGE 7-59

LTN SERIES Ø50MM AND Ø70MM SIGNAL TOWERS

LTN series signal towers are available in both Ø50mm and Ø70mm versions. Designed for signalling system status with lights and sounds, they can be assembled from up to 5 modules. The lamp modules can emit flashing or steady on signals, and are available in green, yellow, red, blue, amber/orange and white. There are also 2 types of sound module with different sound levels. The cabling modules are available for 3 power voltages: 12V, 24V and 110 - 230V. A variety of mounting options are available, with plastic and metal bases and up to 400mm extension tubes.

PAGE 8-3

NEW PRODUCTS 2021/2022

SAFETY MODULES

The new LOVATO Electric series of safety modules is designed for applications up to Cat. 4 and performance level PLc. Conforming with Machinery Directive EN ISO 13849-1, they are used to monitor and safely control safety circuits in applications with emergency stops, safety gates, magnetic safety switches, safety limit switches, electromechanical interlocks and safety barriers. We also offer a multifunction model which integrates all functions into a single unit, which can be configured with a front-mounted selector.

CHAPTER 10

ROTARY CAM SWITCHES GF SERIES

The new GF series of cam switches is the most compact we offer, and requires very little space for installation and connection: the IP20 rated terminals are mounted on the top and bottom of the switch, so that modules can be mounted side-by-side in a very compact layout. The switches have been developed to satisfy the requirements of manufacturers of small machines in applications up to 20A.

CHAPTER 11

ROTARY CAM SWITCHES 4G SERIES

The 4G series of cam switches is dedicated to high power applications, and is available in 200A to 315A versions. For even heavier duty applications, we offer custom 4G series models rated up to 2000A. Layouts are available up to 12 positions and 12 contact elements (24 contacts).

CHAPTER 11

ROTARY CAM SWITCHES GNA20 TYPE

The GNA20 switch is designed for applications with limited clearance behind the mounting panel and switching layouts with a large number of contacts. The stand out feature of this 20A switches is the option to install up to 4 contacts per contact element, thus offering a maximum configuration of 48 contacts, making it ideally suited for special executions.

CHAPTER 11

SWITCH DISCONNECTORS WITH YELLOW/RED FRONT PLATE GA SERIES

Our GA... series of DIN rail disconnectors now features a new version with yellow/red front plate, typically used for emergency switches. This new type of switch disconnector is available for currents from 16A to 160A.

PAGE 12-9

63A AND 160A DOOR MOUNTING SWITCH DISCONNECTORS SERIES

The GA... series of switch disconnectors for door mounting has been expanded with the introduction of two new ratings: 63A and 160A lth thermal current. These new sizes are also available with a fourth simultaneous closing pole for four-pole configurations.

PAGE 12-10

ASSEMBLED SWITCH DISCONNECTORS AND CHANGEOVER SWITCHES GA SERIES

The GA series of disconnectors has been expanded with the introduction of the pre-assembled version of the changeover switches. Available in 6 ratings from 25A to 160A, this type is ideal for three-pole (GA...ET6) and four-pole (GA...ET8) applications.

PAGE 12-17

SWITCH DISCONNECTORS GA SERIES: KIT WITH ROD, HANDLE AND TERMINAL COVER

GA series switch disconnectors are now available as a kit including the disconnector itself with terminal covers, a 300mm rod and door lock handle.

3 ratings are available, at 25A, 40A and 63A, in both three- and four-pole versions.

PAGE 12-17

SWITCH DISCONNECTORS AND CHANGEOVER SWITCHES GL SERIES

The GL series of switch disconnectors is now available for applications up to 630A. The power contact command technology now enables use of these devices in category AC23A with a 630A 400V load. UL98 (400A) and UL1008 (400A) type approved versions are also available.

The handles, which feature the highest protection rating on the market (IP66, IP69K and NEMA 4X), make it possible to configure a direct control version, or a door interlock version with the addition of an extension.

The range includes terminal mounts, auxiliary contacts, contact covers, phase separators and nut supports.

PAGE 12-26

CHANGEOVER SWITCH DISCONNECTORS GE SERIES

The GE series of changeover switch disconnectors has been expanded with the three new ratings of 2000A, 2500A and 3150A.

Available in both three- and four-pole versions, these disconnectors enable switching of very high power loads.

PAGE 12-38

SWITCH DISCONNECTORS FOR PHOTOVOLTAIC APPLICATIONS GD SERIES

The GD series of switch disconnectors for photovoltaic applications has been expanded with the introduction of 3 new codes covering applications up to 25A 1500VDC and 40A 1000VDC.

The 3 new codes have maximum ratings of 25A / 1000VDC, 25A / 1200VDC and 32A / 1000VDC.

PAGE 12-46

FUSE HOLDERS AND FUSES FOR PHOTOVOLTAIC APPLICATIONS UP TO 1500VDC

LOVATO Electric's range of fuse holders has been expanded to cover photovoltaic applications up to 1500VDC.

There is also a new version with a pilot light to indicate when the fuse has tripped. The fuse holders are designed for 35mm DIN rail mounting.

gPV class fuses can be used in applications up to 20A (10x85mm) and 32A (14x85mm).

PAGE 13-4

NEW PRODUCTS 2021/2022

MODULAR SWITCH DISCONNECTORS

These disconnectors have the typical form factor of lever actuated modular switches.

They are fully compatible with products mounted in electrical enclosures with modular windows like miniature circuit breakers, residual current operated circuit breakers with overload protection and residual current operated circuit breakers. The new modular disconnectors have current ratings from 32A to 125A and are available in 1, 2, 3 and 4 pole versions. They can also be equipped with auxiliary contacts.

PAGE 14-13

RESIDUAL CURRENT OPERATED CIRCUIT BREAKERS

The introduction of the new P1RD type enable installation of auxiliary contacts and connection of both residual current operated and miniature circuit breakers on a single power bar.

They are available up to 63A, in 2 and 4 pole versions with AC or A class tripping, and for residual currents of 30mA and 300mA.

A device to padlock the lever is also available.

PAGE 14-14

RESIDUAL CURRENT OPERATED CIRCUIT BREAKERS WITH OVERLOAD PROTECTION

The new P1RE type offers the option of installing auxiliary contacts and features a double actuator lever to differentiate residual current operation from overload protection. They also feature a new isolating barrier on the connection terminals.

This means that the protection rating of IP20 covers not just the front of the product but also the connection terminals, which maintain the protection rating whatever cable cross-section is used.

They are available up to 40A in the 1P+N version with AC or A class tripping, for residual currents of 30mA and 300mA and a type C thermal trip curve.

PAGE 14-15

TYPE 2 AND TYPE 1, 2 SPD FOR PHOTOVOLTAIC APPLICATIONS

LOVATO Electric's SPD range has been expanded with the introduction of new type 2 SG2DG models for rated voltages of Un 600VDC and SA2EDG for Un 1100VDC respectively, and type 1, 2 SG2EDG for Un 1100VDC.

PAGE 15-7

BELLS AND MODULAR TRANSFORMERS

This range of products is particularly suited to third party service and residential applications.

The sound modules have either a classic bell or buzzer sound, with noise level up to 84dB.

The transformers are available in versions for intermittent duty, for bells and buzzers, as well as continuous duty versions. They are rated for 15VA to 63VA with output voltages of 12V and 24V. All transformers have integrated overload and short circuit protection (PTC).

PAGE 16-5

ZERO CROSSING STAIRCASE TIME RELAY

These are used in residential and third party service applications for timed stairwell light actuation.

Load switching uses zero crossing technology to reduce the peak load generated when the light is turned on, a very important criterion for LED lamps.

This extends the life of the lamp itself and also protects the time relay's contact against sticking. In addition to the timed light actuation function, the units also feature a stairwell cleaning function with an option to warn the user when the lamp is about to be switched off.

PAGE 18-4

BACKUP POWER SUPPLIES PMVFUPS01

Standards CEI 0-21 and CEI 0-16 which set out the technical regulations for the connection of active and passive users to low and medium voltage utility company power grids provide for an auxiliary power supply system rated to enable, should the main power supply fail, operation of the interface protection system, retentive closure of the interface device and optional retripping for at least 5 seconds. LOVATO Electric offers the PMVFUPS01 backup power supply, designed and tested in combination with only our PMVF interface devices listed in the catalogue.

PAGE 19-13

PMVF80 INTERFACE PROTECTION SYSTEM

LOVATO Electric has expanded its PMVF interface protection system range with the addition of the PMVF80, designed for use in cogeneration plant in conformity with the German regulations for the connection of renewable energy generators to power grids (VDE-AR-N 4105 and VDEV 0126-1-1), as applicable in Germany and Switzerland and also accepted in many other countries, including Austria, South Africa, Turkey, Greece, Belgium, France, Denmark, the Czech Republic and Poland, among others.

PAGE 19-15

INDUSTRIAL RELAY HR40 TYPE

The HR40 relay expands the HR series of industrial relays and is specifically designed to enable the user to assess the wear of the contacts, thanks to their frontal positioning and the unit's transparent housing. Furthermore, the absence of a test unit makes it ideal for applications in which manual relay actuation is to be prevented.

It is available in versions with 1 16A changeover contact or 2 10A changeover contacts.

PAGE 21-6

PUSH-IN SPRING LOADED SOCKET FOR INDUSTRIAL RELAY HR SERIES

LOVATO's spring loaded sockets for HR series industrial relays are now even more convenient to use. The use of push-in technology greatly simplifies and speeds up cabling. They have excellent, highly effective cable retention against shock and vibration. Even high levels of traction during cabling and service do not affect their ability to retain the cable. The terminal release button, easy to identify and operate, also makes it very easy to release the cable when needed.

PAGE 21-6

ATEX CERTIFIED INDUSTRIAL RELAY HR80 TYPE

Propane gas is ever more widely used in refrigeration applications due to its high energy efficiency and eco-friendliness. However, this means that the electrical equipment installed in refrigerators containing the gas must be conforming with the ATEX regulations for potentially explosive atmospheres.

HR80 relays are designed specifically for these applications, are rated for a current of 30A and are available for 2 NO contacts or 2 changeover contacts. They are equipped with Faston terminals and suited for screw mounting to the panel.

PAGE 21-8

NEW PRODUCTS 2021/2022

COMPACT POWER SUPPLIES PSE1 SERIES

LOVATO Electric has expanded its offering of switching power supplies with the introduction of the PSE1 series single-phase units: ultra-compact, simple and competitive. Made for DIN rail mounting, they have ultra-compact housings which make them ideal for installation in enclosures with restricted space. They feature a 100...240VAC single-phase input and 24VDC output, and are available for powers from 30W to 120W.

PAGE 23-2

MID AND UL TYPE APPROVED ENERGY METERS WITH EXTENDED TEMPERATURE RANGE UP TO 70°C

Our range of MID type approved single- and three-phase meters has been expanded with direct insertion models with operating temperature extended up to 70°C, ideal for applications in electric vehicle recharging stations, even when installed outdoors, and hence subject to high levels of heating in warm climates.

The following units are available:

- single-phase meter up to 40A in a single module (17.5mm), MID approved
- three-phase meter up to 80A in a just 4 modules (72mm), MID approved
- integrated RS485 communications port
- three-phase meter up to 80A in just 4 modules (72mm), cULus approved, with ANSI C12.20 compliant accuracy (class 0.5).

PAGE 25-13

DMG620 MULTIMETER WITH INTEGRATED ETHERNET PORT

The requirement to monitor plant using energy monitoring software is ever more common in industrial and service applications.

The new DMG620 multimeter is equipped with an Ethernet port to facilitate integration into data networks. Its class 0.5s active energy metering accuracy enables it to satisfy all energy analysis and diagnostics requirements.

PAGE 25-23

A NEW GENERATION OF METERING INSTRUMENTS DMG SERIES

Our DMG series of digital metering instruments has been renewed with new advance models with:

- a larger colour LCD graphic display
- smartphone programming option using NFC technology
- 4 versions are available with the following options:
 - integrated RS485 and Ethernet communications port
 - integrated data memory
 - webservice access to settings and measurements.

PAGE 25-19

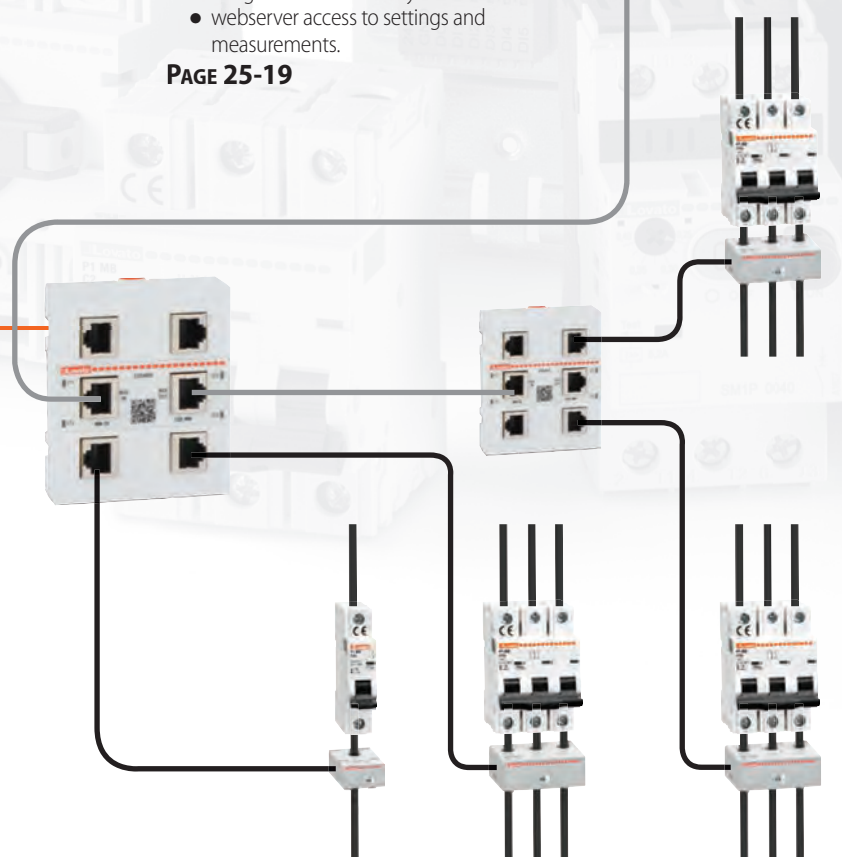

MULTI-CIRCUIT METERING SYSTEM

With current metering modules and electronic current transformers, our new DMG series multimeters enable multi-circuit metering in power enclosures in which the voltage metering is concentrated in a single point, and current draw metering points can be configured downline of the individual outputs quickly and easily. The result is a modern energy monitoring system with numerous benefits:

- reduced installation errors
- reduced cabling requirements
- space saving on the front of the enclosure since the data are available on the display and via the communications interface of the DMG multimeter to which the multi-circuit system is connected.

PAGE 25-20

WOUND PRIMARY AND SOLID CORE CTs FOR BARS

LOVATO Electric's wide range of current transformers is further expanded by the introduction of wound primary transformers and the integration of the solid core type. Wound primary technology makes it possible to read even very low currents (to 5A).

The new solid core transformers have a form factor featuring a cavity for mounting to electric bars, thus optimising their use.

PAGE 25-32

AUTOMATIC TRANSFER SWITCH CONTROLLER ATL500

LOVATO Electric's offering of automatic transfer controllers has been expanded with the simple, ready to use ATL500. Dedicated to switching between two lines, it has a front mounted LED synoptic panel for system status display, and features NFC technology for configuration with a smart device (system data, password, I/O functions, etc.). It has two voltage inputs for three-phase + neutral metering, from which it also draws its own power, thus eliminating the need for an auxiliary power supply. It can also be installed in single- and two-phase systems. Its integrated outputs enable it to control contactors and motorised switches.

PAGE 27-2

CONTROLLERS FOR SINGLE-PHASE FIRE PUMPS

Our electric pump controllers are now also available for single-phase motors used in systems lacking three-phase power, such as residential buildings.

CHAPTER 29

Synergy SOFTWARE

Synergy now has a new graphic design, featuring:

- a new interface which adapts to the display device (PC, smartphone, tablet)
- a new user experience which makes Synergy's functions user-friendly for even novice users, leveraging the most recent web-based technologies
- completely user-configurable and manageable reporting.

CHAPTER 30

NFC IOS AND ANDROID APP

Now also available for iOS on the App STORE, LOVATO Electric's NFC app enables device configuration with tablets and smartphones equipped with the NFC technology.

Configuration is possible even when the device is not powered on.

CHAPTER 30

WORLDWIDE

100 COUNTRIES

90 IMPORTERS

15 INTERNATIONAL BRANCHES

PRODUCTION **SITES**

In addition to its historic Italian head offices, the company has **two factories**: one in the **Czech Republic**, which handles the assembly and testing of electromechanical products, and one in **Croatia** which designs and manufactures cam switches.

ITALIAN DESIGN

CERTIFICATED **TOTAL QUALITY**

For us, quality has always been the priority, and since 1992 our

– management system has been certified to **ISO 9001** - making us one of the first in Italy.

The modern concept of quality embraces a wide range of factors, and we also have the following certifications:

- **ISO 14001** for environmental management, the protection and sustainability of the environment in which we live;
- **ISO 50001** for energy management, with the objective of increasing the sustainability of our operations;
- **ISO 45001** for safety, the primary concern in any workplace.

A LONG TRADITION OF STYLE

We have been managing energy since **1922**, led by the same family for four generations, from the early days of electrical engineering to the present day, in which electromechanics, electronics and automation go hand in hand. **Italian design** has always been our hallmark: our designers, researchers and engineering experts work in our Bergamo offices. Our mission is to create **innovative, reliable products**, and offer services to satisfy our customer's requirements.

Bergamo - ITALY

RESEARCH AND DEVELOPMENT

THE COMPONENTS OF SUCCESS

Products that are designed for the most diverse applications and installed all over the world need to meet high standards of reliability. Behind our products is a solid, flexible and innovative organisation with cutting-edge production facilities, where robotics and automation ensure consistent results. Our test laboratory is fitted out with modern equipment and works together with our design offices to reduce time to market for new products and grow our company know-how. Certified to EN ISO/IEC 17025, LOVATO LAB is authorised to run tests according to Italian and international standards and issue **ACAE/LOVAG certificates**.

CUTTING-EDGE **LABORATORY**

LOVATO LAB runs:

- short circuit tests per IEC and UL standards up to 30kA current at 600V;
- closure and breaking power tests (overload);
- conventional duty performance tests (endurance) up to 6300A at 690V;
- heating tests up to continuous 3000A in low voltage;
- EMC tests in a semi-anechoic chamber;
- energy metering accuracy tests using high precision current and voltage generators;
- temperature and thermal trip tests;
- synthetic short circuit system up to 65kA and programmable current generators;
- environmental tests using climatic and saline mist chambers for IP protection rating verification;
- impact and vibration tests using a vibrating table;
- studies of physical phenomena using high speed and thermal cameras;
- electrical and mechanical life tests using a large number of test benches and a low voltage synchronous alternator for the power generation up to 1800kVA;
- glow-wire testing of plastic materials using a custom chamber and several dielectric testing stations;
- there is also a 225KV tomograph for testing the most varied and stringent quality requirements, which analyses the structure of parts in their entirety, both internally and externally.

QUALITY CONTROL

LOVATO Electric, with a view to continuous improvement, invests in the professional growth of its employees and in advanced quality control instrumentation and software.

We have modern measurement system capable of satisfying the most varied and stringent quality control requirements, and employ product validation (PPAP), risk analysis (FMEA) and problem solving (8D) methods to guarantee reliability and continuously improve our processes and products.

PRODUCTION

MOULD CONSTRUCTION

Our tooling department designs and fabricates the moulds we use to make our plastic components. The department, with its highly experienced and qualified staff and working together with the design office, makes numerous new moulds every year.

PLASTIC MOULDING

The moulding department has always been one of the company's strategic resources. We have numerous presses, from 50 to 300 tons (both electric bi-component), working 3 eight hour shifts around the clock.

ASSEMBLY

Our assembly department is housed in a large area. It features the most advanced assembly and testing lines. The machines are connected to the company computer system to enable continuous performance monitoring, production programming in line with the Industry 4.0 philosophy, and registration of test and tracking data for each individual product.

TRAINING

LOVATO ACADEMY runs our client training programme. Located at our Bergamo offices, the classroom is equipped with the most recent audiovisual aids and **interactive training benches**, and is the ideal place to learn about the use of our products and their programming and monitoring software. LOVATO Electric's technical training uses various methods for delivering content in a blended learning approach, combining conventional methods with the teacher in front of the class with remote synchronous training and online tutorials.

Our training programme includes classroom courses, mainly focussed on practical work with the product, live webinars to keep our clients up to date with emerging standards and technologies, and video tutorials, published on our YouTube channel, as an aid to installing and programming our products directly on the client's PC or smartphone.

For more details on our training programme, go to academy.LovatoElectric.com.

EXPERIENCE AND EXPERTISE

To meet the growing demand for technical training of industrial automation and energy management professionals, LOVATO Electric provides a full programme of courses through the **LOVATO Academy**.

The offering includes, among others, courses on: micro PLCs and HMIs, **energy management**, electric motor starting and control, and surge arrestors.

Register with our YouTube channel to see the latest video tutorials and videos about our company.

● The fuse monitoring version is also available (on page 1-7)

● SM1P... MODULAR SIZE

- Mounting on front of panels or in modular panels for rapid access to buttons, avoiding the opening of the door by non-technical staff.
- Auxiliary contacts, indicator contacts and releases compatible with modular panels.

● 40A IN 45mm

- From 0.1A to 40A in a device just 45mm wide.
- High short-circuit breaking capacity up to 40A.
- Small, cost-effective starters.

● SM1R... TRIP INDICATION

- Thermal and magnetic trip indication with trip position of knob.
- Specific optical indication for short-circuit tripping; guarantees maximum safety for operators and reliability of the system.
- Auxiliary trip indication contacts with ability to distinguish overload from short circuit.

● SM1... HIGH-PERFORMANCE PLASTICS

- IEC/EN/BS 60335-compliant plastics for domestic and similar applications. Can be used in catering equipment.
- EN 45545-compliant plastics: fire behaviour and emissions of fumes. Suitable for railway applications.

● DOOR COUPLING HANDLES

- Padlockable door coupling handles for the entire rotary knob type. Make systems compliant with safety regulations.
- Tough, easy and quick to install.

⊕ Fuse or CB ⊕ Values valid for SM1RE... only

ENCLOSURES

- Various types of plastic enclosures are available for rotating and button-controlled motor protection circuit breakers up to 40A.
- Surface and flush mount.
- Ideal for small machines and isolated motors.
- IP65 (UL Type 4X) protection rating and UV-ray resistant.
- Very robust plastics, IK07; pass even the strict UL "ball impact" test.
- UL-certified.

SM1... PADLOCKABLE

- All of the devices, in both the rotary knob type and push button controlled motor protection circuit breaker range, are padlockable. This provides greater operator safety during maintenance and bypassing of equipment.

UL Type E

- The entire rotary knob type is certified UL Type E.
- Type E is a specific requirement of the UL standards that requires, of short-circuit protection devices, increased terminal isolation distances and strict breaking capacity tests.
- Eliminates the need for further short-circuit protection devices upstream of the motor protection.

UL Type F

- Type F starters are a combination of a motor protection circuit breaker and a contactor tested in specified short circuit conditions to verify their coordination.
- The SM1R motor protection circuit breakers are certified UL type F in combination with BG and BF contactors.
- A Type F starter is the most complete and preferred way to control and protect a motor.

1 Motor protection circuit breakers

INDEX

UL ratings

Type E and Type F combination motor controllers

The UL standard indicates a combination motor controller, also called a combination starter, as equipment consisting of a protected starter incorporating an isolation function. The protection includes both thermal overload and short circuit. In the standard of UL508 (now harmonized with IEC as UL 60947-4-1), we can find

different construction types of starters stated as Type A, Type B, etc... composed of different type of devices intended to control, disconnect and protect a motor. Type E and Type F controllers usually provide the best solution to control and protect a motor.

Type E

A Type E starter is a listed combination starter suitable for use without additional upstream circuit short-circuit protection. The typical Type E starter is a motor protection circuit breaker (MPCB), also known as manual motor protector that includes in a single device the following functions: manual motor control, disconnection, short circuit protection and motor overload protection. A "NON Type E" motor protection circuit breaker, despite including short circuit protection, requires additional upstream short circuit protection.

FUNCTIONS:

- Disconnect
- Branch circuit protection
- Motor control
- Motor overload protection.

- Phase separation barrier (required)
- Motor protection circuit breaker also known as manual motor protector

Type F

A Type F starter has the same functions of Type E but in addition to the motor protection circuit breaker (MPCB) commonly known as manual motor protector, also includes a contactor to have remote or automatic control of the motor.

FUNCTIONS:

- Disconnect (MPCB)
- Branch circuit protection (MPCB)
- Motor control (contactor)
- Motor overload protection (MPCB).

- Phase separation barrier (required)
- Motor protection circuit breaker also known as manual motor protector
- Rigid connection (optional)
- Contactor

CO-ORDINATION TYPE 1 AND CO-ORDINATION TYPE 2

The concept of co-ordination Type 1 and Type 2 was recently introduced in the UL 60947-4-1.

In the co-ordination Type 1, after a short-circuit, the starter shall cause no danger to persons or installation, but may not be suitable for further service and may need parts repair and replacement.

In the co-ordination Type 2, after a short-circuit, the starter shall cause no danger to persons or installation and is suitable for further use.

On the next page the co-ordination tables are provided.

TAP CONDUCTOR PROTECTION

SM... motor protection circuit breakers are also suitable as Tap Conductor Protection for Group Installation.

When manual motor starters are employed in group installations, in specified conditions by the standard, it is possible to reduce the wire sections.

The use of smaller wires reduces the cost of the panel and makes the wiring easier. Furthermore, these motor protection circuit breakers can be used for control transformers protection instead of fuses or circuit breaker certified as UL 489.

1 Motor protection circuit breakers

INDEX

Motor protection circuit breakers SM1... up to 40A. Magnetic and thermal protection

SM1P...

SM1R...

- ❶ For SM1R... breakers, certified UL Type E, add E letter to the code. Ex. SM1RE1000.
- ❷ 10 x In max for 0.1...0.16A and 0.16...0.25A setting ranges.
- ❸ Intended specifically for monitoring the status of fuses:
 - rated current: 0.2A
 - magnetic tripping: 1.2A.

Order code	Thermal trip adjustment range		Short circuit breaking capacity at 400V		Qty per pkg	Wt [kg]

SM1R4000	30...40		20	10	1	0.340

General characteristics

SM1P... and SM1R... are modern circuit breakers with thermal and magnetic trip releases and high breaking capacity. Motor control and protection of up to 22kW (400V) are possible by choosing the suitable adjustment range, 0.1 to 40A. The dimensions of SM1P... breakers are compliant with the DIN 43880 standard, allowing them to be mounted in all modular enclosures on the market.

A magnetic trip indicator integrated on the SM1R... breakers avoids dangerous closing operations during short-circuit conditions, previously disconnected by the breaker. SM1R... up to 32A breakers, with SM1X9000R accessory, are Type E-certified according to UL 60947-4-1; only for range from 6.5 to 32A the Type E version must be ordered with specific code SM1RE...❶. SM1R... motor protection circuit breakers combined with BG... and BF... contactors are Type F certified in compliance with UL 60947-4-1 standard (see page 1-4 and 1-5). SM1P... and SM1R... motor protection circuit breakers are suitable for isolation in accordance with IEC/EN/BS 60947 standards and can be padlocked in OFF position without using accessories. Their high breaking capacity consents to exclude protection fuses on the majority of the installations.

Operational characteristics

- IEC rated insulation voltage Ui: 690V
- IEC rated impulse withstand voltage: 6kV
- IEC rated frequency: 50/60Hz
- Maximum rated current: 40A
- Adjustment ranges: 16
- IEC breaking capacity: See table on page 1-2
- Heat dissipation per phase: 0.7...3.3W
- Magnetic tripping: 13 x In max.❷
- Tripping class: 10A
- Phase failure sensitive
- Mechanical and electrical life: 100,000 cycles
- Mounting on 35mm DIN rail (IEC/EN/BS 60715)
- Mounting position: Any
- IEC utilisation category: A
- Padlocking in OFF: Ø4mm/0.16"
- IEC degree of protection: IP20.

Certifications and compliance

Certifications obtained: cULus, EAC. SM1R... circuit breakers are Type E and Type F certified (Self-Protected Combination Motor Controllers) according to UL 60947-4-1. Certifications pending: CCC. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-2, IEC/EN/BS 60947-4-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials compliant with standards: IEC/EN/BS 60335 and EN/BS 45545.

Motor protection circuit breakers SM1RM... up to 40A. Magnetic protection

SM1RM...

- ❹ 10In max for 0.1...0.16A and 0.16...0.25A setting ranges.

Order code	Rated and magnetic trip current		Short circuit breaking capacity at 400V		Qty per pkg	Wt [kg]

SM1RM3200	32	416	50	25	1	0.340
SM1RM4000	40	420	20	10	1	0.340

General characteristics

SM1RM... are motor protection circuit breakers with magnetic tripping only and high breaking capacity. They are typically used to protect starters where there is a thermal relay or other overload protection. Starter control and protection of up to 22kW (400V) are possible by choosing the suitable adjustment range, from 0.1 to 40A.

Operational characteristics

- IEC rated insulation voltage Ui: 690V
- IEC rated impulse withstand voltage: 6kV
- IEC rated frequency: 50/60Hz
- Maximum rated current: 40A
- IEC breaking capacity: See table on page 1-3
- Heat dissipation per phase: 0.7...3.3W
- Magnetic tripping: 13 x In max.❷
- Mechanical and electrical life: 100,000 cycles
- Mounting on 35mm DIN rail (IEC/EN/BS 60715)
- Mounting position: Any
- IEC utilisation category: A
- Padlocking in OFF: Ø4mm
- IEC degree of protection: IP20.

Certifications and compliance

Certifications obtained: cULus, EAC. Certifications pending: CCC. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-2, IEC/EN/BS 60947-4-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials compliant with standards: IEC/EN/BS 60335 and EN/BS 45545.

1 Motor protection circuit breakers

Motor protection circuit breakers SM1RT... up to 25A. Transformer protection

SM1RT...

⚙️ 16 x I_n for 0.1...0.16A setting range.

Order code	Thermal trip adjustment range	Short circuit breaking capacity at 400V		Qty per pkg	Wt [kg]

SM1RT1400	9...14	25	12.5	5	0.340
SM1RT1800	13...18	25	12.5	5	0.340
SM1RT2300	17...23	15	5	1	0.340
SM1RT2500	20...25	15	5	1	0.340

General characteristics

SM1RT... are circuit breakers with thermal and magnetic trip releases intended specifically for transformers control and protection. The magnetic trip threshold of 20 x I_n enable the connection of transformers avoiding unintentional tripping due to the high in-rush currents. The various adjustment ranges from 0.1A to 25A enable control and protection of transformers up to 17kVA (400V).

Operational characteristics

- IEC rated insulation voltage U_i: 690V
- IEC rated impulse withstand voltage: 6kV
- IEC rated frequency: 50/60Hz
- Maximum rated current: 25A
- IEC breaking capacity: See table on page 1-3
- Max. heat dissipation per phase: 0.7...3.4W
- Magnetic tripping: 20 x I_n max^{⚙️}
- Mechanical and electrical life: 100.000 cycles
- Mounting on 35mm DIN rail (IEC/EN/BS 60715)
- Mounting position: Any
- IEC utilisation category: A
- Padlocking in OFF: Ø4mm/0.16"
- IEC degree of protection: IP20.

Certifications and compliance

Certifications obtained: cULus, EAC. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-2, IEC/EN/BS 60947-4-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastics compliant with standards: IEC/EN/BS 60335 and EN/BS 45545.

Motor protection circuit breakers SM2... and SM3... up to 100A. Magnetic and thermal protection

SM2R...

SM3R...

Order code	Thermal trip adjustment range	Short circuit breaking capacity at 400V		Qty per pkg	Wt [kg]
		I _{cu} [kA]	I _{cs} [kA]		
	[A]	[kA]	[kA]	n°	[kg]

SM3R9000	70...90	50	38	1	2.200
SM3R9900	80...100	50	38	1	2.200

General characteristics

SM2R... and SM3R... are modern circuit breakers with thermal and magnetic trip releases and high breaking capacity. Motor control and protection, up to 55kW (400V) are possible by choosing the suitable adjustment range, up to 100A. SM2R... and SM3R... breakers are Type E and Type F according to UL 60947-4-1. The SM2R... and SM3R... types are suitable for isolation according to IEC/EN/BS 60947 standards and can be padlocked in OFF position without using accessories. SM2R... and SM3R... have has a trip function which indicates thermal and magnetic tripping. Their high breaking capacity removes the need for back up fuse protection on the majority of installations.

Operational characteristics

- IEC rated insulation voltage U_i: 1000V
- IEC rated impulse withstand voltage: 8kV
- IEC rated frequency: 50/60Hz
- Maximum rated current: 63A (for SM2...); 100A (for SM3...)
- Adjustment ranges: 2 (for SM2...); 3 (for SM3...)
- IEC breaking capacity: See table on page 1-2 and 1-3
- Max. heat dissipation per phase: 7W
- Magnetic tripping: 13 x I_n max.
- Tripping class: 10A
- Phase failure sensitive
- Mechanical life: 50.000 cycles
- Electrical life: 25.000 cycles
- Mounting on 35mm DIN rail (IEC/EN/BS 60715)
- Mounting position: Any
- IEC utilisation category: A
- Padlocking in OFF: Ø4mm/0.16"
- IEC degree of protection: IP20 on front.

Certifications and compliance

Certifications obtained: cULus, EAC. SM2... and SM3... circuit breakers are Type E and Type F certified (Self-Protected Combination Motor Controllers) according to UL 60947-4-1; for Type E and Type F, SM3 only with accessory SM3X9000R. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-2, IEC/EN/BS 60947-4-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

General and operational characteristics

ADD-ON AUXILIARY CONTACTS

- Connectable to the left side of the breaker or on the front
- Maximum combinations: 3 SM1X... blocks with 6 auxiliary contacts in total of which 1 front block and 2 side blocks
- IEC conventional free air thermal current Ith: 10A (5A for SM1X11...)
- IEC rated insulation voltage Ui: 690V (300V for SM1X11...)
- Rated impulse withstand voltage Uimp: 4kV
- UL/CSA and IEC/EN/BS 60947-5-1 designation: A600 - Q600 (C300 - R300 for SM1X11...)
- Maximum tightening torque: 1Nm / 9lb.in
- Conductor cross section minimum-maximum (1 or 2 wires): 0.75...2.5mm² or 18...14AWG.
- Screw tightening tool: Phillips 2
- Maximum tightening torque: 1Nm / 9lb.in
- Width of side-mount auxiliary contacts equal to 0.5 DIN 46880 modules
- IEC degree of protection: IP20.

UNDERVOLTAGE TRIP RELEASES

- Snap on to the right side of the breaker
- Consumption inrush/holding: 12/3.5VA
- Release voltage: 0.35...0.7Us
- Operating voltage: 0.85...1.1Us
- Maximum tightening torque: 1Nm / 9lb.in
- Conductor cross section minimum-maximum (1 or 2 wires): 0.75...2.5mm² or 18...14AWG.
- Screw tightening tool: Phillips 2
- Maximum tightening torque: 1Nm / 9lb.in
- Width of side-mount undervoltage trip releases equal to 1 DIN 46880 module
- IEC degree of protection: IP20.

SHUNT TRIP RELEASES

- Snap on to the right side of the breaker
- In-rush consumption: 20VA
- Operating voltage: 0.7...1.1Us
- Conductor cross section minimum-maximum (1 or 2 wires): 0.75...2.5mm² or 18...14AWG.
- Screw tightening tool: Phillips 2
- Maximum tightening torque: 1Nm / 9lb.in
- Width of side-mount shunt trip releases equal to 1 standard DIN 46880 module
- IEC degree of protection: IP20.

PADLOCKABLE DOOR COUPLING HANDLE FOR SM1R...

- IEC degree of protection: IP65
- Degree of protection according to UL: Type 1, 2, 3R, 12, 12K, 4, 4X; external use
- Adjustable rod from 48 to 212mm (1.89" to 8.35")
- Ring-fixing in 22mm/0.87" hole.

THREE-PHASE CONNECTION BUSBARS

- I_{max}: 63A
- SMX903... 45mm/1.77" spacing to reduce the width to the minimum
- SMX904... 54mm/2.13" spacing to consent to fit one side-mount auxiliary contact block on the breaker.

TERMINAL BLOCKS FOR BUSBAR SUPPLY

- I_{max}: 63A
- Screw tightening tool: Phillips 2
- Maximum tightening torque: 2.3Nm / 20lb.in
- Conductor cross section minimum-maximum: 4...25mm² or 10...4AWG.

Certifications and compliance

Certifications obtained: cULus (except terminal block for busbar supply), EAC.
 Certifications pending: CCC.
 Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

① Complete the order code by indicating P for mounting on SM1P... motor protection circuit breakers, or R for SM1R... motor protection circuit breakers.
 ② Mounting also possible with side-mount auxiliary contacts SM1X12... and SM1X13...

General and operational characteristics

RIGID SM1 BREAKER-CONTACTOR CONNECTIONS

The SM1X3... connections electrically and mechanically fasten the motor protection breaker together with the contactor. This forms a highly compact single-unit starter for quick installation on a single 35mm DIN rail.

The SM1X3... connections can also be mounted in combination with reversing and star-delta starters made with the rigid connections indicated in section 2.

SURFACE MOUNT ENCLOSURES

- Top or bottom cable entry:
 - SM1Z1701P and SM1Z1702P 4 M25-threaded knock-outs
 - SM1Z1711P and SM1Z1712P 4 knock-out with Ø20.5mm/0.81" or Ø26.5mm/1.04"
 - SM1Z1710R e SM1Z1715R 4 - knock-out with Ø20.5mm/0.81" or Ø26.5mm/1.04"
- Possibility of rear entry too
- Protection rating: IP65 (UL Type 4X)
- Holds a breaker, one front-mount auxiliary contact block either one shunt or undervoltage release and one pilot light; only for SM1Z1710R and SM1Z1715R, 2 side-mount auxiliary contact blocks can be fitted as well
- The SM1Z1710R and SM1Z1715R rotary actuators can be padlocked with a maximum of 3 padlocks Ø4...8mm/0.16...0.31"
- Earth/ground terminal included
- Operating temperature: -25...+60°C
- Storage temperature: -50...+80°C.

FLUSH MOUNT ENCLOSURES FOR SM1P AND SM1R

- Holds a SM1P breaker, one front-mount auxiliary contact block and either one shunt or undervoltage release
- Protection rating: IP65 (UL Type 4X)
- Earth/ground terminal included
- 70x115mm/2.76x4.53" cutout for SM1P
- 70x143mm/2.77x5.65" cutout for SM1R
- Operating temperature: -25...+60°C
- Storage temperature: -50...+80°C.

ENCLOSURE ACCESSORIES

- Emergency stop button:
- Turn to release
 - Red button Ø35mm/1.38".
- Lockable block:
- Prevents closing operation; 3 padlocks maximum Ø4...8mm/0.16...0.31".

STARTER ASSEMBLY ADAPTER PLATES

These accessories permit the assembly of starters, making slim and compact equipment that's easy and quick to install. The starter adapter plates install on DIN rail 35mm/1.38".

Certifications and compliance

Certifications obtained: cULus except SM1X17024..., SM1X17400..., SMX90... and 11LMM25PG16), EAC. Certifications pending: CCC for rigid connections and enclosures (maximum current enclosures for cULus: 25A). Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

General and operational characteristics

ADD-ON AUXILIARY CONTACTS

- Insert on the top front or snap on the left side of the breaker
- Maximum combinations: 3 SM2X... blocks with 6 auxiliary contacts in total of which 1 front block and 2 side blocks²
- IEC conventional free air thermal current I_{th}: 10A (5A for SM2X11...)
- IEC rated insulation voltage U_i: 690V (250V for SM2X11...)
- UL/CSA and IEC/EN/BS 60947-5-1 designation: A600 – Q300 (B300 - R300 for SM1X11...)
- Conductor cross section minimum-maximum (1 or 2 wires): 0.75...2.5mm² or 18...14AWG
- Screw tightening tool: Pz 2
- Maximum tightening torque: 1Nm / 9lb.in
- Width of side-mount auxiliary contacts equal to 0.5 DIN 46880 modules.

UNDERVOLTAGE TRIP RELEASES

- Snap on to the right side of the breaker for motor protection
- Consumption in-rush/holding: 8.5/3VA
- Release voltage: 0.35...0.7Us
- Operating limits: 0.85...1.1Us
- Conductor cross section minimum-maximum (1 or 2 wires): 0.75...2.5mm² or 18...14AWG
- Screw tightening tool: Pz 2
- Maximum tightening torque: 1.2Nm / 10lb.in
- Width of side-mount undervoltage trip releases equal to 1 DIN 46880 module.

SHUNT TRIP RELEASES

- Snap on to the right side of the breaker
- In-rush consumption: 20VA
- Operating limits: 0.85...1.1Us
- Conductor cross section minimum-maximum (1 or 2 wires): 0.75...2.5mm² or 18...14AWG
- Screw tightening tool: Pz 2
- Maximum tightening torque: 1.2Nm / 10lb.in
- Width of side-mount shunt trip releases equal to 1 standard DIN 46880 module.

PADLOCKABLE DOOR COUPLING HANDLE FOR SM2R and SM3R

- IEC degree of protection: IP65
- Degree of protection according to UL: Type 1, 2, 3R, 12, 12K, 4, 4X; external use
- Adjustable rod from 48 to 212mm (1.89" to 8.35")
- Ring-fixing in 22mm/0.87" hole.

Certifications and compliance

Certifications obtained: cULus, EAC.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

① SM1PF0020 has a single 0.2A thermal adjustment and magnetic tripping at $6 \times I_n$ (1.2A).

② $10 \times I_n$ max for 0.1...0.16A and 0.16...0.25A setting ranges.

③ $16 \times I_n$ max for 0.1...0.16A setting range.

④ When fitting more than one breaker side by side, without leaving space between each to consent free air circulation on the breaker sides, and have simultaneous operation, the thermal trip adjuster must be positioned at a value 15% higher than the rated motor current.

THERMAL TRIPPING CURVE (AVERAGE TIMES)

Three-phase balanced operation

Two-phase operation (phase failure/single phasing)

Tripping times can have a $\pm 20\%$ deviation with respect to the average tripping curve value above.

⑤ $20 \times I_e$ for SM1RT...

2 Contactors

- Three-pole versions up to 630A in IEC AC3 duty
- Four-pole versions up to 1600A in IEC AC1 duty
- Versions for power factor correction up to 100kvar at 400VAC
- Four-pole versions with 2NO+2NC or 4NC main poles
- Versions for photovoltaic application
- Versions with AC, DC or AC/DC control
- Low-consumption versions with DC control circuit for control relays and 9-38A contactors in IEC AC3 duty
- Extensive choice of add-on blocks and accessories
- Certified by primary international authorities.

- IEC Ie ratings in AC3 440V duty: 6 to 630A
- IEC Power ratings in AC3 400V duty: 2.2 to 335kW
- UL/CSA ratings: 3 to 500HP at 480V and 600V
- AC, DC, AC/DC and DC low-consumption coil.

Page 2-10

FOUR-POLE CONTACTORS

- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 20 to 1600A
- IEC Power ratings in AC1 400V duty: 14 to 950kW
- UL/CSA general use: 16 to 1000A
- AC, DC, AC/DC and DC low-consumption coil.

Page 2-14

FOUR-POLE CONTACTORS WITH 2NO+2NC MAIN POWER POLES AND WITH 4 NC POLES

- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 20 to 115A for type 2NO+2NC
- UL/CSA general use: 20 to 115A
- IEC Ith ratings in AC1 duty at $\leq 40^{\circ}\text{C}$: 25 to 40A
- UL/CSA general use: 20 to 55A for 4NC types
- AC, DC, AC/DC and DC low-consumption coil.

Page 2-15

CONTACTORS FOR PHOTOVOLTAIC APPLICATIONS

- Operational current up to 350A (DC1 600V at $\leq 55^{\circ}\text{C}$ with 4 NO poles in series) for photovoltaic applications.
- AC, and AC/DC coil.

Page 2-16

CONTACTORS FOR POWER FACTOR CORRECTION

- With limiting resistors included
- IEC Power ratings at 400V: 7.5 to 100kvar
- UL/CSA ratings: 9 to 100kvar at 480V; 10 to 120kvar at 600V
- AC coil.

Page 2-17

CONTROL RELAYS

- AC, DC and DC low-consumption coil
- Screw or Faston termination
- 4, 8 or 11 auxiliary contact composition.

LOVATO Electric contactors are suitable for new motors with high IE3 efficiency values

2 Contactors

Contactors BF00, BF09...BF150

INDEX

THE IDEAL SOLUTION!

4-TERMINAL COIL

Connecting cables can be coupled to the coil both on the line and load ends of the contactor.

ELECTRONIC COIL

Contactors from 40 to 150A AC3 can be equipped with AC/DC electronic coil with wide operating range. Example: single 100 to 250V AC/DC coil.

BUILT-IN SURGE SUPPRESSOR

BF series contactors up to 150A AC3 with voltages in DC or AC/DC already have a built-in surge suppressor.

LOW-CONSUMPTION COILS

The BF...L contactors feature a 2.4W low consumption. This characteristic widely allows their direct control by PLC outputs.

COILS WITH WIDE OPERATING RANGE

BF...D contactors are equipped with a wide operating range coil and are particularly useful in applications subject to considerable voltage variations, such as in electric traction railway equipment.

45mm WIDE CONTACTORS

Ratings up to 38A in AC3 (18.5kW) 400V 30HP 480V UL - merely 45mm wide: exceptional benefit for electric panel dimensions.

55mm WIDE CONTACTORS

Ratings up to 95A in AC3 (45kW) 400V / 60HP 480V UL - merely 55mm wide: exceptional benefit for electric panel dimensions.

75mm WIDE CONTACTORS

Ratings up to 150A in AC3 (75kW) 400V / 100HP 480V UL - merely 75mm wide: exceptional benefit for electric panel dimensions.

RAILWAY APPLICATIONS

Thanks to the compliance with IEC 61373 (shock and vibration) and EN 45545 (fire behaviour), LOVATO Electric contactors are suitable for railway applications. Consult Technical support for detailed information; see contact details on inside front cover.

HOUSEHOLD AND COMMERCIAL APPLICATIONS

The plastic materials of the contactors comply with the EN 60335 standard typically applied in equipment for food industry and professional catering. Consult Technical support for detailed information; see contact details on inside front cover.

PHOTOVOLTAIC APPLICATIONS

LOVATO Electric contactors are suitable for use in the various sections of the photovoltaic systems. In particular, there are specific contactors for use up to 1000VDC.

2 Contactors

Contactors BF00, BF09...BF150

INDEX

35MM DIN RAIL MOUNTING AND FIXING

Contactor mounting on and removal from a 35mm DIN rail are tool-less operations and are done by simply applying pressure on the contactor.

RUBBER PAD INSERT TO PREVENT DIN RAIL SLIDING

A rubber insert prevents the contactors from sliding on the 35mm DIN rail even when out of tolerance or mounted vertically.

SNAP-ON INSTALLATION

On the contactors, it's quick and easy to fit and remove auxiliary contacts and accessories, without using tools; the same applies to replacing the coil in the AC BF09...BF38 contactors.

EFFORTLESS THERMAL OVERLOAD RELAY LINK RF38, RF82 AND RF110 TYPES

During the connection of the thermal overload relay to the contactor, its auxiliary contact is simultaneously linked to the contactor coil terminal rigid connector. The complete overload relay fixing is obtained with one single operation and without other connections.

RIGID CONNECTION KITS FOR FAST WIRING WITHOUT MISTAKES

The assembly and wiring of electromechanical starters is extremely fast and reliable. Versatile electrical and mechanical connecting systems provide easy and foolproof assembly of compact starters and changeovers.

Changeover

Reversing starter

Star-delta starter

BREAKER-CONTACTOR CONNECTIONS

The rigid connections between breaker and contactor allow complete compact starters to be created easily, quickly and with less space used in the panel. It is fitted on a single DIN rail.

IP20 CONNECTION SECURITY

For BF09...BF38 contactors, the easy access and space for the terminals is combined with IP20 protection, preventing accidental contact with live parts.

IP20 ACCESSORY FOR CONTACTORS FROM 40A TO 150A AC3

IP20 protection can be obtained by adding a simple accessory.

SIDE ADD-ON FOURTH POLE

For the 45A to 165A AC1 ratings, a side-mount fourth power pole can be snapped on the three-pole contactor. This solution permits the optimisation of inventory.

MECHANICAL INTERLOCK

Various versions of mechanical interlock are available.

One type can be integrated in the contactors from 9 to 38A AC3 without increasing the overall dimensions.

They may have built-in contacts to also make the electrical interlock. The mounting position can be on the side or on the front of the contactors.

TERMINAL ADAPTABILITY

Terminals are suitable for every type of cable: flexible, rigid, according to AWG standards and interlocked with any type of cable terminal. For BF09...BF38 contactors, a single type of screwdriver tightens the screws for the power contacts, auxiliary contacts and coil.

DOUBLE LUG TERMINALS

40 to 150A AC3 contactors are equipped with double lug terminals for easy, functional access for power cables.

It is extremely simple to create star-delta starters, reversing switches, changeovers and arrange parallel supply for several contactors.

2 Contactors

Contactors BF160...BF230

INDEX

INNOVATION IS CONTINUING....

- **AC/DC COIL WITH ELECTRONIC CONTROL.**
 - Wide operating range: for example one single coil to cover 100...250VAC/DC range.
 - Low consumption during in-rush and in service
 - No chattering in the event of irregular voltage
 - Built-in surge suppressor filter.

- **COMPACT DIMENSIONS**
 - Three-pole contactors: 105mm width for currents up to 230A AC3 - 350A AC1
 - Four-pole contactors: 140mm width for currents up to 350A AC1
 - Width identical with moulded-case circuit breakers of equal current.

- **CONTACT STATUS FRONT VIEW**
A front mechanical indicator allows to easily identify the status of the contacts.

- **HIGH POWER TERMINALS FOR EASY AND SAFE WIRING**
High terminals to ensure a safe isolation distance from the panel in case of wiring with double terminals or bars for parallel or changeover.

- **SIDE-MOUNT AUXILIARY CONTACTS**
Useful in the event that the panel depth may be critical.

- **REVERSIBLE COIL TERMINALS BLOCK**
Easy coil terminal reversing upstream - downstream for easy wiring.

The coil terminals are easily accessible with a screwdriver as they are between the power terminals.

- **POWER TERMINAL PROTECTIONS PHASE BARRIERS.**
They guarantee the separation and protection of the power terminals and adjacent phases separation.

- **TERMINAL ENLARGEMENT**
They extend the pitch of the terminals from 35mm to 45mm to allow an easy wiring of standard flange lugs for cross-sectional cables of 185mm².

- **FRONT-MOUNT AUXILIARY CONTACTS**
Up to 6 NO or NC auxiliary contacts, with screw terminals, can be mounted without side dimensions increasing.

- **HORIZONTAL AND VERTICAL INTERLOCK**
Horizontal interlock with concealed mounting does not increase the dimensions.

- **CAPTIVE NUT**
Accessory that allows even easier wiring of the terminals using a single wrench.

- **EASY COIL AND POWER CONTACTS REPLACEMENT**

2 Contactors

BG series mini-contactors

- AC and DC versions of same size
- Quick connect - snap on accessory mounting
- Distinct contact status indication
- Up to four auxiliary contacts can be mounted
- Mechanical interlock only 5mm depth
- Three-pole mini-contactors, 6 to 12A IEC AC3 duty / 3 to 7.5HP 480V - 3 to 10HP 600V UL/CSA
- Four-pole mini-contactors, 20A IEC AC1 duty
- Versions with 2NO+2NC main power poles
- Highly conductive auxiliary contacts with four contact points
- Coils with AC or DC supply
- Low-consumption DC versions
- Screw, faston and rear PCB solder pin termination.

BF series contactors

- Quick connect - snap on accessory mounting
- Distinct contact status indication
- Up to eight auxiliary contacts can be mounted
- Mechanical interlock without overall dimensions increasing
- Three-pole contactors, 9 to 230A IEC AC3 duty / 5 to 150HP 480V - 7.5 to 200HP 600V UL/CSA
- Four-pole contactors, 25 to 350A in AC1 duty
- Power factor correction contactors, 7.5 to 100kvar at 400V IEC / 9 to 110kvar at 480V UL/CSA
- Types with 2NO+2NC or 4NC main power poles
- Types for photovoltaic applications
- Highly conductive auxiliary contacts
- Coils with AC or DC supply
- Wide-range coils with electronic control for contactors from 40 to 230A AC3
- Low-consumption versions for control relays and 9-38A contactors in IEC AC3 duty.
- Screw terminals.

- ① Low-consumption version.
- ② Wide-range coil with electronic control.

B series contactors

- 3 frame sizes offering 8 different contactors
- Coil operates indifferently on AC or DC supply voltage
- Coil with low in-rush and holding
- Coil removable without disconnecting power wiring
- Red indicator when contactor is energised
- Safety feature prevents contactor to be energised without arc chute in place and locked
- Convertible auxiliary contact block (2NO + 1NC or 1NO + 2NC), maximum of 4 blocks per contactor for a total of 12 contacts
- Contactor terminals with bolt, washer and nut
- Simple horizontal or vertical interlock
- Three-pole contactors, 265A to 630A IEC AC3 duty
- Four-pole contactors, 350A to 1600A IEC AC1 duty
- 100 to 500HP 600V UL/CSA
- Coils with AC/DC supply
- Screw termination.

- 1 Complete order code with coil voltage digit or with voltage digit followed by 60 (if 60Hz). Standard voltages are as follows:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
 - Example: 11BG0610A230 for mini-contactor BG06, three poles, with one NO contact and 230VAC 50/60Hz coil.
 - 11BG0610A460 60 for mini-contactor BG06 with one NO contact and 460VAC 60Hz coil.
- 2 The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 24 / 48 / 60 / 110-125 (indicate 110) / 220-240 (indicate 220) / 380-415 (indicate 380) / 440-480V (indicate 440).
 - Example: 11B25000110 for contactor B250, three poles, without auxiliary contacts and with 110-125VAC/DC coil.
 - The 24VAC/DC voltage is not possible for B500...B6301000 contactors.
 - Other voltages available on request.

- 3 If predisposed for mechanical latch (G495), the order code becomes 11B...SL00 2. If already fitted with mechanical latch (G495), the order code becomes 11B...L00 2 4.
- 4 Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC. Available voltages are:
 - AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
 - DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
 - Example: 11B250L00110220 for contactor B250 without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 220-240VAC.
- 5 G495 mechanical latch cannot be mounted.
- 6 Complete the order code with the digit of the coil voltage. For 110-125VAC (50/60Hz) indicate 110 or 220-240VAC (50/60Hz) indicate 220. Example: 11B125024110 for contactor B1250, three poles, with 2NO+4NC auxiliary contacts and 110-125VAC 50/60Hz coil.
- 7 Maximum voltage is limited at 300V for UL. For certified type up to 600V, consult Technical support for information; see contact details on inside front cover.
- 8 For voltages 024 / 230 / 400VAC 50-60Hz: 10 pieces/package. For all other voltages: 1 piece/package.
- 9 Highly conductive auxiliary contact.

¹ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.
¹ No UL/CSA ratings; data given for indication and reference purposes only.
² Definite-purpose (DP) contactors are available. Consult Technical support for information; see contact details on inside front cover.
³ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC; 400 = 250...500VAC/DC.
⁴ The values in brackets indicate the class of the fuse to be used. Where there is no value in brackets, any type of fuse can be used. For protection with motor protection circuit breaker (type F combination motor controller) see chapter 1.

● Certified products.

UL - UL Listed, for USA and Canada (cULus - File E93602) for BG...BF150 types indicated, as Motor Controllers - Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (File E93602 - Component - Products having this type of marking are intended for use as components of complete workshop-assembled equipment). BGP is UL rated up to 300V; for type with rating up to 600V, consult Technical support for information - see contact details on inside front cover. UL Listed for USA only (File E93602) for B250...B400 types indicated, as Motor Controllers - Contactors. UL Listed for USA and Canada (cULus - File E172189) for B500...B6301000 and B500SL... B630SL types as Industrial Control Switches. CSA - BF09...BF95 and B250...B400 contactors are also CSA certified, for Canada only (File 54332). In addition, BF12... BF25... and BF38... types are CSA certified as "Elevator Equipment" (File 54332, class 2411); BF65 is UL certified as "Elevator Equipment" (File E 93602). See technical characteristics on page 2-70.

⁵ This contactor has also achieved elevator equipment certification.
⁶ Pending.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials are compliant with standards IEC/EN/BS 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code. Example: BF0910A230V260 for BF09, three poles, with one NO contact and 230V 50/60Hz coil with compliant plastic materials. Note: The contactors that have incorporated NC auxiliary contacts comply with annex F of the IEC/EN/BS 60947-4-1 standard "auxiliary contact linked with power contact" also known as mirror contacts.

- Complete order code with coil voltage digit.
For BG09...D 24VDC version complete with built-in surge suppressor, add suffix **V120** to the standard order code.
The BF09-BF38D types already have a standard supplied built-in TVS (Transient Voltage Suppressor). Standard voltages are as follows:
- DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.
Example: 11BG0610D012 for mini-contactor BG06, three poles, with one NO contact and 12VDC coil.
11BG0910D024 V120 for mini-contactor BG09, three poles, with one NO contact and 24VDC coil, complete with built-in TVS (diode) suppressor.
- Low-consumption version.
No add-on auxiliary contacts or mechanical interlock can be mounted on BG... type contactors. Complete order code with coil voltage digit.
The BF09-BF38L types already have a standard supplied built-in TVS (Transient Voltage Suppressor). Standard voltages are as follows:
- DC 024 / 048V.
Example: 11BG0901L024 for mini-contactor BG09, three poles, with one NC contact and 24VDC low-consumption coil.
- The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.
The order code must be completed with the coil voltage digit.

- The standard voltages are as follows:
- AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.
- The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage.
Standard voltages are:
- AC/DC 24 / 48 / 60 / 110-125 (indicate 110) / 220-240 (indicate 220) / 380-415 (indicate 380) / 440-480V (indicate 440).
Example: 11B25000110 for contactor B250, three poles, without auxiliary contacts and with 110-125VAC/DC coil.
- The 24VAC/DC voltage is not possible for B500...B6301000 contactors.
Other voltages available on request.
- If predisposed for mechanical latch (G495), the order code becomes 11B...SL00.
- If already fitted with mechanical latch (G495), the order code becomes 11B...L00.
- Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC.
Standard voltages are:
- AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
- DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
Example: 11B25000110C48 for contactor B250, three poles, without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 48VDC.

2 Contactors

- Ⓐ G495 mechanical latch cannot be mounted.
- Ⓑ Maximum voltage is limited at 300V for UL. For certified type up to 600V, consult Technical support for information; see contact details on inside front cover.
- Ⓒ Highly conductive auxiliary contact.
- Ⓓ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.
- Ⓔ No UL/CSA ratings; data given for indication and reference purposes only.
- Ⓕ Definite-purpose (DP) contactors are available. Consult Technical support for information; see contact details on inside front cover.
- Ⓖ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.
Complete the order code only with the digit of the coil voltage.
Standard voltages are:
— AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC;
400 = 250...500VAC/DC.
- Ⓖ¹⁵ The values in brackets indicate the class of the fuse to be used.
Where there is no value in brackets, any type of fuse can be used.
For protection with motor protection circuit breaker (type F combination motor controller) see chapter 1.

- ❶ Complete order code with coil voltage digit or voltage digit followed by 60 if 60Hz. Standard voltages are as follows:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
 - Example: 11BG09T4A230 for mini-contactor BG09, four poles, with 230VAC 50/60Hz coil. 11BG09T4A460 60 for mini-contactor BG09, four poles, with 460VAC 60Hz coil.
- ❷ The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 24 / 48 / 60 / 110-125 (indicate 110) / 220-240 (indicate 220) / 380-415 (indicate 380) / 440-480V (indicate 440).
 - Example: 11B250400110 for contactor B250, four poles, without auxiliary contacts and with 110-125VAC/DC coil.
- ❸ **The 24VAC/DC voltage is not possible for B500...B6301000 contactors.** Other voltages available on request.
- ❹ If predisposed for mechanical latch (G495), the order code becomes 11B...4SL00. If already fitted with mechanical latch (G495), the order code becomes 11B...4L00.
- ❺ Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC. Standard voltages are:
 - AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
 - DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
 - Example: 11B2504L00110C220 for contactor B250, four poles, without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 220-240VDC.
- ❻ G495 mechanical latch cannot be mounted.
- ❼ Complete the order code with the digit of the coil voltage. For 110-125VAC 50/60Hz indicate 110 or 220-240VAC 50/60Hz indicate 220. Example: 11B1250424110 for contactor B1250, four poles, with 2NO+4NC auxiliary contacts and 110-125VAC/DC 50/60Hz coil.
- ❽ Maximum voltage is limited at 300V for UL. For certified type up to 600V. Consult Technical support for information; see contact details on inside front cover.
- ❾ Whenever the BF26T4 or BF38T4 types need to be mechanically interlocked with either the BFX5000 or BFX5001, the add-on fourth pole of one of the contactors needs to be removed from the right side and fitted on the left side.
- ❿ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.
- ⓫ Definite-purpose (DP) contactors are available. Consult Technical support for information; see contact details on inside front cover.

[Ⓢ] IEC/EN/BS 60947-1 designation: Pillar terminal.

[Ⓢ] The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. Complete the order code only with the digit of the coil voltage.

Standard voltages are:

– AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC; 400 = 250...500VAC/DC.

[Ⓢ] The values in brackets indicate the class of the fuse to be used.

Where there is no value in brackets, any type of fuse can be used.

For protection with motor protection circuit breaker (type F combination motor controller) see chapter 1.

IEC utilisation current with poles in parallel

If the poles of the contactors are arranged in parallel, the operating current is the one indicated in the table multiplied by the **K** factor given below, which account for the unequal distribution of the current in the various poles.

To limit distribution inequality, it is advisable to use paralleling links (see pages 2-18, 2-23, 2-28 and 2-30).

2 POLES in parallel: **K** = 1.6

3 POLES in parallel: **K** = 2.2

4 POLES in parallel: **K** = 2.8

● Certified products.

UL - UL Listed, for USA and Canada (cULus File E93602) for BG...BF150 types indicated, as Motor Controllers – Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (cULus File E93602 – Component). Products having this type of marking are intended for use as components of complete workshop-assembled equipment.

BGP is UL rated up to 300V; for type with rating up to 600V, consult Technical support for information – see contact details on inside front cover.

UL Listed for USA only (File E93602) for B250...B400 types indicated, as Motor Controllers – Contactors.

UL Listed for USA and Canada (cULus - File E172189) for B5004... B63010004 and B5004SL... B6304SL types as Industrial Control Switches.

CSA - BF09...BF80 and B250...B400 contactors are also CSA certified, for Canada only (File 54332).

In addition, BF12... BF25... BF38... and BF65... types are CSA certified as "Elevator Equipment" (File 54332, class 2411).

See technical characteristics on page 2-70.

[Ⓢ] This contactor has also achieved elevator equipment certification.

[Ⓢ] Pending.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials are compliant with standards IEC/EN/BS 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code.

Example: BF09T4A230V260 for BF09, four poles, 230V 50/60Hz coil with compliant plastic materials.

- ① Complete order code with coil voltage digit.
The BF09-BF38D types already have a standard supplied built-in TVS (Transient Voltage Suppressor).
Standard voltages are as follows:
– DC 012 / 024 / 048 / 060 / 110 / 125 / 220VDC.
Example: 11BG09T4D012 for mini-contactor BG09, four poles, with 12VDC coil.
- ② Low consumption version. Complete the order code with coil voltage digit.
The BF09-BF38L types already have a standard supplied built-in TVS (Transient Voltage Suppressor).
Standard voltages are as follows:
– DC 024 / 048V
Example: BF09T4L024 for contactor BF09, four poles, with 24VDC low-consumption coil.
- ③ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range.
Complete the order code only with the digit of the coil voltage.
Standard voltages are:
– AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.
- ④ The coil of the contactor can be powered indifferently in AC or DC. Complete the order code only with the digit of the coil voltage.
Standard voltages are:
– AC/DC 24 / 48 / 60 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415 indicate 380 / 440-480V indicate 440.
Example: 11B25000110 for contactor B250, four poles, without auxiliary contacts and with 110-125VAC/DC coil.
The 24VAC/DC voltage is not possible for B500-B630 1000 contactors.
The 24V voltage is not possible for B500...B6301000 contactors.
Other voltages available on request.
- ⑤ If predisposed for mechanical latch (G495), the order code becomes 11B...4SL00^④.
If already fitted with mechanical latch (G495), the order code becomes 11B...4L00^④ ⑥.

- ⑥ Indicate rated voltage of the mechanical latch, preceded by the letter C if in DC.
Standard voltages are:
– AC 50/60Hz 48 / 110-125 indicate 110 / 220-240 indicate 220 / 380-415V indicate 380
– DC 48 / 110-125 indicate 110 / 220-240V indicate 220.
Example: 11B250L00110C48 for contactor B250, four poles, without auxiliary contacts, with 110-125VAC/DC coil and mechanical latch powered at 48VDC.
- ⑦ G495 mechanical latch cannot be mounted.
- ⑧ Maximum voltage is limited at 300V for UL. For certified type up to 600V consult Technical support for information; see contact details on inside front cover.
- ⑨ For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.

● Certified products.

- UL - UL Listed, for USA and Canada (cULus File E93602) for BG...BF150 types indicated, as Motor Controllers – Contactors, except for BGP09... types which are UL Recognized, for USA and Canada (cULus, File E93602 – Component). Products having this type of marking are intended for use as components of complete workshop-assembled equipment.
BGP is UL rated up to 300V; for type with rating up to 600V, consult Technical support for information – see contact details on inside front cover.
UL Listed for USA only (File E93602) for B250...B400 types indicated, as Motor Controllers – Contactors.
UL Listed for USA and Canada (cULus - File E172185) for B5004... B63010004 and B5004SL... B6304SL types as Industrial Control Switches.
- CSA - BF09...BF95 and B250...B400 contactors are also CSA certified, for Canada only (File 54332).
In addition, BF12..., BF25..., BF38... and BF65... types are CSA certified as "Elevator Equipment" (File 54332, class 2411).
See technical characteristics on page 2-70.

- Ⓢ This contactor has also achieved elevator equipment certification.
- Ⓢ Pending.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL508, CSA C22.2 n° 14; UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials are compliant with standards IEC/EN/BS 60335; for all BF09...BF38 versions only, add suffix V260 to the standard product order code.
Example: BF09T4D024V260 for BF09, four poles, 24VDC coil with compliant plastic materials.

- 1 Complete with coil voltage digit if 50/60Hz or with voltage digit followed by 60 if 60Hz. N.B.: For BF80T2, 50/60Hz coils are suitable for 50Hz only.
Standard voltages are:
- AC 50/60Hz 024 / 048 / 110 / 230 / 400V
- AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).

Example:

- 11BG09T2A230 for mini-contactor BG09T2, 2 poles NO and 2 poles NC, with 230VAC 50/60Hz coil.
- 11BG09T2A46060 for mini-contactor BG09T2, 2 poles NO and 2 poles NC, with 460VAC 60Hz coil.

- 2 Complete the order code with coil voltage digit.

Standard voltages are:

- DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.

The BF18-BF26-BF38 T2D types already have a standard supplied built-in TVS (Transient Voltage Suppressor).

Example:

- 11 BG09T2D012 for mini-contactor BG09T2, 2 poles NO and 2 poles NC, with 12VDC coil.

- 3 Low consumption version with built-in TVS. Complete the order code with coil voltage digit.

Standard voltages are:

- DC 024 / 048V.

Example:

- BF18T2L024 for contactor BF18T2, 2 poles NO and 2 poles NC, with 24VDC low-consumption coil, supplied with TVS.

- 4 The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. Complete the order code with coil voltage digit.

Standard voltages are:

- AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.

- 5 For use at this other current value, a 16mm² cable, headed with a fork terminal, must be used.

- 6 Maximum combinations of add-on blocks are given on page 2-19.

- 7 For BF80T2E... contactors, coil supply voltage must be AC or smoothed DC. For pulsating DC please consult our Technical support.

- ① Complete with coil voltage digit if 50/60Hz or with voltage digit followed by 60 if 60Hz. Standard voltages are:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
- ② The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. Complete the order code with coil voltage digit. Standard voltages are:
 - AC/DC 024 = 20...48V; 110 = 60...110V; 230 = 100...250V.
- ③ The contactor coil is controlled electronically; it can have either an AC or a DC supply and has a wide operating range. Complete the order code only with the digit of the coil voltage. Standard voltages are:
 - AC/DC 024 = 24...60VAC/20...60VDC; 110 = 60...130VAC/DC; 230 = 100...250VAC/DC; 400 = 250...500VAC/DC.

General characteristics

The contactors are specifically made with magnetic elements in the arc extinction chambers to obtain high DC load operational capabilities. They are used to disconnect and isolate the load between the photovoltaic panel and the AC/DC inverter.

For add-on contact blocks, accessories and spare parts, consider indications of the corresponding standard contactors without the D letter in the code.

Italian Fire Department Directives

These directives provide for a disconnecting device for all current-carrying elements, that can be operated by remote control switch, placed in an easily reached and marked position, in order to safely isolate each part of the installation within the fire system compartment including the photovoltaic (PV) generator.

As an alternative, the PV generator must be installed, either externally of the fire system compartment or internally but in a dedicated compartment with adequate fire-resistant features. For such function, specifically designed contactors for on-load use in IEC DC1 duty up to 1000VDC are available.

Operational characteristics

Use in IEC DC1 duty

Type	Poles in series	IEC operational voltage Ue

Ambient operating temperature: ≤50°C. For ambient temperatures higher than 50°C and up to 70°C, the maximum operating power values indicated in the table must be reduced by a percentage equal to the difference between the operating ambient temperature and 50°C.
 E.g.: using a BFK2600 contactor at the ambient temperature of 60°C, the maximum operating power (at 400V) of the contactor will be equal to 20kvar – 10% = 18kvar.
 Operating cycle: ≤120 cycles/h
 Electrical life: ≥400,000 cycles.

Add-on auxiliary contacts

The following contact blocks, can be fitted on the BFK contactors: BFX12..., 11G418..., 11G481..., 11G482... and 11G218.

Certifications and compliance

Certification obtained (BFK9400A excluded): UL Listed for USA and Canada (cULus - File E93602), as Motor Controllers - Magnetic Capacitive Switches; CCC, EAC.
 Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL508, CSA C22.2 n° 14.
 Plastic materials are compliant with standards IEC/EN/BS 60335; for BFK versions only, add suffix V260 to the standard product order code.

General characteristics

To optimise contactor stock management, a kit is available to transform normal three-pole contactors into BFK types for power factor correction. The table to the left indicates which kits to purchase depending on the standard contactor in stock.

 Example: BF0040D012 (auxiliary contactor with 4 NO auxiliary contacts supplied at 12VDC).
- ③ Low-consumption version. Complete the order code with coil voltage digit. Standard voltages are:
 - DC 024 / 048V.
 Example: 11BG0040L024 (low-consumption auxiliary mini-contactor with 4 NO auxiliary contacts supplied at 24VDC).
- ④ Maximum combinations of add-on blocks are given on page 2-19.
- ⑤ All contacts are highly conductive.
- ⑥ On 11BG0022D, maximum 2 auxiliary contacts may be mounted.
- ⑦ Auxiliary contact blocks and mechanical interlock cannot be mounted.

Operational characteristics

- IEC rated insulation voltage U_i : 690V
- IEC rated conventional free air thermal current I_{th} : 10A
- UL/CSA and IEC/EN/BS 60947-5-1 designation:
 - BG types: A600-Q600
 - BF types: A600-P600
- Low-consumption version of BG types cannot accept additional contacts.

NOTE: no coil change or replacement is possible.

Certifications and compliance

Certification obtained: CCC, EAC, UL Listed for USA and Canada (cULus - File E93602), as Motor Controllers - Auxiliary contactors for all; RINA for BF00 types. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1. Plastic materials are compliant with standards IEC/EN/BS 60335; for BF00 version only, add suffix V260 to the standard product order code. Example: BF0040A230V260 for BF00 control relay having 4 NO auxiliary contacts and 230VAC 50/60Hz coil with compliant plastic materials.

NOTE: the BF00...D and BF00...L types have a standard supplied built-in TVS (Transient Voltage Suppressor).

- ① Cannot be used with BG...L types.
- ② Cannot be used with BG...D and BG...L types.
- ③ Suitable for left-hand mini-contactor only of BGT and BGTP reversing and BGC changeover assemblies.
- ④ The shroud can be used with BG... types with screw termination only and with no auxiliary contacts, surge suppressor or mechanical interlock mounted. It raises the front degree of protection of the mini-contactor when these are used in consumer switchboards.
- ⑤ Cannot be used with BGX8000 shroud.
- ⑥ Contactors with one NC auxiliary contact, 01 type, are usually used. The SM1 breaker can be directly fitted with rigid connector; type connection SM1X3040P for SM1P... breaker and connection SM1X3040R for SM1R... breaker. The relay cannot be directly mounted on the contactor. Use the RF38 type and the RFX3804 independent mounting base.

● Certified products;

- RU - UL Recognized for USA only (File E197069) as Panel and Switchboard Accessories - Component. Products having this type of marking are intended for use as components of complete workshop-assembled equipment.
- cULus - UL Listed for USA and Canada (cULus - File E93601) as Auxiliary Devices - Component.

Compliant with standards: UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1; IEC/EN/BS 60947-1; IEC/EN/BS 60947-5-1 for auxiliary contacts. The add-on auxiliary contact blocks 11BGX... and 11BGXF... comply with annex F of the IEC/EN/BS 60947-4-1 standard "auxiliary contact linked with power contact" also known as mirror contact. They also comply with Annex L of the IEC/EN/BS 60947-5-1 standard "mechanically linked contact elements".

● Certified products; pending for BFX101111

⓪ - UL Recognized for USA only (File E93601) as Auxiliary Devices - Component.
Products having this type of marking are intended for use as components of complete workshop-assembled equipment.

cULus - UL Listed for USA and Canada (cULus - File E93601) as Auxiliary Devices.

CSA - CSA certified for Canada only (File 54332) as Auxiliary Devices for motor controllers.

Add-on auxiliary contacts are compliant with the following standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL 60947-1, UL 60947-5-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-5-1.

The add-on auxiliary contact blocks BFX10... (BFX101111 excluded) and BFX12... comply with annex F of the IEC/EN/BS 60947-4-1 standard "auxiliary contact linked with power contact" also known as mirror contact. They also comply with Annex L of the IEC/EN/BS 60947-5-1 standard "mechanically linked contact elements".

For the BF40...BF150 contactors, compliance with Annex L of the IEC/EN/BS 60947-5-1 standard applies only to the versions with electronically controlled AC/DC coil.

⓪ The contacts can also be fitted on B type contactors using the adapter G358. See pages 2-30 and 2-31.

⓪ Highly conductive contacts.

⓪ Normally closed late-break contact.

⓪ Normally open early-make contact.

⓪ Gold-plated contacts inside tight casing for use in pollutant environments.

The Ith value refers to 125VAC and 30VDC. Minimum applicable load: 5VDC 1mA. IEC IP20 protection is warranted to equipment wired with insulated Faston terminals.

⓪ IEC IP20 protection is warranted to equipment wired with minimum 0.75mm² conductor section. Designation in DC is Q600 for G418 and G419 types.

⓪ IEC IP20 protection is warranted to equipment wired with insulated Faston terminals.

⓪ IEC IP20 protection is warranted to equipment wired with minimum 1mm² conductor section. Mechanical life is 3 million cycles.

⓪ 1.5mm² for insulated bootlace ferrules.

Quick connect surge suppressors for BF00A, BF09A...BF150A contactors.				
BFX77048	≤48VAC/DC (Varistor)	5	0.012	
BFX77125	48...125VAC/DC (Varistor)	5	0.012	
BFX77240	125...240VAC/DC (Varistor)	5	0.012	
BFX79048	≤48VAC (Resistor-Capacitor)	5	0.012	
BFX79125	48...125VAC (Resistor-Capacitor)	5	0.012	
BFX79240	125...240VAC (Resistor-Capacitor)	5	0.012	
BFX79415	240...415VAC (Resistor-Capacitor)	5	0.012	

- ① Different sized contactors can be interlocked.
Example: BF09...BF25 with BF26...BF38.
- ② Replace with the digit of the voltage if 50 or 60Hz and with the letter C followed by the digit of the voltage if DC.
Standard voltages are:
- AC 50/60Hz 24 (indicate 24) - 48 (indicate 48) - 110...125 (indicate 110) - 220...240 (indicate 220) - 380...415V (indicate 380) - 12 (indicate 12) - 24 (indicate 24) - 48 (indicate 48) - 110...125 (indicate 110) - 220...240V (indicate 220).
- DC

NOTE: All contactors BF series, equipped with DC or AC/DC electronic coil, have built-in surge suppressor filter.

2 Contactors

Add-on blocks and accessories for contactors BF00, BF09...BF150

INDEX

Add-on blocks for AC and AC/DC contactors

Combinations: mounting position on BF00A and BF09A...BF150A contactors
Table with combinations: See page 2-21.

- ❶ Mounting is not possible if front lateral contacts or mechanical interlock BFX5000 or BFX5001 are mounted. BF00, BF09...38 cannot be fitted with BFX10 with 4 contacts or G222...
- ❷ Refer to the diagrams below for use of G222..., G272 and BFX641; see also the table of combinations on page 2-21.
- ❸ No add-on block can be mounted on front when the manual closing mechanism G454 or G455 is fitted.
- ❹ This accessory, for contactors BF09...BF94, cannot be mounted if a contact block BFX10... with 4 contacts (BFX1004, BFX1013, BFX1022, BFX1031, BFX1040) is installed.

Combinations: mounting position on BF00A and BF09A-BF38A contactors with mechanical latch G222 fitted.
Table with combinations: See page 2-21.

Combinations: mounting position on BF40A...150A, BF40E...BF150E, contactors with mechanical latch G272 fitted.
Table with combinations: See page 2-21.

- ❺ Mounting not possible if front lateral contacts are fitted.
- ❻ Mounting only for BF95...BF150

2 Contactors

Add-on blocks and accessories for contactors BF00, BF09...BF150

Add-on blocks for DC and DC low consumption contactors

Combinations: mounting position on BF00 and BF09-BF38, D and L versions
Table with combinations: See page 2-21.

- ❶ Mounting not possible when the G222 mechanical latch is fitted.
- ❷ The G222 mechanical latch cannot be fitted on BF26L - BF38L four-pole types.
- ❸ No add-on block can be mounted on front when the G454 manual closing mechanism is fitted.

● Certified products.

UL - UL Recognized for USA only (File E93601) as Auxiliary Devices - Component.

Products having this type of marking are intended for use as components of complete workshop-assembled equipment.

CSA - CSA certified for Canada only (File 54332) as Auxiliary Devices for motor controllers.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL 60947-1, UL 60947-4-1, IEC/EN/BS 60947-4-1, UL508, CSA C22.2 n° 14; add-on auxiliary contacts also comply with: IEC/EN/BS 60947-5-1, UL 60947-5-1, CSA C22.2 n° 60947-5-1. The add-on auxiliary contact blocks 11G350 and 11G354 comply with annex F of the IEC/EN/BS 60947-4-1 standard "auxiliary contact linked with power contact" also known as mirror contact.

2 Contactors

Add-on blocks and accessories for B series contactors

Combinations: Mounting position on B250...B630 contactors

The add-on auxiliary contact blocks G350 and G354 can be applied to contactors B250-B6301000 only up to a maximum of four pieces for each contactor, for a total of 12 contacts.
The contact block G350 provides a 2NO+1NC or 1NO+2NC combination depending on its mounting position; see the drawing below. The G354 block consists of 1NO+1NC.

Contact blocks, BFX10 with 2 contacts, G484, G485, G486 and G487 types, can be mounted using the G358 adapter, refer to page 2-20 for exact types and order codes of the blocks.
A maximum of four adapters can be possibly used per contactor and each adapter can hold one BFX10, G484, G485, G486 and G487.

Coil protection.

11BA1678	B250-B310-B400	1	0.079
11BA1803	B500-B630-B6301000 B1250-B1600	1	0.164

Coil assembly

(Coil, rectifier and coil protection).

11BA1671Ⓢ	B250-B310-B400	1	2.290
11BA1796Ⓢ	B500-B630-B630 1000 B1250-B1600	1	4.650

Ⓢ Available for AC supply only.

② Add the coil voltage digit. Standard voltages are:

- AC/DC 24 - 48 - 60 - 110...125 (indicate 110) - 220...240 (indicate 220) - 380...415 (indicate 380) - 440...480V (indicate 440).

Example: 11BA1671110 for B250...B400 contactor coil assembly suitable for 110-125VAC/DC supply.

③ Add the coil voltage digit. Standard voltages are:

- AC/DC 48 - 60 - 110...125 - 220...240 - 380...415 - 440...480V.

Example: 11 BA1796 110 for B500-B1600 contactor coil assembly suitable for 110-125VAC/DC supply.

For B1250 and B1600 only 110...125 and 220...240VAC voltages are available.

④ When replacing the coil, retrieve the dampers (1 pair for B250...B400 and 2 pairs for B500...B1600) and the fixed core and refit them with the new coil.

⑤ For contactors with coil voltage up to 415V. For higher voltages add suffix 440 to the code. E.G.: 11BA17001440.

MOUNTING POSITION OF CONTACTORS

ON VERTICAL PLANE

The performances given in this catalogue have been established with contactors mounted on a vertical plane with line terminals facing upwards and load terminals facing downwards.

All contactors can be mounted with a $\pm 30^\circ$ inclination to the vertical axis of the contactor without any derating.

For BF series contactors, this inclination can reach $\pm 90^\circ$, that is when the terminals are facing towards left and right.

For BG mini-contactors:

- Position A, with coil terminals A1-A2 facing downwards, is not recommended.
- The position with coil terminals A1-A2 facing upwards is not recommended for mini-contactors with NC contacts.

ON VERTICAL PLANE WITH 30° INCLINATION

All contactors can be mounted on a plane which varies in respect to the vertical up to $\pm 30^\circ$ angle.

On the average, a 5% increase of the minimum pick-up voltage in -30° position can be noted.

This inclination is greater than the one prescribed by main naval registers.

ON HORIZONTAL PLANE (FOR BF SERIES CONTACTORS)

Considerable performance variations can be noted.

It is necessary to check the two possible mounting positions:

- when the contactor is energised, the movable equipment moves upwards.
- when the contactor is energised, the movable equipment moves downwards.

In the first case, it is difficult to close the contactor while in the second, to open it.

The variables which could influence the contactor performance, in addition to the two mounting positions, are:

- type of contactor
- type of control
- contact configuration
- number and type of add-on blocks
- permissible tolerance of auxiliary voltage variation
- ambient temperature.

NOTE: Position B is not recommendable.

Our Technical support (Tel. 035 4282422;
E-mail: service@LovatoElectric.com) can provide further information concerning operational performance of contactors mounted on a horizontal plane.

DYNAMIC TYPE TESTS

Our contactors have sustained dynamic testing, with contactor mounting position rotated $\pm 22.5^\circ$ in respect to the three orthogonal axes.

2 Contactors

Technical characteristics

IEC UTILISATION CATEGORIES DC1, DC3 AND DC5.

POLE CHARACTERISTICS

CHOICE CRITERIA

The elements to be considered for the contactor choice are:

- Rated operational current Ie
- Rated operational voltage Ue
- Utilisation category and L/R time constant
- Eventual verification of electrical life.

OPERATING CONDITIONS

Indicated current is valid for:

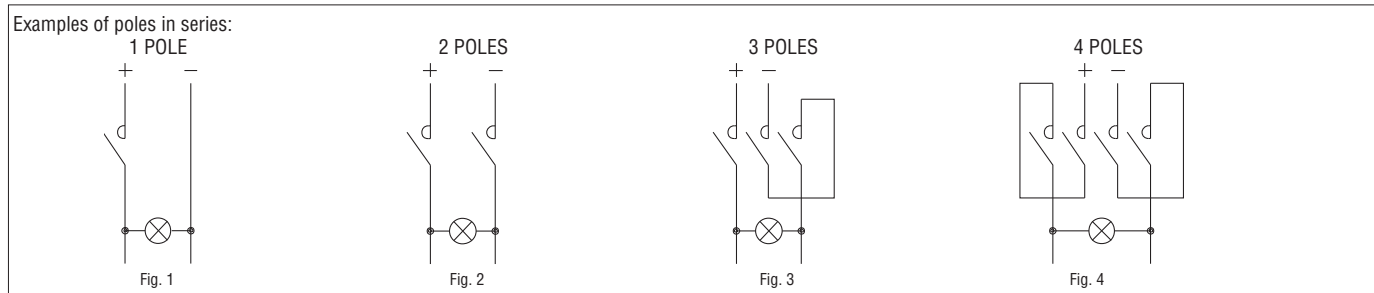

- Ambient temperature $\leq 55^{\circ}\text{C}$
- Operating cycles: up to 120 cy/h with 60% on-load factor
up to 250 cy/h with 30% on-load factor.

POLES IN SERIES

It is important to use contactors with the indicated number of poles in series depending on operating voltage.

The poles in series can be connected to one single polarity or divided between the two polarities of the circuit indifferently.

NOTE. For voltages lower than 30V, the diagrams given in figures 3 and 4 are not recommendable since voltage drops can take place. In these cases, it is better to use poles in parallel considering the notes given in the following section.

POLES IN PARALLEL

It is possible to increase the electrical life by placing poles in series when using voltages which require 1 or 2 poles in parallel.

Poles in parallel do not increase the maximum operational current given in the previous pages; that is, if one pole has a maximum operational current in DC5 of 8A, two poles in parallel, it will always be 8A.

With poles in parallel, it is possible to increase the rated contact capacity (Ith) only if the contactor opens and closes in no-load conditions or when used as resistance shunts.

In this case, the contact capacity can be increased.

The value can be obtained by multiplying the rated current of one pole by the K factor given below; e.g.: if one pole carries 10A, three poles in parallel can carry $10 \times 2.2 = 22\text{A}$.

Therefore, the operating current is the one indicated in the tables, multiplied by the K factor given below which takes into consideration the unequal current division on the various poles.

- 2 POLES in parallel K = 1.6
- 3 POLES in parallel K = 2.2
- 4 POLES in parallel K = 2.8

MAXIMUM OPERATIONAL CURRENT

See tables on pages 2-57 to 2-59.

OTHER CONDITIONS

For different operating conditions or voltage not included among those indicated in the tables, on pages 2-57 to 2-59, consult Technical support (Tel. 035 4282422; E-mail: service@LovatoElectric.com).

IEC SELECTION GUIDE FOR LIGHTING CIRCUIT SWITCHING

GENERAL INFORMATION

The elements which are to be considered for the contactor choice are:

- Type of lamp
- Power factor (cosφ)
- With or without power factor correction
- Value of current when switching on and in running conditions.

Depending on the number and type of lamps, it is also important to bear in mind the main discriminating characteristics given below for the contactor choice:

- Incandescent lamps → contactor making capacity
- Lamps not corrected → rated contactor current in AC1
- Lamps corrected → rated contactor current in AC3

The table below summarises the major characteristics depending on the more commonly used type of lamps:

Type of lamps	Switching on		Switching off	
	Multiple of In ^①	cosφ	Multiple of In ^①	cosφ
Incandescent	15	1	1	1
Mixed light	1.3	1	1	1
Fluorescent	1.15 - 1.3	0.2	1	0.3 - 0.5 (not corrected) 1 (corrected)
High-pressure mercury vapour	1.5 - 1.75	0.2	1	0.45 - 0.7 (not corrected)
High-pressure sodium vapour	1.3 - 1.5	0.2	1	0.3 - 0.5 (not corrected)
Low-pressure sodium vapour	1	0.2 - 0.5	1	0.2 - 0.5 (not corrected)
Metal halide	1.7 - 2.1	0.2	1	0.4 - 0.5 (not corrected)

① In = Rated lamp current.

② For 220/240V circuits, either single-phase (between phase and neutral) or 2-wire (between phase and phase), the maximum number of lamps is as per the table.

For three-phase circuits with neutral 380/415V or 220/240V, the maximum number of lamps controlled by the same contactor is n * 3.

For three-phase 380/415V circuits without neutral, the maximum number of lamps controlled by the same contactor is n * √3.

Electrical life is 100,000 cycles up to 55°C.

③ Incorporated capacitor.

④ Total.

⑤ With reference to the AC side of the power supplies.

⑥ Usually, each light has its own power supply. If a power supply controls several lights, the number of power supplies must be factored into the calculation. The sum of the rated currents of the power supplies connected to each pole of the contact must not exceed 67% of the rated current AC-3 of the contactor indicated on page 2-6.

e.g. BF18 has a rated current AC-3 of 18A; it can control 18x0.67=12.06A per pole at most.

① For 220/240V circuits, either single-phase (between phase and neutral) or 2-wire (between phase and phase), the maximum number of lamps is as per the table.
 For three-phase circuits with neutral 380/415V or 220/240V, the maximum number of lamps controlled by the same contactor is $n \cdot 3$.
 For three-phase 380/415V circuits without neutral, the maximum number of lamps controlled by the same contactor is $n \cdot \sqrt{3}$.
 Electrical life is 100,000 cycles up to 55°C.

Calpe.nl + 31 (0)342 - 45 15 44 Barneveld

2 Contactors

Technical characteristics

POWER FACTOR CORRECTION CAPACITORS

CHOICE CRITERIA

The contactor during the closing transition is influenced by electrical currents having high frequencies and high amplitudes. The frequencies of these currents range between 1 and 10kHz; the amplitudes must have values lower than the maximum permissible current peak of the contactor to be used.

AMBIENT OPERATING CONDITIONS

Ambient temperature: $\leq 50^\circ\text{C}$.
For temperatures higher than 50°C up to 70°C , stated maximum operational power ratings are to be reduced by a percentage equal to the difference between the ambient temperature and 50°C .
Operating cycle: ≤ 120 cy/h
Electrical life: $\geq 100,000$ cycles.

Contactor	IEC rated current $\leq 400\text{V}$	Maximum permissible peak current	IEC maximum operational voltage	Fuse gG	IEC maximum operational power (AC-6b)

The use of contactors with the above operational powers is allowable only when the peak current, in the installation point of the power factor correction board, is lower than the values stated in the table.

If this condition is not verified, it is necessary to use limiting inductances or specific contactors stated on page 2-16. Consult Technical support (see contact details on inside front cover) to obtain detailed information on the correct use of contactors without limiting inductances.

LIMITING INDUCTANCES

The use of limiting inductances is imperative when the system inductances (line transformer and cables), upstream of the power factor correction panel, are not able to maintain the maximum connecting current within the limit value of the contactor used.

FAST DISCHARGE RESISTANCES OF CAPACITORS

The use of the contactor, according to the wiring diagram given, allows the fast discharge of the capacitors as well as the instantaneous disconnection of the capacitors from the mains when the coil is de-energised.

The resistances, indicated in the following table, guarantee the discharge within a maximum time of 2 seconds.

Capacitor power [kvar]	Voltage 220...230V		Voltage 380...500V	
	[Ω]	[W]	[Ω]	[W]
2.5-5	3900	12	8200	12
10-15	1800	25	4300	25
20-50	1000	50	2200	50

2 Contactors

Technical characteristics

SPECIAL CONTACTORS FOR POWER FACTOR CORRECTION CAPACITORS

GENERAL CHARACTERISTICS

These contactors are equipped with early-make contacts. This special type of contact has the purpose of connecting for a very brief interval, 2-3ms, during the contactor closing, resistors which limit the connecting current of the capacitors. These resistors are then excluded when the closing operation is complete and the current capacity is conveyed to the main contacts. With this type of circuit, it is possible to obtain minor wear of all the components of the system especially fuses and capacitors ensuring a longer life and better reliability.

The contactors are particularly suitable for use in automatic power factor correction panels since there is no need of limiting inductances and a source of heat has been eliminated. In this way, these modular electric switchboards can be more compact.

The BFK version, figure 1, is designed for three-phase switching. The peculiarity of this type is in the contacts, suitable to connect limiting resistors, which close only for the time needed to limit any in-rush current peak and then reopen to avoid eventual flow of residual currents through the resistors.

AMBIENT OPERATING CONDITIONS

Ambient temperature: $\leq 50\text{ }^\circ\text{C}$

For ambient temperature higher than $50\text{ }^\circ\text{C}$ up to $70\text{ }^\circ\text{C}$, maximum operational power ratings, indicated in the table, are to be reduced by a percentage equal to the difference between the ambient temperature and $50\text{ }^\circ\text{C}$.

Operating cycles: ≤ 120 cy/h.

Electrical life: $\geq 400,000$ cycles.

- ① Derating for use at 61-400Hz. Consult Technical support for information; see contact details on inside front cover.
- ② Current values guarantee an electrical life of about 200,000 cycles.
- ③ IP20 protection warranted by wired equipment; minimum 1mm² conductor section.
- ④ IP20 protection on front.
- ⑤ For this other current value, use 16mm² wire with spade cable terminal.
- ⑥ NO or NC auxiliary is highly conductive. Other characteristics are the same as the mechanical characteristics of the poles.
- ⑦ Elevator equipment by CSA (file LR54332-23) 500,000 operations.
- ⑧ Elevator equipment by cULus (file E93602) 500,000 operations.

CONTROL CIRCUIT UTILISATION

The input electronic circuit of the contactor coil B250-B1600 is designed and tested according to IEEEC 62.41 and can withstand a 10 kV impulse voltage (1.2/50µs) with 50 Joule energy. For higher values, the use of an auxiliary step-down voltage transformer is recommended.

CONTACTORS WITH MECHANICAL LATCH

Contactors B250-B630 type, can have mechanical latch included or can be predisposed, to be completed with mechanical latch, see pages 2-6 and 2-8 (3-pole version) or 2-10 and 2-12 (4-pole version). Technical data of mechanical latch G495 type is stated on page 2-30.

2 Contactors

Technical characteristics

MECHANICAL INTERLOCK BETWEEN CONTACTORS ONE ON TOP OF THE OTHER

B250...B1600... (Fig. 1, 2 and 3)

It is G356... type, which is provided in six types to allow different fixing interaxis of contactors.

Contactors of the same size can be interlocked as well as different sizes.

INTERAXIS A [mm] - For contactors with terminal protection (Fig. 1)

KM1	B250-B310-B400		B500-B630	
	B250 B310 B400	B500 B630	B250 B310 B400	B500 B630
G3562	—	—	—	—
G3563	—	—	—	—
G3564	372...385	—	—	—
G3565	390...425	420...425	420...425	—
G3566	470...500	470...500	470...500	470...500

To interlock two contactors B6301000, use type G3566 only.

To interlock two contactors B1250 or B1600, it is imperative to use two pieces of type G3566 (fig. 3), one fixed on the left side and the other on the right.

The tables below indicate the interaxis which can be obtained with the various interlock types; with terminal protections (INTERAXIS A) and without terminal protection (INTERAXIS B).

INTERAXIS B [mm] - For contactors without terminal protection (Fig. 2)

KM1	B250-B310-B400		B500-B630	
	B250 B310 B400	B500 B630	B250 B310 B400	B500 B630
G3562	265...305	—	—	—
G3563	305...345	305...345	305...345	—
G3564	345...385	345...385	345...385	345...385
G3565	390...425	390...425	390...425	390...425
G3566	470...500	470...500	470...500	470...500

Interaxis B is 470-500mm for B630 1000, B1250 or B1600.

The B1250 or B1600 cannot be interlocked with the other types of the B series.

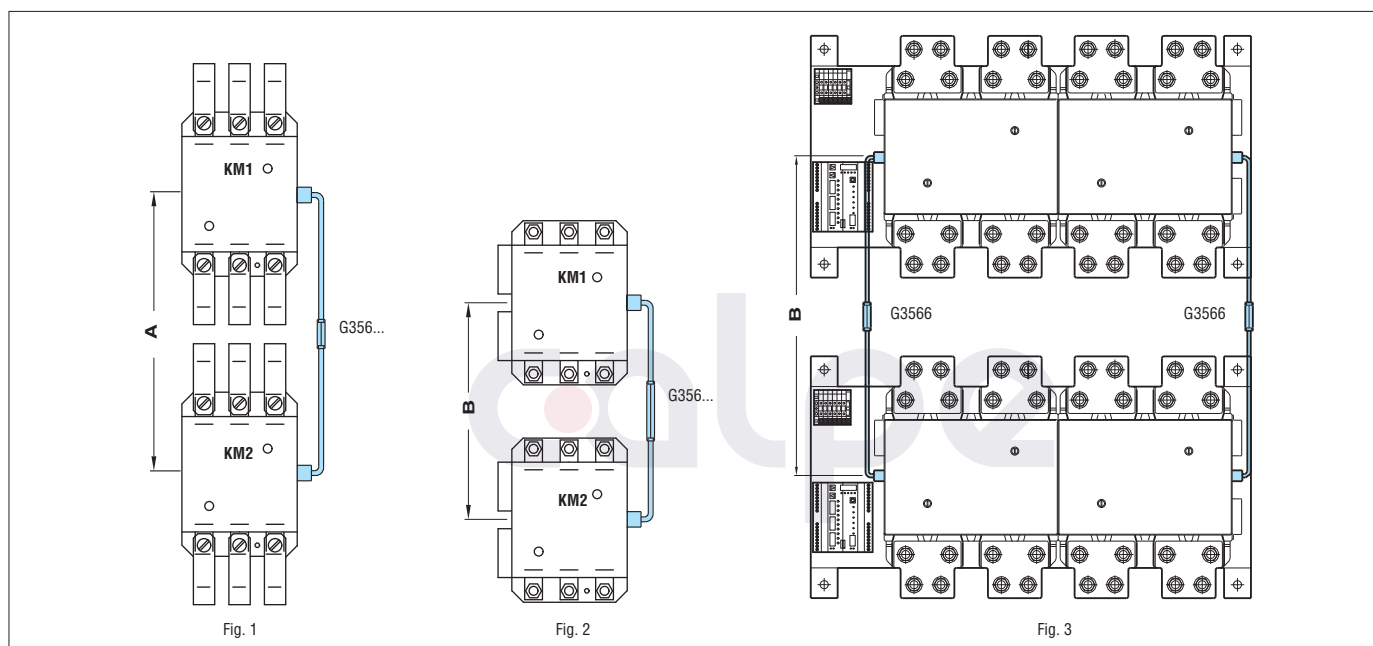

Fig. 1

Fig. 2

Fig. 3

2 Contactors

Technical characteristics

Horizontal and vertical interlock between contactors B250...B630.

It is G355 type and can interlock both contactors of equal size and contactors of different sizes (e.g. B250 can be interlocked with B630).

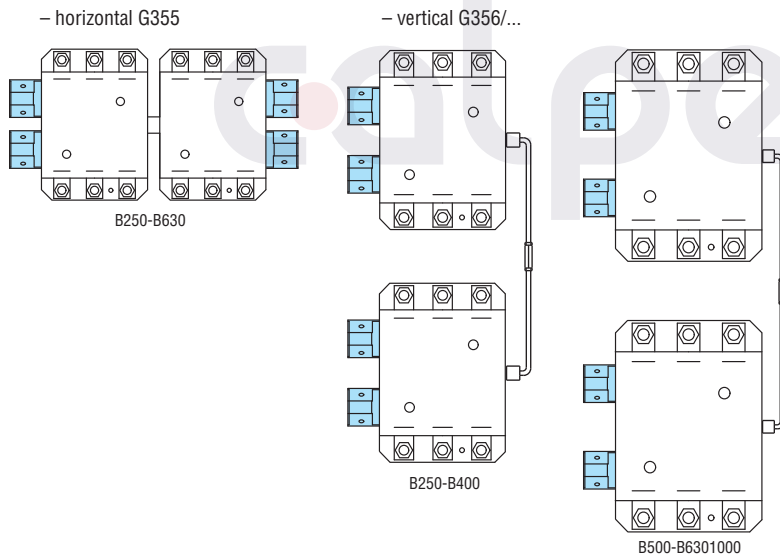

For contactor B630 1000 (three-pole), contact our Technical support office.

This interlock cannot be applied to contactors B1250-B1600.

Admissible mounting positions for 11G350 and 11G354 auxiliary contacts on contactors equipped with mechanical interlock:

Admissible mounting positions for 11G358 adapter on contactors equipped with mechanical interlock:

3 Motor protection relays

HOME

- Thermal overload relays for currents between 0.09 and 420A
- Electronic thermal overload relays for currents between 0.4 and 45A
- Electronic thermal overload relays with selectable tripping class: 5-10-20-30
- Phase failure sensitive and non phase failure sensitive versions
- Automatic and/or manual resetting
- Independent or direct mounting on contactor
- Thermistor protection relay.

FOR BG SERIES MINI-CONTACTORS

- Type RF9, phase failure sensitive, manual resetting
- Type RFA9, phase failure sensitive, automatic resetting
- Type RFN9, non phase failure sensitive, manual resetting
- Type RFNA9, non phase failure sensitive, automatic resetting.

Page 3-4

FOR BF SERIES CONTACTORS

- Type RF38, phase failure sensitive, manual or automatic resetting
- Type RFN38, non phase failure sensitive, manual or automatic resetting
- Type RF82 and RF110, phase failure sensitive, manual resetting
- Type RFA82 and RFA110, phase failure sensitive, automatic resetting
- Type RFN82 and RFN110, non phase failure sensitive, manual resetting
- Type RFNA82 and RFNA110, non phase failure sensitive, automatic resetting.

Page 3-8

FOR BF AND B SERIES CONTACTORS

- Type RF200 and RF420, phase failure sensitive, manual or automatic resetting
- Type RFN200 and RFN420, non phase failure sensitive, manual or automatic resetting.

Page 3-11

ELECTRONIC THERMAL OVERLOAD RELAYS FOR BF SERIES CONTACTORS

- Phase failure sensitive, manual or automatic resetting
- Selectable tripping class: 5-10-20-30
- High reliability and accuracy of tripping
- Minimal heat dissipation
- Wide current adjustment range.

Page 3-12

THERMISTOR PROTECTION RELAY

- 24VDC and 24 to 240VAC supply types.

LOVATO Electric motor protection relays are suitable for new motors with high IE3 efficiency values

RF38 features

FRONT PROTECTION COVER OF THERMAL OVERLOAD RELAYS

A sealable protection cover is available. When fitted on to the relay front, it precludes all possible adjuster tampering and involuntary activation of the "Reset" and "Stop" buttons of the thermal overload relay.

CLEAR IDENTIFICATION OF THERMAL OVERLOAD RELAY MANUAL OR AUTOMATIC RESETTING

The RF38 thermal overload relay is supplied configured for manual resetting. Breaking the plate below the "Reset" button allows for the automatic resetting configuration.

FIXING EASE OF THE THERMAL OVERLOAD RELAY

While the thermal overload relay is being linked to the contactor, its auxiliary contact fits on and connects to the coil terminal by rigid terminal. Complete relay fixing is done in a single operation, with no need of other connections.

SEALABLE RELAY COVER

A handy closing flap feature excludes any tampering of the thermal overload relay adjuster.

① The indicated powers apply to 4-pole motors; it is advisable to always check that the nameplate motor current is within the relay adjustment range.

General characteristics

The RFE... electronic thermal overload relays for BF series contactors are characterized by a wide current adjustment range and high reliability and accuracy of tripping. They are self powered by the main circuit current and therefore do not require separate auxiliary supply voltage. RFE electronic thermal overload relays are suitable for all types of motor starting thanks to the possibility to select several tripping classes. A single front push button is used to select the reset function, manual or automatic, and to activate or deactivate the STOP function.

Operational characteristics

- IEC power circuit rated insulation voltage U_i : 1000V
- IEC auxiliary circuit rated insulation voltage U_i : 690V
- rated impulse withstand voltage: 8kV
- rated frequency: 50/60Hz
- maximum rated current: 45A
- heat dissipation per phase: <1W
- selectable tripping classes: 5-10-20-30
- phase failure sensitive
- mounting position: any
- sealable current adjuster and dip switches for tripping class selection
- degree of protection: IP20 on front.

Certifications and compliance

Certifications obtained: cULus.
Compliant with standards: IEC/EN/BS 60947-1;
IEC/EN/BS 60947-4-1, UL 60947-1, UL 60947-4-1,
CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

		n°	[kg]
31CE106	Adapter for screw fixing of DRPT relay on mounting plate.	10	0.008

① Galvanic isolation between supply and measuring circuits does not exist.

General characteristics

The DRPT is a thermal protection relay for motors equipped with thermistor PTC sensors immersed in the winding heads. The maximum number of thermistors to be used is limited by the resistance of all the sensors connected in series; total ohmic value is not to exceed 1.5kΩ at 25°C.

The DRPT type has fail-safe operation: the protective feature trips even in the case the PTC circuit is disconnected or there is a lack of voltage.

Resetting is manual or automatic.

Operational characteristics

- Supply circuit:
 - Rated frequency: 50-60Hz for AC types only
 - Operational limits: 0.85...1.1 Us
 - Maximum dissipation: 2.5W
 - Connection: permanent
- Measuring circuit:
 - Type of connectable PTC sensor: According to DIN 44081
 - Total PTC resistance at 25°C: ≤1.5kΩ
 - Tripping resistance: 2.7...3.1kΩ
 - Resetting resistance: 1.5...1.8kΩ
 - Voltage at PTC terminals: ≤ 2.5VDC
- Remote resetting:
 - Control: NC contact opening
 - Contact voltage: 5VDC
 - Current consumption: about 1mA
- Relay output:
 - Arrangement: 1 relay with 2 changeover contacts
 - Rated operational voltage Ue: 250VAC
 - Conventional free air thermal current Ith: 5A
 - Designation to IEC/EN/BS 60947-5-1: B300
 - Mechanical life: 50x10⁶ cycles
 - Electrical life (with rated load): 2x10⁵ cycles
- Indications:
 - Green LED indicator for power ON
 - Red LED indicator for relay state TRIP
- Connections:
 - Conductor section 2x1.5mm² with ferrule (max)
 - Tightening torque: 0.8-1.2Nm
- Ambient conditions:
 - Operating temperature: -10...+60°C
 - Storage temperature: -30...+80°C
- Housing:
 - Snap on 35mm DIN rail (IEC/EN/BS 60715)
 - For screw fixing, use CE106 adapter
 - Degree of protection
 - IP40 housing
 - IP20 terminals.

Certifications and compliance

Certifications obtained: EAC.

Compliant with standards: IEC/EN/BS 60255-5.

Page 4-2

DIRECT-ON-LINE STARTERS

- Motor ratings up to 80A 440V in IEC AC3 duty
- Motor rating up to 52A 600V per UL/CSA
- Versions with Start-Stop/Reset buttons or Reset button
- Versions with and without thermal relay
- Versions with motor protection circuit breaker.

Page 4-5

REVERSING CONTACTOR ASSEMBLIES

- For three-phase motor control 9...25A 440V / 4...12.5kW 400V, in IEC AC3 duty and up to 15HP 600V per UL/CSA
- Versions with built-in or external mechanical interlock
- Complete with rigid connections
- PCB version 9A 440V / 4kW 400V in IEC AC3 duty; 5HP 300V per UL/CSA.

Page 4-5

CHANGEOVER CONTACTOR ASSEMBLIES

- From 20A to 165A loads at $\leq 40^{\circ}\text{C}$ in IEC AC1 duty
- For 20A general use per UL/CSA
- With built-in mechanical interlock.

Page 4-6

STAR-DELTA STARTERS OPEN FRAME

- Suitable for three-phase motor control, 16A...225A 440V / 7.5kW...132kW 400V ratings in IEC AC3 duty.

Page 4-7

STAR-DELTA STARTERS IN NON-METALLIC ENCLOSURE

- Suitable for three-phase motor control, 16...60A 440V / 7.5kW...30kW 400V ratings in IEC AC3 duty.

Page 4-8

EMPTY NON-METALLIC ENCLOSURES

- Versions without pushbuttons, with Reset button only or Start-Stop/Reset buttons
- For starters, with pushbuttons and metal plate
- Suitable to contain BG mini-contactor or BF09A to BF80 contactors, up to 110A 440V rating in IEC AC3 duty; up to 52A at 600V for UL/CSA.

⑤ For thermal overload relay selection, refer to pages 3-4 or 3-5.

General characteristics

The M0..., M1..., M2..., M25... and M3...UL enclosures are made in UV protected polycarbonate. They are ideal to assemble starters for stand alone motors; robust and easily customizable adding pushbuttons, selector switches, pilot lights, modular time relays, modular level controls, etc. M3 enclosures are made in ABS plastic material: a version in polycarbonate is available by adding the UL suffix at the end of the code.

Operational characteristics

- Cable entry:
 - M0/M1... - 2 knockouts PG13.5/M20 on enclosure top and bottom
 - M2... - 2 knockouts PG13.5/M20 or PG16/M25 on enclosure top and bottom
 - M25... - 2 knockouts PG16/M25-PG29/M32 on enclosure top and bottom
 - M3... - Smooth surfaces; can be drilled by customer
- Ambient conditions:
 - Operating temperature: -25...+60°C
 - Storage temperature: -40...+70°C
- Degree of protection: IEC IP65 for all; Type 4/4X industrial control environment for M1/M2/M25... and M3... UL versions.

Special M3... versions

In addition to standard-indicated versions, cULus certified starters are available up to 52A motor control or 65A general use rating max. Add suffix **UL** to the order code, e.g. M3P05010024**UL**.

UL/CSA HP ratings

See page 4-24.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada cULus - File E93602) and CSA certified for Canada and USA (cCSAus - File 94157) as Magnetic Motor Controllers, enclosed type, for all M0-M1-M2-M25P/R... starters and M3P/R50-65...UL types as indicated in "Special M3" above; EAC for all. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

❶ Complete order code with coil voltage digit (if 50/60Hz) or with voltage digit followed by 60 (if 60Hz).

Standard voltages are as follows:

- AC 50/60Hz 024 / 048 / 110 / 230 / 400V

- AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).

Example: M2P00911400A8 for direct-on-line starter in M2 type with reset and reset/emergency button, 9A/AC3 contactor with 400VAC 50/60Hz coil and motor protection circuit breaker 4...6.5A.

General characteristics

M2P00911... is ideal for starting applications on small machines. It is robust and fully functional for machine control: start, stop, emergency stop, overload protection, short circuit protection and disconnection (insulation function), padlockable in OFF position.

General characteristics

The M2P00911... starters are composed of an IP65 plastic enclosure where the following devices are mounted:

- a motor protection circuit breaker type SM1R... with the short circuit and overload protection function
- a contactor with start / stop function of the motor
- 2 push-buttons for the start and stop
- a mushroom push-button for the emergency stop
- a padlockable rotary actuator, that operates the circuit breaker, for the isolation, with door coupling function.

These starters are easily and quickly installed. They are especially suitable to operate the motor of smaller machines where there is no electrical panel.

Inside the enclosure, other components can be added like timers, level relays, protection relays, etc.

Operational characteristics

- M2... - 2 knockouts PG13.5/M20 or PG16/M25 on enclosure top and bottom
- Ambient conditions:
 - Operating temperature: -25...+60°C
 - Storage temperature: -40...+70°C
- Degree of protection: IEC IP65.

Certifications and compliance

Certifications obtained: EAC.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1.

- ① Complete order code with coil voltage digit or with voltage digit followed by 60 if 60Hz. Standard voltages are as follows:
- AC 50/60Hz 024 / 048 / 110 / 230 / 400V
- AC 60Hz 024.60 / 048.60 / 120.60 / 220.60 / 230.60 / 460.60 / 575.60 (V).
Example: 11BGR0901A024 for reversing contactor assembly with 2 mini-contactors BG09 having 1 NC auxiliary contact each and 24VAC 50/60Hz coil.
11BGR0901A02460 for reversing contactor assembly with 2 mini-contactors BG09 having 1 NC auxiliary contact each and 24VAC 60Hz coil.
- ② Complete order code with coil voltage digit.
Standard voltages are:
- DC 012 / 024 / 048 / 060 / 110 / 125 / 220V.
Example: 11BGC09T4D012 is a changeover contactor assembly with 2 mini-contactors BG09 having 4 main poles each and 12VDC coil.
- ③ One auxiliary contact for each contactor.
- ④ Maximum voltage is limited to 300V for UL. For certified type up to 600V, consult Technical support; see contact details inside front cover.

General characteristics
REVERSING CONTACTOR ASSEMBLIES
Supplied complete, ready for quick mounting.
The various versions are composed as follows:
BGR... Screw termination, external mechanical interlock BGX5000, power and auxiliary wiring.
BGT... Screw termination, built-in mechanical interlock and power wiring only.
BGRP... Rear PCB solder pin termination, built-in mechanical interlock only.
No thermal overload relay can be directly mounted to BGR... reversing contactor assemblies.
BFA... Screw termination, external mechanical interlock BFX5002 and power wiring.
The motor protection circuit breakers SM1... can be directly mounted to BGR... and BFA... reversing contactor assemblies by means of the rigid connections SM1X3...; for selection, refer to page 1-9.
The thermal overload relay RF38... can be directly mounted to BFA... reversing contactor assemblies; for selection, refer to section 3.

CHANGEVER CONTACTOR ASSEMBLIES 4 POLES
Supplied complete, ready for quick mounting as follows:
11BGC... with built-in mechanical interlock, BFC... with side mounting mechanical interlock including NC contacts for electrical interlock. The changeover contactor assemblies are made with four-pole contactors.
No power or auxiliary wiring included.

BFA025	2	3	7½	7½	15	15						

NOTE: BGR09, BGT09, BGR12, BGT12... types are UL Listed for USA and Canada as "Magnetic Motor Controller - Reversing Contactors". All these are rated 20A general purpose use and suitable for use on a circuit capable of delivering more than 5kA symmetrical amps at 600V max when protected by fuses class K5 rated no more than 30A.
BGTPO9 type is UL Recognized for USA and Canada as "Magnetic Motor Controller - Component - reversing contactors". Max HP rating up to 300VAC only; rated 20A general purpose use.
BGC... types are UL Listed for USA and Canada as "Magnetic Motor Controller - Changeover contactor".
No coil change or replacement is possible for any BG... types.

Add-on blocks
Refer to section 2, page 2-18 and page 2-20. Special add-on auxiliary contacts 11BGX1111 or 11BGX1112 must be used on the left-side contactor of the BGT reversing assemblies. For the right-side contactor, normal 11BGX10... types of auxiliary contacts can be used instead. Refer to page 2-16 for details.

Certifications and compliance
Certifications obtained: UL Listed for USA and Canada (File E93602) for BGR09, BGT09, BGR12, BGT12, BFA... and BGC... (see NOTE above), EAC.
UL Recognized, for USA and Canada (cULus - File E93602 Component), for BGTP09; products having this type of marking are intended for use as components of complete workshop-assembled equipment.
Compliant with standards UL 60947-1, UL 60947-4-1, IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

Thermal relay adjustment range

Choose the thermal relay adjustment range considering a value equal to 58% of rated motor current (Ie).

Example: Ie=100A; 58% Ie=58A.

The suitable relay range is 46-65A.

During the setup, the relay is to be regulated at 58A.

Operational characteristics

- Enclosure is made in ABS plastic material
- Cable entry: smooth surface; can be drilled by customer
- Ambient conditions:
 - Operating temperature: -25...+60°C
 - Storage temperature: -40...+70°C
- Degree of protection: IEC IP65 for M3P...; UL Type 1, 12, 4/4X for M3...UL versions.

Special M3... versions

In addition to standard-indicated versions, cULus certified starters are available up to 52A motor control rating max. This is also valid for the enclosure with general use rating of 65A.

Add suffix **UL** to the order code, e.g. M3PA70UL.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (File E93602), as Magnetic Motor Controllers - Enclosed (starters) and - Enclosures for M3...PUL types.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

- 1 To be purchased separately; refer to page 2-6 for contactor choice.
- 2 To be purchased separately. Refer to pages 3-2 to 9 for thermal overload relay choice. For use of the overload relay in the M24N, consult Technical support; see contact details on inside front cover.
- 3 MX31 metal mounting plate included.
- 4 MX30 metal mounting plate included.
- 5 To install eventual pushbuttons, selectors and/or other control accessories, use the PLatinum series and mount the relay contact elements on the cover using the LPXAU120 mounting adapter. See section 7.
- 6 SM1R motor protection circuit breaker gives the following functions: overload protection, short circuit protection and disconnection.

Stop/Reset button extension	MX10P MX11P MX12P	1				1			
Unused hole threaded plug	LPXA130					1	1	1	1

- M2P00911 enclosure: Start, Stop, Emergency stop pushbuttons with contacts and Handle to operate motor protection circuit breaker
- M3PA enclosure: 2 Start and Stop/Reset pushbuttons and 1 MX30 mounting plate
- M3RA enclosure: 1 Reset pushbutton and 1 MX30 mounting plate
- M3N enclosure: supplied without accessories to be purchased separately including MX 30 mounting plate.

Enclosures can house the following devices:

- M0 = BG... with/without RF9
- M1 = BF09A-BF12A-BF18A with/without RF38
- M2 = BF25A-BF26A-BF32A, assemblies BFA...42 with/without RF38
- M2P00911 = SM1R... with BG...
- M24N = BG..., BF09A...BF25A, assemblies BGR/BGT/BGC and BFA...42 without overload
- M25 = BF26...BF38A, assemblies BGR/BGT/BGC and BFA...42 with/without overload
- M3 = BF40...BF94 and all assemblies with/without overload.

Operational characteristics:

- Cable entry:
 - M0/M1/M2... - 2 knockouts PG13.5/M20 on enclosure top and bottom
 - M24N/M25... - 2 knockouts PG16/M25-PG29/M32 on enclosure top and bottom
 - M3... - Smooth surfaces; can be drilled by customer
- Ambient conditions:
 - Operating/storage temperature: -25...+60°C/-40...+70°C
- Degree of protection: IEC IP65 for all; UL Type 1, 12, 4/4X for M0/M1/M2/M24N/M25... types and M3...UL versions.

Special M3... versions

In addition to standard-indicated versions, cULus certified starters and enclosures are available up to 52A - motor control and 65A general use rating max (MX30 plate, earth/ground and neutral terminal plates are always included in this case). Add suffix **UL** to the order code of enclosures e.g. **M3N UL**.

Certifications and compliance

Certifications obtained: EAC for all; for M3NUL type, UL Listed for USA and Canada (cULus - File E300050) as Industrial control panels; for M0/M1/M2PA/RA/N and other M3...UL types, UL Listed for USA and Canada (cULus - File E93602) under magnetic motor controllers as Polymeric enclosures - and CSA certified for Canada and USA (cCSAus - File 94157) as Non-metallic enclosures. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-1, UL 60947-1, UL 60947-4-1, CSA C22.2 n° 60947-1, CSA C22.2 n° 60947-4-1.

4 Electromechanical starters and enclosures

Direct-on-line starters - Full voltage across the line.
Accessories and spare parts

Maximum combinations for MO... and M1... starters in enclosure

For the fitting of add-on blocks and electronic relays in the starters, consult our Technical support; see contact details on inside front cover.

The enclosure cover can be equipped with various types of actuators and pilot lights, per following details:

1) Upper position 1

The cover must be drilled in this position, with a 22.5mm hole, by the user and LPL..., LPM... and LPCZS... pilot light can be fitted.

To fit the LPL..., pilot light head, the mounting base, type MX20P for MO enclosure or type MX21P for M1 enclosure, must also be purchased. The LED element is snapped onto this mounting base.

No adapter or base is needed for LPL..., LPM... and LPCZS...

2) Middle position 2

Based on the enclosure type, in this position, the user finds either the Start button or threaded plug. Various **PLatinum** (plastic series) actuators can be fitted in this position, such as flush or extended buttons, selectors or pilot lights, as illustrated below. To fit the actuators, the mounting base, type MX20 for MO enclosure, or type MX21P for M1 enclosure, must also be purchased. The contact or LED elements are snapped onto this mounting base. No adapter or base is needed for LPL..., LPM... and LPCZS...

3) Lower position 3

The STOP/RESET button is mounted in this position, except for the enclosure without buttons. This button activates the thermal overload relay via a mechanical actuator.

In eventual applications without thermal overload relay, this button can be removed and the hole closed up by the threaded plug LPXA130.

4 Electromechanical starters and enclosures

Direct-on-line starters - Full voltage across the line.
Accessories and spare parts

Maximum combinations for M2... starters in enclosure

For the fitting of add-on blocks and electronic relays in the starters, consult our Technical support; see contact details on inside front cover.

The enclosure covers can be equipped with various types of actuators and pilot lights, per following details:

1) Upper position 1

The cover must be drilled in this position with a 22.5mm hole by the user; LPL..., LPM... or LPCZS... pilot light can be fitted.

To fit the LPL... pilot light, the mounting base type MX21P must also be purchased. The LED element is snapped onto this mounting base.

No adapter or base is needed for LPL..., LPM... and LPCZS...

2) Middle position 2

Based on the enclosure type, in this position, the user finds either the Start button or threaded plug.

Various **PLatinum** (plastic series) actuators can be fitted in this position, such as flush or extended buttons, selectors or pilot lights, as illustrated in the side figure.

To fit the actuators, the mounting base type MX 21P must also be purchased.

The contact or LED elements are snapped onto this mounting base.

No adapter or base is needed for LPL..., LPM... and LPCZS...

3) Lower position 3

The STOP/RESET button is mounted in this position, except for the enclosure without buttons.

This button activates the thermal overload relay via a mechanical actuator. In eventual applications without thermal overload relay, this button can be removed and the hole closed up by the threaded plug LPXA130. Various **PLatinum** (plastic series) actuators can be fitted in this position, such as flush or extended buttons, selectors or pilot lights, as illustrated in the drawing below. To fit the actuators, the mounting base type

MX21P must also be purchased. The contact or LED elements are snapped onto this mounting base.

No adapter or base is needed for LPL..., LPM... and LPCZS...

4) Upper position 4

The cover must be drilled in this position with a 22.5mm hole by the user whenever an external handle is needed for a switch disconnector fitted in the enclosure.

4 Electromechanical starters and enclosures

Maximum combinations for starters in M24N enclosure

In addition to a direct-on-line, full voltage across the line, starter or reversing contactor assembly, various other electromechanical devices can be fitted. The cover of the M24N enclosure can be used across the entire surface to mount pushbuttons, measuring instruments, switch disconnectors GA016A...GA040A and GA063SA type. No contact blocks or other additional accessories can be mounted on the contactor face of AC BF series; they can only be fitted on the contactor side since the cover is shallow.

Eventually pushbuttons, selector switches and/or other control accessories of the PLatinum (plastic series) can be used and contact or LED elements can be mounted directly inside on the cover with the LPXAU120 mounting adapter; refer to section 7.

MX31 internal metal mounting plate is standard-supplied.

The wall fixing holes and the cover closing captive screws are positioned **outwards** with respect to the sealing gasket. This guarantees the protection degree of the enclosure against infiltrations liquid (IEC IPX5 / UL Type 4X).

The base has **ribbing** which facilitates the fixing of DIN rails, metal mounting plates and electronic printed boards.

Grid references, marked by letters and numbers, are engraved on the interior surface of the cover. This grid allows to quickly identify the exact drilling points where pushbuttons, handles or pilot lights will be mounted.

A **safety sealing** system keeps the cover and base together to avoid inopportune opening and tampering.

4 Electromechanical starters and enclosures

Maximum combinations for starters in M25... enclosure

In addition to a direct-on-line, full voltage across the line, starter or reversing contactor assembly, various other electromechanical devices can be fitted. The cover of the M25 enclosure can be used across the entire surface to mount pushbuttons, measuring instruments, switch disconnectors GA016A...GA040A and GA063SA type. Possible contact blocks or other additional accessories can be mounted on the contactor face of AC or DC BF series or on the contactor side since the cover is deep. Eventually pushbuttons, selector switches and/or other control accessories of the **PLatinum** (plastic series) can be used and contact or LED elements can be mounted directly inside on the cover with the LPXAU120 mounting adapter; refer to section 7.

MX31 internal metal mounting plate is standard-supplied.

The wall fixing holes and the cover closing captive **screws** are positioned **outwards** with respect to the sealing gasket. This guarantees the protection degree of the enclosure against liquid infiltrations (IEC IPX5 / UL Type 4X).

The base has **ribbing** which facilitates the fixing of DIN rails, metal mounting plates and electronic printed boards.

Grid references, marked by letters and numbers, are engraved on the interior surface of the cover. This grid allows to quickly identify the exact drilling points where pushbuttons, handles or pilot lights will be mounted.

A **safety sealing** system keeps the cover and base together to avoid inopportune opening and tampering.

4 Electromechanical starters and enclosures

Direct-on-line starters

Maximum combinations for starters in M3... enclosure

In addition to a direct-on-line, full voltage across the line, starter or reversing contactor assembly, star-delta starters can be installed as illustrated at the lower right as well as various other electromechanical devices. The cover of the M3 enclosure can be used across the entire surface to mount pushbuttons, measuring instruments or switch disconnectors GA016A...GA125A, etc.

MX30 internal metal mounting plate is standard supplied with M3P... and M3R... types; not included with the M3N, it can be purchased separately.

With the specifically designed **hinges**, the cover remains attached to the base, fully open, while the wiring work is being carried out. By applying **slight pressure** on the hinges, the cover can be released from the base.

The cover closing captive **screws** and the wall fixing holes are positioned **outwards** with respect to the sealing gasket. This guarantees the protection degree of the enclosure against liquids infiltrations (IEC IPX5 / UL Type 4X).

A **safety sealing** system keeps the cover and base together to avoid inopportune opening and tampering.

Grid references, marked by letters and numbers, are engraved on the interior surface of the cover. This grid allows to quickly identify the exact drilling points where pushbuttons, handle or pilot lights will be mounted.

A properly predrilled metal mounting plate (MX30 standard supplied except for M3N) permits to quickly and precisely fix equipment in place.

The base has **ribbing** which facilitates the fixing of DIN rails, metal mounting plates and electronic printed boards.

DIAGRAM 2
Connect the eventual two-wire control (e.g. automatism) between terminal 3 of the contactor and terminal 96 of the thermal overload relay.

IMPORTANT

- Remove jumpers 5 and 6 and connect the auxiliary line to terminals A1 and 3 for a control circuit with a voltage value different than the supply.
- Remove jumper 5 and connect the neutral to terminal A1 for a control circuit between phase and neutral.
- SINGLE-PHASE SUPPLY
The main circuit must be configured according to Diagram 4 in the case of a single-phase line or motor.
- FUSES

A set of three fuses must be connected upstream of the starter in the event no appropriate protection is included in the system.

NOTE: the HP / FLA values vary from one motor to another; if possible, always verify the HP and FLA (or rated current) on the motor nameplate. Enclosure UL Type 1, 12, 4 and 4X industrial control environment for M1, M2, M25 and M3...UL versions; designation of control units can be:

N – without push buttons
R – with reset button only
P – per table, with start-stop push buttons.
Consult Technical support for any other combination required (e.g. with other type of contactors, contactor assemblies or definite-purpose version, different overload version or range, additional pilot lights, extra electrical or electronic elements); see contact details on inside front cover. Refer to 1 below for specified standard configurations.

- 1 Complete the order code by indicating:
 - 10 if required without thermal overload relay
 - 12 if required with three-phase overload relay
 - 17 if required with disconnect switch for M2 and M3 types.
- 2 Complete order code with coil voltage digit (if 50/60Hz) or with voltage digit followed by 60 (if 60Hz).
Standard voltages are as follows:
 - AC 50/60Hz 024 / 048 / 110 / 230 / 400V
 - AC 60Hz 024 60 / 048 60 / 120 60 / 220 60 / 230 60 / 460 60 / 575 60 (V).
- 3 Maximum UL ratings is 52A for motor control and 65A for general use.
- 4 No CSA or UL certification. Indicated values correspond to UL/CSA magnetic contactor ratings and for indication and reference purposes only.

Certifications obtained:

- CSA certified for Canada and USA (cCSAus - File 94157) as Magnetic Motor Controllers at max 600VAC, max 15HP per single phase, max 60HP three phase, max 125A with general purpose enclosure.
- UL Listed for USA and Canada (cULus - File E93602) as Magnetic Motor Controllers – Enclosed.

10	100	50
15	135	68

The information in the chart has been obtained from the IEC/EN/BS 60947-4-1 standards. The kW ratings are preferred rated values according to IEC 60072-1 (primary series) at 50/60Hz while Horsepower and corresponding current values are according to UL 508 Industrial Control Standard at 60Hz.

The full load current values listed are for motors running at standard speeds with normal torque characteristics. Motors which are non-standard, such as low speed, high torque or other special applications may have higher full load currents.

Caution: for accurate and reliable motor protection, motor nameplate current should be used to obtain actual motor full load amps for all motors. The information given is for indication and reference purposes only.

- 6A to 1200A soft starter ratings
- Standard and severe duty types
- Internal bypass contactor up to 320A rating
- Versions with advanced functions for the control of the motor
- Startup with torque control, voltage ramp with current limit
- Protection functions for the motor and the soft starter
- Clock calendar
- Digital control and adjustment
- NFC connectivity for a simple, fast and intuitive programming with smartphone and App
- RS232 and RS485 for monitoring and remote control

5 Soft starters

INDEX

ADXN SERIES: SIMPLE, COMPACT AND FUNCTIONAL

The soft starters ADXN series are the ideal solution for those who need a **simple, compact and fast to configure** product for the gradual control of the starting and stopping of the motors. Their **versatility** makes them suitable for several applications such as the control of pumps, fans, conveyor belts, compressors and they are available with **rated currents from 6 to 45A**.

VERSIONS

The soft starters ADXN series are available in three versions.

Basic version (ADXNB)

Ideal solution for those who need a soft starter with basic functions and extremely simple to configure, with the only purpose to control the gradual starting and the stopping of the motor. The configuration requires the settings of only 3 parameters (starting voltage, acceleration ramp and deceleration ramp) adjusted with 3 **potentiometers** present on the front of the soft starter.

NFC version (ADXNF)

Version provided with **NFC** (Near Field Communication) connectivity for the programming via smartphone and LOVATO **NFC** App. The default settings make it ready to use for the control of scroll compressors, typically used in conditioning systems, refrigerators and heating pumps without need for any programming. Thanks to the NFC antenna integrated on front it is however possible to modify the parameters of the soft starter via smartphone for the control of loads different from compressors, like pumps, fans, conveyors, etc, solution which makes ADXNF extremely flexible for any kind of application. The setting of parameters in digital format guarantees accuracy and repeatability, with possibility to set the programming on the smartphone to be immediately transferred on others ADXNF. It is also possible to configure a password for the lock of the settings to protect the soft starter against tampering of the parameters by unauthorized personnel.

Advanced version (ADXNP)

Version which provides the **electronic thermal overload protection** of the motor, obtained thanks to the presence of integrated current transformers, which allow the protection of the motor against overload and the management of starting ramps with current limiting, which are automatically adapted to follow the load variations. The soft starter ADXNP can also be equipped with an **optional RS485 communication module (CX04)** in order to be integrated in a remote control and supervision system. It is provided with both **potentiometers** on front for the setting of the basic parameters (starting voltage, acceleration ramp and deceleration ramp) and **NFC connectivity** for the programming of the advanced parameters through the LOVATO **NFC** App, such as the rated motor current, the tripping thermal class, protection thresholds, password, communication parameters, the function of the relay outputs and alarm properties. The **frontal optical port** allows the programming, data download and diagnostic from PC and App with the optional USB (CX01) and Wi-Fi (CX02) devices.

COMPACT DIMENSIONS

The soft starters ADXN series are characterized by two phase control and are realized in an extremely compact enclosure **only 45mm wide** for the entire range up to 45A (divided in 2 mechanical sizes that differ in height and depth).

SIMPLICITY

They are extremely **simple and quick to configure**. The control of the motor requires only the setting of **few and intuitive parameters**, such as the ramp times and the starting voltage, which can be configured according to the version with potentiometers on front or via smartphone with NFC technology and LOVATO **NFC** App, available for free for iOS and Android smart devices.

WIDE OPERATIONAL VOLTAGE RANGE

They are characterized by a wide rated line voltage range, which extends **from 208 to 600VAC**; this makes them suitable for every market, including the North American one, without needs to manage different codes according to the supply voltage available in the system.

AUXILIARY POWER SUPPLY

All the three versions of ADXN are available with 2 auxiliary power supply voltages: **24VAC/DC**, typical voltage value available in the automation control panels, or **100-240VAC**, typical voltage available for example in the panels for pumps control.

INTEGRATED PROTECTION FUNCTIONS

They integrate several functions for the protection of the motor and the soft starter, such as:

- soft starter thermal protection made by a built-in temperature probe installed on the heatsink
- controls on the line voltage: voltage and frequency out of limits, phase loss, wrong phase sequence
- electronic thermal protection of the motor (ADXNP version only).

The protection thresholds and tripping delays are configurable on the versions provided with NFC connectivity (ADXNF and ADXNP) and can be individually enabled or disabled.

5 Soft starters

INDEX

● NFC CONNECTIVITY AND PROTECTION OF THE SETTINGS

The ADXNF and ADXNP versions are provided with NFC connectivity integrated on the front, technologically advanced solution which allows the modification of the parameters in a **fast, simple and intuitive** way directly from the **smartphone with LOVATO NFC App**. Thanks to the NFC it is possible to set the parameters in digital format in a clear and precise way using the user-friendly **graphical interface** of the App.

It is also possible to save the programming on the smartphone to be **copied** on other soft starters of the same model extremely fast, **even with the device powered off**, solution ideal for those who make programming in series of several devices. In addition to the fast speed, accuracy and simplicity of configuration, the versions provided with NFC connectivity allow to satisfy **safety** requirements thanks to the possibility to set via smartphone a **password** to protect the parameters against tampering by unauthorized personnel. The LOVATO **NFC** App is available for **Android and iOS** smart devices and it is freely downloadable from Google Play Store and App Store.

● ELECTRONIC MOTOR THERMAL OVERLOAD PROTECTION (ADXNP version only)

The advanced version ADXNP integrates current transformers for the measure of the current flowing in the motor phases. With this information the soft starter can thermally protect the motor commanding it to stop when the current exceeds the rated value for an extended time, without the necessity to install an external thermal overload relay, resulting in cost, space, wiring and installation time savings. The thermal protection is electronic type and it is possible to set a double protection class: one for the starting and one for the running, at choice between class 10, 15, 20 and 25 according to the duty level of the application. The rated motor current, the thermal protection classes and their alarm properties are configurable via smartphone with LOVATO **NFC** App or LOVATO **Sam1** App.

● OPTICAL PORT FOR COMMUNICATION (ADXNP version only)

The advanced version ADXNP is provided with optical port on front for the connection of the optional USB (CX01) or Wi-Fi (CX02) devices, by which the soft starter can be connected to a PC with software **Xpress**, smartphone and tablet with LOVATO **Sam1** App to carry out operations of programming, diagnostic and data download in simple and safe way, by operating directly from the front of the soft starter without the need to disconnect the electrical panel power supply.

● RS485 COMMUNICATION PORT (ADXNP version only)

The advanced version ADXNP can be equipped with the optional RS485 communication module CX04. With this module the soft starter is provided with a **serial RS485 communication port with Modbus-RTU** protocol to be integrated in supervision and monitoring system or to communicate with a Modbus master like a PLC or HMI. The module is provided with terminals for the 24VAC/DC auxiliary power supply and it connects in simple and fast way to the optical port of the soft starter with screw fixing. The communication between the soft starter and the RS485 module is done through the optical interface, which ensures electrical safety and comfort of operate directly from the front. It is compatible with **Synergy** supervision and energy management software.

● BUILT-IN BYPASS

All the versions integrate a **bypass** relay which automatically deactivates the thyristors circuit once the acceleration ramp is completed and the motor reaches its run condition, allowing the reduction of the heat and the power dissipation, which consequently results in **energy saving**. The presence of the bypass also increases the reliability of the soft starter, by protecting the internal thyristors against unpredictable phenomena on the network during the motor running, such as short circuits, overcurrents or overvoltages.

● 2 RELAY OUTPUTS INTEGRATED

The soft starters ADXN have 2 built-in relay outputs with normally open contact, which can be used for signaling functions or for the command of external devices. The function of the outputs is fixed on the basic versions ADXNB, while it is programmable via NFC technology on the versions ADXNF and ADXNP at choice between line contactor control (Run), TOR (Top Of Ramp), alarm and maximum torque.

● PASSWORD

The access to the parameters of the soft starters ADXNF and ADXNP can be locked with a password configurable with the LOVATO **NFC** App to protect the settings against tampering by unauthorized personnel.

● FRONTAL LEDS

All the three versions have 3 LEDs on the front for the signalling of the presence of auxiliary power supply, run status and alarm. In case of active alarm the alarm LED is flashing and the type of alarm in progress can be identified by the number of flashes.

● MOUNTING

The soft starters ADXN can be fixed with screws on the rear panel or on 35mm DIN rail (IEC/EN/BS 60715). For the screw fixing there are 4 holes on the base of the soft starter enclosure, while for the DIN rail fixing there is a rubber pad insert which prevents the soft starter from sliding on the DIN rail.

● FAN

It is possible to install on the soft starter ADXN up to 30A an optional fan **40x40mm** (already built-in on the sizes 38A and 45A) to improve the heating dissipation performances and increase the number of operations per hour. The fan is supplied directly by the soft starter through a pre-wired cable which is completely hidden inside the soft starter enclosure. The presence of the fan doesn't affect the dimensions of the soft starter ensuring the maintenance of compact dimensions.

● RIGID CONNECTION FOR THE DIRECT MOUNTING TO A MOTOR PROTECTION CIRCUIT BREAKER (MPCB)

The rigid connection SM1X3150R allows the direct mounting of the soft starter ADXN to a motor protection circuit breaker type SM1R (rotary knob type) up to size 38A, allowing the realization of compact starters and reducing the installation time. SM1X3150R includes an accessory for the support of the weight of the soft starter when hooked to the MPCB, to be fixed with screws to the panel. This support can be used with high or low DIN rail and it can be mounted even with soft starter already installed without need to modify the drillings.

5

ADXL SERIES SIMPLE, EFFICIENT AND SAFE MOTOR CONTROL

SIMPLE

The ADXL soft starter series is equipped with a backlit LCD display with icons and NFC connectivity, for a simple configuration, possible also via smartphones and tablets. They are ideal for simple “plug and play” applications, thanks to the installation AUTO SET wizard, and for high-performance applications, with control and protection during the motor startup and operation.

EFFICIENCY

The two-phase control during the start and stop of the motor allows a reduction of the heat dissipation. After the start-up is completed, the soft starter closes the internal bypass contacts and reduces energy consumption.

SAFETY

ADXL built-in functions allow to protect the connected motor and the starter; it's capable of monitoring the motor thermal status, to manage the thermal protection, and its internal temperature, in order to protect the thyristors from overtemperature. Furthermore, a motor overtemperature protection can be enabled through an external PTC temperature sensor.

AUTO SET

Upon startup, the soft starter launches a user wizard to simplify the setup. The user can set the device through 4 simple parameters:

- **language:** it is possible to choose the text view by selecting the preferred language. The available languages are: English, Italian, French, Spanish, Portuguese, German;
- **motor current size:** the motor nominal current (can be set between 50% and 100% of the rated soft starter current);
- **application type:** it includes predefined setups for the most common applications: centrifugal pump, fire fighting pump, conveyor belt, fan, mixer and general purpose. By selecting one type, the soft starter automatically updates the parameter programming to adapt to the requested application.
- **soft starter duty level:** the same application, based on the load connected to the motor, can be more or less heavy-duty. ADXL is capable of automatically adapting to standard or heavy-duty startups by adjusting the related parameters based on the user selection.

Expert users can customize the settings through the complete parameter menu.

EASY SETUP

The ADXL series soft starters are equipped with NFC technology to simplify the parameter setting procedure. Using a compatible smartphone or tablet, the user, even with the soft starter turned off, can download, save and edit the parameter menu using the LOVATO **NFC** App. The device front includes an optical port compatible with the CX01 device, to connect it via USB to the PC with **Xpress** software, and the CX02 device, for Wi-Fi connection to the PC with **Xpress** software or to smartphone and tablet with LOVATO **Sam1** App.

5 Soft starters

TORQUE CONTROL

The ADXL soft starters integrate the torque control. This motor starter solution allows to perform gradual accelerations and decelerations, with consequent significant reduction of mechanical faults and wear of the transmission devices.

KICK START

This function allows to start the motor when the initial torque is not sufficient to overcome friction forces typical of high inertia loads, by providing a high torque during the very first moments of the startup.

FIRE FIGHTING PUMP PRESET SETUP

While choosing the application in the AUTO SET wizard, it is possible to select the fire fighting pump application. This parameter setting is optimized to start fire fighting pumps overriding all alarms and protections. In this situation, the main priority is the pump start-up, without considering the possible consequences for the pump starter and motor.

INPUTS, OUTPUTS, LIMITS AND REMOTE VARIABLES

The input and output functions are preset with the most common settings; the user can easily edit the preset configuration to adapt the soft starter to the application needs. All inputs and outputs can be edited. There are three types of programmable internal variables:

- limit thresholds
- remote variables
- user alarms.

MAINTENANCE COUNTERS

ADXLs have two counters dedicated to count the number of start-ups and the motor operation hours. It is possible to set a threshold for the operation hours; when this threshold is exceeded, a dedicated alarm is triggered.

COOLING FAN

The fan is supplied as an accessory for sizes from 18 to 115A, while it is built-in for all larger sizes. In order to increase its life span, the fan is activated only when necessary. Furthermore, the ADXL is capable of checking the fan conditions; any blocks or faults are signalled through two specific alarms.

DIN MOUNT GUIDE

For sizes from 18 to 115A, the EXP8003 accessory is available to mount the soft starter on a 35mm DIN rail.

USER INTERFACE

A backlit icon display shows the data to the user in a clear and immediate way.

- Alarm texts available in 6 languages (ENG-ITA-FR-ES-POR-DE)
- 6 icons indicate the default setup in use: centrifugal pump, fire fighting pump, conveyor belt, fan, mixer and general purpose
- Two graphic bars show the motor and thyristors thermal status
- Two alphanumeric displays allow to view texts and measures
- A status bar shows the soft starter status: start, bypass, run, stop.

PASSWORD

Access to the soft starter parameters can be protected by user customizable passwords. There are two access levels, user and advanced. Furthermore, it's possible to block the serial communication using the remote control password.

RS485 COMMUNICATION AND REMOTE KEYPAD

All ADXL series soft starters are equipped with a slot to house the EXC1042 MiniCard, an expansion dedicated to the RS485 port, Modbus protocol. RS485 communication can be used to connect the soft starter to a supervision software (e.g. Synergy) or for the connection to the EXCRDU1 remote display unit, to view the measures or to perform the setup through the touch screen installed on the front panel and command the start and stop of the motor.

MONITORING AND REMOTE CONTROL

Through the optional EXC1042 communication card and compatibility with the supervision and energy management software Synergy, setup and remote control software Xpress, it's possible to constantly monitor all the measures available on the soft starter, the soft starter status, see live trends and edit the setup parameters.

General characteristics

ADXN... is a soft starter with two phase control for the gradual control of the start and stop of asynchronous motors. Its main strengths are the simplicity of configuration, thanks to a short set of parameters which allows the programming simple and fast, and the compactness, thanks to the enclosure only 45mm wide which makes it suitable for the installation in panels with limited spaces.

It can be used for several applications such as the control of pumps, fans, compressors, conveyor belts and mixers. It is available with rated current from 6 to 45A, suitable for the installation in systems with rated line voltage from 208 to 600VAC 50/60Hz.

The series consists of 3 versions which differs in the type of programming mode (settings with potentiometers on front or via smartphone with NFC technology and App) and integrated functions.

Every version is available in double variant with auxiliary supply voltage 24VAC/DC or 100...240VAC to suit every need based on the voltage present in the plant.

BASIC VERSION ADXNB

The soft starter ADXNB is the ideal solution for those who need a soft starter with basic functions and extremely simple to configure. The configuration requires the settings of only 3 parameters adjusted with potentiometers present on the front of the soft starter.

The general characteristics are the following:

- Built-in bypass relay
- Programming with potentiometers on front: starting voltage, acceleration ramp and deceleration ramp
- Voltage ramp startup
- Free wheel or controlled stop
- Integrated overtemperature protection
- 2 built-in relay outputs with normally open NO contact, with function line contactor control (Run) and TOR (Top Of Ramp)
- Suitable for the control of pumps, fans, blowers, conveyor belts, compressors and general purpose applications.

NFC VERSION ADXNF

The soft starter ADXNF is a version provided with NFC connectivity for the programming via smartphone and LOVATO **NFC** App. The default settings make it ready to use for the control of scroll compressors, typically used in air conditioning systems, refrigerators and heating pumps but the parameters can be modified via smartphone and LOVATO **NFC** App for the control of every kind of application, like pumps, fans, conveyor belts, etc.

It is also possible to configure a password for the lock of the settings.

The general characteristics are the following:

- Built-in bypass relay
- Programming with smartphone with NFC technology and LOVATO **NFC** App, available for Android and iOS smart devices, freely downloadable from Google Play Store and App Store.
- Default settings with pre-configured parameters for the control of scroll compressors
- Voltage ramp startup
- Free wheel or controlled stop
- Integrated overtemperature protection
- 2 built-in relay outputs with normally open NO contact with programmable function line contactor control (Run), TOR-Top Of Ramp and alarm
- Suitable for the control of scroll compressors (air conditioning systems, refrigerators and heating pumps), pumps, fans, blowers, conveyor belts, compressors and general purpose applications with parameters settings via NFC connectivity and LOVATO **NFC** App.

ADVANCED VERSION ADXNP

The soft starter ADXNP provides the motor electronic current thermal protection, obtained thanks to the presence of integrated current transformers, which allow the motor protection against overload and the management of starting ramps with current limiting, which are automatically adapted to follow the load variations. It is provided with both potentiometers on front for the setting of the basic parameters and NFC connectivity and optical port for the programming of the advanced parameters through the LOVATO NFC App.

ADXNP can also be equipped with an optional RS485 communication module in order to be integrated in a supervision network.

The general characteristics are the following:

- Built-in bypass relay
- Integrated electronic thermal protection of the motor, with double class (starting and running) configurable
- Programming of basic parameters with potentiometers on front (which can be disabled via NFC if preferable): starting voltage, acceleration ramp and deceleration ramp
- Programming of advanced parameters (rated motor current, starting current limit, tripping thermal class, protection thresholds, communication parameters, password, relay outputs function and alarm properties) with smartphone with NFC technology and LOVATO NFC App, available for Android and iOS smart devices, freely downloadable from Google Play Store and App Store
- Voltage ramp startup with current limiting
- Free wheel or controlled stop
- Integrated overtemperature protection
- 2 built-in relay outputs with normally open NO contact with programmable function line contactor control (Run), TOR (Top Of Ramp), alarm and maximum torque
- Optical port on front for the connection of USB (CX01) or Wi-Fi (CX02) devices for programming, data download and diagnostic from PC with Xpress software or smart devices with LOVATO Smart1 App, freely downloadable from Google Play Store and App Store
- Optional RS485 module (CX04), Modbus-RTU protocol
- Suitable for the control of pumps, fans, blowers, conveyor belts, compressors mixers and general purpose applications.

Operational characteristics ADXNP...

- Two phase control
- Input voltage: 208...600VAC $\pm 10\%$
- Network frequency: 50 or 60Hz $\pm 5\%$ self-configurable
- Auxiliary power supply Us: 24VAC/DC (ADXNP...24), 100...240VAC (ADXNP...) $-15\%/+10\%$
- Rated starter current Ie: 6...45A
- 3 indicator LEDs: presence of auxiliary power supply, ramp in progress / TOR, alarm
- 1 digital input for start command
- 2 relay outputs with normally open contact, programmable on ADXNF and ADXNP, fixed function on ADXNB
- Operating temperature: $-20...+60^\circ\text{C}$ (above 40°C with derating of the starter current)
- Storage temperature: $-30...+80^\circ\text{C}$
- Screw fixing or 35mm DIN rail mounting (IEC/EN/BS 60715)
- Protection degree: IP20.

Certifications and compliance

Certifications (pending): cULus, EAC, RCM. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-2, UL 60947-4-2, CSA C22.2 n° 60947-4-2.

General characteristics

The ADXL soft starter with two phase control and built-in bypass relay allows the control of the start and stop of three-phase asynchronous motors. ADXL is equipped with a backlit display with icons and NFC technology, for a simple, intuitive and fast configuration, with smartphones and tablets. ADXL is ideal for simple "plug and play" applications, thanks to the installation wizard, and for high-performance applications, with control and protection during the motor start-up and operation. The ADXL includes protection features for the starter and motor, and it's possible to enable specific alarms to signal maintenance needs, such as the number of startups performed or the operation hours of the motor.

It has the following main features:

- Backlit LCD display
- Texts available in 6 languages (ENG-ITA-FR-ES-POR-DE)
- IEC rated starter current I_e from 18 to 320A
- Rated motor current selectable from 50 to 100% of rated starter current I_e
- Rated motor power 7.5...160kW (400VAC) and 15...300HP (600VAC)
- Voltage or torque ramp startup
- Torque control
- Kick start
- Limited maximum starting current
- Free wheel or controlled stop
- 4 configurable sets of motor parameters
- Built-in bypass relay
- Optical port for programming, data download and diagnostics through the software **Xpress** and LOVATO **S^{start}1** App, freely downloadable from Google Play Store and App Store
- NFC technology for parameter programming through the LOVATO **NFC** App, freely downloadable from Google Play Store and App Store
- Optional RS485 communication card
- Modbus-RTU and Modbus-ASCII communication protocols
- Supervision and energy management software **Synergy**.

Operational characteristics

- Two phase control
- Input voltage: 208...600VAC ±10%
- Network frequency: 50 or 60Hz ±10% self-configurable
- Auxiliary power supply: 100...240VAC
- 3 indicator LEDs: power supply, startup or bypass, alarm
- 3 programmable digital inputs, one of which configurable as digital or PTC input
- 3 programmable relay outputs: 1 with changeover contact and two with normally open contact
- Operating temperature: -20...+60°C (above 40°C with derating of the starter current by 0.5%/°C)
- Storage temperature: -30...+80°C
- Screw fixing or 35mm DIN rail mounting for ADXL0018600...ADXL0115600 with optional accessory EXP8003
- Protection degree: IP00
- Number of starts per hour: see page 5-20.

Displayed measures:

Maximum current, L1 current, L2 current, L3 current, torque, voltage, total active power, total PF, motor thermal status, soft starter temperature, energy, motor hour counter, number of starts.

Protections

- Motor: separate starting and running overload class settings thermal protection, PTC protection, locked rotor, current asymmetry, startup too long, minimum torque
- Power supply: no power supply, phase loss, wrong phase sequence and out-of-range frequency
- Starter: overtemperature, overcurrent, SCR fault, bypass relay fault, temperature sensor fault and fan fault.

Certifications and compliance

Certifications obtained: cULus, EAC, RCM. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-2, UL508, CSA C22.2 n°14.

General characteristics

Communication devices to connect LOVATO Electric products to:

- PC
- Smartphones
- Tablets.

CX01

This USB/optical device, complete with cable, allows the frontal connection of products compatible with PC with Xpress software without having to disconnect the power supply from the electric panel.

The PC identifies the connection as a standard USB.

CX02

Via Wi-Fi connection, compatible LOVATO Electric products can be viewed on PCs, smartphones and tablets with no need for cabling. Compatible with Xpress software and LOVATO Sam1 App.

For dimensions, wiring diagrams and technical characteristics, consult the manuals available online in the Download section of the following website:

www.LovatoElectric.com

EXCRDU1

Through the EXCRDU1 remote keypad, it is possible to command and monitor up to 32 starters at choice between soft starters ADXL series or variable speed drives VL3B series, even in mixed configuration.

For ADXL series is possible to set the parameters, command the start and stop of the motor, read the measures, signalling alarms and motor status.

- 100...240VAC / 110...250VDC power supply
- 128x112 pixel touchscreen LCD display
- Opto-isolated RS485 communication port, Modbus RTU protocol
- 96x96mm flush mount and ANSI 4"
- Compatible with ADXL equipped with communication card RS485, cod. EXC1042
- 3m/10ft long cable included
- Degree of protection IP65 and NEMA 4X.

EXCM4G01

For details please see section 31.

Certifications and compliance

Certifications obtained: cULus for EXA..., EXCRDU1, EXP8003 and EXP8004, EAC (except EXA...).

Compliant with standard:

- CX01 and EXCRDU1: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3;
- CX02: IEC/EN/BS 60950-1, EN 62311, EN 301 489-1 V2.2.0, EN 301 489-17 V3.2.0, EN 300 328 V2.1.1.
- EXC1042: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-2;
- EXCM4G01: IEC/EN/BS 60950-1.

General characteristics

51ADX is a three-phase control soft starter used to start and gradually stop three-phase asynchronous squirrel-cage motors. The startup can be performed through a voltage ramp with torque control and limitation of the maximum startup current. The integrated bypass contactor (only for 51ADX...B types) drastically limits dissipation, as a result, equipment for electric panel cooling ventilation can be eliminated and the enclosure size can be reduced as well. It's equipped with RS232 and RS485 interfaces.

CONTROL

- During starting: torque control acceleration, current limit control and booster.
- During stopping: torque control deceleration, dynamic braking and free-wheel.
- In emergency conditions: starting without protection direct-on-line starting using integrated bypass contactor.
- Remote control: PC supervision by connection with RS232/RS485 converter, analog modem or GSM modem.
- Automatic call function (Autocall) in case of alarm conditions with sending of SMS or e-mail.
- Proprietary ASCII and Modbus-RTU communication protocols.

FRONTAL KEYPAD FUNCTIONS

- Backlit LCD 2-line 16-character display
- 4 languages (Italian, English, French, Spanish)
- Basic, advanced and function programming menus
- Start and stop commands from keypad
- Measures readings:
 - line voltages (L-L)
 - phase currents
 - active and apparent power values per phase
 - power factor per phase
 - energy
- Events log
- Clock calendar with backup battery.

PARTICULAR FUNCTIONS

Digital inputs and programmable relay outputs.
Analog input (0...10V, 0...20mA or 4...20mA) for ramp acceleration and/or deceleration, motor start and stop control thresholds, programmable relay enable and disable control thresholds.
Analog output (0...10V, 0...20mA or 4...20mA) for current, torque, motor thermal status and power factor readings.
Input programming for second motor starting.

PROTECTIONS

- Motor: dual thermal protection class (one during starting phase and the other during running) or by PTC sensor, locked rotor, current asymmetry, minimum torque and starting time too long
- Auxiliary voltage: voltage value too low
- Power voltage: phase failure, phase sequence and frequency out of limits
- Control inputs and analog output: auxiliary 24VDC short-circuit protection with automatic resetting.
- Starter: overcurrent, high temperature, SCR and bypass contactor malfunction.

Operational characteristics

- Input voltage:
 - 208...500VAC ±10% (51ADX...B)
 - 208...415VAC ±10% (51ADX...)
- Network frequency: 50/60Hz ±5%
- Auxiliary supply voltage: 208...240VAC ±10%
- Auxiliary consumption: 20VA
- Rated starter current Ie:
 - 17A...245A (51ADX...B)
 - 310A...1200A (51ADX...)
- Motor current: 0.5...1 Ie
- Overload current:
 - 105% Ie for 51ADX...B
 - 115% Ie for 51ADX...
- Operating temperature: -10...+55°C (above 45°C with derating of the starter current by 1.5%/°C)
- Storage temperature: -30...+70°C.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standard: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-2.

Accessories

INDEX

Accessories for 51ADX... types

51ADXTAST

51C4

Order code	Description	Qty per pkg	Wt
		n°	[kg]
51ADXTAST	Remote keypad 96x96mm, 2x16 backlit LCD, 208...240VAC supply, provided with 51C8 3m/10ft long connecting cable	1	0.350
31PA96X96	Protective cover (IP54) for remote keypad 51ADXTAST	1	0.076
51C2	PC (RS232) ↔ 51ADX connecting cable, 1.8m/6ft long	1	0.062
51C4	PC (RS232) ↔ RS232/RS485 converter drive connecting cable, 1.8m/6ft long	1	0.147
51C6	51ADX ↔ RS232/RS485 converter drive connecting cable, 1.8m/6ft long	1	0.102
51C8	51ADX ↔ 51ADXTAST remote keypad connecting cable, 3m/10ft long	1	0.080

51ADXTAST remote keypad

The flush-mount 51ADXTAST remote keypad is identical to the one integrated on the front of the soft starter except for the start and stop commands of the motor which are permanently disabled.

With this keypad it is possible to configure the setup of the soft starter, read measures and operating data and transfer the parameters from 51ADX to the keypad and vice versa. A backup copy of the soft starter data and parameter setup is obtainable with the transfer functions.

It is possible to adjust the display contrast and the backlight and select the communication baud rate.

The 51C8 cable 3m/10ft long provided with the keypad is used to connect the 51ADXTAST keypad to the RS485 port of the 51ADX soft starter.

For longer distances the keypad can be connected to the RS232 port of the 51ADX soft starter with RS232/RS485 converter.

Operational characteristics

- Auxiliary supply voltage: 208...240VAC ±10% 50/60Hz
- Power consumption: 6.9VA
- Dissipation: 3.2W
- RS485 port: RJ4/4 connector
- Supply: Removable 3-pole 2.5 mm² terminal block.
- Display: 2 line, 16 character backlit LCD
- LED indication (3): POWER, RUN and FAULT
- Keys (6) ENTER/START, RESET/STOP, ←PREVIOUS, NEXT→, ▼ and ▲
- Ambient conditions:
 - Operating temperature: -10...+60°C
 - Storage temperature: -20...+70°C
- Flush mount enclosure
- Degree of protection on front: IP41; IP54 with protective cover (code 31PA96x96).

Certifications and compliance for 51ADXTAST

Certifications obtained: EAC.

Compliant to standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-4-2.

Remote control software 51ADXSU

The soft starters 51ADX... can be connected to a PC for the control and supervision with the software 51ADXSU:

- Parameters setup, with possibility to save the settings on the PC and subsequently reload them on the soft starter
- Display of all the measures of the soft starter (current, torque, etc.) in real time
- Access to all the functions of the frontal panel with a virtual keypad with possibility to operate on the pushbuttons
- Graphic trends of monitored parameter data during operation
- Display of soft starter events log showing time and date entry.

The connection between 51ADX and PC is made by the supplied 51C2 cable via the RS232 port, RS232/RS485 converter, analog or GSM modem.

GSM modem represents the ultimate solution for unmanned applications or where there are no telephone lines, with possibility to send messages via SMS and email in case of alarm.

The software is available in 4 languages (Italian, English, Spanish and French) and it is freely downloadable from the Download section of the website www.LovatoElectric.com.

5 Soft starters Software and App

INDEX

For ADXNP... and ADXL...

Xpress configuration and remote control software

Synergy supervision and energy management software

LOVATO **S_{am}1** APP

For ADXNF... , ADXNP... and ADXL...

LOVATO **NFC** APP

Xpress

By using the **Xpress** software, the quick setup of the soft starter can be carried out via PC, avoiding possible parameter programming errors.

The parameter programming of ADXNP... and ADXL... soft starters can also be PC saved and quickly uploaded other devices of the same model requiring the same programming.

It allows the following operations:

- Graphical and numerical display of measurements
- Soft starter status monitoring
- Access all setup parameters
- Saving / loading parameters
- Highlighting of changed values
- Resetting to default values
- Send commands
- See live trends
- Reading of events list.

Xpress software is freely downloadable from the website www.LovatoElectric.com, section Energy Management.

Synergy

Synergy software allows to remotely control and monitor the soft starters. The software structure and applications are based on MS SQL relational databases and the data can be consulted via the most common browsers. It is an extremely versatile system that can be accessed via intranet network, VPN or internet by several users/units at the same time.

For details, consult section 30 or our Technical support office; see contact details on inside front cover.

S_{am}1 APP for smartphones and tablets

The application **S_{am}1** allows the user to set the soft starter, view the alarms, send commands, read the measures, download the events and submit the data collected via e-mail. The connection is made by Wi-Fi with a smartphone or tablet using the CX02 device.

The App is compatible with Android and iOS smart devices and it is freely downloadable from Google Play Store and App Store.

For details, consult section 30 or our Technical support office; see contact details on inside front cover.

NFC APP for smartphones and tablets

The soft starters ADXNF..., ADXNP... and ADXL... are equipped with built-in NFC technology. Using the LOVATO **NFC** App it is possible to program the parameters and save them on smartphones and tablets.

The App is compatible with Android and iOS smart devices and it is freely downloadable from Google Play Store and App Store.

For details, consult section 30 or our Technical support office; see contact details on inside front cover.

Cooling system	Natural	51ADX0017...45B	—
	Forced	51ADX0060...245B	All types
PROTECTION			
Auxiliary supply		Voltage too low	
Line voltage		Phase loss, frequency out of limits, minimum and maximum voltage and phase sequence	
Motor		Overload at starting (trip class 2, 10A, 10, 15, 20, 25, 30, 35, and 40), overload during running (trip class 2, 10A, 10, 15, 20, 25 and 30), locked rotor, current asymmetry, minimum torque and maximum starting time	
Soft starter		Overcurrent and overtemperature	
Inputs and outputs		Protection against auxiliary 24VDC short-circuit	
STARTUP AND STOP SETTINGS			
Startup		Torque ramp with maximum current control	
Stop		Free-wheel or deceleration ramp with torque control	
Braking		DC dynamic with external contactor	
DISPLAY AND PROGRAMMING			
		Integrated keypad on front, remote keypad 51ADXTAST or PC with software 51ADXSW	
Display		Backlit LCD 2x16 character	
Selectable languages		Italian, English, French, Spanish	
Measure view		Voltage, current, torque, power (kVA, kW), PF, thermal status of motor and starter, energy consumption	
Other views		Operating status, events, alarms, event log, data	
LEDs		"POWER", "RUN" and "FAULT"	
DIGITAL AND ANALOGUE INPUTS			
Number of inputs		3 (2 digital + 1 digital/analog)	
Input type		Volt-free contact (24VDC command provided by the soft starter)	
Inputs with fixed functions		2 inputs for starting and stopping/reset	
Multifunction input PROG.IN configured as digital input		Free-wheel stop, external alarm, motor preheat, local control, alarm inhibition, thermal protection, manual reset, cascade starting and keypad lock	
Multifunction input PROG.IN configured as analog input		Motor protection via PTC probe, acceleration and/or deceleration ramp via analog input, analog input thresholds for motor starting and stopping, analog input thresholds for programmable relay enable and disable, PT100 input thresholds for motor starting and stopping and PT100 input thresholds for programmable relay enable and disable	
RELAY OUTPUTS			
Number of outputs		4	
Output arrangement		1NO+1NC (global alarm) and 3 NO programmable: 5A 250VAC AC1	
Outputs function		Motor running, motor started, braking, current threshold triggering, maintenance schedule, cascaded startup, PROG-IN thresholds, alarm	
ANALOG OUTPUT			
Type		0...20mA, 4...20mA or 0...10V (with external 500Ω resistor)	
Associated measure		Current, torque, motor thermal status, power factor and active power	
COMMUNICATION INTERFACES			
RS232		Setup and remote control	
RS485		Dedicated only for the connection of 51ADXTAST remote keypad	
VARIOUS FUNCTIONS			
Calendar clock		Calendar clock with backup battery	
Event memory		20 sequential storing of alarms/events with date and time	
Operational data memory		Energy meter, startup counter, motor hour meter and maintenance hour counter	
AMBIENT CONDITIONS			
Operating temperature		-10...+55°C (above 45°C, with derating of the starter current of 1.5%/°C)	
Storage temperature		-30°...+70°C	
Pollution degree		3	
Maximum altitude		1000m (higher up with derating of the starter current of 0.5%/100mt)	
Operating position		Vertical ±15°	
HOUSING			
Mounting		Screw-mount on panel	
IEC degree of protection		IP00	

① IEC IP20 for 51ADX0017B...51ADX0125B types only.

- Versions with single-phase input up to 2.2kW / 3HP and three-phase input up to 110kW / 150HP
- Special function for pump and fan control using PID algorithm
- EMC suppressor included in all versions
- Selectable motor control mode: V/f, vector, energy saving
- Selectable digital and analog input and output functions
- Integrated functions for motor protection.

VLA1... SERIES

- Single-phase 200...240VAC supply
- Three-phase motor power 0.25...2.2kW / 0.33...3HP ratings at 240VAC
- Compliant with standard IEC/EN/BS 61800-3 cat.C2 without external filters
- Optional USB module for parameter programming.
- "Book style" housing.

Page 6-4

VT1... SERIES

- Single-phase 200...240VAC supply
- Three-phase motor power 0.2...2.2kW / 0.25...3HP ratings at 240VAC
- Compliant with standard IEC/EN/BS 61800-3 cat.C2 without external filters
- Built-in RS485 port, Modbus-RTU protocol and BACnet.
- Ultra-compact.

Page 6-5

VLB3... SERIES

- Three-phase 400...480VAC supply
- Three-phase motor power 0.4...110kW / 0.5...150HP for heavy load, up to 132kW / 175HP for standard load, ratings at 400VAC
- Compliant with standard IEC/EN/BS 61800-3 cat.C1 or cat.C2 without external filters
- Integrated dynamic braking circuit
- Optional STO (Safe Torque Off) module
- Optional three-phase motor inductances
- Optional braking resistors
- Communication protocols available: Modbus-RTU, CANopen, ProfiBUS, ProfiNET and Ethercat
- Optional USB and Wi-Fi modules for parameter programming.
- "Book style" housing.

VLAXP01	Door-mount installation kit for the keypad VLAXC01. IP65, Type 4X. Connecting cable included, 3m long	1	0.340

General characteristics

VLA1... is an ultra-compact drive (book style housing) with high performance. It integrates different motor control modes, like V/f linear and quadratic and sensorless vector control. VLA1... is extremely versatile and can be used in several applications such as conveyor belts, machine tools, control of automatic doors, packaging machines and in particular to manage pumps and fans thanks to specific integrated functions like the PID control and flying restart. Simple to install and configure.

The user interface, which comprises of a built-in keypad and display, allows to access the setting parameters easily, thanks to the use of extended texts describing the functions and codes. Using the optional USB communication module, the programming, monitoring and diagnostic can be performed using a PC with software VLBXSW, freely downloadable from the website www.LovatoElectric.com, download section.

SPEED REFERENCE SIGNALS

Reference signals for speed adjustment are obtained by:

- External potentiometer 1...10kΩ
- Voltage signal 0...10VDC or current signal 0/4...20mA
- Buttons on front keypad
- Door-mount installation kit
- 15 preset speeds via digital inputs
- Motor potentiometer.

PROGRAMMABLE INPUTS AND OUTPUTS

- Selectable pNp or nPn logic
- 5 digital inputs
- 1 digital output
- 1 changeover relay output
- 2 analog inputs: 1 configurable as voltage input 0...10VDC or current input 0/4...20mA, 1 voltage input 0...10VDC
- 1 analog output configurable as voltage output 0...10VDC or current output 0/4...20mA.

PROTECTIONS

- Overcurrent
- Output short circuit and earth/ground leakage
- Overvoltage and undervoltage
- Phase loss
- Motor heat overload (I²t)
- Overspeed
- Speed reverse.

FUNCTIONS

- Speed or torque control
- V/f linear or quadratic curves
- Sensorless vector control
- Flying restart
- DC braking and DC injection at start
- Integrated PID with SLEEP and WAKE-UP thresholds
- Multi-pump PID control (1 main pump frequency regulated + 2 auxiliary pumps activated in on-off mode in case of necessity)
- Programmable frequency/time cycles
- Different parameter configurations
- User menu (favorite parameters)
- Programming and monitoring software VLBXSW, freely downloadable from the website www.LovatoElectric.com.

Operational characteristics

- Input voltage: 200...240VAC single-phase
- Rated operational current I_e: 1.7...9.6 A
- Mains frequency: 50/60Hz
- Output frequency: 0...599Hz
- Switching frequency: 2...16kHz
- Current overload: 150% for 60s; 200% for 3s
- IEC degree of protection: IP20
- Ambient conditions:
 - Operating temperature: -10...+55°C (45°C without derating)
 - Maximum altitude: 2000m (without derating)
 - Relative humidity: 5...95% (with no condensing)
- Side-by-side installation
- Built-in EMC suppressor (EN/BS 61800-3), cat. C2
- IE2 efficiency level (EN/BS 50598-2).

Certifications and compliance

Certifications: cULus, EAC, RCM.
Compliant with standards: EN/BS 61800-5-1, UL 61800-5-1, CSA 22.2 No. 274.

① Software for programming and monitoring VT1XSW freely downloadable from the website www.LovatoElectric.com, download section.
② Use a standard Ethernet cable (CAT.5 or higher) max. 5m length.

VT1XC01	Cable RS485/USB for the connection VT1-PC ①, 1.8m length	1	0,080
VT1XC02	Remote keypad (Ethernet connection cable ② not included), IP20, IP65 on front	1	0,122

General characteristics

VT1 is an ultra-compact variable speed drive with single phase input and built-in RS485 communication port. Simple and versatile, it can be used in several applications such as control of pumps and fans, conditioning systems, packaging machines, conveyor belts, control of automatic doors, etc. The extremely compact dimensions make it suitable for the installation in panels or machinery with limited space. The integrated RS485 communication port allows the remote control and monitoring of the drive from a supervision system or a controller such as a PLC or HMI. It supports the communication protocols Modbus-RTU, Modbus-ASCII and BACnet.

VT1 is extremely simple to install and configure. It can be programmed from the frontal keypad with digital display. Alternatively, it is possible to program the parameters from a PC with software VT1XSW and dedicated USB connection cable VT1XC01.

The different integrated motor control modes, like the linear or quadratic V/f control, multipoint curve and sensorless vector control, make it perfectly suitable for several type of loads and applications.

SPEED REFERENCE SIGNALS

Reference signals for speed adjustment are obtained by:

- Front jog dial control (potentiometer)
- External potentiometer 1...10kΩ
- Voltage signal 0...10V or current signal 0/4...20mA
- 8 preset speeds via digital inputs
- Optional remote keypad VT1XC02
- RS485 serial signals.

PROGRAMMABLE INPUTS AND OUTPUTS

- 5 multifunction digital inputs
- 1 voltage analog input 0...10VDC
- 1 current analog input 0/4...20mA
- 1 relay output with NO contact
- 1 voltage analog output 0...10VDC.

PROTECTIONS

- Motor and drive overload
- Overvoltage and undervoltage
- Phase loss
- Overtemperature
- Overspeed.

FUNCTIONS

- Speed control
- V/f linear or squared curves
- V/f customizable multipoint curve
- Sensorless (open loop) vector control
- Preset speeds
- Built-in PID with sleep and wake up thresholds
- Sequencer (programmable frequency/time cycles)
- DC braking and DC injection at start
- Multi-pump PID for the control of up to 4 VT1... drives in master-slave configuration
- Software for programming and monitoring VT1XSW, freely downloadable from the website www.LovatoElectric.com, download section.

Operational characteristics

- Input voltage: 200...240VAC single-phase
- Output voltage: 0...240VAC three-phase
- Rated operational current I_e: 1.8...10.5A
- Mains frequency: 50/60Hz
- Output frequency: 0...599Hz
- Switching frequency: 1...16kHz
- Current overload: 150% for 60s
- IEC degree of protection: IP20
- Ambient conditions:
 - Operating temperature:
 - -10...+40°C (50°C with derating of 40% of the output current) for sizes 0,2...0,75kW
 - -10...+50°C (without derating) for sizes 1,5 and 2,2kW with built-in fan
 - Maximum altitude: 1000m (without derating), 3000m (with derating of 2% of the rated current every 100m)
 - Relative humidity <95% (without condensation)
- Built-in EMC suppressor (EN/BS 61800-3), cat. C2.

Certifications and compliance

Certifications: cULus, EAC, RCM (excluded VT1XC01 and VT1XC02).
Compliant with standards: EN/BS 61800-5-1, UL 508C, CSA 22.2 No. 274.

-	VLB30750A480XX	180	90	120
-	VLB30900A480XX	216	110	150
-	VLB31100A480XX	254	132	175

General characteristics

VLB3... is a compact drive (book style housing) with three-phase supply input. It is ideal for general applications and, in particular, to control and manage pumps and fans, thanks to several specific built-in functions (S Curve, PID, torque quadratic V/f control). It does not require any space for side ventilation, allowing several drives to be installed side-by-side. The user interface, which comprises of a built-in keyboard and display, allows easy access to the setting of parameters, thanks to the use of extended texts describing the functions and codes. Using the USB or Wi-Fi connection accessories, the programming, monitoring and diagnostics can be performed using a PC with software VLBXSW, freely downloadable from the website www.LovatoElectric.com. The RS485 communication port with built-in Modbus-RTU (integrated in the complete drives VLB3... A480) and EMC filter complete the hardware supply. The logic unit can be replaced with one of the VLBXL... codes, obtaining a communication port with different protocol.

SPEED REFERENCE SIGNALS

- External potentiometer: 1...10kΩ
- Voltage signals -10...+10VDC (two-pole), 0...10VDC or current signals 0/4...20mA
- Buttons on front keyboard
- Remote control panel
- 15 preset speeds via digital inputs
- Motor potentiometer
- Setting via communication protocol.

PROGRAMMABLE INPUTS AND OUTPUTS

- Selectable pNp or nPn logic
- 5 digital inputs
- 1 digital output, 1 changeover relay output
- 2 analog inputs configurable as voltage inputs (0/2...10VDC, -10...+10VDC, 0...5VDC) or current inputs 0/4...20mA
- 1 analog output configurable as voltage output 0...10VDC or current output 0/4...20mA.

PROTECTIONS

- Overcurrent
- Output short circuit and earth/ground leakage
- Overvoltage and undervoltage
- Phase loss
- Motor heat overload (I²t)
- Motor PTC heat protection
- Drive, motor and braking resistor overload
- Overspeed
- Speed reverse.

FUNCTIONS

- Speed or torque control
- V/f linear or quadratic curves
- Open or closed loop vector control
- Energy-saving ECO control
- S curves
- Flying restart
- Access to DC bus
- DC braking and DC injection at start
- Built-in PID with SLEEP and WAKE-UP thresholds
- Multi-pump PID control (1 main pump frequency regulated + 2 auxiliary pumps activated in on-off mode in case of necessity)
- Programmable frequency/time cycles
- Ideal for asynchronous or synchronous motors (up to 22kW)
- Different parameter configurations
- User menu (favorite parameters)
- Safe Torque Off (STO) input accessory class SIL 3 (EN/BS 62061 / EN/BS 61800-5-2)
- Programming and monitoring software VLBXSW freely, downloadable from the website www.LovatoElectric.com.

Operational characteristics

- Input voltage: 400...480VAC three-phase
- Rated operational current: 1.3...212A
- Mains frequency: 45...65Hz
- Output frequency: 0...599Hz
- Switching frequency: 2...16kHz
- Current overload: 150% for 60s; 200% for 3s
- IEC degree of protection: IP20
- Ambient conditions
 - Operating temperature: -10...+55°C (45°C without derating)
 - Maximum altitude: 4000m (with power derating)
 - Relative humidity: 5...95% (with no condensing)
- Side-by-side installation
- Built-in EMC suppressor (EN/BS 61800-3) motor cable length: up to 3m for cat. C1 (for sizes 0.4 and 0.75kW); up to 20m for cat. C2
- IE2 efficiency level (EN/BS 50598-2).

Certifications and compliance

Certifications obtained: cULus, EAC, RCM.
Compliant with standards: EN/BS 61800-5-1, UL 61800-5-1, CSA 22.2 No. 274.

General characteristics

CONTROL UNITS VLBXC...

The variable speed drives VLB3... series can be programmed with the control unit VLBXC01 (keypad and display) or alternatively from a PC with the software VLBXSW (freely downloadable from the website www.LovatoElectric.com) by using the communication modules **VLBXC02** (USB) and **VLBXC03** (Wi-Fi).

SAFE TORQUE OFF (STO) MODULE VLBXSM

The VLBXSM module allows to increase and optimize the safety functions of the drive providing two inputs dedicated to the function Safe Torque Off (STO) with performance level ISO 13849-1 (EN/BS 954-1), safety class SIL 3 (EN/BS 62061 / EN/BS 61800-5-2).

LOGIC UNITS VLBXL...

Thanks to their modular structure, on the VLB3... series variable speed drives it is possible to replace the logic unit with Modbus-RTU protocol (integrated as standard on the complete drives VLB3...A480) with one of the logic units VLBXL..., available in the versions with the most common fieldbus, obtaining a drive with a different communication port, which allows its integration inside control systems.

DOOR-MOUNT INSTALLATION KIT VLBXP01

With the kit VLBXP01 it is possible to mount the keypad and display VLBXC01 (provided as standard on the complete drives VLB3...A480 or purchased as an optional accessory for the power units VLB3...A480XX) on the panel door. The door-mounting kit has an IP65 and Type 4X degree of protection and it is provided with an Ethernet connection cable 3 meters long.

REMOTE DISPLAY UNIT EXCRDU1

The remote display unit EXCRDU1 allows the command and monitoring of up to 32 variable speed drives VLB3... series, connected in RS485 (Modbus-RTU protocol).

It provides the following functions:

- Command of the start and stop of the motor
- Adjustment of the speed of the motor
- Inversion of the sense of rotation of the motor
- Monitoring of the main electrical measures of the system
- Control of the status of the drive and presence of alarms
- PID control and monitoring of the status.

Technical characteristics:

- Auxiliary supply 100...240VAC / 110...250VDC
- Graphic LCD display with touch screen, 128x112 pixel
- Opto-isolated RS485 port, Modbus-RTU protocol
- Flush mount housing, compatible with DIN 96x96mm and ANSI 4"
- Compatible with VLB3 drives equipped with Modbus-RTU logic unit
- Cable for RS485 connection included, 3 meters long
- Degree of protection on front IP65 and 4X.

Certifications and compliance

Certifications obtained: cULus, EAC and RCM (only for VLBXC..., VLBXSM and VLBXL...).

Compliant with standards: EN/BS 61800-5-1, UL 61800-5-1, CSA 22.2 No. 274.

INDEX

Three-phase mains chokes

VLXL...

Order code	Ie	Inductance	Power	Qty per pkg.	Weight
	[A]	[mH]	[kW]	n°	[kg]
Three phase mains chokes for VLB3... variable speed drives.					
VLXL590	50	0.59	22...30	1	8.350
VLXL370	80	0.37	37	1	12.500
VLXL330	90	0.33	45	1	16.000
VLXL300	100	0.30	55	1	19.000
VLXL190	160	0.19	75	1	26.000
VLXL140	200	0.14	90...110	1	32.000

General characteristics

VLXL... three-phase mains chokes are applied to the input of VLB3... drives from 22kW to 110kW to reduce the harmonic content upstream, with consequent reduction of the input current absorbed by the drives.

For the correct choice, select the inductance with current rating equal to or greater than the rated current of the drive they will be used with.

Operational characteristics

- Current: 50...200A.
- Operating temperature: -10...+55°C (40°C without derating)

Compliance

Compliant with standards: IEC/EN/BS 61558-1.

Three-phase motor chokes

VLXM...

new

Order code	Ie	Inductance	Power	Qty per pkg.	Weight
	[A]	[mH]	[kW]	n°	[kg]
Three phase motor chokes for VLA1... - VT1... - VLB3... variable speed drives.					
VLXM012	12.5	1	0.2...4	1	3.000
VLXM025	25	0.6	5.5...11	1	6.000
VLXM050	50	0.2	15...22	1	8.000
VLXM100	100	0.15	30...45	1	16.000
VLXM150	150	0.08	55...75	1	18.000
VLXM300	300	0.04	90...110	1	29.000

General characteristics

Three phase motor chokes VLXM... can be installed to the drive output, to reduce the voltage peaks generated by the drive towards the motor, or when several parallel motors are simultaneously controlled by the drives.

For the correct choice, select the inductance with Ie current rating equal to or greater than the rated current of the drive they will be used with.

Operational characteristics

- Rated grid voltage: 400VAC
- Operating range: 170...530VAC
- Rated frequency: 50/60Hz
- Winding material: Aluminium
- Rated current Ie: 12.5...300A type code according
- Rated power: 150...3390VA type code according
- Saturation current: 1.5*Ie
- THD: about 40%
- Ambient temperature max: 40°C
- Maximum altitude: 1000m
- Insulation class: F
- Working class: F
- Test voltage: 3kV/1 sec
- Protection degree: IP00.

Compliance

Compliant with standards: IEC/EN/BS 61558.

Braking resistors

VLBXR...

Order code	Output	Resistance	Power	Qty per pkg.	Wt
	[W]	[Ω]	[kW]	n°	[kg]
Resistors for VLB3... variable speed drives.					
VLBXR390	100	390	0.4...0.75	1	0.260
VLBXR180	200	180	1.5...2.2	1	0.630
VLBXR047	200	47	4...5.5	1	0.500
VLBXR027	200	27	7.5...11	1	0.500
VLBXR018	800	18	15	1	4.200
VLBXR015	800	15	18.5...22	1	4.200
VLBXR007	1900	7.5	30...75	1	9.500

General characteristics

Braking resistors can be connected to VLB3 drives in order to absorb the power generated during the motor stop phase.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 60204-1, IEC/EN/BS 60664-1.

Other accessories

LPCPA001

BUTTON ACTUATORS

- Spring return flush, extended and shrouded
- Push-push flush and extended
- Mushroom-head
- Mechanical reset
- Illuminated.

DOUBLE AND TRIPLE-TOUCH ACTUATORS

- Double-touch with or without indicator
- Triple-touch.

SELECTOR SWITCHES

- Short lever
- Long lever
- Key
- Knob
- Illuminated.

PILOT LIGHTS Ø22mm

- Monoblock LED.

MONOBLOCK BUZZERS Ø22mm

- Continuous or pulse tone.

COMMUNICATION INTERFACES

- USB.
- RJ45.

POTENTIOMETERS Ø22mm

- Potentiometer included in the product with graduated scale
- Potentiometer drives with:
 - graduated scale
 - variable index.

ADD-ON ELEMENTS, ACCESSORIES AND SPARE PARTS

- Mounting adapters
- Contact elements
- Lamp holders
- LED integrated elements
- Labels, label holders, protections, etc.

JOYSTICKS Ø22mm

- 2 directions
- 4 directions
- 2 directions with mechanical interlock
- 4 directions with mechanical interlock
- Complete with contact elements.

PLASTIC CONTROL STATIONS

- 1 to 6 holes option without actuators
- Complete versions from 1 to 3 actuators in various combinations.

METAL CONTROL STATIONS

- Without actuators (from 1 to 16 holes)
- Version without holes.

7 Pushbuttons and selector switches

PLatinum series

INDEX

A COMPLETE SERIES AT YOUR FINGERTIPS!

PLatinum

- HIGH DEGREE OF PROTECTION IP66, IP67 and IP69K**

The actuators have been tested to guarantee a degree of protection per IEC/EN IP66, IP67, IP69K and per UL Type 4X, appropriate for use even in extreme ambient conditions.

- ELEGANT STYLE AND ERGONOMIC DESIGN**

All the series elements have an ergonomic design and, at the same time, particular care has been given to the finest detail aesthetics.

- LONG ACTUATOR MECHANICAL LIFE**

High performance characteristics assure 5,000,000 cycle mechanical life for spring return actuators, 1,000,000 for double and triple touch units and 300,000 for emergency-stop types.

- MATERIALS RESISTANT TO OILS, SOLVENTS AND HYDROCARBONS**

- CUSTOMIZATION**

To facilitate warehouse management, it is possible to purchase spring return or push-push button actuators without caps or lenses and at the same time caps and lenses as spare parts. This allows for custom buttons to be completed from stock.

- HIGH STANDARDIZATION**

Contact elements, LED light elements and a wide range of accessories are common to all types of the series.

- USAGE AT EXTREME TEMPERATURE CONDITIONS**

Operation temperature range between -25° and +70°C.

- CERTIFICATIONS: cULus, EAC, RINA and CCC.**

PLatinum series

INDEX

QUICK AND EASY ACTUATOR INSTALLATION

Ø30mm FLAT METAL

- The operator fits into the Ø30mm panel hole with an adapter that retains it securely by two screws.

- The operator has a seal with rubber grommets which ensure stable fitting.

Ø22mm METAL

- The operator fits into the Ø22mm panel hole with an adapter that retains it securely by two screws.

- The operator has a seal with rubber grommets to ensure stable fitting.

Ø22mm CHROMED PLASTIC

- The operator mounts to the Ø22mm panel hole with a threaded ring. The mounting base snaps onto the back of the operator itself.

- The operator has a seal with rubber grommets to ensure stable fitting.
- The anti-rotation lug on the operator collapses into the seal to enable installation even to round holes without an anti-rotation notch.
- The mounting plate and operators have clearly visible reference marks to facilitate snapping the operators onto the base.

CONTACT ELEMENTS

- Common to all PLatinum series operators.
- Miniaturised size
- High electric conductivity - 5V 1mA
- Up to 9 contact elements can be installed
- Versions with screw, spring-clamp (push-in), Faston and base mount contact blocks for use with LPZP control stations
- Contact operation: double breaking action, direct (positive) action operation and wiping effect.
- Electrical contact and LED elements are snapped onto the mounting adapter.
- The activation of the middle contact is standard supplied on all non-illuminated spring return and push-push button or selector switch actuators.

CONTACT AND LED ELEMENTS WITH SPRING-CLAMP (PUSH-IN) TECHNOLOGY

PUSH-IN technology reduces the time required to connect stiff cables and cables with crimped terminals. The wire simply inserts into the clamp for a secure, sealed connection - no screwdriver needed!

The clamping force is long-lasting and unaffected by vibration and impact.

Push-in technology

HIGH-LUMINOSITY LED ELEMENTS

- Miniaturised size
- Long electrical life: 100,000h
- Versions with screw, spring-clamp (push-in) and for bottom of LPZP control stations
- Overvoltage protection
- Withstand vibrations
- Protection against stray currents in wiring
- Flickering phenomenon reduction
- Steady and flashing light versions
- Supply voltages: 12...30VAC/DC, 85...140VAC, 185...265VAC
- Test elements installed alongside and connected with the relative LED element allow checking if all LED elements of the installation are working properly.

LOW PROFILE OPERATORS AND COMPACT FOOTPRINT

- The operator's external collar has a low profile and reduced front depth.
- The total depth from the panel surface to the first contact element is just 43mm for the Ø22mm metal/plastic type, and 49mm for the Ø30mm flush-mounting metal type.

7 Pushbuttons and selector switches

PLatinum series

INDEX

INDUSTRIAL MARINE RAILWAY

calpe

7

DOUBLE AND TRIPLE-TOUCH ACTUATORS

- IEC IP66, IP67, IP69K and UL Type 4X degree of protection
- Double-touch button actuators, with 2 flush or 1 flush and 1 extended buttons
- Triple-touch button actuators with 2 flush and middle extended buttons
- Versions with or without indicator.

MECHANICAL RESET BUTTONS

- Rod adjustment directly on actuator front (1...4mm/0.04...0.16")

- Up to 6 contact elements can be mounted.

EMERGENCY STOP ACTUATORS

- Actuator structure suitable to warrant direct opening operation with mechanical latching for emergency stopping per ISO 13850 and IEC/EN/BS 60947-5-5
- There is a green line around the actuator body to spot when the emergency stop is at rest or activated
- Use of **Ronis key**
- Various accessories available (e.g. yellow E-stop disks, padlockable protection, rubber actuator boots, label holders and labels)
- Auto-monitor contact elements are available with functions to:
 - Constantly control the correct installation (mounting adapter and NC contact with the actuator) and proper operation of the NC contact
 - Open the circuit in the case of malfunctions (e.g. the contact detaches from the mounting adapter due to strong vibrations or shock).

SELECTOR SWITCH ACTUATORS

- Lever design assures excellent grip
- Option to differentiate the actuation of the central contact

- **High visibility** on front or side and actuator inscription shows exact switch position

- Use of **Ronis key**

- **Activation of the middle contacts is standard supplied** on 2 and 3 position selector switches.

PILOT LIGHTS

- Protection rating IP66, IP67, IP69K and UL Type 4X for LED monoblock pilot lights and pilot light heads
- Long life and low consumption
- Supply voltages:
 - 110...120VAC, 230VAC, 380...415VAC
 - 110...125VDC, 220VDC
 - 12VAC/DC, 24VAC/DC, 48VAC/DC.

MONOBLOCK POTENTIOMETERS

- Potentiometer included in the product
- Protection rating IP66, IP67 and IP69K and UL Type 4X
- Resistance values from 1 to 500kΩ.

ADAPTER FOR Ø30MM HOLES

- Allows installation of Ø22mm operators in Ø30mm holes
- Two versions; one for buttons and selector switches and one for emergency buttons.

MONOBLOCK BUZZERS

- Continuous or pulse-tone monoblock buzzers in a single product
- IP40 version (90dB/10cm) and IP66, IP67, IP69K and UL Type 4X, version (80dB/10cm) available.

COMMUNICATION INTERFACES

- Protection rating IP65, UL Type 4X
- USB and RJ45 for Ethernet types with data transmission in both directions
- USB type 3.0 (backward compatible with USB 2.0)
- Versions complete with cable.

JOYSTICKS

- Complete with contact elements
- **2 and 4 directions** available versions with or without mechanical interlock.

ACCESSORIES

- DIN rail adapter
- Label holders and labels
- Rubber operator hoods
- Padlockable protection
- Protective covers.

PLASTIC CONTROL STATIONS

- Protection rating IP66, IP67, IP69K and Type 4X per UL
- 1 to 6 hole empty versions
- Complete 1 to 3 operator versions in a variety of combinations
- Quick installation and easy cabling of the contacts and LED elements with mounting to the bottom (snap mounting to the base)
- Option to also install screw-in and spring-mounting LED elements together with the operator inside the cover panel.

MOUNTING THE CONTACTS TO THE BOTTOM OF THE CONTROL STATION

- The use of contact and LED lamp holder elements that snap mount to the bottom of the control station makes for easier cabling.

YELLOW CONTROL STATION WITH ACTUATOR SHROUD

- Protective cover integrated into the button panel cover
- Protection rating IP66, IP67, IP69K and UL Type 4X
- 4 knockout holes for cable wiring
- Kit of 4 caps to protect the screws.

METAL CONTROL STATIONS

- Protection rating IP66, IP67 and UL Type 4X
- From 1 to 16 holes version
- 1 hole version with actuator protection
- Version without holes.

Ⓢ Use contact elements LPXC10A (EM) and LPXC01 (NC) only.
Contact elements LPXC10 (NO) and LPXC01D (LB) cannot be fitted on these actuators.
For the number of contacts that can be fitted, see the indication here to the side.

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

An aluminium and zinc alloy (zama) is used for the metal part whereas plastic parts are made of polyamide.

Mechanical endurance

- Operating force: <0.5kg/1.1lb (actuator).
Mechanical life:
- Spring return actuators: 5,000,000 cycles
 - Push-push actuators: 500,000 cycles.

Mounting adapter

See page 7-36.
Type: LPXAU120M.
The adapter is fixed to the mounting surface by means of incorporated screws (Tmax = 0.7Nm/6.1lb.in).
Actuators latch onto the mounting adapter by simple rotation.

Contact elements for spring return button actuators

See page 7-36 and 7-38.

Type	Termination	
1NO	LPXC10	Screw
	LPXCF10	Faston
	LPXCS10	Spring clamp
1EM	LPXC10A	Screw
1NC	LPXC01	Screw
	LPXCF01	Faston
	LPXCS01	Spring clamp
1LB	LPXC01D	Screw

Base mount types snap into LPZP... control station base.
See example on page 7-38.

Up to 3 contacts can be fitted per control station.

1NO	LPXCB10	Screw
1NC	LPXCB01	Screw

Contact elements for push-push button actuators

See page 7-37.
Type: LPXC10A (1EM)
LPXC01 (1NC)

Contacts snap onto the mounting adapter which can also be used with LPZ... control stations.
Up to 6 contacts can be fitted: 2 each on the left, middle or right; up to 3 elements can be fitted to the adapter when used with the LPZ... control station.

All these actuators are standard supplied with action plug for middle contacts.

Certifications and compliance

Certifications: cULus, EAC, RINA.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

Normal operation of auto-monitor contact mounted on surface or on cover of control stations

In case of detachment of only the contact element and/or of the mounting adapter with contact element

With contact type LPXC01SM (1NC)

If the contact LPXC01SM detaches from the actuator due to **strong vibrations or shock**, the equipment can be restored to operating state only when proper mounting of the contact with the actuator is re-established resulting in **contact 3-4 closing**.

With contact type LPXC02SM (2NC)

If the contact LPXC02SM detaches from the actuator due to **strong vibrations or shock**, the equipment can be restored to operating state only when proper mounting of the contact with the actuator is re-established resulting in **contact 3-4 closing**.

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

An aluminium and zinc alloy (zama) is used for the metal part whereas plastic parts are made of polyamide.

Mechanical endurance

- Operating force: <0.5kg/1.1lb (actuator).
Mechanical life:
- Spring return mushroom-head actuators: 5,000,000 cycles
 - Latch mushroom-head actuators: 300,000 cycles.

Mounting adapter

See page 7-36.
Type: LPXAU120M.
The adapter is fixed to the mounting surface by means of incorporated screws (Tmax = 0.7Nm/6.1lb.in).
Actuators latch onto the mounting adapter by simple rotation.

Contact elements

See page 7-37 and 7-38.

Type	Termination
Front-mount types snap onto LPXAU120M mounting adapter (to purchase separately). For SPRING RETURN types, up to 9 contacts can be fitted: 3 each on the left, middle and right, one behind the other. For LATCH types, up to 4 contacts can be fitted. The LPXAU120M mounting adapter can also be fitted internally to the cover of the LPZ... control station with up to 3 elements per actuator.	1NO LPXC10 Screw

3-position selector switch

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

An aluminium and zinc alloy (zama) is used for the metal part whereas plastic parts are made of polyamide.

Mechanical endurance

Mechanical life: 1,000,000 cycles.

Mounting adapter

See page 7-36.

Type: LPXAU120M.

The adapter is fixed to the mounting surface by means of incorporated screws (Tmax = 0.7Nm/6.1lb.in).

Actuators latch onto the mounting adapter by simple rotation.

Contact elements

See page 7-37 and 7-38.

Type	Termination
Front-mount types snap onto LPXAU120M mounting adapter (to purchase separately). Up to 6 contacts can be fitted: 2 each on the left, middle and right or 3 each on the left and right, one behind the other. The LPXAU120M mounting adapter can also be fitted internally to the cover of the LPZ... control station with up to 3 elements per actuator.	

1NO	LPXC10	Screw
	LPXCF10	Faston
	LPXCS10	Spring clamp
1EM	LPXC10A	Screw
1NC	LPXC01	Screw
	LPXCF01	Faston
	LPXCS01	Spring clamp
1LB	LPXC01D	Screw

Base mount types snap into LPZP... control station base.

See example on page 7-38.

Up to 3 elements can be fitted to the adapter when used with the LPZ... control station.

1NO	LPXCB10	Screw
1NC	LPXCB01	Screw

All these actuators are standard-supplied with action plug for middle contacts.

The middle contact activation, with respect to the right and left side contact, can be changed by the user, if required, by removing one mechanism pin. Consult the relative instructions available online in the Downloads section at www.LovatoElectric.com.

Type of position

LPXAU101	2-4 directional holder for adhesive legends	1	0.004

See page 7-48 for the complete list of available labels.

Operational characteristics

- Any mounting position allowed
- LPSJ2... types can be used with LPZ... control stations
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K
 - IP20 for contact elements.

Materials

An aluminium and zinc alloy (zama) is used for the metal parts whereas plastic parts are made of polyamide and polycarbonate. The sealing boot is made of NBR rubber.

Mechanical endurance

Mechanical life: 1,000,000 cycles.

General characteristics of contact elements

Wiping action and dual scraping-oscillating effect. IEC rated insulation voltage: 690V IEC rated thermal current I_{th}: 10A UL/CSA and IEC/EN/BS 60947-5-1 designation: A300 Q300. IEC/EN operational characteristics in AC15 category:

[V]	12	24	48	120	240
[A]	6	6	6	6	3

IEC/EN operational characteristics in DC13 category:

[V]	12	24	48	125	250
[A]	3	3	1.5	0.55	0.27

Short circuit protection fuse, max calibre: 10A gG/SC. Contact resistance: ≤20mΩ.

Terminals: Clamp screw with washer
Maximum tightening torque: 1Nm/8.8lb.in.

Mounting adapter and contact elements

The joystick is standard supplied with the mounting adapter and contact elements.

The adapter is fixed to the mounting surface by means of incorporated screws (T_{max} = 0.7Nm/6.1lb.in).

The joystick latches onto the mounting adapter by simple rotation.

Contact elements snap onto the mounting adapter. 2 LPXC... contacts are mounted on joystick LPSJ2... type and 4 LPXC... contacts on LPSJ4... type.

The mounting adapter and contact elements of LPSJ2... types can be internally mounted on LPZ... control stations covers.

Certifications and compliance

Certifications: cULus, EAC, RINA.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

An aluminium and zinc alloy (zama) is used for the metal part whereas plastic parts are made of polyamide.

Mechanical endurance

Operating force: <0.5kg/1.1lb (actuator).
Mechanical life: 5,000,000 cycles.

Mounting adapter

See page 7-36.
Type: LPXAU120M.
The actuators fit into a Ø30mm/Ø1.18" hole. The fixing of the base to the mounting surface is made using the adapter supplied with the actuator and the screws incorporated in the base (Tmax = 0.7Nm/6.1lb.in).

Contact elements for spring return button actuators

See page 7-37 and 7-38.

Type	Termination
1N0	LPXC10 Screw
	LPXCF10 Faston
	LPXCS10 Spring clamp
1EM	LPXC10A Screw
1NC	LPXC01 Screw
	LPXCF01 Faston
	LPXCS01 Spring clamp
1LB	LPXC01D Screw

All LPFB... actuators are standard supplied with action plug for middle contacts.

Certifications and compliance

Certifications: cULus, EAC, RINA.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

LPFD06	RJ45 interface,, Ethernet connection type	1	0.061
LPFD06L100	RJ45 interface, Ethernet connection with 1m long cable	1	0.125

General characteristics

USB and RJ45 communication interface connectors are used in industrial environments, which in recent years have seen an increase in the number of connections between machines, production lines, equipment and measuring instruments. These interfaces provide the transmission of data in both directions between the various devices.

Operational characteristics

- Rated insulation voltage for LPFD01, LPFD03, LPFD05: 5VAC/DC
- Rated insulation voltage for LPFD06: 50VAC/DC
- Installed through a Ø30mm/Ø1.18" drilling with a threaded fixing ring (Tmax = 0.8Nm/7lb.in)
- Transmission characteristics for LPFD01, LPFD03, LPFD05: 5Gbps (625MB/sec)
- Transmission characteristics for LPFD06: Cat.6
- Rated current for LPFD01, LPFD03, LPFD05: 1.5A
- Rated current for LPFD06: 0.6A
- Insulation resistance: ≥100MΩ
- Contact resistance for LPFD01, LPFD03, LPFD05: ≤30mΩ
- Contact resistance for LPFD06: ≤40mΩ
- USB connector class: 3.0 (backward compatible with USB class 2.0)
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP65 on front (with cap mounted)
 - Per IEC/EN: IP20 at rear
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K on front (with cap mounted).

Materials

An aluminium and zinc alloy (zama) is used for the metal part whereas plastic parts are made of polyamide.

Certifications and compliance

Certifications: cULus, EAC, RINA.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

❶ Use contact elements LPXC10A (EM) and LPXC01 (NC) only.
Contact elements LPXC10 (NO) and LPXC01D (LB) cannot be fitted on these actuators.
For the number of contacts that can be fitted, see the indication here to the side.

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

Polyamide.

Mechanical endurance

- Operating force: <0.5kg/1.1lb (actuator).
Mechanical life:
- Spring return actuators: 5,000,000 cycles
 - Push-push actuators: 500,000 cycles.

Mounting adapter

See page 7-36.

Type: LPXAU120.

Actuators are installed through a Ø22mm/Ø0.87" drilling with a threaded fixing ring (Tmax = 2.3Nm/20.3lb.in) also on the cover of LPZ... control stations.

The mounting adapter directly snaps onto the actuator.

Contact elements for spring return button actuators

See page 7-37 and 7-38.

Type	Termination	
1NO	LPXC10	Screw
	LPXCF10	Faston
	LPXCS10	Spring clamp
1EM	LPXC10A	Screw
1NC	LPXC01	Screw
	LPXCF01	Faston
	LPXCS01	Spring clamp
1LB	LPXC01D	Screw

Front-mount types snap onto LPXAU120 mounting adapter (to purchase separately).

Up to 9 contacts can be fitted: 3 each on the left, middle and right, one behind the other.

The LPXAU120 mounting adapter can also be fitted internally to the cover of the LPZ... control station with up to 3 elements per actuator.

1NO	LPXC10	Screw
	LPXCF10	Faston
	LPXCS10	Spring clamp
1EM	LPXC10A	Screw
1NC	LPXC01	Screw
	LPXCF01	Faston
	LPXCS01	Spring clamp
1LB	LPXC01D	Screw

Base mount types snap into LPZP... control station base. See example on page 7-38.

Up to 3 contacts can be fitted per LPZ... control station actuator.

1NO	LPXCB10	Screw
1NC	LPXCB01	Screw

Contact elements for push-push button actuators

See page 7-37.

Type: LPXC10A (1EM)
LPXC01 (1NC)

Contacts snap onto the adapter also internally on the cover surface of LPZ... control stations.

Up to 6 contacts can be fitted: 2 each on the left, middle and right, one behind of the other; up to 3 elements per control station actuator.

All these actuators are standard supplied with action plug for middle contacts.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada, (cULus - File E93601), as Auxiliary Devices; EAC, CCC, RINA. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

Note: for other symbols see page 7-35.

- ① Add letter "L" if illuminated type is required.
 - ② For the type of actuator, add: 1 for flush or 2 for extended.
 - ③ Add the actuator colour: 2 black only for non-illuminated type; 3 green, 4 red, 5 yellow, 6 blue, 8 white or 7 transparent for illuminated version.
 - ④ Products available on specific request for a minimum multiple quantity of 50 pieces per type.
 - ⑤ Consult Technical support for assistance; see contact details or inside front cover.
 - ⑥ Symbol indicating dangerous voltage (IEC 60417 5036-a).
- Examples of complete order codes:
LPCB2258 – extended non-illuminated white pushbutton with + symbol
LPCB1685 – flush illuminated yellow pushbutton actuator with ⚡ symbol.

Operational characteristics

- Any mounting position allowed
- Fine rod adjustment (1-4mm/0.04-0.16") on front with screwdriver by removing actuator cap for mechanical reset buttons
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

Polyamide.

Mechanical endurance

Operating force: <0.5kg/1.1lb (actuator).
Mechanical life: 5,000,000 cycles.

Mounting adapter

See page 7-36.

Type: LPXAU120.

Actuators are installed through a Ø22mm/Ø0.87" drilling with a threaded fixing ring (Tmax = 2.3Nm/20.3lb.in) also on the cover of LPZ... control stations.

The mounting adapter directly snaps onto the actuator.

Contact elements for mechanical reset buttons

See page 7-37 and 7-38.

Type | Termination

Front mount types snap onto LPXAU120 mounting adapter (to purchase separately), if any contacts are needed. Up to 6 contacts can be fitted: 3 each on the left and right, one behind the other.

1NO	LPXC10	Screw
	LPXCF10	Faston
	LPXCS10	Spring clamp
1EM	LPXC10A	Screw
1NC	LPXC01	Screw

	LPXCS01	Spring clamp
1LB	LPXC01D	Screw

Contact elements for spring return button actuators

See page 7-37 and 7-38.

Type | Termination

Front-mount types snap onto LPXAU120 mounting adapter (to purchase separately). Up to 9 contacts can be fitted: 3 each on the left, middle and right; one behind the other. The LPXAU120 mounting adapter can also be fitted internally to the cover of the LPZ... control station with up to 3 elements per actuator.

1NO	LPXC10	Screw
	LPXCF10	Faston
	LPXCS10	Spring clamp
1EM	LPXC10A	Screw
1NC	LPXC01	Screw
	LPXCF01	Faston
	LPXCS01	Spring clamp
1LB	LPXC01D	Screw

Base mount types snap into LPZP... control station base.

See example on page 7-38.

Up to 3 contacts can be fitted per LPZ... control station actuator.

1NO	LPXCB10	Screw
1NC	LPXCB01	Screw

The LPCB... actuators are standard supplied with action plug for middle contacts.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada, (cULus - File E93601), as Auxiliary Devices; EAC, CCC, RINA. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

Example of complete code: LPCB6844R421E.

Normal operation of auto-monitor contact mounted on surface or on cover of control stations

In case of detachment of only the contact element and/or of the mounting adapter with contact element

With contact type LPXC01SM (1NC)

If the contact LPXC01SM detaches from the actuator due to strong vibrations or shock, the equipment can be restored to operating state only when proper mounting of the contact with the actuator is re-established resulting in contact 3-4 closing.

With contact type LPXC02SM (2NC)

If the contact LPXC02SM detaches from the actuator due to strong vibrations or shock, the equipment can be restored to operating state only when proper mounting of the contact with the actuator is re-established resulting in contact 3-4 closing.

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

Polyamide.

Mechanical endurance

- Operating force: <0.5kg/1.1lb (actuator).
Mechanical life:
- Spring return actuators: 5,000,000 cycles
 - Push-push actuators: 500,000 cycles
 - Spring return mushroom-head actuators: 5,000,000 cycles
 - Latch mushroom-head actuators: 300,000 cycles.

Mounting adapter

See page 7-36.

Type: LPXAU120.

Actuators are installed through a Ø22mm/Ø0.87" drilling with a threaded fixing ring (Tmax = 2.3Nm/20.3lb.in) also on the cover of LPZ... control stations.

The mounting adapter directly snaps onto the actuator.

Contact elements for illuminated spring return and mushroom-head latch actuators

See page 7-37 and 7-38.

Type	Termination
------	-------------

Front-mount types snap onto LPXAU120 mounting adapter (to purchase separately).

For TYPES LPCBL1/BL2/BL61... up to 6 contacts can be fitted: 3 each on the left and right, one behind the other.

For TYPES LPCBL66... up to 4 contacts can be fitted:

2 each on the left and right, one behind the other.

The LPXAU120 mounting adapter can also be fitted internally to the cover of the LPZ... control station with up to 2 elements per actuator in addition to the LED element in the middle position.

1NO	LPXC10	Screw
	LPXCF10	Faston

LPCPA050	50kΩ	1	0.040
LPCPA100	100kΩ	1	0.040
LPCPA500	500kΩ	1	0.040

General characteristics for monoblock potentiometers

Monoblock potentiometers are typically used for regulating the parameters of many devices (e.g. the speed of the electric motors through static converters).

The monoblock body design permits direct use of the potentiometer by panel fitting with fixing ring and subsequent tightening of cables into the built-in terminal block.

The potentiometer is made with Cermet technology, which ensures stable, constant resistance values over time. The, UL-certified, range is made for resistance values from 1 to 500kΩ. All potentiometers are IP66, IP67, IP69K and UL Type 4X, which means that they can be used in demanding ambient conditions.

Operational characteristics for monoblock potentiometers

- Rated insulation voltage U_i : 250VAC
- Impulse withstand voltage U_{imp} : 4kV
- Potentiometer included in the product
- Monoblock body with 1-turn graduated scale
- Any fitting position permitted
- Installed through a Ø22mm/Ø0.87" drilling with a threaded fixing ring ($T_{max} = 2.3Nm/20.3lb.in$) also on the cover of LPZ... control stations
- Resistive material: cermet
- Operation: linear
- Resistance tolerance: $\pm 10\%$
- Max. power: 0.5W (70°C)
- Mechanical endurance: 25,000 operations
- Mechanical travel: 290°
- Side cable entry
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K on front
 - Per IEC/EN: IP20 at rear
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K on front.

LPCZSMIP	185...265VAC/DC	80	1	0.020

General characteristics for monoblock buzzers

Monoblock buzzers are used as sound indicators in automation systems and on-board machinery in the production processes. Long life, low consumption values, compact size and the use of materials, in accordance with the North American market, are the main features of this product.

Operational characteristics for monoblock buzzers

- Rated frequency: 50...60Hz
- Auxiliary supply voltage: 9...15VAC/DC, 18...30VAC/DC, 85...140VAC/DC, 185...265VAC/DC
- Maximum consumption: 20mA-0.30W (type 9...15VAC/DC), 15mA-0.40W (type 18...30VAC/DC), 5.5mA-0.80W (type 85...140VAC/DC), 3.5mA-0.95W (type 185...265VAC/DC)
- Minimum activation voltage: >4V (type 9...15VAC/DC), >8V (type 18...30VAC/DC), >15V (type 85...140VAC/DC), >25V (type 185...265VAC/DC)
- Impulse withstand voltage U_{imp} : 4kV
- Installed through a Ø22mm/Ø0.87" drilling with a threaded fixing ring ($T_{max} = 2.3Nm/20.3lb.in$) also on the cover of LPZ... control stations
- Service life: 30,000 hours (permanently powered)
- Side cable entry
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection (type LPCZS...):
 - Per IEC/EN: IP40 on front and IP20 at rear
- Degree of protection (type LPCZS...IP):
 - Per IEC/EN: IP66, IP67, IP69K on front and IP20 at rear
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K on front.

- ① Add letter "S" if Ø22mm metal type is required; "F" if Ø30mm flat metal type is required; "C" if Ø22mm chromed plastic type is required.
 - ② Add letter "L" if illuminated type is required.
 - ③ or the type of actuator, add: 1 for flush or 2 for extended.
 - ④ Add the actuator colour: 2 black only for non-illuminated type; 3 green, 4 red, 5 yellow, 6 blue, 8 white or 7 transparent for illuminated version.
 - ⑤ Products available on specific request for a minimum multiple quantity of 50 pieces per type.
 - ⑥ Consult Technical support for assistance; see contact details or inside front cover.
 - ⑦ Symbol indicating dangerous voltage (IEC 60417 5036-a).
- Examples of complete order codes:
 LPSB2258 - Ø22mm metal white extended pushbutton with + symbol;
 LPFB1685 - Ø30mm illuminated flat metal yellow flush pushbutton with symbol;
 LPCB1344 - Ø22mm chromed plastic green flush pushbutton with "AUTO" symbol.

Operational characteristics

- Any mounting position allowed
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Materials

Polyamide.

Mechanical endurance

Operating force: <0.5kg/1.1lb (actuator).
 Mechanical life: 5,000,000 cycles.

Mounting adapter

See page 7-36.
 Type: LPXAU120...

Contact elements

See page 7-37 and 7-38.

Type	Termination
1NO	LPXC10 Screw
	LPXCF10 Faston
	LPXCS10 Spring clamp
1EM	LPXC10A Screw
1NC	LPXC01 Screw
	LPXCF01 Faston
	LPXCS01 Spring clamp
1LB	LPXC01D Screw

Base mount types snap into LPZP... control station base. See example on page 7-38.

Up to 3 elements can be fitted to the adapter when used with the LPZ... control station.

1NO	LPXCB10	Screw
1NC	LPXCB01	Screw

All these actuators are standard-supplied with action plug for middle contacts.

Certifications and compliance

Certifications obtained: cULus, EAC, CCC, RINA.
 Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

- ① Use LPXC10A (EM) or LPXC01 (NC) type only with push-push actuators. Not suitable for push-push actuators.
- ② Direct (positive) opening action in accordance with IEC/EN/BS 60947-5-1.

Drillings

Minimum recommended distances for Ø22mm/0.87" actuators.

Minimum recommended distances for Ø30mm/1.18" actuators.

Operational characteristics

- Any mounting position allowed
- for LPXAU120M: the base is fixed to the mounting surface by 2 screws incorporated in the base (Tmax = 0.7Nm/6.1lb.in)
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - IP20 for screw termination
 - IP00 for Faston termination.

General characteristics of contact elements

Wiping effect, dual scraping-oscillating action
IEC rated insulation voltage: 690V
IEC rated thermal current Ith: 10A
Conductivity: 5V 1mA
UL/CSA and IEC/EN/BS 60947-5-1 designation: A600 Q600.

IEC/EN operational characteristics in AC15 category:

[V]	12	24	48	120	240	400	480	500	600
[A]	6	6	6	6	6	3	1.5	1.4	1.2

IEC/EN operational characteristics in DC13 category:

[V]	12	24	48	125	250	440	500	600
[A]	3	3	1.5	0.55	0.27	0.15	0.13	0.1

Short-circuit protection fuse: max calibre: 10A gG/SC.

Contact resistance: ≤20mΩ.

Terminals: Clamp screw with washer.

Stroke of contact elements

Maximum conductor cross section for screw terminals

1 or 2 2.5mm² or AWG14 cables.

Mechanical and electrical endurance

Operating force: ≤0.5kg/1.1lb (auxiliary contacts).
Electrical life: 1,000,000 cycles.

Certifications and compliance

Certifications: EAC, cULus, CCC, RINA.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

Push-in wiring technology for rigid cables or with ferrules only - no screwdriver needed
Cable retaining force guaranteed over time even in presence of vibrations and/or impacts

Push-in
technology

Wiring with flat-blade screwdriver
(for flexible bare cable without terminal)

Cable removal
(always using flat-blade screwdriver)

Operational characteristics for screw termination

- Any mounting position allowed
- Snap onto LPXAU120M or LPXAU120 mounting adapters:
 - See the combinations given under "Contact elements" in the right-hand column for each type of pushbutton and selector switch.
 - A maximum of 3 LPXCF... contacts or 2 contacts and 1 LED element (LPXL... mounted in the middle position) can be fixed internally on the cover surface of LPZ... control stations for each actuator
- Max. tightening torque for screw terminals: 1Nm/8.8lb.in
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - IP20 for screw termination
 - IP00 for Faston termination.

Operational characteristics for spring-clamp termination

- Any mounting position allowed
- Elements snap onto mounting adapter, also internally on LPZ... control station cover with maximum of 3 LPXCS... contact or 2 LPXCS... contact and 1 LPXLPS... LED elements (in middle position) per actuator
- No other element can be stacked behind LED elements
- See the combinations given under "Contact elements" in the right-hand column for each type of pushbutton and selector switch
- Suitable for applications with vibration and/or impact work conditions; cable retaining force guaranteed over time in these conditions
- For use with the test elements, see page 7-37
- Wiring also possible after installation with stacked contacts
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection: IP20.

General characteristics of contact elements

Wiping action and dual scraping-oscillating effect
IEC rated insulation voltage: 690V
IEC rated thermal current Ith: 10A
Conductivity: 1mA 5V

Order code	Function	Qty per pkg	Wt
		n°	[kg]

Screw termination.
Direct snap-on mounting on LPZP... control station base.

LPXCB10		10	0.012
LPXCB01		10	0.012

- ① Not suitable for push-push actuators.
- ② Direct opening operation \ominus in accordance with IEC/EN/BS 60947-5-1.

Mounting position on the LPZP... control station base

General characteristics

- Any mounting position allowed
- Max. tightening torque for screw terminals: 1Nm/8.8lb.in
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection: IP20 for screw termination, IP00 for Faston termination.

Operational characteristics for Faston termination and auto-monitoring contact elements

- Snap onto LPXAU120M or LPXAU120 mounting adapters:
 - A maximum of 3 LPXCF... contacts or 2 contacts and 1 LED element (LPXL... mounted in the middle position) can be fixed internally on the cover surface of LPZ... control stations for each actuator
- A maximum of 2 LPXC...SM contacts can be installed on adapters exclusively on non-illuminated mushroom-head latch actuators:
 - In pos. 1-3 (on the left side only of the mounting adapters; refer to REAR VIEW drawing), one only LPXC01SM or LPXC02SM element can be fitted
 - One extra LPXC...SM can be installed in pos. 4-6 (stacked behind the LPX...SM on the mounting adapters)
 - With LPXC01SM, a maximum of two contacts LPXC0... or LPXC1... can be fitted on the right side of the mounting adapters in pos. 2 and 5, one behind the other
 - On the internal surface of LPZ... control station covers, one only LPXC01SM or LPXC02SM contact can be mounted on the mounting adapters in pos. 1 (on the left).
With LPXC01SM, one extra element LPXC0... or LPXC1... can be fitted on the right (on the mounting adapters in pos. 2).
 - No LED element can be used with LPXC...SM types.

Operational characteristics for base mount on LPZP... control stations contact elements

- Snap-on mounting into fixing structures of LPZP... control station base
- Maximum of 3 LPXCB... contact or 2 LPXCB... contact and 1 LPXLB... LED elements (in middle pos. 3) for each actuator of LPZP... control stations
- For use with test elements, consult Technical support; see contact details on inside front cover

Mounting adapter

See page 7-36.

General characteristics

Wiping action and dual scraping-oscillating effect
IEC rated insulation voltage: 690V
IEC rated thermal current Ith: 10A
Conductivity: 5V 1mA
UL/CSA and IEC/EN/BS 60947-5-1 designation: A600 Q600.

IEC/EN operational characteristics in AC15 category:

Test elements for steady light LED elements with screw terminals

LPXT...

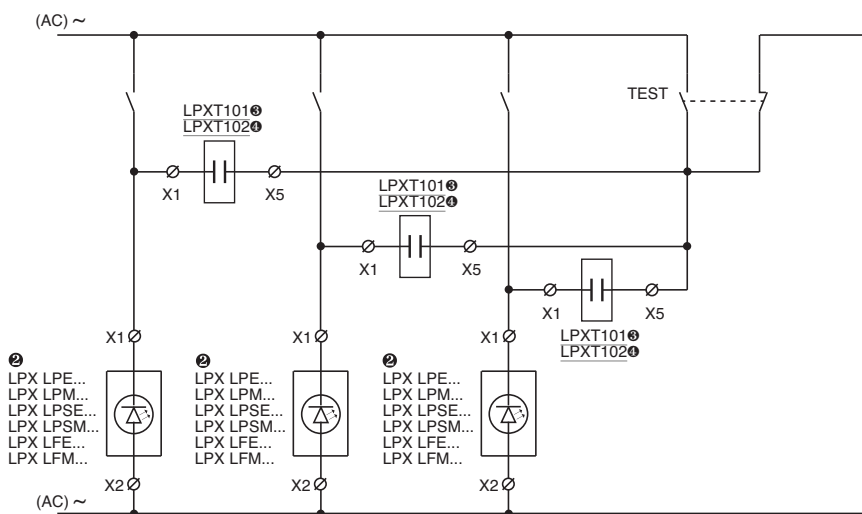

Order code	Description	Qty per pkg n°	Wt [kg]
Screw termination. Without mounting adapter.			
LPXT100 ②	Use with LED elements in AC/DC, types LPXLE... (all), LPXLFB..., LPXLPB and LPXLPSB...	10	0.011
LPXT101 ②	Use with LED elements at 85-140VAC for types LPXLFE..., LPXLPE... and LPXLPE...	10	0.011
LPXT102 ②	Use with LED elements at 185-265VAC for types LPXLFM..., LPXLPM... and LPXLPSM...	10	0.011

- ① Whenever test circuits include illuminated actuators connected with paralleled load, use two LPXT100 for each LED element. Refer to the wiring diagram below or online in the Downloads section at www.LovatoElectric.com
- ② With DC supply only for LPXT100 type, the LED element works at full voltage and brightness while with AC supply for all LPXT... types, the LED element works at half voltage with reduced brightness level.

For LPXT100 test element

For LPXT101 and LPXT102 test elements

- ② Use with LPXLFE..., LPXLPE... or LPXLPE... type.
- ④ Use with LPXLFM..., LPXLPM... or LPXLPSM... type.

Operational characteristics

- Auxiliary supply voltage:
 - LPXT100 test element:
 - 12...30VAC/DC for LPXLEB/LFB/LPB/LPSB...
 - 85...140VAC/DC for LPXLEE...
 - 185...265VAC/DC for LPXLEM...
 - LPXT101 test element: 85...140VAC
 - LPXT102 test element: 185...265VAC
- For use with LED elements LPXLPBB/LPBE/LPBM... types, consult Technical support; see contact details on inside front cover
- Electrical life: 100,000 hours
- Any mounting position allowed
- Snap onto mounting adapter beside the LED element or stacked behind contact elements; also internally on the LPZ... control station cover
- Maximum tightening torque: 1Nm/8.8lb.in
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection: IP20.

Mounting adapter

See page 7-36.
The mounting adapter directly snaps onto the actuator fixed to the mounting surface.

Maximum conductor cross section

1 or 2 2.5mm² or AWG 12 cables.

Wiring diagram

For LPXT100

For LPXT101 - LPXT102

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada, (cULus - File E93601), as Auxiliary Devices; EAC, CCC, RINA. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

- Degree of protection: IP20.

Mounting adapter

See page 7-36.
The mounting adapter directly snaps onto the actuator fixed to the mounting surface.

Maximum conductor cross section

1 or 2 2.5mm² or AWG12 cables.

Wiring diagram

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada, (cULus - File E93601), as Auxiliary Devices; EAC, CCC, RINA. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

Push-in wiring technology for rigid cables or with ferrules only - no screwdriver needed
Cable retaining force guaranteed over time even in presence of vibrations and/or impacts

Push-in technology

Wiring with flat-blade screwdriver (for flexible bare cable without terminal)

Cable removal (always using flat-blade screwdriver)

Operational characteristics

- Any mounting position allowed
- Elements snap onto adapter, also internally on LPZ... control station cover (in middle position) per actuator
- No other element can be stacked behind LED elements
- See the combinations given under "Contact elements" in the right-hand column for each type of pushbutton and selector switch
- Suitable for applications with vibration and/or impact work conditions; cable retaining force guaranteed over time in these conditions
- For use with the test elements, see page 7-37
- Wiring also possible after installation with stacked contacts
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection: IP20.

Mounting adapter

See page 7-36.

The mounting adapter directly snaps onto the actuator fixed to the mounting surface.

General characteristics

- Rated frequency: 50-60Hz
- Auxiliary supply voltage:
 - 12...30VAC/DC; 85...140VAC; 185...265VAC
- Maximum consumption: 17mA-0.50W (12...30VAC/DC); 20mA-0.40W (85...140VAC); 18mA-0.55W (185...265VAC)
- Total protection:
 - Against overvoltages
 - Against stray currents in wiring
 - To reduce flickering phenomenon
 - To withstand vibrations
- Minimum activation voltage:
 - 4V-1mA (12...30VAC/DC); 30V-4mA (85...140VAC); 55V-4mA (185...265VAC)
- Electrical life: 100,000 hours.

Wiring diagram for LED elements

Maximum conductor cross section

1 or 2 2.5mm² or AWG14 cables. For 2.5mm² section, use rounded cable terminal with metal end at least 10mm.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada, (cULus - File E93601), as Auxiliary Devices; EAC, CCC, RINA. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n° 14.

Mounting position on the LPZ... control station base

Operational characteristics

- Any mounting position allowed
- Snap-on mounting into fixing structures of LPZ... control station base (in middle pos. 3) for each actuator
- See the combinations given under "Contact elements" in the right-hand column for each type of pushbutton and selector switch
- For use with test elements, consult Technical support; see contact details on inside front cover
- Maximum tightening torque for screw terminals: 1Nm/8.8lb.in
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection: IP20.

General characteristics

General characteristics

The main function of the illuminated plastic disk is to make the emergency button more identifiable by ensuring its operation in conditions of low visibility. The illuminated plastic disks integrate two light functions: steady or flashing. The function choice depends on the wiring.

Operational characteristics

- Auxiliary supply voltage: 24VAC/DC, 110...120VAC or 220...240VAC
- Rated frequency: 50/60Hz
- Electrical life: >30,000 hours
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12, 12K.

Certifications and compliance

Certifications: cULus
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508, CSA C22.2 n°14

Control station base

Fixing structures for contact and/or LED elements
For each actuator: Maximum of 3 contacts or 2 contacts and 1 LED

Control station cover (inside view)

Easy identification reference
For actuator and corresponding contact and/or LED elements

General characteristics

CONTROL STATIONS WITHOUT ACTUATOR

- 1 to 6 holes
- Compact dimensions
- Easy wiring for base-mount contact and LED elements; possible use of screw and spring-clamp terminal contact or LED elements on the inside surface of the cover using mounting adapter
- Numerous cable entries.

Operational characteristics

- Cable entry:
 - LPZP1... knockouts:
 - M16/PG11 (1 at rear and 1 on left side)
 - M20/M25/PG13.5/PG16 (1 each on top and bottom)
 - LPZP2... knockouts:
 - M16/PG11 (2 at rear)
 - M20/PG13.5 (1 on each side)
 - M20/M25/PG13.5/PG16 (1 each on top and bottom)
 - LPZP3/P4/P5/P6 A8 knockouts:
 - M16/PG11 (2 at rear)
 - M20/PG13.5 (2 on each side)
 - M20/M25/PG13.5/PG16 (1 each on top and bottom)
- Any mounting position allowed
- Tightening torque of cover screws $T_{max} = 1.8Nm/16lb.in$
- Ambient conditions:
 - Operating temperature: $-25...+70^{\circ}C$
 - Storage temperature: $-40...+85^{\circ}C$
- Degree of protection:
 - Per IEC/EN: IP66, IP67 and IP69K
 - Per UL: Type 1, 2, 3R, 4, 4X, 12K.

Materials

Polycarbonate.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada, (cULus - File E93601), as Auxiliary Devices; EAC, CCC, RINA. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, UL508A for types without actuators / UL508 for types complete with actuator, CSA C22.2 n° 14.

❶ Maximum configuration: n°3 LP9XC... contact elements.

General characteristics

LOVATO Electric palm switches LP9... types are designed for machine stop and immediate service control applications. They are widely used in the most diverse applications, including emergency stop for escalators, gate openers, pedestrian crossing buttons for disabled users, etc... The ergonomic design and large surface for an easy actuation with the hand, elbow or foot, ensures immediate actuation of machinery and equipment even if the operator has his hands full.

This new range is split into two versions:

- Momentary mushroom (available in grey/black or grey/red);
- Emergency mushroom "pull-to-release" (available in yellow/red only).

Operational characteristics

- Cable entry (knockout version):
 - M20/PG13.5 (1 on each side)
 - M16/PG11 (2 on the cover bottom)
- Any mounting position allowed
- Tightening torque of cover screws Tmax = 0.8Nm/7lb.in
- Ambient conditions:
 - Operating temperature: -25...+75°C
 - Storage temperature: -40...+85°C
- IEC/EN degree of protection: IP65.

CONTACT ELEMENTS

- Rated insulation voltage: 690V
- Rated thermal current Ith: 10A
- Conductivity: 5V 10mA
- Tightening torque of contact screws: 0.5...0.8Nm
- Conductor cross section: 1 or 2 conductors - 0.5...2.5mm²
- IEC/EN 60947-5-1 designation: A600 Q300.

Minimum operational characteristics in AC15:

[V]	12	24	48	120	240	400	480	500	600
[A]	6	6	6	6	3	1.9	1.5	1.4	1.2

Minimum operational characteristics in DC13:

[V]	12	24	48	125	250	440	500	600
[A]	3	3	1.5	0.55	0.27	0.15	0.13	0.1

Operational characteristics in AC15: 24V 10A and 400V 4A

- Short-circuit protection fuse: max. calibre 10A gG/gL
- Contact resistance: ≤25mΩ
- Operating force: ≤2.6N
- Mechanical life: 1,000,000 cycles.

Stroke of contact elements

■ Closed contact □ Open contact

Material

PC-ABS for button and control station.
PA66 for plastic operator frame (LP9S...).
Chrome-plated aluminium and zinc alloy (zama) for metal operator frame (LP9P...).

Compliance

Compliant with standards: IEC60947-5-1.

[Ⓢ] It is not possible to use plastic disks in combination with enclosure with protection.

General characteristics

Enclosures made of aluminium alloy suitable for pushbuttons, selector switches and pilot lights Ø22mm/0.87" Platinum series.

Possible use of contact elements on the inside surface of the cover using the relevant mounting adapter.

The thickness of the enclosure is suitable for drilling.

Up to 6 contacts can be fitted; 2 each on the left, middle and right, one behind the other.

For the possible combinations consult this chapter on the actuator pages.

Operational characteristics

- Cable entry: Ø21mm/0.83" (for M20 or PG13.5 cable gland)
- Degree of protection:
 - Per IEC/EN: IP66 and IP67
 - Per UL: Nema 4X
- Earth connection through threaded holes on the base and on the cover (screws supplied)
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+85°C.

Certifications and compliance

Certifications obtained: cULus.
Compliant with standards: IEC/EN/BS 60947-5-1.

[Ⓢ] Not available for multiholes LPZM...C type.

Visual code	Red	Yellow	Orange	Blue	Green	White
Meaning	Danger. Emergency.	Warning and caution. Abnormal situation.		Mandatory command.	Normal situation. Regular operation.	No specific meaning.
Sound	Fast modulated repetition or high-pitch pulsing.	Continuous short sound.		Alternating sound at constant tone	Constant and prolonged sound after an alarm.	Other sounds.
Correlated actions	Immediate intervention to deal with dangerous situation.	Control intervention required.		Intervention needed for mandatory action.	No specific action.	Depending on the situation.

Interpretation of light and sound signals for signal towers and beacons

Light and sound signals are a fundamental element for the safety of a system.

To avoid incorrect interpretations, a European standard has been introduced attributing an unambiguous meaning to visual or audible signals.

Each colour or sound alarm corresponds to a specific state of operation of the connected system and various levels of warning, as shown in the table above, according to EN 981-IEC/EN/BS 60073 standards. The white module can be assigned a meaning as desired.

① For accessories and spare parts see page 8-9 and 10.

General characteristics

The Ø45mm/1.77" signal towers are supplied completely assembled with the possibility of up to 3 light modules with a sound module. The high-brightness LED circuit lighting ensures low consumption and long life.

Technical characteristics

- Supply voltage: 24VDC (±10%)
- Light module consumption: 37mA per module
- Sound module consumption: 15mA
- Sound intensity: 80dB/1m, pulsed or continuous sound
- Material: polycarbonate
- Connections: screw clamp terminals and maximum conductor section 1.5mm²/16AWG
- Tightening torque: 0.5Nm/4.5lb.in
- Operating temperature: -20...+50°C
- IEC degree of protection: IP54.

Certifications and compliance

Certifications obtained: cULus, EAC.
Compliant with standards: IEC/EN/BS 60947-5-1, IEC/EN/BS 60947-1, UL508, CSA C22.2 n° 14.

Combinations

For accessories and spare parts see page 8-9 and 10.

- ② For fixing base LTN50BP2 the extension tube LTNP... without threaded end has to be used.
- ③ Extension tubes with threaded end LTNP...T have to be used for all the fixing bases except for LTN50BP2.

General characteristics

Signal towers are fundamental elements in manufacturing processes for the visual and audible signaling of the system status.
The signal towers can be assembled by stacking up to 5 light modules or 4 light modules and 1 sound module.

Technical characteristics

- Maximum operational voltage: 26.4VDC - 240VAC
- Light, sound and wiring modules consumption:
 - light modules: 1.2VA
 - sound modules: 1.7VA
 - wiring modules: 1VA
- Number of stackable modules: 5
- Connections: screw clamp terminals and conductor section 0.25...1.5mm²/AWG16...24
- Operating temperature: -30...+50°C
- IEC degree of protection: IP65 for light modules, top cover and sound module LTN50MSL.

Certifications and compliance

Certifications obtained: cULus, EAC.
Compliant with standards: IEC/EN/BS 60947-5-1, IEC/EN/BS 60947-1, UL508, CSA C22.2 n° 14.

8LT73B9A	Green, orange, red, 24VDC	1	0.090
8LT73S2B9A	Green, orange, red, with continuous or pulsed sound 24VDC	1	0.200
8LT73B9B	Blue, orange, red, 24VDC	1	0.090
8LT73S2B9B	Blue, orange, red, with continuous or pulsed sound 24VDC	1	0.200

❶ For accessories and spare parts see page 8-9 and 10.

General characteristics

The multicoloured signal towers incorporate the possibility of up to 3 different colours in a single light module. In the event of two or more alarms, the multicoloured module lights up in alternating colours corresponding to the event. The multicoloured module must always be placed last, at the top of the tower, should it be used together with light modules 8LT7EL... 8LT7GL... or 8LT7FL...

Technical characteristics

- Supply voltage: 24VDC (±10%)
- Light and sound module consumption: 90mA
- Sound intensity: 90dB/1m
- Material: polycarbonate
- Number of stackable elements: 4 with 8LT73B modules, 1 with 8LT73S modules
- Connections: screw clamp terminals and maximum conductor section 1.5mm²/16AWG
- Tightening torque: 0.5Nm/4.5lb.in
- Operating temperature: -20...+50 °C
- IEC degree of protection: IP65.

Certifications and compliance

Certifications obtained: cULus, EAC.
Compliant with standards: IEC/EN/BS 60947-5-1, IEC/EN/BS 60947-1, UL508, CSA C22.2 n° 14.

Combinations

For accessories and spare parts see page 8-9 and 10.

❶ For accessories and spare parts see page 8-9 and 10.

General characteristics

Signal towers are fundamental elements in manufacturing processes for the visual and audible signalling of the system status.

The signal towers can be assembled by stacking up to 7 modules, in the following sequence, starting from the top: red, yellow, orange, blue, green and white.

Technical characteristics

- Maximum operational voltage: 250VAC/DC
- Flash light and sound module consumption:
 - 8LT7FLB... in AC: 135mA
 - 8LT7FLB... in DC: 75mA
 - 8LT7FLE... 20mA
 - 8LT7FLM... 15mA
- Material: polycarbonate or anodised aluminium
- Number of stackable modules: 7
- Connections: screw clamp terminals and maximum conductor section 1.5mm²/16AWG
- Tightening torque: 0.5Nm/4.5lb.in
- Operating temperature: -20...+50°C (12VAC max. up to +40°C)
- IEC degree of protection: IP65.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - file E318016) as Power Circuit and motor-mounted Apparatus - Stackable tower lights, EAC. Compliant with standards: IEC/EN/BS 60947-5-1, IEC/EN/BS 60947-1, UL508, CSA C22.2 n° 14.

Combinations

For accessories and spare parts see page 8-9 and 10.

❶ For accessories and spare parts see page 8-9 and 10.

❷ For 8LT7S2B... = 84.5dB.

❸ For 8LT7S2B... = 82.6dB.

Technical characteristics

- The sound module must always be placed last, on the top of the tower (it cannot be fitted with an 8LT73... multicoloured module).
- Sound module consumption:
 - 8LT7S0B...: 25mA
 - 8LT7S1B...: 40mA
 - 8LT7S2B...: 200mA
 - 8LT7S2E...: 40mA
 - 8LT7S2M...: 30mA
- Material: polycarbonate
- Max. number of sound modules: 1 per tower
- Connections: screw clamp terminals and maximum conductor section 1.5mm²/16AWG
- Tightening torque: 0.5Nm/4.5lb.in
- Operating temperature: -20...+50°C (12VAC max. up to +40°C)
- IEC degree of protection: IP65 (IP54 if 8LT7S0B... sound module used).

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - file E318016) as Power Circuit and motor-mounted Apparatus - Stackable tower lights, EAC. Compliant with standards: IEC/EN/BS 60947-5-1, IEC/EN/BS 60947-1, UL508, CSA C22.2 n° 14.

Combinations

8LB6S2B6	Blue, 24VAC/DC (80dB)	1	0.060
8LB6S2B8	White, 24VAC/DC (80dB)	1	0.060

General characteristics

Signal beacons are fundamental elements in manufacturing processes for the visual and audible signalling of the system status.

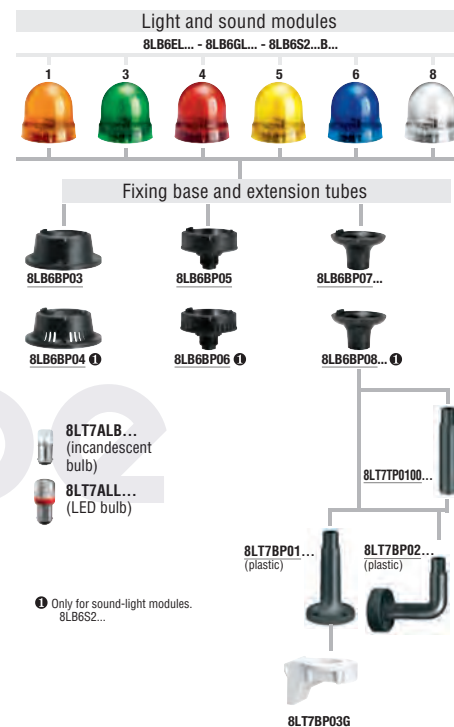

Technical characteristics

- Maximum operational voltage: 250VAC/DC
- Sound module consumption: 8LB6S2...:150mA
- Material: polycarbonate
- Connections: screw clamp terminals and maximum conductor section 1.5mm²/16AWG
- Tightening torque: 0.5Nm/4.5lb.in
- Operating temperature: -20...+50°C
- IEC degree of protection: IP54 (IP30 if used with bases 8LB6BP04, 8LB6BP06, 8LB6BP08...).

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 60947-5-1, IEC/EN/BS 60947-1.

8LT7TP0100G	100mm/3.94", grey colour	1	0.029
8LT7TP0100	100mm/3.94", black colour	1	0.029

General characteristics

The assembly operation for the signal tower is simple and fast and does not require the use of any tools. The bayonet fitting with slight pressure and simple circular movement makes it possible to mount each element on top of the previous one. There are specific white marks to indicate the correct alignment.

- Aluminium-zinc alloy housing
- Maximum of 2 auxiliary contacts
- IEC degree of protection IP40 and IP65
- PG11 cable entry.

Page 9-21

ROPE-PULL LEVER LIMIT SWITCHES FOR NORMAL STOPPING

- Self-extinguishing polymer thermoplastic housing
- Aluminium-zinc alloy housing
- IEC degree of protection IP40, IP65 and IP66
- PG11 and PG13.5 cable entry.

Page 9-23

ROPE-PULL LEVER LIMIT SWITCHES FOR EMERGENCY STOPPING

- Compliant to ISO 13850 standards
- IEC degree of protection IP65 and IP66
- PG11 and PG13.5 cable entry.

Page 9-24

SAFETY SWITCHES WITH SOLENOID AND SEPARATE ACTUATOR

- Actuator locked by solenoid
- For safety applications up to:
 - Safety integrity level (SIL), category 3: according to EN/BS 62061
 - PLe according to EN/BS ISO 13849-1
- Interlock with mechanical lock Type 2 according to EN/BS ISO 14119
- Self-extinguishing polymer thermoplastic housing and actuator head
- IEC degree of protection IP65
- Three threaded conduit entries M20.

Page 9-26

PLASTIC MICRO SWITCHES

- Polymer thermoplastic housing
- Changeover contact switch
- IEC degree of protection IP00 or IP20.

Page 9-27

FOOT SWITCHES

- Versions with or without protection cover
- Self-extinguishing polymer thermoplastic housing
- Aluminium-zinc alloy housing
- IEC degree of protection IP54 and IP65
- M20 cable entry.

General characteristics

The LOVATO Electric limit switches have been designed to satisfy requirements comprising quick installation, easy wiring, simple setup, modularity, sturdiness and constant reliability.

The body cover is hinged at the bottom and removable. The innovative locking bayonet mechanism permits to remove and reposition the operating head in the required configuration with no tools. The auxiliary contact blocks are removable assuring remarkable wiring ease.

Operational characteristics

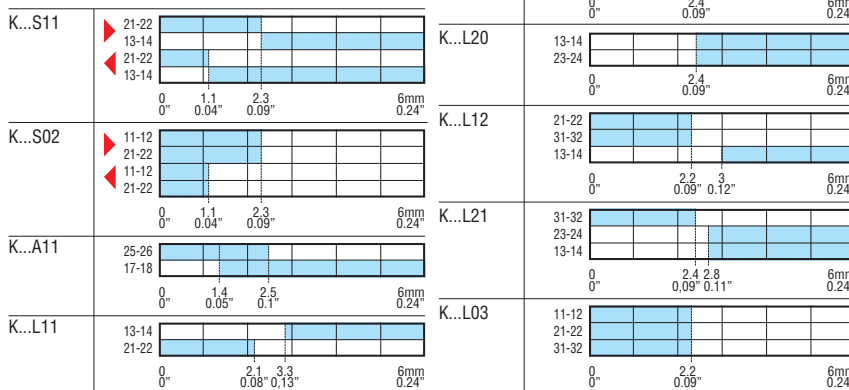

- Maximum operating rate: 3600 cycles/h
- Switching speed: 0.5...1.5m/s
- Mechanical life: >10 million cycles
- IEC conventional thermal current Ith: 10A
- UL/CSA and IEC/EN/BS 60947-5-1 designation:
 - A600 Q300 for KB...-KC... types
 - A300 Q300 for KM...-KN... types
- IEC rated insulation voltage Ui:
 - 690VAC for KB...-KC... types
 - 440VAC for KM...-KN... types
- IEC rated impulse withstand voltage Uimp:
 - 6kV for KB...-KC... types
 - 4kV for KM...-KN... types
- Class II insulation for KB...-KC... only
- Contact resistance: <10mΩ
- Short-circuit backup protection: 10A gG/SC quick fuse
- Operators of aluminium-zinc alloy
- Housing:
 - KB...-KC... types: self-extinguishing double-insulation polymer thermoplastic
 - KM...-KN... types: aluminium-zinc alloy
- Cable entry: M20 standard supplied; PG13.5 and 1/2 NPT available (see the side note for details)
- Operating head fixing: locking bayonet insert
- Operating force: 5N / 1.1lb
- Cable connection: self-releasing screw terminal
- Tightening torque:
 - Switch fixing: 2.5Nm / 22.1lb.in
 - Contact terminals: 0.8Nm / 7lb.in
 - Body lid screw fixing: 0.8Nm / 7lb.in
- Conductor section: 1 or 2 2.5mm² max / 16-14AWG
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3
 - IEC degree of protection: IP20 for terminals
 - IEC degree of protection: IP65 for body housing.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93601), as Auxiliary Devices - Limit switches; EAC, CCC.

Compliant with standards: EN/BS 50047, IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204-1, UL508, CSA C22.2 n° 14.

① Ø19x5mm = Ø0.75x0.2"

② Ø50x10mm = Ø1.97"x0.39"

③ Direct (positive) opening action ⊖; safety function according to IEC/EN/BS 60947-5-1.

④ Consult Technical support for information; see contact details on inside cover.

General characteristics

The LOVATO Electric limit switches have been designed to satisfy requirements comprising quick installation, easy wiring, simple setup, modularity, sturdiness and constant reliability.

The body cover is hinged at the bottom and removable.

The innovative locking bayonet mechanism permits to remove and reposition the operating head in the required configuration with no tools. The heads have axial rotation of 45° angles.

The auxiliary contact blocks are removable assuring remarkable wiring ease.

Operational characteristics

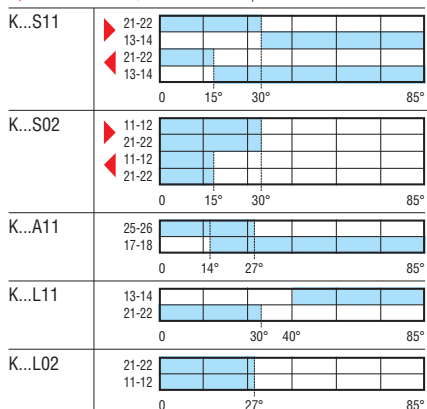

- Maximum operating rate: 3600 cycles/h
- Switching speed: 0.5...1.5m/s
- Mechanical life: >10 million cycles
- IEC conventional thermal current Ith: 10A
- UL/CSA and IEC/EN/BS 60947-5-1 designation:
 - A600 Q300 for KB... types
 - A300 Q300 for KM... types
- IEC rated insulation voltage Ui:
 - 690V for KB... types
 - 440V for KM... types
- IEC rated impulse withstand voltage Uimp:
 - 6kVAC for KB... types
 - 4kVAC for KM... types
- Class II insulation for KB only
- Contact resistance: <10mΩ
- Short-circuit backup protection: 10A gG/SC quick fuse
- Operators of aluminium-zinc alloy
- Housing:
 - KB... types: self-extinguishing double-insulation polymer thermoplastic
 - KM... types: aluminium-zinc alloy
- Cable entry: M20 standard supplied; PG13.5 and 1/2 NPT available (see the side note for details)
- Operating head fixing: locking bayonet insert
- Operating torque: 3Ncm / 4.25ozin
- Cable connection: self-releasing screw terminal
- Tightening torque:
 - Switch fixing: 2.5Nm / 22.1lb.in
 - Contact terminals: 0.8Nm / 7lb.in
 - Body lid screw fixing: 0.8Nm / 7lb.in
- Conductor section: 1 or 2 2.5mm² max / 16-14AWG
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3
 - IEC degree of protection: IP20 for terminals
 - IEC degree of protection: IP65 for body housing.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93601), as Auxiliary Devices - Limit switches; EAC, CCC.

Compliant with standards: EN/BS 50047, IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204-1, UL508, CSA C22.2 n° 14.

General characteristics

The LOVATO Electric limit switches have been designed to satisfy requirements comprising quick installation, easy wiring, simple setup, modularity, sturdiness and constant reliability.

The body cover is hinged at the bottom and removable.

The innovative locking bayonet mechanism permits to remove and reposition the operating head in the required configuration with no tools. The heads have axial rotation of 90° angles (180° for KC... and KN... types).

The auxiliary contact blocks are removable assuring remarkable wiring ease.

Operational characteristics

- Maximum operating rate: 3600 cycles/h
- Switching speed: 0.5...1.5m/s
- Mechanical life: >10 million cycles
- IEC conventional thermal current Ith: 10A
- UL/CSA and IEC/EN/BS 60947-5-1 designation:
 - A600 Q300 for KB...-KC... types
 - A300 Q300 for KM...-KN... types
- IEC rated insulation voltage Ui:
 - 690VAC for KB...-KC... types
 - 440VAC for KM...-KN... types
- IEC rated impulse withstand voltage Uimp:
 - 6kV for KB...-KC... types
 - 4kV for KM...-KN... types
- Class II insulation for KB...-KC... only
- Contact resistance: <10mΩ
- Short-circuit backup protection: 10A gG/SC quick fuse
- Operators of aluminium-zinc alloy
- Housing:
 - KB...-KC... types: self-extinguishing double-insulation polymer thermoplastic
 - KM...-KN... types: aluminium-zinc alloy
- Cable entry: M20 standard supplied; PG13.5 and 1/2 NPT available (see the side note for details)
- Operating head fixing: locking bayonet insert
- Operating force: 3Ncm/4.25ozin
- Cable connection: self-releasing screw terminal
- Tightening torque:
 - Switch fixing: 2.5Nm / 22.1lb.in
 - Contact terminals: 0.8Nm / 7lb.in
 - Body lid screw fixing: 0.8Nm / 7lb.in
- Conductor section: 1 or 2 2.5mm² max / 16-14AWG
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3
 - IEC degree of protection: IP20 for terminals
 - IEC degree of protection: IP65 for body housing.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93601), as Auxiliary Devices - Limit switches; EAC, CCC.

Compliant with standards: EN/BS 50047, IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204-1, UL508, CSA C22.2 n° 14.

- ① Not suitable for key operated KBN / KCN, hinged operating KBP / KCP / KMP / KNP and slotted lever KBQ / KCQ / KMQ / KNQ types.
- ② Direct (positive) opening action (↷); safety function according to IEC/EN/BS 60947-5-1.
- ③ Not suitable for KC and KN types.
- ④ Consult Technical support for information; see contact details on inside cover.

General characteristics

The KXB... contact blocks can be used with the K series of limit switches. Combinations of 2 contacts with slow or snap action and, for KB... and KM... types only, 3 slow action contacts are available.

The NC contacts have direct opening operation, a specific safety principle.

The particular four-point contacts warrant high conductivity in any sort of application. The removal of the contacts from the limit switch body provides remarkable wiring ease and reduces installation time as well.

The KXC... bodies, complete with auxiliary contacts, can be used as spare parts for the K series limit switches or coupled with the KXA... operating heads, to obtain complete limit switches in the required configurations.

The body cover is hinged at the bottom and removable to have the best access. Each body includes the innovative locking bayonet mechanism of the operating head. Plastic and metal types are available.

Operational characteristics

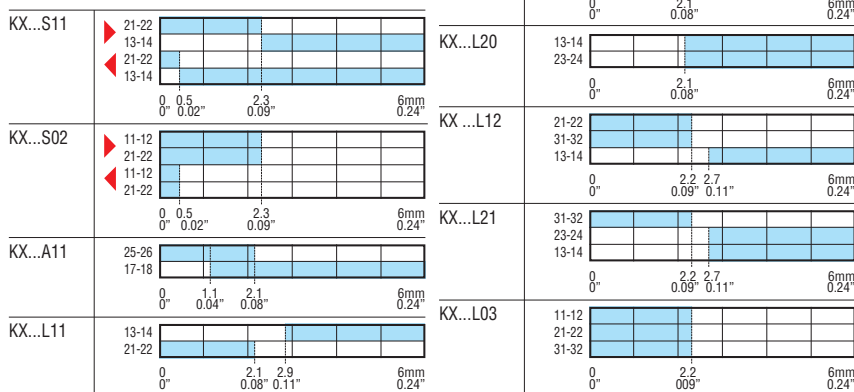

- Mechanical life: >10 million cycles
- IEC conventional thermal current Ith: 10A
- Conductivity: 10mA 5V
- UL/CSA and IEC/EN/BS 60947-5-1 designation:
 - A600 Q300 for KXCB...-KXCC... types
 - A300 Q300 for KXCM...-KXCN... types
- IEC rated insulation voltage Ui:
 - 690VAC for KXCB...-KXCC... types
 - 440VAC for KXCM...-KXCN... types
- IEC rated impulse withstand voltage Uimp:
 - 6kV for KXCB...-KXCC... types
 - 4kV for KXCM...-KXCN... types
- Class II insulation for KXCB...-KXCC... only
- Contact resistance: <10mΩ
- Short-circuit backup protection: 10A gG/SC quick fuse
- Housing:
 - KXCB...-KXCC... types: self-extinguishing double-insulation polymer thermoplastic
 - KXCM...-KXCN... types: aluminium-zinc alloy
- Cable entry: M20 standard supplied; PG13.5 and 1/2 NPT available (see the side note for details)
- Operating head fixing: locking bayonet insert
- Cable connection: self-releasing screw terminal
- Tightening torque:
 - Switch fixing: 2.5Nm / 22.1lb.in
 - Contact terminals: 0.8Nm / 7lb.in
 - Body lid screw fixing: 0.8Nm / 7lb.in
- Conductor section: 1 or 2 2.5mm² max / 16-14AWG
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3
 - IEC degree of protection: IP20 for terminals
 - IEC degree of protection: IP65 for body housing.

Certifications and compliance

Certifications obtained: UL Listed for US and Canada (File E93601), as Auxiliary Devices for KX C... body types only. UL Recognized for USA and Canada (cURus - File E93601) as component - Auxiliary devices for contact blocks only; products having this type of marking are intended for use as components of complete workshop-assembled equipment; EAC for all.

Comply with standards: EN/BS50047, IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204-1, UL508, CSA C22.2 n° 14.

① Ø19x5mm = Ø0.75"x0.2".

② Ø50x10mm = Ø1.97"x0.39".

General characteristics

The KXA... operating heads can be used as spare parts for the K series limit switches or coupled with the KXC... bodies to obtain complete limit switches in the required configurations.

The heads are made of metal and warrant sturdiness and operating reliability in all conditions.

The shape of the coupling section with the body of the K series switches permits to orient the head in any 45° angle position while the initial lever and rod position can be adjusted 360° at 15° angle positions.

The head fixing to the body is achieved by the innovative locking bayonet mechanism so there is no need of tools. Tightening torque for eventual operating head actuator fixing is 0.8Nm/7lb.in.

calpe

Cable glands and cable conduit

Order code	Description	Qty per pkg	Wt
		n°	[kg]

PLN...HSBW

General characteristics

The PL types are for general purpose use. The extensive range of models with numerous actuators and multiple contact configurations is the optimal solution to the diverse installation requirements.

Overall simple design, oversize contacts and choice materials ensure durable and safe operation. The metal alloy housing and resistant thermoplastic actuators warrant reliable heavy-duty features for any sort of operating conditions.

The PL series limit switches are available with IEC IP40 or IP65 degree of protection; this characteristic is ensured by the use of appropriate sealing gasket.

The IEC IP65 version is easily identified by the "W" suffix of its order code and can be used in adverse ambient conditions.

Operational characteristics

- Maximum operating rate: 3600 cycles/h
- Mechanical life: >10 million cycles
- IEC utilisation category:
 - DC13 duty: 10A 24V
 - AC15 duty: 5A 250V, 3A 400V

General characteristics

The PL limit switches were initially made specifically for hoisting or lifting duty and then used in other diverse applications. The type with latch and manual release as well as the one with manual reload and magnetic release are designed so the switch remains opened after the switching of the NC contact. In the first instance, the contact closing is made by pushing the release button. In the second case, the reloading is obtained by pushing the shaft end or else pulling it from the top for the IP65 types.

The limit switches with dual operation can be replaced by two standard switches, for the stop control of moving mechanisms with two directions of running (e.g. automatic doors). It is equipped with two opposed operating mechanisms and one NC contact for each mechanism (i.e. 2NC).

The simple constructive design, oversize contacts and careful material combinations warrant safe and constant operation. The metal-alloy housing and the thermoplastic mechanism material of first-rate mechanical features assure reliability and durability with any type of operating condition.

Operational characteristics

- Maximum operating rate: 3600 cycles/h
- Mechanical life: >10 million cycles

General characteristics

The RS series limit switches are designed and manufactured according to European standards for dimensions and operating characteristics.

The double-insulated housing of the limit switch is made of glass-reinforced self-extinguishing polyamide resin to protect internal circuits against shocks or impacts and in industrial environments, against accidental ingress of tools and accidental contact.

The contacts are dimensioned to ensure self cleaning of the silver-alloy contact surfaces.

Operational characteristics

General characteristics

The rope-operated switches for emergency stop are mainly suitable for emergency stop or alarm systems for machinery which occupies a large space. This emergency stop can be achieved from any point when the rope is manually pulled each time. The choice of the body, between plastic and metal, can satisfy the most diversified requirements for sturdiness and size.

Operational characteristics

- Maximum operating rate: 1800 cycles/h
- Mechanical life: 100,000 cycles
- IEC utilisation category:
 - DC13 duty: 1.5A 24V (10A 24V only for PLN-P2L)
 - AC15 duty: 6A 250V (3A 400V only for PLN-P2L)
- IEC conventional thermal current Ith: 10A for RS and PLN; 6A for P2L
- IEC rated insulation voltage Ui: 250VAC (400V for PLN-P2L)
- Contact resistance: <10mΩ
- Short-circuit backup protection: 10A gG/SC quick fuse
- Cable entry: PG11 for RS, PLN and P2L types (PLN and P2L complete with cable gland)
- Cable connection: self-releasing screw terminal
- Tightening torque:
 - Switch fixing: 2.5Nm / 22.1lb.in
 - Contact terminals: 0.8Nm / 7lb.in (for RS), 1.8Nm / 15.9lb.in (for PL and P2L)
 - Body lid screw fixing: 0.8Nm / 7lb.in
- Conductor section: 1 or 2 2.5mm² max / 16-14 AWG
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3
 - IEC degree of protection: IP65.

Operation

Certification and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93601), as Auxiliary Devices - Limit switches for RS13... types only; EAC for all. Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204-1, ISO 13850; also UL508, CSA-C22.2 n° 14 for RS types.

KEXN2	Angled key	1	0.013
KEXN5	Toggle key	1	0.019

ACTUATOR HAED ORIENTATION

Follow these steps in order to properly direct the actuator head of KEN... safety switches:

- Unscrew the 4 Ø2 Pozidriv 1 screws
- Remove the actuator
- Check the gasket is properly placed
- Put the actuator head in the desired position and press for fixing it into the case
- Screw the the 4 Ø2 Pozidriv 1 screws (tightening torque 0.8Nm / 7lb.in)
- Before start using the new configuration, repeat the functional tests of the system.

General characteristics

The safety switches with solenoid avoid access in hazardous areas until the receiving of an appropriate signal: the actuator key could be locked or released through a solenoid dependent upon it's powered state (locked actuator with energised solenoid for KEN1E... /locked actuator with de-energised solenoid for KEN1M...).

A manual emergency release is available.

Three different electric contact combinations are available. Contacts are actuated separately by key actuator or by solenoid and allow to cover the installations' main common needs.

Operational characteristics

- For safety applications up to:
 - Safety integrity level (SIL), category 3 according to EN/BS 62061
 - PLe according to EN/BS ISO 13849-1
- Interlock with mechanical lock Type 2 according to EN/BS ISO 14119.
- Actuator insertion force: 15N
- Release actuator extraction force: 30N
- Locked actuator holding force: 1200N
- Maximum operating rate: 600 cycles/h
- Mechanical life: 1.000.000 cycles
- B10d: 4.000.000 cycles
- IEC conventional thermal current: 10A
- IEC/EN/BS 60947-5-1 designation: A300 Q300
- AC15 duty:
 - 24V - 10A
 - 230V - 4A
- DC13 duty:
 - 24V - 4A
- IEC rated insulation voltage Ui: 250V
- Rated impulse withstand voltage: 2.5kV
- Short-circuit backup protection: 10A Gg
- Max solenoid consumption:
 - 24V: 8.3W
 - 120V: 8.1W
 - 230V: 6.8W
- IEC terminals degree of protection: IP20
- IEC body housing degree of protection: IP65
- Self-extinguishing polymer thermoplastic housing and actuator head
- Actuator head orientation can be modified by the user in 4 axial positions (90° step)
- Cables entries: 3 x M20
- Cable connection: self-releasing screw terminal
- Tightening torque:
 - Case cover: 0.8Nm / 7lb.in
 - Manual release: 0.5Nm / 4.3lb.in
 - Head actuator fixing: 0.8Nm / 7lb.in
 - Contact terminals: 0.5Nm / 4.3lb.in
 - Supply terminals: 0.5Nm / 4.3lb.in
- Conductor section: 1 or 2 conductors 1.5mm² max
- Ambient conditions:
 - Operating temperature: -25...+55°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3.

Certifications and compliance

Certifications obtained: cULus, EAC.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204, UNI EN/BS ISO 14119, UL508, CSA C22.2 n°14.

General characteristics

The KG... and KR... foot switches are used to control machinery and other equipment, leaving the operator's hands free to do other functions. The sturdiness of the metal and plastic body and the wide range of the available versions provide the proper solution for each control need.

Main features are:

- Thermoplastic or metal version.
The plastic or metal body gives adequate robustness to the foot switch, for installation in all ambient and application conditions.
- Versions complete with or without pedal protection cover.
The cover assures protection against accidental foot switch operation, due to sudden tool or heavy material dropping or other shock or vibration. The type without cover, open version, is instead immediately accessible and is preferred when the most important pedal operation is to stop a machine.
- Versions with safety lever.
The safety mechanism prevents unintentional foot switch activation and excludes the pedal pressing if the operator's foot is not completely in place.
- Stable pedal base.
The foot switch is equipped with rubber feet and metal-reinforced base for a firm and non-sliding position and a more reliable and safe activation.

Operational characteristics

- Mechanical life: >10 million cycles
- Conventional thermal current Ith: 10A
- Designation to IEC/EN/BS 60947-5-1:
 - A600 Q600 for KG types
 - A300 Q300 for KR types
- Tightening torque for contacts: 1Nm/8.8lb.in
- Rated insulation voltage Ui:
 - 690VAC for KG types
 - 440VAC for KR types
- Rated impulse withstand voltage Uimp:
 - 6kV for KG types
 - 4kV for KR types
- Class II insulation (KG types only)
- Contact resistance: <10mΩ
- Short-circuit backup protection: 10A gG fuse
- Cable connection: self-releasing screw terminal
- Housing:
 - KG types: self-extinguishing double-insulation polymer thermoplastic
 - KR types: aluminium-zinc alloy
- Cable entry: M20
- Ambient conditions:
 - Operating temperature: -25...+70°C
 - Storage temperature: -40...+70°C
 - Pollution degree: 3
- IEC degree of protection:
 - IP20 for terminals
 - IP54 for body housing
 - IP65 available on request (add the letter S at the end of the order code. E.g. KG100S11S).

Certifications and compliance

Certifications obtained: cURus for contacts only and EAC for foot switches.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-5-1, IEC/EN/BS 60204-1, IEC/EN/BS 60447.

KXP02	PG13.5 cable gland	50	0.009
KXP03	M20 rubber cable conduit	50	0.004

General characteristics

The cable glands are in plastic with either M20 or PG13.5 thread and provide to keep the cable in place and maintain the proper IP protection of the switch after installation.

Operational characteristics for cable gland

- Material: self-extinguishing polyamide
- IEC degree of protection: IP68
- Gland seal with cable diameter: 6...12mm/0.24"...0.47".

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: EN/BS 50262, UL508.

Safe outputs expansion module.					
SRBEM41	24V AC/DC	4NO+1NC	Expansion module	1	0.239

General characteristics

LOVATO Electric safety relays are designed for applications up to Category 4 and performance level up to PLe according to EN/ISO/BS 13849-1.

The SRB ... safety relays are designed in order to monitor and control safety circuits in applications with:

- Emergency stops
- Security accesses
- Magnetic safety switches
- Safety limit switches
- Electromechanical interlocks.

They are also used to safely control the circuits for lift cabin leveling and inspection of the lifting pit, according to EN/BS 81-20 and EN/BS 81-50 lift standards.

SRBEM41 is an expansion module to extend the number of safe outputs.

Main characteristics

- Auxiliary supply voltage: 24VAC / DC
- 35mm DIN rail mounting (IEC / EN / BS 60715)
- Compact size: 17.8mm wide
- Double or single channel operation
- Control up to 3 NO safety outputs with electromechanical relay with forced guidance
- Start / reset operating mode (manual, automatic or monitored manual)
- Diagnostics of the safety circuit through indications of LEDs for power supply, safety input status and status of the safety outputs
- The short circuit between the two input channels is detected
- In the event of a fault, the safe outputs are deactivated (contacts opened)
- 1 NC auxiliary output (SRBES31) that can be used for remote status indication
- Removable screw terminal connection
- Front protection degree: IP40
- Terminal protection degree: IP20.

Certifications and compliance

Certifications obtained: cULus, TUV.

Compliant with standards: Cat. 4, PLe according to EN/BS 13849-1, EN/BS 81-20, EN/BS 81-50 (SRBES20 and SRBES31 only).

SRASM20	24VDC	2NA	Devices OSSD	1	0.150
Multifunction.					
SRAMF21	24VDC	2NO+1PNP	Multi-function	1	0.150

General characteristics

The LOVATO Electric SRA... safety relays are designed in order to monitor and control safety circuits in applications with:

- SRATH21: monitoring of two-hand control devices
- SRALC21: monitoring of safety devices equipped with OSSD (light curtains, laser scanner, RFID)
- SRASM20: monitoring of devices equipped with OSSD and integrated safety functions.

The SRAMF21 multifunction safety relay offers the possibility of having all the safety functions of SRB series and the three SRA codes above in one device. This is achieved by simply selecting the desired function using the dedicated frontal trimmer.

The SRAMF21 multifunction safety relay monitors and controls safety circuits in applications with:

- Emergency stops
- Security accesses
- Magnetic safety switches
- Safety limit switches
- Electromechanical interlocks
- Input from OSSD (for ESPE and RFID), automatic restart or monitored manual restart
- Command of two-hand control devices
- Control for type 2 photocells, manual or automatic restart.

Main characteristics

- Auxiliary supply voltage: 24VDC
- 35mm DIN rail mounting (IEC / EN / BS 60715)
- 1 PNP output for system monitoring
- 1 feedback input from external contactors
- 1 test input (for light curtains)
- Alarm diagnostics through LED flashing
- Front protection degree: IP20
- Terminal protection degree: IP20.

Certifications and compliance

Certifications (pending): cULus, TUV.

Compliant with standards: Cat. 4, PLe according to EN/BS 13849-1.

GF SERIES

- IEC conventional free air thermal current Ith 10A and 20A
- Up to 24 contacts
- Direct (positive) opening action \ominus ; according to IEC/EN/BS 60947-5-1
- Up to 12 switching positions
- Rotation angles: 30°, 45°, 60°, 90°
- Possibility of side-by-side installation
- IEC IP20 degree of protection of contacts
- IEC IP40 degree of protection of front, standard supplied.

7GN SERIES

- IEC conventional free air thermal current Ith 16...125A
- Round-shaped contact body
- Up to 24 contacts
- Direct (positive) opening action \ominus ; according to IEC/EN/BS 60947-5-1
- Up to 12 switching positions
- Rotation angles: 30°, 45°, 60°, 90°
- Available versions in plastic enclosure
- IEC IP40 degree of protection of front, standard supplied.

GX SERIES

- IEC conventional free air thermal current Ith 16...40A
- Square-shaped contact body
- Up to 24 contacts
- Direct (positive) opening action \ominus ; according to IEC/EN/BS 60947-5-1
- Up to 12 switching positions
- Rotation angles: 30°, 45°, 60°, 90°
- Available versions in plastic enclosure
- Possibility of side-by-side installation
- IEC IP20 degree of protection of contacts
- IEC IP65 degree of protection of front, standard supplied.

GN SERIES

- IEC conventional free air thermal current Ith 200...315A
- Available on request versions up to 2000A
- Up to 24 contacts
- Direct (positive) opening action \ominus ; according to IEC/EN/BS 60947-5-1
- Up to 12 switching positions
- Rotation angles: 30°, 45°, 60°, 90°
- Available versions in metal enclosure
- 200A to 315A versions cURus approved.

Page 11-42

GNA20 SERIES

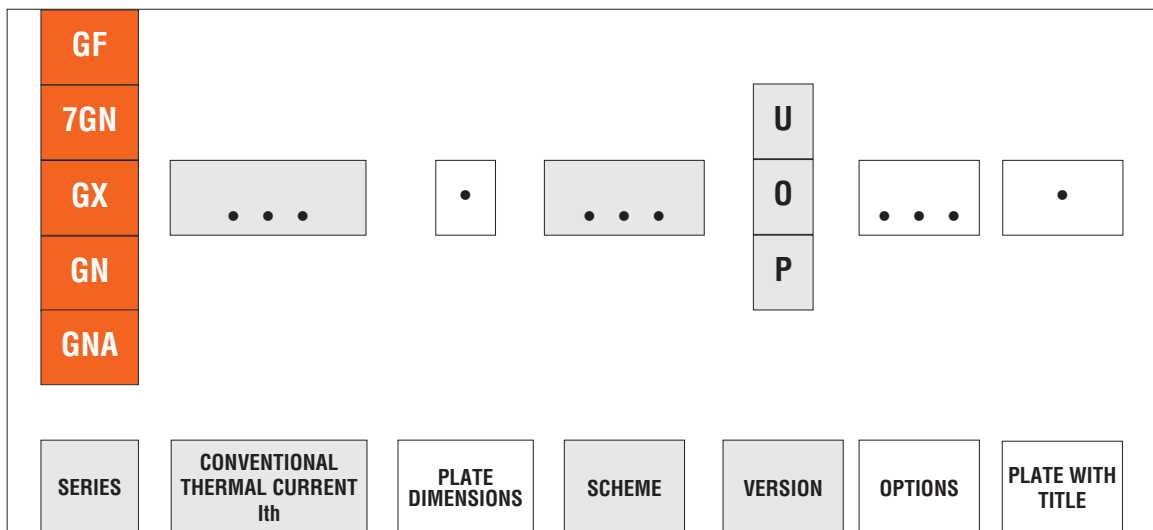

- IEC conventional free air thermal current Ith 20A
- Up to 48 contacts
- Direct (positive) opening action \ominus ; according to IEC/EN/BS 60947-5-1
- 4 contacts for each element
- Reduced depth
- Rotation angles: 30°, 45°, 60°, 90°
- Available versions in plastic enclosure
- IEC IP20 degree of protection of contacts.

11 Rotary cam switches

GNA20 series

INDEX

ROTARY CAM SWITCH GNA20 SERIES

● IEC CONVENTIONAL FREE AIR THERMAL CURRENT ITH 20A.

Front mounting with black handle

● AVAILABLE VERSIONS IN PLASTIC ENCLOSURE.

● 48 AVAILABLE CONTACTS

The GNA20 series of cam switches has 4 contacts for each element. It can have a maximum of 12 control positions with 12 switching elements for a total of **48 contacts available**.

Front mounting with padlockable yellow/red handle

● REDUCED DEPTH

The GNA20 series cam switches are used in applications where the depths available inside the panel are limited.

Comparison example between GNA20 and 7GN series:

GNA20 series: 6 elements, 24 contacts.

7GN series: 12 elements, 24 contacts.

Rear mounting with black handle

Consult Technical support to determine the order codes relating to the GNA20 series; see contact details on inside front cover.

INDUSTRIAL MARINE RAILWAY

calpe

- 16A to 1600A ratings
- Versions: direct operating handle, door coupling, door mount and in enclosure
- Wide range of accessories
- Type for photovoltaic applications up to 850A, 1000VDC (DC21B)
- Switch disconnectors and changeover switches in plastic, metal and stainless steel AISI 304 enclosure.

	SEC. - PAGE
GA series 16A to 160A	
Three-pole switch disconnectors	12 - 9
Fourth pole add-on.....	12 - 9
Add-on blocks and accessories	12 - 11
Assembled changeover switches	12 - 17
Switch disconnectors complete with shaft extension, door-coupling handle and terminal covers	12 - 17
Empty plastic enclosures	12 - 18
Switch disconnectors in plastic enclosure	12 - 19
Changeover switches in plastic enclosure	12 - 21
Switch disconnectors in metal enclosure	12 - 23
Changeover switches in metal enclosure	12 - 24
Switch disconnectors in stainless steel AISI 304 enclosure	12 - 24
Empty metal enclosures	12 - 25
GL series 160A to 630A	
Three-pole switch disconnectors	12 - 30
Fourth pole add-on.....	12 - 30
Three and four-pole changeover switches	12 - 31
Add-on blocks and accessories	12 - 32
Switch disconnectors in metal enclosure	12 - 34
Changeover switches in metal enclosure	12 - 35
GE series 50A to 1600A	
Three-pole switch disconnectors	12 - 36
Three-pole switch disconnectors with fuse holder	12 - 36
Four-pole switch disconnectors	12 - 37
Four-pole switch disconnectors with fuse holder	12 - 37
Three-pole changeover switches	12 - 38
Four-pole changeover switches	12 - 38
Add-on blocks and accessories	12 - 39
GM series 30A to 800A	
Three-pole disconnect switches with fuse holder (UL98)	12 - 44

**GA SERIES
16A TO 160A (AC21A)**

- UL60947-4-1 and UL98 certified three-pole switch disconnectors; add-on fourth pole available
- Switch disconnectors with direct operating handle and door coupling version
- Switch disconnectors door mount version
- Switch disconnectors in plastic, metal and AISI 304 stainless-steel enclosure
- Changeover switches in plastic and metal enclosure.

Page 12-26

**GL SERIES
160A TO 630A (AC23A)**

- IEC and UL98 certified three-pole switch disconnectors; add-on fourth pole available
- IEC and UL1008 certified changeover switches
- Switch disconnectors with direct operating handle and door coupling version
- Changeover switches with direct operating handle and door coupling version
- Switch disconnectors in metal enclosure
- Changeover switches in metal enclosure.

Page 12-36

**GE SERIES
50A TO 1600A (AC21A)**

- IEC version three and four-pole switch disconnectors
- IEC version three and four-pole switch disconnectors with NFC, NH and BS type fuse holders
- Switch disconnectors with direct operating handle and door coupling version
- Three and four-pole changeover switches; add-on motorised control unit available.

Page 12-44

**GM SERIES
30A TO 800A (AC21A)**

- UL98 certified three-pole switch disconnectors with CC, J and L type fuse holders
- Switch disconnectors with fuse holders direct operating and door coupling versions.

Page 12-46

**FOR PHOTOVOLTAIC APPLICATIONS
UP TO 850A 1000VDC (DC21B)**

- Switch disconnectors
- Direct operating and door coupling versions
- Switch disconnectors in non-metallic enclosure
- Connection of 2, 3, 4 poles in series.

12 Switch disconnectors

12 Switch disconnectors

Overview.
GA series

INDEX

VERSATILITY!

- COMPACT SIZE**
 The three-pole 16A to 63A switch disconnectors, are made up of a single unit body, merely 36mm/1.42" wide, while the 30A to 160A ratings, of another frame size of only 70mm/2.75" wide.
- ACCESSORY FLEXIBILITY**
 Mounting and removal of the fourth pole and add-on blocks are simple and quick operations with no need for tools.
- VERSIONS FOR PHOTOVOLTAIC APPLICATIONS**
 The GA... series switch disconnectors are suitable for small domestic installations as well as those with a large number of solar cells. Use up to 800V in DC21B category.

- CERTIFICATIONS**
 The 16A to 63A types are listed for the USA and Canada, certified according to UL60947-4-1/CSA C22.2 n° 60947-4-1. The 30A to 125A types are listed for Canada and the USA, certified according to UL98A/CSA C22.2 n° 4.

- SIDE MOUNT ADD-ON FOURTH POLE**

Simultaneous closing or early-make contact operation of the fourth pole with respect to the switch disconnector poles.

- ADD-ON AUXILIARY CONTACTS**

Only one add-on block suitable for all the 9 ratings of switch disconnectors, having simultaneous closing with the switch disconnector poles. There are versions with an early-break NO contact with respect to the switch disconnector.

- MAXIMUM COMBINATIONS**

Mounting up to 4 auxiliary contacts or 1 fourth pole and 3 auxiliary contacts (2 blocks always on the right and 2 on the left side) of each switch disconnector. The earth and neutral terminals and fuse holder also can be added.

- SWITCH STATUS INDICATION**

The switch open or closed state is clearly and unequivocally seen at a distance thanks to the simple and modern design of the handles.

- TERMINAL ADAPTABILITY**

Terminals are suitable to accept any type of cable: flexible, rigid, AWG wire. The terminals can withstand high tightening torques.

- 6 AND 8 POLE VERSION**

Mechanical coupling systems are available for switch disconnectors with direct operating handle to provide 6/8 pole disconnectors or a mechanical interlock mechanism for the line changeover function (I - O - II). The enclosed switches are cULus certified.

- FUSE HOLDERS**

A three-pole fuse holder can be added to 16A to 32A switch disconnectors, with direct operating handle, to provide a single compact unit. Access to the fuse can be made only when the disconnector is in OFF position.

- HIGH IEC CAPABILITY IN AC23**

The rated currents I_n in AC23 at 690VAC are the highest of the category.

- TORX SCREW TERMINALS**

Version with Torx screw terminals available on request.

- MODULARITY**

The switch disconnectors can be mounted in modular panels.

- IP65 PADLOCKABLE HANDLES**

Wide range of selector or pistol grip handles, with screw or ring fixing. All handles are equipped with built-in padlockable mechanism. The selector handle GAX63... snaps onto the door mount switch disconnectors in 16A to 40A ratings, with no need for tools.

- DIN RAIL FIXING**

Switch disconnector mounting on and removal from the 35mm DIN rail are done by simply pressing it downwards with no need for tools.

- ANTI-SLIDE INSERT FOR DIN RAIL**

A rubber pad insert prevents the sliding of switch disconnectors on the DIN rail even when out of tolerance or mounted vertically.

- DOOR COUPLING HANDLE WITH FRONT DIMENSIONS 48X48MM**

The GAX68 and GAX68B handles can be used in panels and boxes of limited dimensions.

- REDUCED HANDLE THICKNESS**

GAX61 and GAX61B handles are only 23mm thick.

- HANDLE IP69K (GAX63K and GAX63KB)**

- HANDLE ADAPTABILITY**

The extensive number of fixing holes in the front handle plate can replace switch disconnectors, normally found out in the field, without having to drill others.

- UL508A HANDLE VERSION**

In compliance with UL508A standards, which require internal panel inspection by authorised personnel with power applied, selector and pistol handles are available with defeatable feature of the door coupling when the switch disconnector is closed, i.e. in ON position.

- Available versions:
 - Direct operating
 - Door coupling. Use switch disconnector with direct operating handle and separately purchase the handle and shaft extension for this version. See pages 12-14 and 12-16
- Version with Torx screw terminals available on request
- Compact and modular size
- Screw or 35mm DIN rail fixing
- Padlockable in 0 position with no extra accessory.

Operational characteristics

- Rated insulation voltage Ui: 1000V
- Rated impulse withstand Uimp: 8kV
- Electrical life in AC21A:
 - 100,000 cycles GA016...GA040..., GAX...40A
 - 15,000 cycles GA063SA..., GAX...063SA
 - 30,000 cycles GA030... and GA063...GA125..., GAX...063...125A
 - 1,500 cycles GA160A..., GAX42160A
- Mechanical life:
 - 100,000 cycles GA016...GA040A..., GA063SA..., GAX...40A, GAX...063SA
 - 30,000 cycles GA030... and GA063...GA160A..., GAX...063...125A, GAX42160A.

General and operational characteristics

- Choice of handle fixing: ring or screw
- Handle fixing centres:
 - GAX61/61B-GAX62/62B-GAX67B: 36x36mm/1.42x1.42" or 48x48mm/1.89x1.89"
 - GAX66N/66NB: 28x40mm/1.10x1.57"
 - GAX68/68B: 28x28mm/1.10x1.10" or 36x36mm/1.42x1.42"
 - Compatible with pre-existing drillings of most common types in the marketplace
- 1 to 3 padlocks in the Ø4...8mm/0.16...0.31" for all handles except:
 - GAX68 only 1 padlock in the Ø4...8mm/0.16...0.31"
 - GAX61 up to 3 padlocks in the Ø5...8mm/0.20...0.31"
- Front plate dimensions:
 - GAX61/61B-GAX62/62B-GAX63/63B-GAX64/64B-GAX67/67B: 65x65mm/2.56x2.56"
 - GAX66N/66NB: Ø76mm/2.99"
 - GAX68/68B: 48x48mm/1.89x1.89"
- Tightening torque:
 - Fixing ring types: 2.3Nm/20.4lb.in
 - GAX60B: 0.8Nm/7lb.in
 - GAX66N/66NB: 1.5Nm/13.3lb.in
 - All others: 0.8Nm/7lb.in
- Degree of protection for all: IP65
- Degree of protection for GAX66N/66NB: IP66, IP69K; for UL/CSA data see detail on page 12-16.

Set of 2 three-pole terminal covers.

GAX83	For GA016A...GA040A..., GA063SA..., GA016C...GA063C, GA063SC and GA040D	1	0.011
GAX84	For GA030A...GA160A..., GA030C...GA160C	1	0.030

Fuse holder for switch disconnectors.

GAX391	For GA016A...GA032A... Suitable for 10.3x38 fuse size	1	0.132
GAX391UL	For GA016A...GA025A... Suitable for Class CC fuses	1	0.135

① Other length available on request.

Operational characteristics of fuse holder

- IEC rated insulation voltage U_i : 1000V
- IEC rated impulse withstand U_{imp} : 8kV
- The fuse holder/blocks connects directly to the switch disconnectors
- Access to fuses only when the switch disconnectors are in OFF position.

Terminal covers

For switch disconnectors

For fourth pole

General characteristics

- Enclosure material: polycarbonate
- For four-pole types not indicated, separately purchase corresponding fourth pole GAX4...A and install on enclosed 3-pole UL-suffix version
- Possible accessories to mount afterwards, if any required:
 - GAX30 to provide shielded cable connection continuity (e.g. with static converters)
 - GAZ016...GAZ040...: 1 contact block both on the right and left disconnector side unless 4th pole is installed
 - Other types: 2 contact blocks both on the right and left disconnector side unless 4th pole is installed
- Padlockable handles
- Sealable cover
- Tightening torque for cover screws:
 - GAZ016...GAZ040...UL: 1.3Nm/16lb.in
 - Other types: 1.5Nm/13lb.in

GAZS1	GA063SA	GAX61B
GAZS1	GA063A	GAX61B
GAZS1	GA100A	GAX61B

General characteristics

- Enclosure material: AISI 304 stainless steel
- Padlockable handle
- Front door closing with screws
- Degree of protection: IP65
- Cable entry: smooth surfaces; can be drilled by customer
- For four-pole versions add the corresponding GAX42...A fourth pole to the switch disconnector.

Certifications and compliance

Certifications: EAC (pending).
Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

① Extension shaft GAX7... has to be added; for more details contact our Technical support; see contact details on inside front cover.

GAZS1	150x200x120 (5.90x7.87x4.72")	1	1.900

General characteristics

- Painted sheet steel enclosures for GAZM...
- AISI 304 stainless steel enclosures for GAZS1
- Front door closing with screws for GAZM1, GAZM2 and GAZS1
- Front door closing with screws and hinges on the right side of the enclosures for GAZM3
- Drilled cover for handle assembly
- Factory mounted 35mm DIN rail on the base
- Ground terminal included
- Degree of protection: IP65
- Cable entry: smooth surfaces; can be drilled by customer
- For compatible components see pages 12-23 and 24.

Compliance

Compliant with standards: IEC/EN/BS 60947-1.

12 Switch disconnectors

Overview.
GL series

INDEX

SWITCH DISCONNECTORS

● **COMPACT SIZE**

The three-pole switch disconnectors are made up of a body with compact dimensions: 162mm/6.38" wide up to 315A, 203mm/7.99" from 320A to 500A and 231mm/9.09" for 630A.

● **UL98 VERSION**

Switch disconnectors are listed for USA and Canada, certified according to UL98/CSA C22.2 n° 4.

● **FOUR-POLE VERSION AVAILABLE**

Switch disconnectors are supplied with three-pole configuration. To realise the four-pole version, a fourth-pole add-on can be purchased.

● **EASY INSTALLATION ON DIN RAIL**

The switch disconnectors can be mounted on a DIN rail (for sizes from 160A to 315A) or on a plate by screw fixing.

● **FLEXIBLE INSTALLATION ORIENTATION**

Switch disconnectors can be installed in all directions. The clips for screw fixing can be adjusted both in rotation and position (flexible fixing).

● **ANTI-SLIDE INSERT FOR DIN RAIL**

For sizes from 160A to 315A there are two rubber pad inserts prevent the sliding of switch disconnectors on the DIN rail.

● **COMPONENT FLEXIBILITY**

It is possible to mount the fourth pole, neutral and earth/ground terminals on both sides of the switch disconnectors using 2 screws.

CHANGEOVER SWITCHES

● **COMPACT SIZE**

Changeover switches are made up of a body with compact dimensions:
- 185mm/7.28" wide for three-pole versions up to 315A, 237mm/9.33" from 320A to 500A and 263mm/10.35" for 630A;
- 220mm/8.66" wide for the four-pole versions up to 315A, 281mm/11.06" from 320A to 500A and 317mm/12.48" for 630A.

● **EASY INSTALLATION**

The changeover switches can be mounted on a plate by screws.

● **UL1008 VERSION**

The changeover switches are listed for USA and Canada, certified according to UL1008/CSA C22.2 n° 178.

● **THREE AND FOUR-POLE VERSION**

Changeover switches are already supplied assembled in three-pole and four-pole configuration.

12 Switch disconnectors

Overview.
GL series

INDEX

● WIDE RANGE OF ACCESSORIES

A wide choice of auxiliary contacts, terminal covers, phase barriers, terminal clamps, bridging bars, shafts and handles are available to satisfy every installation need.

● HIGH IEC ELECTRICAL CAPABILITY

The rated currents in AC23A up to 630A-415V and 500A-690V are the highest of the category.

● ADD-ON AUXILIARY CONTACTS

The same add-on block is suitable for all the switch disconnectors and changeover switches. Contacts are mounted on main switching actuator (max 8 contacts for switch disconnectors; max 4 contacts for changeover switches).

● VISIBLE CONTACTS: MAXIMUM SECURITY!

Thanks to the window on the individual power poles the open or closed switch status is clearly visible at a distance.

● UL508A DEFEATABLE HANDLE

In compliance with UL508A standards, which require internal panel inspection by authorized personnel with power applied, pistol handles are available with defeatable feature of the door coupling when the switch disconnector or the changeover switch is closed, i.e. in ON position.

● IP66, IP69K AND NEMA 4X HANDLES

A wide range of screw fixing pistol grip handles are available with the maximum degree of protection on the market.

● PADLOCKABLE HANDLES

All direct and door coupling handles are equipped with integrated padlock mechanism.

● HANDLES

Switch disconnectors and changeover switches are standard supplied without any handles. By purchasing the direct operating handle separately it is possible to create a direct operating version. The handles can be mounted and removed very easily thanks to the snap-on assembly.

By purchasing a shaft extension and a door coupling handle separately it is possible to create the door coupling version.

● SNAP-ON SHAFT MOUNTING

Shafts can be mounted and removed very easily by snapping on the front of the switch. This feature allows fast installation and easy accessibility to the panel in case of maintenance.

General characteristics

- 160 to 630A AC23 versions
- 100A, 200A and 400A general purpose according to UL98
- Compact dimensions and add-on fourth-pole
- Screw or 35mm DIN rail fixing to 315A, only on a plate from 320A to 630A
- Possibility to adjust the position of the clips for screw fixing on plate
- Visible contacts
- Maximum number of power poles: 4.

Operational characteristics

- Rated insulation voltage Ui: 1,000V
- Rated impulse withstand Uimp: 12kV
- Mechanical life:
 - 20,000 cycles from 160A to 315A
 - 10,000 cycles from 320A to 630A.

Certifications and compliance

Certifications obtained: cULus according to UL98 / CSA C22.2 n°4 for GL...UL and GLX42...UL types.
Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

General characteristics

- 160 to 630A AC33 versions
- 100A, 200A and 400A general purpose according to UL1008
- Screw fixing on plate
- Visible contacts.

Operational characteristics

- Rated insulation voltage Ui: 1,000V
- Rated impulse withstand Uimp: 12kV
- Mechanical life:
 - 20,000 cycles from 160A to 315A
 - 10,000 cycles from 320A to 630A.

Certifications and compliance

Certifications obtained: cULus according to UL1008 (pending for GLC0400...UL types).
Compliant with standards: IEC/EN 60947-6-1, IEC/EN 60947- 3.

Operational characteristics of auxiliary contacts GLX10...

- Conventional free air thermal current I_{th}: 10A
- Rated insulation voltage: 690V
- Conductivity: 5V, 1mA
- UL/CSA and IEC/EN 60947-5-1 designation: A600 Q600
- Tightening torque: 0.8Nm/7.1lb.in
- Maximum 8 contacts for GL0100...GL0630 switch disconnectors
- Maximum 4 contacts for GLC0100...GLC0630 changeover switches
- snap-on assembly without the use of tools.

Operational characteristics of neutral and earth/ground terminals GLX3...

- Add-on only on GL0100...GL0630 switch disconnectors
- Tightening torque for GLX300 and GLX301: 15...22Nm/132.7...194.7lb.in
- Tightening torque for GLX302 and GLX303: 30...37Nm/265...327lb.in.

Operational characteristics for terminal covers and phase barriers GLX8..., GLX9...

- Snap-on mounting.

Operational characteristics for terminal clamps GLX500-GLX501

- Maximum conductor cross section: 120mm²/250kcmil
- Minimum conductor cross section: 16mm²/6AWG
- Tightening torque: 35Nm/309.7lb.in.

GLX502-GLX503

- Maximum conductor cross section: 304mm²/600kcmil
- Minimum conductor cross section: 33.6mm²/2AWG
- Tightening torque: 42.4Nm/375lb.in

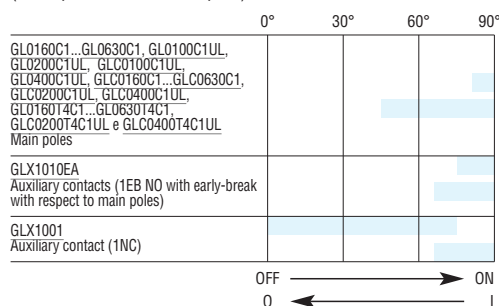

GLX504-GLX505

- Maximum conductor cross section: 2x152mm²/2x300kcmil
- Minimum conductor cross section: 2x21.2mm²/2x4AWG
- Tightening torque: 22.6Nm/200lb.in

Certifications and compliance

Certifications obtained: cULus
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-3.

- 50A to 1600A
- Available versions: direct operating and door coupling
- Screw fixing: 35mm DIN rail mount adapter kit for GE0160P on page 12-42
- Padlockable in 0 position with no extra accessory.

Operational characteristics

- IEC rated insulation voltage U_i:
 - 1000V for GE0160...GE1600, GE0160P, GE0250N/B...GE0800N/B
 - 800V for GE0050F, GE0125F, GE0160N, GE0161N, GE0160B and GE0200B
- Mechanical life:
 - 30,000 cycles for GE0160...GE0250, GE0160P
 - 20,000 cycles for GE0251...GE0400
 - 10,000 cycles for GE0500...GE1600, GE0050, GE0125F, GE0160N/B...GE0400N/B
 - 5,000 cycles for GE0630N/B and GE0800N/B.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-3.

① Unsuitable for switch disconnectors type GE0050F, GE0050FT4, GE0125F, GE0125FT4, GE0160N, GE0160NT4, GE0160E, GE0200E, GE0160ET4, GE0200ET4, GE1600E and GE1600ET4.

② Changeover contact.

Selection of add-on contacts and accessories

Refer to the combinations given on pages 12-41 to 43 and 12-47 for a correct choice based on the switch disconnector type used.

General characteristics for auxiliary contacts

IEC conventional free air thermal current Ith: 16A.

General characteristics for motorised control units

- IEC rated auxiliary supply voltage: 230VAC
- 4 static outputs, 24VDC 120mA total
- 4 inputs, contacts powered at 24VDC or 5VDC (500mA) for changeover control (pulsed or continuous)
- RS485-Modbus (only for GEX692C, GEX693C and GEX694C) serial port for control, monitoring, programming
- Padlockable at 0 position
- Programming by position inputs
- 4-digit display for status-error indications.

Certifications and compliance

Certifications obtained: EAC.

Compliant with standards: IEC/EN/BS 60947-1, IEC/EN/BS 60947-3.

① The motorised control unit cannot be installed.

② Standard supplied with IP20 terminal protection warranted by wired equipment with only maximum conductor section of 95mm². Suitable for mounting on 35mm DIN rail, GEX8900 kit is available on page 12-39.

③ Standard supplied with IEC IP20 terminal protection warranted by wired equipment with only maximum conductor section of 35mm² for GE0050F and of 95mm² for GE0125F.

④ Extension length for type GAX7150AN is 186mm/7.32", type GAX7200AN 236mm/9.29", type GAX7300AN 336mm/13.23", type GAX7400AN 436mm/17.16" and type GAX7500AN 536mm/21.10".

GMX505	6-piece set. Terminal size 2.8-0.8mm/0.11-0.03"	1	0.004
---------------	---	---	-------

General characteristics

- General purpose current according to UL98: 30A to 800A
- Compact dimensions
- Available versions: direct operating and door coupling
- Screw or 35mm DIN rail fixing for GMF...030 types
- Possibility to adjust the position of the clips for fixing screw on plate for GMF...060 to GMF...800 types.

Operational characteristics

- IEC rated insulation voltage U_i : 1000V
- UL max operating voltage: 600V
- IEC rated impulse withstand U_{imp} : 12kV
- Mechanical life:
 - 10,000 cycles for GMF...030 and GMF...060
 - 8,000 cycles for GMFJ100C03 and GMFJ200C03
 - 5,000 cycles for GMFJ400C03 and GMFJ600C03
 - 3,000 cycles for GMFL800C03.

Certifications and compliance

Certifications obtained: cULus according to UL98 / CSA C22.2 n°4.
Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

GMF...C12 type

Central command pole

GMF...C03 type

Left command pole

Operational characteristics of auxiliary contacts GMX1011

- IEC conventional free air thermal current I_{th} : 10A
- IEC rated insulation voltage: 400V
- Conductivity: 12V, 25mA
- Tightening torque: 0.8Nm/7.1lb.in
- Maximum 6 contacts for GMF...030 disconnect switches.

Operational characteristics of auxiliary contacts GMX1010/01

- IEC/UL conventional free air thermal current I_{th} : 16A/10A
- IEC/UL rated insulation voltage: 690V/600V
- Conductivity: 24V, 10mA
- UL/CSA and IEC/EN 60947-5-1 designation: A600 R300
- Tightening torque: 0.8Nm/7.1lb.in
- Maximum 8 contacts for GMF...060 to GMFL800 disconnect switches.

Operational characteristics for terminal clamps

- Minimum and maximum conductor cross section:
 - GMX500: 2.5...70mm² / 14-2/0AWG
 - GMX501: 25...150mm² / 4-300Kcmil
 - GMX502: 35...300mm² / 2-600Kcmil
 - GMX503: (2)x 35...150mm² / (2)x 6-300Kcmil
 - GMX504: (2)x 35...300mm² / (2)x 2-600Kcmil
- Tightening torque:
 - GMX500: 13Nm / 120lb.in.
 - GMX501: 22Nm / 200lb.in.
 - GMX502: 42Nm / 375lb.in.
 - GMX503: 22Nm / 200lb.in.
 - GMX504: 22.6Nm / 200lb.in.

Operational characteristics for terminal covers

- Snap-on mounting.

Certifications and compliance

Certifications obtained: cULus for GMX1010, GMX1001, GMXFM1 and GMXFM2.
Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

General characteristics

- Up to 40A (1000VDC) and 32A (1200VDC)
- Modular construction
- Jumpers for connecting the poles in series supplied as standard with disconnectors GD series...
- Available versions:
 - Direct operating
 - Door coupling version. Use switch disconnector with direct actuator and separately purchase the handle and shaft extension for this version. See pages 12-14 to 12-16
- Screw or 35mm DIN rail fixing
- Padlockable in 0 position with no extra accessory.

Operational characteristics

- Rated insulation voltage for GA...D and GD...:
 - Ui: 1000V (pollution degree 3)
- Rated insulation voltage for GD...:
 - Ui: 1500V (pollution degree 2)
- Rated impulse withstand Uimp: 8kV
- Mechanical life:
 - 100,000 cycles GA040D
 - 10,000 cycles GD...
- Operating temperature: -25°C...+55°C
- Storage temperature: -40°C...+70°C
- Degree of protection: IP20 (only for GA040D).

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93602) as Manual Motor Controllers, to UL508/CSA C22.2 n° 14 for GA040D and GAX42040D; EAC for GA...D.

Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

② For further details contact our Technical support; see contact details on inside front cover.

General characteristics

- Enclosure material: ABS
- Possible accessories to mount afterwards, if any required:
 - GAX30 to provide shielded cable connection continuity (e.g. with static converters)
- Padlockable handles
- Sealable cover
- Tightening torque for cover screws:
 - GAZ025...: 1.3Nm/16lb.in
 - Other types: 1.5Nm/13lb.in.
- Degree of protection: IP65
- Cable entry:
 - GAZ025... types: PG16/M25 and PG13.5/M20 knockouts
 - GAZ032... and GAZ040... types: PG16/M25 and PG29/M32 knockouts.

Certifications and compliance

Certifications obtained: EAC
Compliant with standards: IEC/EN/BS 60947-3, IEC/EN/BS 60947-1.

12 Switch disconnectors

For photovoltaic applications

GE series four-pole switch disconnectors

GE...DT4

Order code	IEC conventional free air thermal current Ith	IEC rated operational current Ie DC21B ②			Qty per pkg	Wt [kg]
		220V	800V	1000V		
[A]	[A]	[A]	[A]	[A]	n°	[kg]

Direct operating and door coupling versions. Separately purchase the handle and shaft extension ①.

Order code	125	250	315	630	800	1250
GE0125DT4	125	125	125	100	1	1.900
GE0250DT4	250	250	250	200	1	2.000
GE0315DT4	315	315	280	250	1	4.000

- ① With protection fuse limiting peak current and specific through energy.
- ② Not suitable for types GE0160P and GE0160T4P.
- ③ Types GE...P have hex terminals IP20.
- ④ 4Nm/35lb.in only for types GE...P.
- ⑤ The 4-pole types (3P+N) have early-make late-break neutral pole.

General and operational characteristics

SINGLE-POLE SUPPLY BUSBAR

- Rated operational voltage Ue: 1000V
- Central point of power supply: 100A max.
- Side point of power supply: 63A max.
- Spacing: 17.5mm/0.69"
- Busbar section: 10mm²
- For paralleling connection
- For 57 modules, 1000mm/39.37" long (57 1P fuseholders)
- Length can be cut in shorter sections.

TWO-POLE, THREE-POLE AND FOUR-POLE SUPPLY BUSBARS

- Rated operational voltage Ue: 690V
- Central point of power supply: 100A max.
- Side point of power supply: 63A max.
- Spacing: 18mm/0.71"
- Busbar section: 10mm²
- For paralleling connection
- Two-pole: for 56 modules, 1000mm/39.37" long (28 2P fuseholders)
- Three-pole: for 57 modules, 1012mm/39.84" long (19 3P fuseholders)
- Four-pole: for 56 modules, 1000mm/39.37" long (14 4P fuseholders)
- Length can be cut in shorter sections.

Certification and compliance

Certifications obtained: EAC.

^① See technical characteristics under derating factor of FB01... type for derating factor.

^② When used with FB01D, rated operational voltage has to be checked.

General characteristics

These devices are used to protect against short circuits and overloads of wiring installations and loads in panel boards, office buildings, stores and similar applications. Their purpose is circuit protection, circuit isolation and load operation controls. They have instantaneous trip characteristics defined as follows:

- B-curve: instantaneous trip 3...5 times In for non-inductive or low inductive loads (heating resistors, generators, very long wire lines)
- C-curve: instantaneous trip 5...10 times In for inductive loads (mixed and inductive resistive loads with low inrush current)
- D-curve: instantaneous trip 10...14 times In for highly inductive loads (loads with high inrush and current such as motors).

Main features include:

- IEC rated current In: 1...63A
- Pole width: 17.5mm / 0.69"
- Contact status with flag indicator
- Trip characteristic: curve type B, C and D
- Auxiliary contacts and trip releases mounted on MCB left side
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Dissipation per pole: 3...13W
- IEC rated insulation voltage Ui: 440V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated operational voltage Ue: 230/400VAC
- UL 1077 rated operational voltage: 277VAC
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 7.5kA 240V - 5kA 277V.

Certifications and compliance

Certifications obtained: cURus (E369585); EAC; TÜV-Rheinland.
Compliant with standards: IEC/EN/BS 60898-1, IEC/EN/BS 60947-2, UL 1077, CSA C22.2 n°235.

General characteristics

These devices are used to protect against short circuits and overloads of wiring installations and loads in panel boards, office buildings, stores and similar applications. Their purpose is circuit protection, circuit isolation and load operation controls. They have characteristics of instantaneous trip defined as follows:

- B-curve: instantaneous trip 3...5 times In for non-inductive or low inductive loads (heating resistors, generators, very long wire lines)
- C-curve: instantaneous trip 5...10 times In for inductive loads (mixed loads, resistive and inductive with low inrush current)
- D-curve: instantaneous trip 10...14 times In for highly inductive loads (loads with high inrush and current such as motors).

Main features include:

- IEC rated current In: 2...40A
- Pole width: 9mm/0.35" (0.5 module)
- Contact status with flag indicator
- Trip characteristic: curve type B and C
- Auxiliary contacts and trip releases mounted on left side
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Dissipation per pole: 3...7.5W
- IEC rated insulation voltage Ui: 440V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated operational voltage Ue: 230VAC.

Certifications and compliance

Certifications obtained: EAC, TÜV-SUD.
Compliant with standards: IEC/EN/BS 60898-1, IEC/EN/BS 60947-2.

General characteristics

These devices are used to protect against short circuits and overloads of wiring installations and loads in panel boards, office buildings, stores and similar applications.

Their purpose is circuit protection, circuit isolation and load operation controls. They have characteristics of instantaneous trip defined as follows:

- B-curve: instantaneous trip 3...5 times In for non-inductive or low inductive loads (heating resistors, generators, very long wire lines)
- C-curve: instantaneous trip 5...10 times In for inductive loads (mixed loads, resistive and inductive with low inrush current)
- D-curve: instantaneous trip 10...14 times In for highly inductive loads (loads with high inrush and current such as motors).

Main features include:

- IEC rated current In: 1...63A
- Pole width: 17.5mm / 0.69"
- Contact status with flag indicator
- Trip characteristic: curve type B, C and D
- Auxiliary contacts and trip releases mounted on left side
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Dissipation per pole: 3...13W
- IEC rated insulation voltage Ui: 440V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated operational voltage Ue: 230/400VAC
- UL 1077 rated operational voltage: 480VAC
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 7.5kA 480V.

Certifications and compliance

Certifications obtained: cURus (E369585); EAC; TÜV-Rheinland.

Compliant with standards: IEC/EN/BS 60898-1, IEC/EN/BS 60947-2, UL 1077, CSA C22.2 n°235.

General characteristics

These devices comply with the UL 489 standard, mostly used in the North American markets. They are designed to protect feeder circuits, the part of the system from the network supply point to the protection device for a branch circuit. They can also be used on the international market thanks to compliance with the IEC/EN/BS 60947-2 standard.

They have characteristics of tripping instantaneously defined as follows:

- C-curve: instantaneous trip 5...10 times In for inductive loads (mixed loads, resistive and inductive with low inrush current)
- D-curve: instantaneous trip 10...14 times In for highly inductive loads (loads with high inrush and current such as motors).

Operational characteristics

- Dissipation per pole: 3...13W
- Rated voltage 1...32A: 277V (UL 489)
- Rated voltage 35...63A: 120V (UL 489)
- Rated insulation voltage Ui: 440V (IEC/EN/BS 60947-2)
- Rated impulse voltage Uimp: 4kV (IEC/EN/BS 60947-2)
- Rated operational voltage Ue: 230/400VAC (IEC/EN/BS 60947-2)
- DC operational voltage: 60V
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 10kA.

Certifications and compliance

Certifications obtained: cULus (E481234); EAC.
Compliant with standards: UL 489, IEC/EN/BS 60947-2.

General characteristics

These devices comply with the UL 489 standard, mostly used in the North American markets. They are designed to protect feeder circuits, the part of the system from the network supply point to the protection device for a branch circuit. They can in any case be used on the international market thanks to compliance with the IEC/EN/BS 60947-2 standard as well.

They have characteristics of tripping instantaneously defined as follows:

- C-curve: instantaneous trip 5...10 times In for inductive loads (mixed loads, resistive and inductive with low inrush current)
- D-curve: instantaneous trip 10...14 times In for highly inductive loads (loads with high inrush and current such as motors).

Operational characteristics

- Rated voltage 1...32A: 480Y/277V (UL 489)
- Rated voltage 35...63A: 240V (UL 489)
- Rated insulation voltage Ui: 440V (IEC/EN/BS 60947-2)
- Rated impulse voltage Uimp: 4kV (IEC/EN/BS 60947-2)
- Rated operational voltage Ue: 230/400VAC (IEC/EN/BS 60947-2)
- DC operational voltage: 125V
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 10kA.

Certifications and compliance

Certifications obtained: cULus (E481234); EAC.
Compliant with standards: UL 489, IEC/EN/BS 60947-2.

General characteristics

These devices are used to protect against short circuits and overloads of wiring installations and loads in panel boards, office buildings, stores and similar applications.

Their purpose is circuit protection, circuit isolation and load operation controls. They have characteristics of instantaneous trip defined as follows:

- C-curve: instantaneous trip 5...10 times In for inductive loads (mixed loads, resistive and inductive with low inrush current)
- D-curve: instantaneous trip 10...14 times In for highly inductive loads (loads with high inrush and current such as motors).

Main features include:

- IEC rated current In: 80...125A
- Pole width: 27mm / 1.06"
- Contact status with flag indicator
- Trip characteristic: curve type C and D
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Dissipation per pole: 15...20W
- IEC rated insulation voltage Ui: 400V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated operational voltage Ue: 230/400VAC (230VAC 1P version)
- Short circuit breaking capacity: IEC/EN/BS 10kA - UL 5kA 240V (1P) - 5kA 480V (2-3-4P).

Certifications and compliance

Certifications obtained: cURus (E369585); EAC; TÜV-Rheinland.

Compliant with standards: IEC/EN/BS 60898-1, IEC/EN/BS 60947-2, UL 1077, CSA C22.2 n°235.

Shunt trip release.				
P1X16230	110...415V 50/60Hz	1	8	0.070

ⓘ Not suitable for P1MBU...

General characteristics

- Auxiliary and indicator contact width: 9mm/0.35" (0.5 module)
- Undervoltage and shunt trip release width: 18mm/0.71" (1 module)
- Maximum combination: 3 add-on blocks on MCB left side of which 1 undervoltage or shunt release directly on MCB side and then 2 contacts of which 1 auxiliary and 1 indicator.

Operational characteristics

- IEC rated impulse voltage Uimp: 4kV
- IEC rated operational current in AC: 6A 230V; 3A 400V (auxiliary contacts).

Certifications and compliance

Certifications obtained: EAC, cURus (excluding P1X14230), UL (only P1X14230)
Compliant with standards: IEC/EN/BS 60947-5-1, CSA C22.2 n° 5.

General and operational characteristics

SINGLE-POLE SUPPLY BUSBAR

- Rated operational voltage U_e: 1000V
- Central point of power supply: 100A max.
- Side point of power supply: 63A max.
- Spacing: 17.8mm/0.70"
- Busbar section: 10mm²
- For paralleling connection
- For 57 modules, 1000mm/39.37" long (57 1P breakers).

TWO-POLE, THREE-POLE AND FOUR-POLE SUPPLY BUSBARS

- Rated operational voltage U_e: 690V
- Central point of power supply: 100A max.
- Side point of power supply: 63A max.
- Spacing: 17.8mm/0.70"
- Busbar section: 10mm²
- For paralleling connection
- Two-pole: for 56 modules, 1000mm/39.37" long (28 2P breakers)
- Three-pole: for 57 modules, 1012mm/39.84" long (19 3P breakers)
- Four-pole: for 56 modules, 1000mm/39.37" long (14 4P breakers).

PADLOCKABLE ATTACHMENT

- Max. padlock diameter 5mm/0.20"
- Padlockable in ON and OFF
- One can be fitted for each pole of the breaker.

Main features

- UL approved power bars are divided into two groups:
 - Bars for UL 1077 approved thermal-magnetic circuit breakers;
 - Bars for UL 489 approved thermal-magnetic circuit breaker bars.

Both models are supplied 1000mm/39.37" long and can be cut to the desired length. This feature makes it easy to adapt to any combination of installed thermal-magnetic circuit breakers. Special end caps must be applied at the points where the bars are cut, to ensure IP20 protection and to comply with UL standards.

Operational characteristics

POWER BARS FOR UL APPROVED THERMAL-MAGNETIC CIRCUIT BREAKERS

- Maximum rated AC voltage: 600V
- Central power point: 160A max
- Side point for power supply: 80A max
- Spacing: 17.8mm/0.70"
- Bar section: 18mm²
- For parallel connection
- Single pole: for 57 modules, 1000mm/39.37" long (57 1P switches)
- Two pole: for 56 modules, 1000mm/39.37" long (28 2P switches)
- Three pole: for 57 modules, 1012mm/39.84" long (19 3P switches).

Certifications

UL 508 for P18K57... bars (for use with UL 1077 approved thermal-magnetic circuit breakers).
UL 489 for UL... bars (for use with UL 489 approved thermal-magnetic circuit breakers).

P1RA4P63A300	A	63	300	3.5	1	0.230

General characteristics

These devices are mainly used for disconnection and insulation of power lines and systems. They can also be used to switch various types of resistive and inductive loads.

Main features include:

- IEC rated current In: 32...125A
- Pole width: 17.5mm / 0.69"
- Clear contact status indication
- Wide terminals for easy wiring
- Auxiliary contacts can be mounted on left side and padlockable attachment
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Utilisation category: AC-22A
- IEC rated insulation voltage Ui: 1000V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated operational voltage Ue: 1P 230...240V; 2P, 3P, 4P 400...440V
- IEC rated short-time withstand current Icw: 12Ie (for 1 second).

Certifications and compliance

Certifications obtained: TÜV-Rheinland, EAC.
Compliant with standards: IEC/EN/BS 60947-3.

Operational characteristics (auxiliary contact)

- Utilisation category AC-12: 6A 230V; 3A 400V
- Utilisation category DC-12: 0.4A 250V; 6A 24V.

General characteristics

These devices are intended for the protection of people against indirect contact (electric shock) and of installations against fire hazards due to a persistent earth/ground fault current.

They snap onto the P1MB... series thermal-magnetic circuit breakers; this combination forms a single device to protect people, protect against fire and protect lines.

Operational characteristics

- IEC rated insulation voltage Ui: 400V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated frequency: 50/60Hz
- IEC rated operational voltage Ue: 230/400V
- IEC rated residual current for tripping IΔn: 30mA; 300mA
- Dissipation per pole: 1.6W (40A), 2.7W (63A).

Certifications and compliance

Compliance with standards: IEC/EN/BS 61009-1.
Certifications obtained: TÜV-SUD, EAC.

P1RC4P80B030	B	80	30	4	1	0.335
P1RC4P80B300	B	80	300	4	1	0.335

General characteristics

These RCCBs are intended for the protection of people against indirect contact (electric shock) and of installations against fire hazards due to a persistent earth/ground fault current. Specifically to prevent electric shock, RCCBs must be rated with a rated residual current (IΔn) not exceeding 30mA so that these devices trip in the case of earth/ground fault only. They usually are connected in series with thermal-magnetic breakers which assure short circuit and overcurrent protection too. P1RC types have a IΔn of either 30mA or 300mA and are available with three different versions of residual current tripping, as follows:

Type AC – Tripping for earth/ground fault is ensured “for residual sinusoidal alternating currents, suddenly applied or slowly rising”. The symbol identifying Type AC is the following:

Type A – Tripping for earth/ground fault is ensured “for residual sinusoidal alternating currents and pulsating direct currents, suddenly applied or slowly rising”. In addition to the protection given by Type AC, this version protects against residual current with pulsating waveform. This can be caused by circuits connected with electronic equipment. The symbol identifying Type A is the following:

Type B – tripping is ensured for all conditions already covered by types AC and A. They also ensure tripping for high-frequency leakage currents up to 1000Hz and direct currents. They are particularly suitable for applications with inverters, UPSs and electric vehicle charging stations. The symbol identifying Type B is the following:

Main features include:

- IEC rated current In: 25A, 40A and 63A
- Versions: 2P and 4P
- Type of operation: AC, A and B
- Pole width: 17.5mm / 0.69"
- Contact status with flag indicator
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Dissipation per pole:
 - 1.1W for P1RC2/4P25... type AC or A
 - 2.9W for P1RC2/4P40... type AC, A or B
 - 7.2W for P1RC2/4P63... type AC, A or B
 - 9.7W for P1RC/4P80... type B
- IEC rated insulation voltage Ui: 400V
- IEC rated impulse voltage Uimp: 4kV
- IEC rated frequency: 50/60Hz
- IEC rated operational voltage Uc: 230VAC for 2P; 230/400VAC for 4P
- IEC rated residual operating voltage Ue: IΔn: 30mA; 300mA
- IEC short-circuit breaking capacity Icn: 10kA

Certifications and compliance

Certifications obtained: TÜV-Rheinland (types AC and A), EAC. Compliant with standards: IEC/EN/BS 61008-1, IEC/EN/BS 61008-2-1 (all types); IEC/EN/BS 62423 (type B).

General characteristics

These devices both detect and trip in the event of residual current and protect circuits in the case of short circuits and overcurrent. From a practical point of view, they integrate both functions of MCB and RCCB.

They have a C-type trip characteristic (instantaneous trip 5-10 times I_n) and are used for inductive loads (mixed loads, resistive and inductive with low inrush current).

In addition, they have a rated residual current (I_{Δn}) of either 30mA or 300mA and are available with two different versions of residual current tripping type AC or A as described on page 14-14.

Its main features are:

- IEC rated current I_n: 6...40A
- Version: 1P+N
- Contact status with flag indicator
- Double control lever to distinguish the residual current tripping from short circuit or overcurrent tripping
- Trip characteristic: curve type C
- Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Operational characteristics

- Dissipation per pole: 3...13W
- Rated insulation voltage U_i: 400V
- Rated impulse voltage U_{imp}: 4kV
- Operating frequency: 50/60Hz
- Rated operational voltage U_e: 230VAC
- Rated residual operating voltage I_{Δn}: 30mA; 300mA
- IEC short-circuit breaking capacity I_{cn}: 10kA

Certifications and compliance

Certifications obtained: TÜV Rheinland, EAC. Compliant with standards: IEC/EN/BS 61009-1, IEC/EN/BS 61009-2-1.

SURGE PROTECTION DEVICES

The surge arresters commonly defined as SPDs (Surge Protection Devices), are devices designed to protect electric systems and equipment against transient and impulse overvoltages such as those caused by lightning strikes and by electric switching. Their function is to divert the discharge or impulse current generated by an overvoltage to earth/ground, thereby protecting the equipment downstream. SPDs are installed in parallel with the electric line to be protected. At the mains rated voltage, they are comparable to an open circuit and have a high impedance at their ends. In the presence of an overvoltage, this impedance falls to very low values, closing the circuit to earth/ground. Once the overvoltage has ended, their impedance rises again rapidly to the initial value (very high), returning to open loop conditions. The SA1B and SA0B (monoblock) type protects against direct and indirect lightning strikes as well as induced overvoltage conditions. It can be installed in areas with a high risk of direct lightning strikes, inside main distribution boards or nearby sub-distribution boards. With the SA0 plug-in cartridge type, the same features are available with the advantage of only having to replace the protection cartridge once the SPD blows.

PROTECTION ZONES

Standards define the LPZs (Lightning Protection Zones), which indicate the different zones at risk. These are distinguished among:

LPZ 0A: Area outside a building not protected by LPS (e.g. lightning rods) where a direct lightning strike is possible. In this zone, there is total exposure to induced electromagnetic fields.

LPZ 0B: Area outside a building protected by LPS; therefore, a direct lightning strike is not possible. In this zone, there is total exposure to induced electromagnetic fields.

LPZ 1: Area inside a building so protected against direct lightning strikes. In this zone, there is the possibility of very high overvoltages and of induced electromagnetic fields which may be attenuated depending on the degree of screening. This zone must be protected by an SPD type 1 at the boundary with zone LPZ 0A or 0B.

LPZ 2: Area inside a building (e.g. in a room), in which there is the possibility of low overvoltages since they are limited by SPDs installed upstream. This zone must be protected by an SPD type 2 at the boundary with zone LPZ 1.

LPZ 3: Area inside a building (e.g. the system connected to a socket in a room) characterised by very sensitive equipment, in which there is the possibility of very low overvoltages as they are limited by SPDs installed upstream. This zone must be protected by an SPD type 3 at the boundary with zone LPZ 2.

INSTALLATION CATEGORY

For the correct choice of the SPD, the dielectric strength of the equipment to protect needs to be considered. This level is established by IEC 60664-1 standard.

For a 230/400V installation, it specifies:

Installation category IV: 6kV for devices installed upstream of the distribution board (for example, delivery point with the distribution system)

Installation category III: 4kV for devices being part of the fixed system (for example, distribution boards, switching devices, isolators, ducting and their accessories)

Installation category II: 2.5kV for non electronic devices (for example, household appliances or electric tools)

Installation category I: 1.5kV for equipment containing "particularly sensitive" electronic circuits (for example, electronic devices like PCs or TVs).

RECOMMENDATIONS FOR INSTALLATION

For correct installation, it is advisable to make connections between the line and the SPD input (phase or neutral terminals) as well as between the SPD output (earth/ground terminal) and the equipotential bonding connection with a maximum 0.5m/20" length of the leads. To reduce the distance, use of the so-called "V connection" is admissible.

For more details, IEC/EN/BS 62305 standards can be consulted.

INDEX

Type 2 DC

SURGE PROTECTION DEVICES FOR PHOTOVOLTAIC APPLICATIONS

In photovoltaic applications in a domestic environment or industrial facility or other similar circumstances, equipped with lightning rod systems having a safety distance (S), SPD type 2, suitable for DC duty, can be used to protect the installation. It is advisable to install these devices as close as possible to the photovoltaic panels, consequently in the so-called string boards. If the AC/DC inverter is far away from the string boards (indicatively more than 10m/33' apart), another SPD type 2 DC needs to be installed next to the inverter on the DC side. Installation of SPD type 2 suitable of AC duty is also required downstream of the inverter on the AC side. For more details, consult specific national standards and/or application guides issued by local authorities for solar systems concerning protection against lightning. The SG2DG... types with plug-in cartridges are suitable for connection in the DC side of a solar installation and offer protection against induced overvoltage conditions. The SG2...A300 type is suitable for installation downstream of the inverter on the AC side and in intermediate panels.

BACKUP PROTECTION

Protection against short circuits of SPDs is provided by overcurrent devices (g/L/GG fuses), which should be chosen according to the SPD manufacturer's recommendations.

Fuse size depends on SPD

SPD COORDINATION

In order to obtain an effective protection against overvoltage, it is advisable to install several SPDs coordinated with one another in cascade connection. For instance, it is advisable to have a type 1 SPD in the main distribution board, a Type 2 SPD in the sub-distribution board and a type 3 SPD near the terminal equipment to be protected. In this way, the energy originating from an overvoltage gradually decreases as it reaches the equipment to protect.

DEFINITIONS AND RATINGS ACCORDING TO IEC/EN/BS

Maximum continuous voltage U_c :

Maximum value of AC or DC voltage that the SPD is capable of permanently withstanding without activating or getting damaged; this is its rated voltage.

Protection level voltage U_p :

Maximum value of the voltage between the terminals of the SPD in presence of an impulsive overvoltage. It is a fundamental parameter to correctly choose the SPD; it must be taken into account with regards to the impulse voltage of the equipment to protect.

Impulse current I_{imp} :

Crest value of the current that circulates in the SPD with a 10/350 μ s waveform (activation must be guaranteed for 20 times without damage). It is used to classify SPDs in test class I.

Rated discharge current I_n :

Crest value of the current that circulates in the SPD with an 8/20 μ s waveform (activation must be guaranteed for 20 times without damage). It is used to classify SPDs in test class II.

Open circuit discharge voltage U_{oc} :

Crest value of the no-load discharge voltage delivered by the test generation with a 1.2/50 μ s waveform simultaneously with a short circuit current of an 8/20 μ s waveform, applied at the SPD terminals. It is used to classify SPDs in test class III.

Main characteristics

The surge protection device type SA1B combines the performance of SPD type 1 and 2 into a single product. It protects against direct and indirect lightning strikes as well as induced overvoltage conditions. It can be installed in areas with a high risk of direct lightning strikes, inside main distribution boards or nearby sub-distribution boards.

Operational characteristics

- IEC maximum continuous operating voltage U_c: 320VAC
- IEC maximum discharge current I_{max} (8/20µs): 100kA per pole
- IEC rated discharge current I_n (8/20µs): 25kA per pole
- Version with relay output having changeover contact for remote status indication
- IEC degree of protection: IP20.

Certifications and compliance

Certification obtained: EAC.
Compliant with standards: IEC/EN/BS 61643-11.

Main characteristics

SURGE PROTECTION DEVICES TYPE SG2

They are available in plug-in cartridge version and they are suitable for installation in secondary boards and in terminal equipment.

They ensure protection against overvoltages conditions. The protection cartridges are plug-in and can be easily replaced for quick servicing.

SG2 surge arresters are immune to temporary overvoltages (TOV) and block the circulation of the subsequent network current after the intervention.

SURGE PROTECTION DEVICES TYPE SG2C

They are available in plug-in cartridge version and suitable for installation in residential boards where a 5kA per pole indirect discharge protection is sufficient. They have compact size, 1 module width for two poles.

Operational characteristics

- IEC maximum continuous operating voltage Uc: 300VAC (SG2...)/320VAC (SG2C...)
- IEC maximum discharge current I_{max} (8/20µs): 50kA per pole (SG2...); 15kA (SG2C...)
- IEC rated discharge current In (8/20µs): 20kA per pole (SG2...); 5kA (SG2C...)

- Two, three and four-pole contactors, 20A to 63A
- Silent during operation or control stage
- Contactors with manual control
- Latching relays
- Add-on auxiliary contacts
- 12VAC or 230VAC bells and buzzers
- 12 to 63VA modular safety transformers
- Modular sockets.

Page 16-2

ONE AND TWO-POLE CONTACTORS

- IEC rated current lth AC1 (400V): 20A and 32A
- IEC rated current AC3 (400V): 9A
- Ideal for domestic and service applications.

Page 16-2

THREE AND FOUR-POLE CONTACTORS

- IEC rated current lth AC1 (400V): 25A, 32A, 40A and 63A
- IEC rated current AC3 (400V): 8.5A, 22A and 30A
- Ideal for industrial and service applications, such as office buildings, stores, hospitals, hotels, etc.

Page 16-3

ONE AND TWO-POLE CONTACTORS WITH MANUAL CONTROL

- IEC rated current lth AC1 (400V): 20A and 32A
- IEC rated current AC3 (400V): 9A
- Ideal for functional tests and dual tariff systems in domestic and service applications.

Page 16-3

THREE AND FOUR-POLE CONTACTORS WITH MANUAL CONTROL

- IEC rated current lth AC1 (400V): 32A
- IEC rated current AC3 (400V): 8.5A
- Ideal for functional tests and dual tariff systems in domestic and service applications.

Page 16-4

LATCHING RELAYS

- IEC rated current lth AC1 (400V): 20A and 32A
- IEC rated current AC3 (400V): 8.5A and 7A
- 2 position hand toggle actuator
- Coil cut-off selector
- Ideal for lights control.

Page 16-5

BELLS AND BUZZERS

- 12VAC or 230VAC power supply
- Ideal for audible signalling in domestic and service applications.

Page 16-5

MODULAR SAFETY TRANSFORMERS

- Power supply primary: 230VAC
- 12VAC or 24VAC output voltages
- Available powers: 15, 25, 40 and 63VA.

Page 16-5

MODULAR SOCKET

- 16A modular socket Italian and German (Schuko) standard.

- ① Other voltages on request. Consult Technical support; see contact details on front cover.
- ② 2NC version supplied on request.
- ③ The last (NC) pole has the same characteristics as the power pole. It can therefore be used indifferently as an auxiliary or as a NC power contact.
- ④ The fourth NO or NC pole has the same characteristics as the power poles; therefore it can be used indifferently as auxiliary or as power contact.
- ⑤ On request can be supplied: 4NC power poles. Consult Technical support; see contact details on front cover.
- ⑥ Can also operate at 220VDC.
- ⑦ No auxiliary contacts can be mounted.

Maximum number of contactors side-by-side

When contactors are mounted side by side and operate in continuous service (1 hour), spacing is needed between equipment to allow appropriate cooling. 9mm spacing is required; there is an accessory, called half-module spacer, order code CNX80, for this specific type of mounting. The following table indicates details of the space needed between each.

Maximum number of contactors to be mounted side-by-side without spacing; the CNX80 spacer is required when the number of pieces is more than the indicated below:

	CN20	CN32	CN25	CN40	CN63
Ambient temperature ≤40°C	3	3	3	3	3
Ambient temperature >40°...55°C	2	2	2	3	2

General characteristics

- DC powered magnetic core system assuring silent operation and noise damping during the control phase
- Overvoltage protection circuit and voltage peak limitation of the magnetic core
- Equipped with 2 or 4 closing contacts of equal capacity permitting use in power or auxiliary circuits
- Operation flag indicator.

① Usually each LED lamp has one ballast.

In event of one ballast supplies several lamps, the calculation has to consider the number of supplied ballasts.

E.G. If the LED lamp ballast input current is 500mA, (consider CN40=11,000/500=22), the maximum number of ballasts admitted per each pole of CN40 contactor is 22.

16 Modular contactors and other modular devices

17 Earth leakage relays

- Modular, flush and internal panel mount version, with or without flag indicator, configurable prealarm indication and fail safe operation
- Versions with automatic toroidal connection control
- Choice of supply voltage ranges
- Adjustable fault current $I_{\Delta n}$
- Adjustment and choice of tripping range for both fault current and delay time.

Earth leakage relays

With 1 operation threshold	17 - 2
With 2 operation thresholds	17 - 3
Toroidal current transformers	17 - 3
External multiplier	17 - 3

Page 17-2

FLUSH-MOUNT VERSION

R1D type

- 1 operation threshold
- External toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time.

Page 17-3

FLUSH-MOUNT VERSION

R2D type

- 2 operation thresholds
- External toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time
- Configurable fail safe operation.

R3D type

- 2 operation thresholds
- External toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time
- Configurable fail safe operation
- Flag indicator.

Page 17-3

FLUSH-MOUNT VERSION

R4D type

- 2 operation thresholds
- External toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time
- Configurable fail safe operation
- Fault current measurement
- Digital display
- Flag indicator
- Shunt tripping circuit.

Page 17-2

MODULAR VERSION

RM1 type

- 1 operation threshold
- External toroidal transformer
- Fixed tripping $I\Delta n$ and delay time.

RM type

- 1 operation threshold
- External toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time.

Page 17-2

MODULAR VERSION

RMT type

- 1 operation threshold
- Incorporated toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time.

Page 17-2

COMPACT PANEL MOUNT VERSION

RC type

- 1 operation threshold
- Incorporated toroidal transformer
- Adjustable tripping $I\Delta n$ and delay time
- 35mm to 110mm diameter.

Page 17-3

TOROIDAL CURRENT TRANSFORMERS

RT type

- Solid core
- 35mm to 210mm diameter.

RTA type

- Split core
- 110mm and 210mm diameter.

Page 17-3

EXTERNAL MULTIPLIER

RX10 type

- 10-fold multiplier.

R1D...

Order code	Rated auxiliary supply voltage	Output contacts	Qty per pkg	Wt
	[V]	$\frac{1}{2}$ SPDT	n°	[kg]
1 OPERATION THRESHOLD. Flush mount. External CT.				
R1D48	24-48VAC/DC	1	1	0.280
R1D415	110-240-415V ①	1	1	0.280

① Supply voltage:
110...125VAC (50/60Hz)/DC
220...240VAC (50/60Hz)
380...415VAC (50/60Hz).

General characteristics

- Earth leakage relay type A
- Green power LED indicator (ON)
- Red relay tripped LED indicator (TRIP)
- Front TEST and RESET buttons
- Configurable automatic or manual resetting
- Flush mount 96x96mm housing with transparent cover
- IEC degree of protection: IP20 terminals, IP40 on front with cover.

ADJUSTMENTS FOR R1D

- Configurable tripping set-point (Δn): 0.025...0.25A
0.25...2.5A
2.5...25A
25...250A (with external multiplier 31RX10)
- Configurable tripping delay time (t): 0.02...0.5s
0.2...5s.

Certification and compliance

Certification obtained: EAC.
Compliant with standards: IEC/EN/BS 60947-2.

RM1...

Order code	Rated auxiliary supply voltage	Output contacts	Qty per pkg	Wt
	[V]	$\frac{1}{2}$ SPDT	n°	[kg]
1 OPERATION THRESHOLD. Modular, 35mm DIN (IEC/EN/BS 60715) rail mounting. External CT. Fixed tripping set point and time.				
RM148	24-48VAC/DC	1	1	0.175
RM1415	110-240-415V ①	1	1	0.175

① Supply voltage:
110...125VAC (50/60Hz)/DC
220...240VAC (50/60Hz)
380...415VAC (50/60Hz).

General characteristics

- Earth leakage relay type A
- Configurable fail safe operation for RMT type only
- Green power LED indicator (ON)
- Red relay tripped LED indicator (TRIP)
- Front TEST and RESET buttons
- Configurable automatic or manual resetting
- Modular DIN 43880 housing, 2 modules, with transparent cover, suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715)
- IEC degree of protection: IP20 terminals, IP40 on front with cover.

SETTINGS FOR RM1

- Selectable tripping set-point (Δn): fixed 0.3A or 0.5A
- Selectable tripping time (t): fixed 0.02s or 0.5s.

ADJUSTMENTS FOR 31RM AND 31RMT

- Configurable tripping set-point (Δn): 0.025...0.25A
0.25...2.5A
2.5...25A
25...250A (with external multiplier 31RX10 for RM only)
- Configurable tripping delay time (t): 0.02...0.5s
0.2...5s.

Certification and compliance

Certification obtained: EAC.
Compliant with standards: IEC/EN/BS 60947-2.

31RM...

Order code	Rated auxiliary supply voltage	Output contacts	Qty per pkg	Wt

Supply voltage:
110...125VAC (50/60Hz)
220...240VAC (50/60Hz)
380...415VAC (50/60Hz).

General characteristics

- Earth leakage relay type A
- 2 output relays each with changeover contact, configurable as 2 tripping or 1 tripping and 1 alarm
- Configurable fail safe pre-alarm and operation
- Automatic toroid connection control
- Green power LED indicator (ON)
- Red relay tripped LED indicator (TRIP)
- Red tripping pre-alarm LED indicator (ALARM)
- Front TEST button
- Manual resetting by front RESET button or remote contact closing
- Automatic resetting by remote contact closing or rear jumper connection
- Constant toroid-relay circuit control
- Flag indicator (TRIP MEMORY) (R3D-R4D only)
- Digital fault current measurement and display with configurable tripping value memory (R4D only)
- Shunt tripping circuit operating test (TCS) (R4D only)
- Flush mount 96x96mm/3.78"x3.78" housing with transparent cover
- IEC degree of protection: IP20 terminals, IP40 on front with cover.

ADJUSTMENTS FOR R2D and R3D

- Configurable tripping set-point (I_{Δn}): 0.025...0.25A
0.25...2.5A
2.5...25A

18 Time relays

- Modular versions for modular-slot switchboards, mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- Plug-in or flush-mount version
- Version programmable with NFC and APP
- Wide range of functions and time scales
- High accuracy and repeatability of the time settings.

TMP

Order code	Time of scale range	Rated auxiliary supply voltage	Qty per pkg	Wt
		[V]	n°	[kg]
TMP	0.1...1s 1...10s 6...60s 1...10min 6min...1h 1...10h 0.1...1 day 1...10 days ON only OFF only	24...48VDC 24...240VAC	1	0.078
TMPA440	0.1...1s 1...10s 6...60s 1...10min	380...440VAC	1	0.078

General characteristics

- Electronic time relay, multiscale, multivoltage. On delay, delay on make, with 1 relay output with 1 changeover contact (SPDT) start at relay energising for TMP
- Electronic time relay, multiscale with 2 normally open (N/O-SPST) contacts with common pole for TMPA440.
- Delay time adjustable on front by rotary switch: 10...100%
- Green LED indicator for power on
- Red LED indicator for relay state; flashing for delay and steady when relay energised
- Modular DIN 43880 housing, 1 module suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: EAC; UL Listed, for USA and Canada (cULus - File E93601), CCC.
Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

Multifunction time relay. Multiscale. Multivoltage. 1 relay output

General characteristics

- Electronic time relay, multifunction, multiscale, multivoltage, with 1 relay output with 1 changeover contact (SPDT)
- Enabling input
- Selectable functions: (a) On delay. (b) Pulse on relay energising with start when energised. (c) Symmetrical flasher starting with OFF. (d) Symmetrical flasher starting with ON. (e) Off delay; relay energising at external contact closing with start on break. (f) Pulse on relay energising with start on external contact closing. (g) Pulse on relay energising with start on external contact opening. (h) On-off delay. Delay on make, with start at external contact closing, and delay at break, with start at external contact opening. (i) Internal ON/OFF trigger with relay contact closing or operating at each closing of an external contact. (j) Pulse generator.
- Delay time adjustable on front by rotary switch: 10...100%
- Green LED indicator for power on
- Red LED indicator for relay state; flashing for delay and steady when relay energised
- Modular DIN 43880 housing, 1 module suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601); EAC.
Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

Simple and intuitive programming with LOVATO **NFC** App thanks to the graphic interface that displays the selected function and parameters directly on the screen of the smartphone, eliminating the need to consult the manual.

General characteristics

- Electronic time relay, multifunction, multiscale, multivoltage, with 1 relay output with changeover contact (SPDT), with NFC technology and LOVATO **NFC** App
- Command input for the enabling of the function or to pause the timing
- 40 selectable functions. For details consult the technical manual on the website www.LovatoElectric.com
- NFC connectivity for the programming of the parameters with the LOVATO **NFC** App freely downloadable from Google Play Store and App Store
- Simple, fast and intuitive programming
- Very high accuracy and repeatability of the settings
- Internal counter which stops the function when the relay output reaches a programmable number of closures
- Possibility to save the program on smartphone or tablet to be copied on others TMM1NFC, even with device powered off
- Possibility to protect the settings with a password
- QR code for the direct connection to the LOVATO Electric website for the download of the technical manual
- Green LED indicator for power on
- Red LED indicator for relay state; flashing for delay and steady when relay energised
- Modular DIN 43880 housing (1 module), suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40), IP20 on terminals.

Certifications and compliance

Certifications: cULus, EAC, CCC.
Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n°14.

The app can be downloaded from Google Play Store and App Store.

Multifunction time relay. Multiscale. Multivoltage. 2 relay outputs

TMM2

Order code	Time of scale range	Rated auxiliary supply voltage [V]	Qty per pkg n°	Wt [kg]
TMM2	0.1...1s 1...10s 6...60s 1...10min 6min...1h 1...10h 0.1...1 day 1...10 days ON only OFF only	12...240V AC/DC	1	0.094

General characteristics

- Electronic time relay, multifunction, multiscale, multivoltage
- 2 relay outputs, one with 1 delayed changeover (C/O-SPDT) contact and the other with 1 normally open (N/O-SPST) contact, programmable as instantaneous or delayed
- Enabling input
- Selectable functions: (a) On delay; delay on make with start at relay energising. (b) Pulse on relay energising with start when energised. (c) Flasher starting with OFF interval. Equal timing recycle. (d) Flasher starting with ON interval. Equal timing recycle. (e) Off delay; relay energising at external contact closing with start on break. (f) Pulse on relay energising with start on external contact closing. (g) Pulse on relay energising with start on external contact opening. (h) On-off delay. Delay on make, with start at external contact closing, and delay at break, with start at external contact opening. (i) Internal ON/OFF trigger with relay contact closing or operating at each closing of an external contact. (j) Pulse generator, unequal timing recycle; starting with OFF pulse time and 0.5s ON pulse.
- Delay time adjustable on front by rotary switch: 10...100%
- Green LED indicator for power on
- Red LED indicator for relay state; flashing for delay and steady when relay energised
- Modular DIN 43880 housing, 1 module suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601) as Auxiliary Devices - Timers; EAC. Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

General characteristics

- Recycle time relay with asymmetrical timings, multiscale, multivoltage
- 1 relay output with 1 changeover contact (SPDT)
- Enabling input of ON (work) or OFF (pause) interval
- Delay time for OFF (pause) interval, adjustable on front by rotary switch: 10...100%
- Delay time for ON (work) interval, adjustable on front by rotary switch: 10...100%
- Green LED indicator for power on
- Red LED indicator for relay state; flashing for delay
- Modular DIN 43880 housing, 1 module; suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601) as Auxiliary Devices - Timers; EAC. Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

TMD	0.06...0.6s 0.6...6s 6...60s 18...180s	24...240V AC/DC	1	0.080

General characteristics

- Electronic time relay, multiscale, multivoltage. True off delay; delay on break with start at relay de-energising
- 1 relay output with 1 changeover contact (SPDT)
- Delay time adjustable on front by rotary switch: 10...100%
- Green LED indicator for power on
- Modular DIN 43880 housing, 1 module; suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601) as Auxiliary Devices - Timers; EAC, CCC. Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

TMSTA440	0.1...1s 1...10s 6...60s 1...10min	380...440VAC	1	0.090

General characteristics

- Electronic time relay, multiscale, multivoltage for starting (star-delta, impedance, autotransformer, etc) of induction motors (squirrel cage), 2 separate timings
- 1 relay output with 2 normally open (N/O-SPST) contacts with common pole
- Delay time adjustable on front by rotary switch: 10-100% for star connection
- Starting and transition (20...300ms time scale - from star to delta), time adjustable on front by rotary switch
- Green LED indicator for power on
- Red LED indicator for relay state; flashing during delay and steady at delay lapsing
- Modular DIN 43880 housing, 1 module; suitable for fixing on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601) as Auxiliary Devices - Timers; EAC, CCC. Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

Time relay for staircase lighting with "zero crossing" load switching

new

TMLSL

Order code	Time of scale range	Rated auxiliary supply voltage [V]	Qty per pkg n°	Wt [kg]
TMLSL	0.5...20min	220...240VAC	1	0.090

General characteristics

- Electronic time relay for staircase lighting single scale and single voltage
- 1 relay output with 1 powered normally open (N/O-SPST) contact
- Possible connections for 3- or 4-wire systems
- Zero crossing load switching
- Adjustable delay time on the front: 0.5...20min
- Selectable functions:
 - timed lighting + staircase cleaning
 - timed lighting with notice of shutdown + staircase cleaning
 - constant lighting
- Green LED for power presence signalling
- 1 control input can be connected to up to 50 light buttons (<1mA each)
- 1 relay output with normally open contact NO, 16A 250VAC
- LED lamp management up to 600W
- QR code for the direct connection to the LOVATO Electric website for the download of the technical manual
- Modular housing DIN 43880 (1 module), suitable for fixing on 35mm omega profile or screw fixing
- Degree of protection: IP40 on front (if mounted in container and/or electrical panel having IP40), IP20 on terminals.

Certifications and compliance

Certifications obtained: EAC. Compliant with standards: IEC/EN/BS 61812-1, UL508, CSA C22.2 n°14.

"ZERO CROSSING" LOAD SWITCHING - IDEAL FOR LED LAMPS

The time relay for staircase TMLSL uses "zero crossing" technology for load switching, which consists in monitoring the sinusoidal mains voltage and inserting the load at the exact instant in which the voltage passes through zero.

This has several advantages:

- reduction of the inrush current generated when the lamp is activated, which can reach very high values, especially in the increasingly popular LED lamps
- protection of the lamp and extension of the electrical life
- protection of the time relay contact from the risk of sticking
- reduction of consumption.

- Screw fixing or on DIN rail for HR7X..., flush mount for 31L48... with accessory 31L48AP
- Screw terminals
- Ratings: 10A - 250VAC.

Certifications and compliance

Certifications obtained: cURus (for 31L48... and HR7X... type), CSA (for HR7X... type), EAC. Compliant with standards: IEC/EN/BS 61810-1 (for HR7X... type), IEC/EN/BS 61812-1, UL508, CSA C22.2 n° 14.

Automation and control
19 Monitoring relays

- Modular versions suitable for different type of installations, DIN rail, screw fixing or switchboard, also suitable for rear mounting plate fixing
- Minimum and maximum voltage monitoring relays for single and three-phase systems, with or without neutral
- Voltage asymmetry, phase sequence and phase loss control relays
- Multifunction voltage and frequency monitoring relays with NFC technology and APP
- Frequency monitoring relays
- Minimum and maximum current monitoring relays
- Interface protection system units compliant with standards CEI 0-21, CEI 0-16, DEWA DRRG, ENA G59-3/G99, VDE-AR-N 4105, VDE V 0126-1-1, SEC (Saudi Electricity Company).

CURRENT MONITORING RELAYS

- For single and three-phase systems
- Maximum AC/DC current
- Minimum or maximum AC/DC current
- Minimum and maximum AC/DC current.

Page 19-11

PUMP PROTECTION RELAYS

- For single and three-phase systems
- Minimum $\cos\phi$ for dry running protection
- Maximum AC current
- Phase loss and incorrect phase sequence.

Page 19-12

INTERFACE PROTECTION SYSTEM UNITS

- Compliant with Italian standard CEI 0-21, for low voltage
- Compliant with Italian standard CEI 0-16, for medium voltage
- Compliant with standard SHAMS DUBAI - DRRG (DEWA)
- Compliant with technical guide SEC (Saudi Electricity Company)
- Compliant with technical guide ENA G59-3/G99
- Compliant with technical guide VDE-AR-N 4105
- Compliant with technical guide VDE V 0126-1-1.

PMV40A575	380...575VAC	1	0.130
PMV40A600	600VAC	1	0.130

General characteristics

- Voltage monitoring relay, self powered, for phase loss and incorrect phase sequence
- Phase loss detection if one of the voltages is <70% rated value
- Phase loss tripping time: 60ms
- 1 relay output with 1 changeover contact (SPDT)
- Modular DIN 43880 housing: 1 module for PMV10; 2 modules for PMV20
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601) as Auxiliary Devices; EAC. Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

General characteristics

- Voltage monitoring relay, self powered, for minimum voltage, phase loss and incorrect phase sequence
- Configurable rated voltage (Ue):
 - PMV30A240: 208-220-230-240VAC
 - PMV30A575: 380-400-415-440-460-480-525-575VAC
- Excellent tripping accuracy
- TRMS measurements (True Root Mean Square)
- Control of phase-to-phase voltages
- Phase loss detection if one of the voltages is <70% rated value
- Phase loss tripping time: 60ms
- 1 relay output with 1 changeover contact (SPDT)
- Modular DIN 43880 housing, 2 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "V min" Minimum voltage tripping threshold
80...95% Ue
- "Delay" Tripping time 0.1...20s
- "Reset delay" Resetting time 0.1...20s.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices; EAC. Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

General characteristics

- Voltage monitoring relay, self powered, for asymmetry, phase loss and incorrect phase sequence
- Excellent tripping accuracy
- TRMS measurements (True Root Mean Square)
- Control of phase-to-phase voltages
- Phase loss detection if one of the voltages is <70% rated value
- Phase loss tripping time: 60ms
- 1 relay output with 1 changeover contact (SPDT)
- Modular DIN 43880 housing, 2 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "Asymmetry" High voltage asymmetry tripping threshold
5...15% Ue
- "Delay" Tripping time 0.1...20s
- "Reset delay" Resetting time 0.1...20s.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices; EAC. Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

- Voltage monitoring relay, self powered, for minimum and maximum voltage, phase loss, neutral loss and incorrect phase sequence
- 4 configurable rated voltages (Ue):
 - **PMV50NA240:** 208-220-230-240VAC (phase-to-phase) 120-127-132-138VAC (phase-to-neutral)
 - **PMV50NA440:** 380-400-415-440VAC (phase-to-phase) 220-230-240-254VAC (phase-to-neutral)
 - **PMV50NA600:** 480-525-575-600VAC (phase-to-phase) 277-303-332-347VAC (phase-to-neutral)
- Excellent tripping accuracy
- TRMS measurements (True Root Mean Square)
- Phase loss detection when one of the voltages is <70% rated voltage
- Phase or neutral loss tripping time: 60ms
- 2 relay outputs, each with 1 changeover contact (SPDT)
- Modular DIN 43880 housing, 3 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "V max" Maximum voltage tripping threshold 105...115% Ue
- "V min" Minimum voltage tripping threshold 80...95% Ue
- "Delay" for each Tripping time 0.1...20s
- "Reset delay" Resetting time 0.1...20s.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

PMV70N...

Order code	Rated voltage to control Ue (phase-to-phase)	Qty per pkg	Wt
	[V] 50/60Hz	n°	[kg]

- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "V max" Maximum voltage tripping threshold 105...115% Ue
- "V min" Minimum voltage tripping threshold 80...95% Ue
- "Hz min/max" Minimum/maximum frequency tripping threshold ±1...10% rated frequency
- "V delay" Tripping time 0.1...20s
- "Hz delay" Tripping time 0.1...5s.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

For single-phase systems

PMV55...

Order code	Rated voltage to control Ue	Qty per pkg	Wt
	[V] 50/60Hz	n°	[kg]
Single-phase system. Minimum and maximum AC voltage. Delayed trip.			
PMV55A127	110...127VAC	1	0.125
PMV55A240	208...240VAC	1	0.125
PMV55A440	380...440VAC	1	0.125

General characteristics

- Voltage monitoring relay, self powered, for minimum and maximum voltage
- 4 configurable rated voltage (Ue):
 - **PMV55A127:** 110-115-120-127VAC
 - **PMV55A240:** 208-220-230-240VAC
 - **PMV55A440:** 380-400-415-440VAC
- Excellent tripping accuracy
- TRMS measurements (True Root Mean Square)
- 1 relay output with 1 changeover contact (SPDT)
- Modular DIN 43880 housing, 2 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "V max" Maximum voltage tripping threshold 105...115% Ue
- "V min" Minimum voltage tripping threshold 80...95% Ue
- "Delay" for each Tripping time 0.1...20s
- "Reset delay" Resetting time 0.1...20s.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices; EAC.
Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

19 Monitoring relays

Multifunction voltage and frequency monitoring relays.

INDEX

Multifunction voltage and frequency monitoring relays for three-phase systems with or without neutral, with NFC technology and APP

PMV95N...

The App can be downloaded from Google Play Store and App Store.

Order code	Rated voltage to control Ue (phase-to-phase)	Qty per pkg	Wt
	[V] 50/60Hz	n°	[kg]
PMV95NA240NFC	208...240VAC	1	0.130
PMV95NA575NFC	380...575VAC	1	0.130

Three-phase system, with or without neutral. Minimum and maximum AC voltage, minimum and maximum frequency and asymmetry. Delayed trip. Phase loss, neutral loss and phase sequence. Instantaneous trip. Programmable via smartphone or tablet with NFC technology and App.

General characteristics

- Multifunction voltage and frequency monitoring relay, self powered, for minimum and maximum voltage, minimum and maximum frequency, phase loss, neutral loss, incorrect phase sequence and asymmetry.
- NFC connectivity for parameter setting with LOVATO NFC App, freely downloadable from Google Play Store and App Store
- Simple, fast and intuitive programming
- Very high accuracy and repeatability of the settings
- Possibility to save the program on smartphone or tablet to be copied on other PMV95N, even with device powered off
- Possibility to enable or disable individually the functions of interest
- Possibility to protect the settings with a password
- QR code for the direct connection to the website www.LovatoElectric.com for the download of the technical manual
- Excellent tripping accuracy
- TRMS measurements (True Root Mean Square)
- Phase loss detection if one of the voltages is <70% rated value
- 1 relay output with changeover contact (SPDT)
- Modular DIN 43880 housing, 2 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.
- Adjustments: consult the technical manual on the website www.LovatoElectric.com.

8 protection functions in a single product, with possibility to enable or disable individually the functions of interest.

- maximum voltage
- minimum voltage
- maximum frequency
- minimum frequency
- asymmetry
- phase loss
- neutral loss
- incorrect phase sequence

Simple and intuitive programming thanks to the graphic interface of the LOVATO NFC App that shows on the display of the smartphone the functions and parameters without need to consult the technical manual.

Compact dimensions

Suitable for three-phase systems with or without neutral. It comes in a 2 DIN module housing

Excellent accuracy of settings with digital setting of time and tripping thresholds.

Repeatability of settings, with possibility to save the programming on the smartphone to be copied in fast way on other relays without risk of error.

Protection of settings with a password.

19 Monitoring relays

Frequency monitoring relays.
Current monitoring relays

INDEX

Frequency monitoring relays for single and three-phase systems

PMF20...

Order code	Rated voltage Ue	Qty per pkg	Wt

Single and three-phase systems. Minimum and maximum frequency. Delayed trip. Automatic reset.			
PMF20A240	220...240VAC	1	0.125
PMF20A415	380...415VAC	1	0.125

General characteristics

- Frequency monitoring relay, self powered, for minimum and maximum control
- Rated frequency selection: 50 or 60Hz
- Tripping threshold for minimum and maximum frequency
- Excellent tripping accuracy
- 1 relay output, configurable, with 1 changeover contact (SPDT)
- Modular DIN 43880 housing, 2 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "Hz max" Maximum frequency tripping threshold
101...110% rated frequency
- "Delay" Tripping time 0.1...20s
- "Hz min" Minimum frequency tripping threshold
90...99% rated frequency
- "Delay" Tripping time 0.1...20s
- "Reset delay" Resetting time 0.1...20s
- "Mode"
 - Minimum and maximum frequency with output relay normally energised
 - Maximum frequency with output relay normally energised
 - Minimum frequency with output relay normally energised
 - Maximum frequency with output relay normally de-energised.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices; EAC. Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

Current monitoring relay for single-phase systems

PMA20240

Order code	Rated current Ie	Auxiliary supply voltage	Qty per pkg	Wt
	[A]	[V]	n°	[kg]
Single-phase system. AC/DC maximum current control. Auxiliary AC/DC power supply. Automatic or manual reset.				
PMA20240	5 or 16A	24...240V AC/DC	1	0.121

General characteristics

- Current monitoring relay for AC/DC maximum current control
- AC/DC multivoltage auxiliary power supply
- Direct connection up to 16A max or by current transformer (CT)
- Excellent tripping accuracy
- TRMS current measurements (True Root Mean Square)
- Resetting and inhibition input
- 1 relay output with 1 changeover contact (SPDT)
- Modular DIN 43880 housing, 2 modules
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- IEC degree of protection: IP40 on front (only when placed in IP40 enclosure or control board); IP20 at terminals.

ADJUSTMENTS

- "Imax" Maximum current tripping threshold
5...100% Ie
- "Hysteresis" Maximum hysteresis threshold
1...50%
- "Trip delay" Tripping time 0.1...30s
- "Inhibition time" Inhibition delay for external input or at power up 1...60s
- "Aut. reset delay" Automatic resetting time 0.1...30s
- "Mode"
 - Rated current 5A or 16A
 - Relay output normally energised or de-energised
 - Tripping memory (latch) ON or OFF.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices - Modular ampere monitoring relays; EAC. Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

Communication ports.	
EXP1010	Opto-isolated USB interface
EXP1011	Opto-isolated RS232 interface
EXP1012	Opto-isolated RS485 interface
EXP1013	Opto-isolated Ethernet interface
EXP1018	IEC/EN/BS 61850 interface

IEC/EN/BS 61850 protocol

The EXP1018 module will be made available only when the competent authorities have established the exact terms of the supervision and control of the specific commands (currently under study as specified in the Italian CEI 0-21 standard).

EXP1003

PMVFUPS01

new

Order code	Description	Qty per pkg	Wt
Backup power supply for interface protection unit PMVF20.			
PMVFUPS01	Input 230VAC Output 230VAC with stored energy 200Ws and power 250VA	1	0.500

General characteristics

PMVF20 interface protection system (IP) unit has been developed according to the Italian CEI 0-21 standard prescriptions. It is used when a local generating system is connected in parallel with the low-voltage electric utility. The controls refer to limits of voltage and frequency monitoring.

In the case when either the voltage or the frequency are out of admissible limits, PMVF... must step in by de-energising a relay output so that the interface device (DDI) trips.

PMVF20 is equipped with 4 inputs having the following functions:

- DDI status feedback
- External signal for frequency selection (communication network malfunction)
- Local control for frequency selection
- Remote tripping (forced DDI opening independent of voltage and frequency values).

Also, there are two relay outputs for:

- DDI opening and closing
- Standby device opening (programmable: retentive normally energised, retentive normally de-energised or adjustable pulse).

The standby device control is compulsory in installations with more than 20kW and consists of a signal, with a 0.5s delay respect to the DDI opening command, transmitted only if the DDI fails and does not complete the disconnection.

By fitting the EXP10 03 expansion module on the PMVF20, the following functions can be configured as:

- Programmable alarm
- Autonomous signalling in case of phase power unbalance (LSP), only if three CTs are also installed.

Operational characteristics

- Auxiliary voltage:
 - PMVF20: 100...400VAC/110...250VDC
 - PMVF20 D048: 12...48VDC
- Voltage inputs:
 - 400VAC (three-phase connection)
 - 230VAC (single-phase connection)
- Relay outputs 5A 250VAC AC1 / 5A 30VDC
- 4 digital inputs
- Current inputs (optional): Use via CTs with selectable /5A or /1A secondary
- Parameter configuration and remote control (only with communication expansion module) with software **Synergy** and **Xpress**
- Housing: Flush mount 96x96mm/3.78x3.78"
- IEC degree of protection: IP65 on front; IP20 on terminals
- **Predisposed for IEC/EN/BS 61850 signal supervision using expansion or external module** .

Reference standards

Compliant with standards: Italian CEI 0-21, IEC/EN/BS 60255-27, IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

Synergy: Supervision and Energy management software with remote and configuration capabilities.

Xpress: Free software for Energy management controlling one device only.

See section 30.

PMVFUPS01

new

Order code	Description	Qty per pkg	Wt
------------	-------------	-------------	----

Backup power supply for interface protection unit PMVF51.

PMVFUPS01	Input 230VAC Output 230VAC with stored energy 200Ws and power 250VA	1	0.500
------------------	--	---	-------

General characteristics

PMVF51 interface protection system (IP) unit has been developed according to the Italian CEI 0-21 standard prescriptions. Each is used when a local solar generating system is connected in parallel with the low-voltage electric utility. The controls refer to limits of voltage and frequency monitoring.

In the case when either the voltage or the frequency are out of admissible limits, PMVF51 must step in by de-energising a relay output so that the interface device (DDI) trips. PMVF51 is certified for use in single and three phase systems, where it is required in presence of storage systems connected in parallel to the distribution network and to the photovoltaic inverter on the AC side (presence of multiple energy generators simultaneously or exceeding the threshold of 11.08kW overall).

PMVF51 is equipped with 4 inputs having the following functions:

- DDI status feedback
- External signal for frequency selection (communication network malfunction)
- Local control for frequency selection
- Remote tripping (forced DDI opening, independent of voltage and frequency values).

Also, there are two relay outputs for:

- DDI opening and closing
- Standby device opening (programmable: retentive normally energised, retentive normally de-energised or adjustable pulse).

The standby device control is compulsory in installations with more than 20kW and consists of a signal, with a 0.5s delay respect to the DDI opening command, transmitted only if the DDI failed and did not complete the disconnection. PMVF51 also has two additional relay outputs (EXM1001) to configure as:

- Programmable alarm
- Autonomous signalling in case of phase power unbalance (LSP), only if three CTs are also installed.

Operational characteristics

- Auxiliary voltage: 100...240VAC/110...250VDC
- Voltage inputs:
 - 400VAC (three-phase connection)
 - 230VAC (single-phase connection)
- Relay outputs 5A 250VAC AC1 / 5A 30VDC
- 4 digital inputs
- Current inputs (optional): Use via CTs with selectable /5A or /1A secondary
- Parameter configuration and remote control (only with communication expansion module) with software **Synergy** and **Xpress**
- Modular housing (6 modules)
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- Degree of protection for both: IP40 on front; IP20 on terminals
- **Predisposed for IEC/EN/BS 61850 signal supervision using expansion or external module.**

Reference standards

Compliant with standards: Italian CEI 0-21, IEC/EN/BS 60255-27, IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

Synergy: Supervision and Energy management software with remote and configuration capabilities.

Xpress: Free software for Energy management controlling one device only.

See section 30.

General characteristics for PMVFUPS01

CEI 0-21 and CEI 0-16 standards require an auxiliary power supply to feed the interface protection (IP), the interface switch (IS) and the backup switch for at least 5 seconds in the event of a power failure. PMVFUPS01 guarantees the necessary energy by accumulating it in capacitors, thus avoiding the use of batteries that require maintenance.

- Power supply: 230VAC, 50Hz
- Output voltage: 230VAC, 50Hz
- Output power: 250VA
- Accumulated energy: 200Ws
- Accumulation time: 15s
- 9U modular housing
- Operating temperature: -5...+ 55°C
- Degree of protection IP20.

Reference standards

Compliant with standards: IEC/EN/BS 61010-1.

EXP10...

PMVFUPS01

new

Order code	Description	Qty per pkg	Wt
PMVFUPS01	Backup power supply for interface protection unit PMVF30. Input 230VAC Output 230VAC with stored energy 200Ws and power 250VA	1	0.500

General characteristics

PMVF30 interface protection system (IP) unit has been developed according to the Italian CEI 0-16 standard prescriptions. It is used when a local generating system is connected in parallel with the medium-voltage utility distribution grid. The controls refer to limits of voltage and frequency monitoring.

In the case when either the voltage or the frequency are out of admissible limits, PMVF... must step in by de-energising a relay output so that the interface device (DDI) trips.

PMVF30 is equipped with inputs having the following functions:

- DDI status feedback
- Interface protection system exclusion
- Local control
- Remote tripping (forced DDI opening, independent of voltage and frequency values).

In addition, there are two relay outputs to configure as:

- DDI opening
- Programmable (either as factory default for standby device opening or to set up as auto reclosing if the DDI is an automatic circuit breaker).

Standby device opening

In installations with more than 400kW, the standard specifies there must be a command signal, that releases another standby device, given within 1 second whenever the DDI opening fails or malfunctions.

Automatic DDI reclosing

Whenever an automatic circuit breaker is used as the DDI, the PMVF30 is capable of controlling both the opening (according to the installation conditions indicated in the Italian CEI 0-16 standard) and the auto reclosing. The auto reclosing function includes defining the number of attempts and the time interval between an attempt and the following one as well as generating an alarm if the closing operation does not take place.

This function can be carried out through a programmable output of the PMVF30 (unless it is already used for the standby device operation) or by installing an EXP1003 expansion module.

Operational characteristics

- Auxiliary voltage:
 - PMVF30: 100...400VAC/110...250VDC
 - PMVF30D048: 12...48VDC
- Voltage inputs (connection via VTs in MV or directly in LV end):
 - Primary: until 150,000V
 - Secondary: 50...500V (for voltage/frequency); 50...150V (for residual voltage measurement)
- Relay outputs 5A 250VAC AC1 / 5A 30VDC
- 4 digital inputs
- 3 current inputs (for optional measuring): Use via CTs with selectable /5A or /1A secondary
- Parameter configuration and remote control (only with communication expansion module) with software **Synergy** and **Xpress**
- Housing: Flush mount 96x96mm/3.78x3.78"
- Degree of protection: IP65 on front; IP20 on terminals
- **Predisposed for IEC/EN/BS 61850 signal supervision using expansion or external moduleⓈ.**

PMVF80	Programmable	100...240VAC/ 110...250VDC	1	0.470

General characteristics

PMVF... interface protection system (IP) units have been developed in order to be used when a local generating system is connected in parallel with the utility distribution grid. The controls refer to limits of voltage and frequency monitoring.

In the case when either the voltage or the frequency are out of admissible limits, the PI must step in by de-energising a relay output so that the interface device (IS) trips.

PMVF... is equipped with 4 inputs having the following functions:

- IS status feedback
- R.O.C.O.F./Vector shift delay or external signal for frequency selection (communication network malfunction)
- Disabling signal
- Remote tripping (forced IS opening, independent of voltage and frequency values).

Also, there are two relay outputs for:

- IS opening and closing
- Standby device opening (programmable: retentive normally energised, retentive normally de-energised or adjustable pulse).

The backup device consists of a signal contemporary or delayed respect to the IS opening command, transmitted only if the IS failed and did not complete the disconnection. PMVF... also has two additional relay outputs (EXM1001) to configure as:

- Programmable alarm
- Autonomous signalling in case of phase power unbalance (LSP), only if three CTs are also installed.

Operational characteristics

- Auxiliary voltage: 100...240VAC/110...250VDC
- Voltage inputs:
 - 400VAC (three-phase connection)
 - 230VAC (single-phase connection)
- Relay outputs 5A 250VAC AC1 / 5A 30VDC
- 4 digital inputs
- Current inputs (optional): use via CTs with selectable /5A or /1A secondary
- Support of EXM series communications ports (USB, RS232, RS485, Ethernet) see section 31
- Parameter configuration and remote control (only with communication expansion module) with software **Synergy** and **Xpress**
- Modular housing (6 modules)
- Mounting on 35mm DIN rail (IEC/EN/BS 60715) or screw fixing via pull out tabs
- Degree of protection for both: IP40 on front; IP20 on terminals
- **Predisposed for IEC/EN/BS 61850 signal supervision using expansion or external module.**

19 Monitoring relays

Interface protection system unit compliant with G59 (ENA) technical guide

INDEX

Remote control and monitoring GSM modem via SMS

Compliant with Italian CEI 0-16 Standard, paragraph 8.8.6.5 and annex M, resolution 421/2014 of the ARERA

EXCGSM01

Order code	Description
	GSM Modem (modular - 4U). IP69K outside aerial with 2.5m cable. RJ45-USB programming cable (included).
EXCGSM01	100...240VAC, 1 digital input, 1 analogic input (0...10V, 0...20mA, NTC), 1 relay output

General characteristics

With EXCGSM01 it is possible to remotely operate a relay output and obtain information on the system by sending programmable SMS. Using the configuration software (downloaded for free from www.LovatoElectric.com) the user can control the relay output and both the digital and analog inputs. The logic is based on events (for example, the activation of the digital input or the arrival of an SMS with specific text), to which the user can decide specific actions (reply either by SMS or voice message, or by switching the relay output).

Use with CEI 0-16

The CEI 0-16 standard in paragraph 8.8.6.5 and in attachment M prescribes that the electricity production plants powered by wind or solar photovoltaic sources with power greater than or equal to 100kW, connected or to be connected to medium voltage grids, are equipped with GSM modem. Thanks to this modem it is possible to manage the disconnection of the generation through the messages sent by the energy distributor.

Functional characteristics

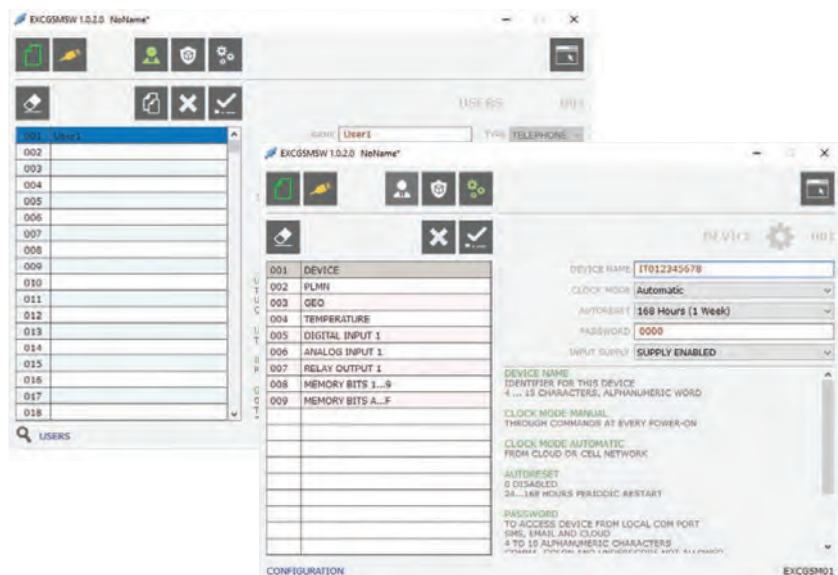

- Connection to the GSM network for sending and receiving SMS messages
 - Programmable message texts
 - Command output piloted by SMS or internal logic, for example to send the remote disconnection command to the interface device CEI 0-16
 - Programmable digital input, for example to detect the status of the Interface Switch (IS) and sending of successful IS opening and closing SMSs
 - POD management (active user code)
 - Management of the list of caller IDs (CLI) up to 5000 callers enabled
 - Detection of mobile network coverage
 - Full compatibility with medium-voltage PI LOVATO Electric PMVF30: no software/hardware updates or programming required
 - **Compatibility with third-party PIs where the remote disconnection signal is transmitted via digital input (dry contact)**
- For additional information contact our Technical support
Tel. + 39 035 4282422; E-mail: service@LovatoElectric.com.

Software

To configure the EXCGSM01 modem (using the RJ45-USB programming cable included), the EXCGSMSW software must be used. This can be downloaded for free from the www.LovatoElectric.com website. The software allows you to set:

- the users enabled to exchange messages with the modem
- the identifier of the modem, for example the active customer code (POD) in CEI 0-16 applications;
- the functions assigned to the digital output and input and to analog input;
- the texts of the SMS associated with the commands
- the logic of the actions taken following the SMS arrival, change of input status, alarm situations.

Configuration is also possible off-line, creating a file to transfer to the modem at another time.

Operational characteristics

- MODEM**
- 35mm DIN (IEC/EN/BS 60715) rail fixing
 - 4 modules
 - Supply: 100...240VAC
 - Consumption: 5VAC
 - 1 digital output 3A 250VAC
 - 1 self-supplied digital input
 - 1 analog input 0...10V, 0...20mA, NTC
 - Housing for 3V and 1.8V SIM card
 - SIM PIN management
 - Temperature sensor
 - Update time, sunrise and sunset via GSM network
 - Position update via GSM
 - Certified according to FCC rules, part 15B
 - Operating temperature: -20...+60°C
 - Protection rating: IP40 on front; IP20 on terminals.

AERIAL

- Quad band 850/900/1800/1900MHz
- Degree of protection: outside IP69K
- 2.5m cable
- Fixing via M10 hole:
 - with adhesive seal
 - with threaded pin and nut.

Compliance

Compliant with electrical safety standards: EN/BS 62368, EN/BS 62311.

DESCRIPTION			
	Single-phase maximum current monitoring AC/DC multiscale	Single-phase minimum or maximum current monitoring AC/DC multiscale	Single-phase minimum and maximum current monitoring AC/DC multiscale
CONTROL CIRCUIT			
Rated current	5 or 16A		0.02 - 0.05 - 0.25 - 1 - 5 - 16A
Rated frequency	50/60Hz ±5%		
Overload capacity	5 le for 1s 160A for 10ms Constant 16A	50mA - 1A inputs: 5 le for 1s 10le for 10ms Constant 2le	16A input: 5 le for 1s 160A for 10ms Constant 16A
Connection	Direct or by current transformer		
Adjustment	Tripping values 5...100% f.s.		
	Tripping time 0.1...30s		
	Inhibition time 1...60s		
	1...50%	3% fixed	
Resetting	Automatic or manual		
External input	Resetting or inhibition		—
Repeat accuracy	±1% with constant parameters		
AUXILIARY SUPPLY			
Auxiliary supply voltage Us	24...240VAC/DC		
Operating range	0.85...1.1Us		
Rated frequency	50/60Hz ±5%		
Power consumption (maximum)	3.2VA	7VA	
Power dissipation (maximum)	1.6W	1.7W	
RELAY OUTPUTS			
Number of relays	1	2	
Relay state	Normally energised / de-energised (selectable)		
Contacts arrangement	1 changeover contact SPDT each		
Rated operational voltage	250VAC		
Maximum switching voltage	400VAC		
IEC conventional free air thermal current Ith	8A		
UL/CSA and IEC/EN/BS 60947-5-1 designation	B300		
Electrical life (with rated load)	10 ⁵ cycles		
Mechanical life	30x10 ⁶ cycles		
Indications	1 green LED for power on/inhibition 1 red LED for tripping	1 green LED for power on/inhibition 2 red LEDs for max/min tripping	
CONNECTIONS			
Tightening torque maximum	0.8Nm (7lb.in; 7...9lb.in per UL/CSA)		
Conductor section min...max	0.2...4.0mm ² (24...12AWG; 18...12AWG per UL/CSA)		
INSULATION (input-output)			
IEC rated insulation voltage Ui	415VAC		
IEC rated impulse withstand voltage Uimp	4kV		
IEC power frequency withstand voltage	2.5kV		
AMBIENT CONDITIONS			
Operating temperature	-20...+60°C		
Storage temperature	-30...+80°C		
HOUSING			
Material	Self-extinguishing polyamide		

19 Monitoring relays

Technical characteristics
Pump protection

INDEX

TYPE	PMA50	
DESCRIPTION	Single and three-phase pump protection (motor under-load and over-current control) monitoring for max AC current, min $\cos\phi$, phase loss and incorrect phase sequence	
CURRENT AND $\cos\phi$ CONTROL CIRCUIT		
Rated current I_e	5 or 16A	
Rated frequency	50/60Hz $\pm 5\%$	
Overload capacity	5 I_e for 1s 160A for 10ms Constant 16A	
Connection	Direct or by current transformer	
Adjustments	End-scale value	5 or 16A
	Tripping for MAX current	10...100 I_e
	Tripping for $\cos\phi$	0.1...0.99 $\cos\phi$ (Min)
	Tripping delay	0.1...10s
	Inhibition time	1...60s
	Automatic resetting delay	OFF...100min
External input	Consent for running/resetting	
Repeat accuracy	$\pm 1\%$ with constant parameters	
VOLTAGE CONTROL CIRCUIT		
Voltage measuring range (U_e)	80...660VAC	
Tripping time for phase loss	60ms	
AUXILIARY SUPPLY		
Auxiliary supply voltage U_s	220...240VAC	
	380...415VAC (maximum voltage for UL/CSA)	
	440...480VAC	
Operating range	0.85...1.1 U_s	
Frequency range	50/60Hz $\pm 5\%$	
Power consumption (maximum)	4.5VA	
Power dissipation (maximum)	2.3W	
RELAY OUTPUTS		
Number of relays	1	
Relay state	Normally energised, de-energises at tripping	
Contact arrangement	1 changeover contact SPDT	
Rated operational voltage	250VAC	
Maximum switching voltage	400VAC	
IEC conventional free air thermal current I_{th}	8A	
UL/CSA and IEC/EN/BS 60947-5-1 designation	B300	
Electrical life (With rated load)	10^5 cycles	
Mechanical life	30×10^6 cycles	
Indications	1 green LED for power on/inhibition 2 red LEDs for tripping	
CONNECTIONS		
Tightening torque maximum	0.8Nm (7lb.in)	
Conductor section min...max	0.2...4.0mm ² (24...12AWG; 18...12AWG per UL/CSA)	
INSULATION (input-output)		
IEC rated insulation voltage U_i	600VAC	
IEC rated impulse withstand voltage U_{imp}	6kV	
IEC power frequency withstand voltage	2.5kV	
AMBIENT CONDITIONS		
Operating temperature	-20...+60°C	
Storage temperature	-30...+80°C	
HOUSING		
Material	Self-extinguishing polyamide	

19 Monitoring relays

Technical characteristics
Frequency monitoring relays

INDEX

TYPE	PMF20	
DESCRIPTION	Single-phase minimum and maximum frequency control	
FREQUENCY CONTROL CIRCUIT		
Rated frequency	50 or 60Hz selectable	
Operating frequency range	40...70Hz	
Adjustment	MAX tripping	101...110% operating frequency
	MIN tripping	90...99% operating frequency
	Resetting hysteresis	0.5%
	Inhibition time	0.1...20s
	Reset delay	0.1...20s
Resetting	Automatic	
Repeat accuracy	< ±0.1%	
AUXILIARY POWER SUPPLY		
Rated supply voltage Ue	220...240VAC	
	380...415VAC	
Operating range	0.85...1.1Ue	
Rated frequency	50/60Hz	
Power consumption (maximum)	10VA (220...240VAC); 17VA (380...415VAC)	
Power dissipation (maximum)	1.5W	
RELAY OUTPUTS		
Number of relays	1	
Relay state	Normally energised, de-energises at tripping ^❶	
Contact arrangement	1 changeover contact SPDT	
Rated operational voltage	250VAC	
Maximum switching voltage	400VAC	
IEC conventional free air thermal current I _{th}	8A	
UL/CSA and IEC/EN/BS 60947-5-1 designation	B300	
Electrical life (with rated load)	10 ⁶ cycles	
Mechanical life	30x10 ⁶ cycles	
Indications	1 green LED for power on/tripping 2 red LEDs for min-max tripping	
CONNECTIONS		
Tightening torque maximum	0.8Nm (7lb.in)	
Conductor section min-max	0.2...4.0mm ² (24...12AWG)	
INSULATION (input - output)		
IEC rated insulation voltage U _i	575VAC	
IEC rated impulse withstand voltage U _{imp}	6kV	
IEC power frequency withstand voltage	4kV	
AMBIENT CONDITIONS		
Operating temperature	-20...+60°C	
Storage temperature	-30...+80°C	
HOUSING		
Material	Self-extinguishing polyamide	

❶ Normally de-energised, energises at tripping with MAX function configured.

Operational characteristics

- Used with 3 sensing electrodes, MIN, MAX and COM
- 2.5...50kΩ adjustable sensitivity
- Double insulation between each supply, electrodes and output relay circuits
- Fixed probe signal delay: <1s
- Green LED indicator for power on
- Red LED indicator for output relay state
- Modular DIN 43880 housing (2 modules)
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, EAC, for USA and Canada (cULus-File E93601), as Auxiliary Devices - Level control relays.

Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 no. 14.

Probes and electrode holders

Use probes and electrode holders type: 11SN1/31PS31/31PS3S/31SCM/31CGL or similar (see page 20-6).

20 Level controls

Level control relays.
Modular version

INDEX

Single-voltage multifunction relay

LVM40...

FUNCTIONS

A- Emptying with MIN and/or MAX alarms.

B- Filling with MIN and/or MAX alarms.

EXAMPLE OF EMPTYING OPERATION

To achieve this type of operation, two electrodes are used to control the liquid between the fixed limits using MIN1 and MAX1 and two alarm levels using MIN2 and MAX2. When one of the alarm electrodes is wet, the alarm relay is de-energised.

The alarm can be caused by pump malfunction, insufficient pump delivery capacity, MAX control level failure or MIN level electrode shorted.

With a proper connection, only the MIN alarm or MAX alarm can be activated or neither of the two can be activated so the relative output contacts can be used for pump control.

C- Emptying with pump priority change.

D- Filling with pump priority change.

EXAMPLE OF EMPTYING OPERATION

This operation is obtained by using four electrodes positioned at four different levels and two relay outputs to control two pumps. For example, one can place the four electrodes, MIN1, MIN2, MAX1 and MAX2, in increasing order from the lowest to the highest levels and must control the tank emptying. Usually the level is controlled between the MIN1 and MAX1 levels by starting one of the two pumps. This case is different so the pumps can be maintained at the best efficiency and optimise their wear. When the liquid wets the MAX2 level and because the first pump is faulty or else a higher delivery capacity is needed, the second stand-by pump is activated to back up the first pump. When the liquid lowers and no longer wets the MIN2 level, the second pump is stopped and then when the MIN1 level is no longer wet, the first pump is stopped too.

E- Tank filling and well drawing with alarm.

EXAMPLE

Two electrodes are used in this operation to control the tank level and another two for the well. One relay is used to activate the pump while the other for dry running / no water alarm.

When the well liquid wets the MAX2 level and the liquid wets the MIN1 tank level, the tank-filling pump is activated.

When the tank MAX1 level is wet, the pump is stopped. During the tank filling, the pump could stop before the MAX1 level is wet because the well MIN2 level is no longer wet.

Should the tank MIN1 level no longer be wet at which the pump should restart but the well MIN2 level is also no longer wet, then the alarm relay is de-energised.

Order code	Auxiliary supply voltage	Type of output contacts	Qty per pack	Weight

① Two relay outputs; one with C/O (SPDT) and one with N/O (SPST).

Operational characteristics

- Use with 5 sensing electrodes, MIN1, MAX1, MIN2, MAX2 and COM
- 2.5...200kΩ adjustable sensitivity
- Adjustable sensitivity full-scale value: 25-50-100-200kΩ
- Separate sensitivity adjustment of MAX electrodes for foam detection
- Insensitivity to stray electrode-cable capacitance
- Programming selector for 5 different functions:
 - Emptying function and alarms (pos. A)
 - Filling function and alarms (pos. B)
 - Emptying function with pump priority start-up change (pos. C)
 - Filling function with pump priority start-up change (pos. D)
 - Well draining and tank filling and alarms (pos. E)
- Double insulation between each supply, electrodes and output relay circuits
- Adjustable probe signal delay: 1...10s
- Adjustable pump start delay: 0...30min
- Green LED indicator for power on
- Red LED indicators for output relay and electrode state
- Modular DIN 43880 housing (3 modules)
- IEC degree of protection: IP40 on front (only when mounted in housing or electric board with IP40); IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus-File E93601), as Auxiliary Devices - Level control relays, EAC.

Compliant with standards: IEC/EN/BS 60255-27, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 n° 14.

Probes and electrode holders

Use probes and electrode holders type:

11SN1/31PS31/31PS3S/31SCM/31CGL or similar (see page 20-6).

General characteristics

11SN1 SINGLE POLE PROBES

A single pole probe used for level control in wells or storage tanks. It comprises of an AISI 303 stainless steel electrode, a plastic (PPOX) holder and a cable gland.

A seal ring and the tightening of the cable gland PG7 prevent water from entering the cable terminal connector and causing its oxidation.

Cable connection: screw.

The external cable diameter must be 2.5 to 6mm/Ø0.1 to 0.24" to warrant perfect sealing.

Maximum connection cable section: 2.5mm²

Maximum operating temperature: +60°C.

Application: tanks and deep wells.

31SCM... PROBES

A single pole probe used for level control on boilers, autoclaves and in general where pressure (10bar maximum) and high temperature (+100°C maximum) are present. It comprises of an AISI 303 stainless steel electrode embedded in an aluminium oxide body and a 3/8" GAS threaded metal support holder.

Cable connection: threaded rod with nut.

Application: tanks, pressurised tanks and boilers.

31CGL125... PROBES

A single pole probe with AISI 302 electrode, used for level control on boilers and autoclaves and in general wherever pressure is maximum up to 10bar.

Maximum operating temperature: +180°C.

Threaded coupling: 3/8" GAS.

Cable connection: threaded rod with nut.

Application: tanks, pressurised tanks and boilers.

31PS31 PROBE

A small electrode holder, complete with three AISI 304 stainless steel probes.

Particularly suited to small containers whenever pressure is maximum up to 2bar.

Maximum operating temperature: +70°C.

Threaded coupling: 1/2" GAS.

Faston termination; related lugs supplied.

Application: tanks and automatic dispensers.

31PS3S ELECTRODE HOLDER

A thermoset resin electrode holder to be used with three probes (rods probes to be ordered separately) and complete with terminal cover.

Maximum operating temperature: +100°C.

2" GAS threaded coupling.

Cable connection: screw.

Application: tanks.

Certification and compliance

Certification obtained: EAC.

Compliant with standards: IEC/EN/BS 60255-27.

Order code	Rod probe length [mm/in]	Qty per pack n°	Weight [kg]

LVFSN1W20	Neoprene	20	Yes	1	2.480

Filling function

This function is achieved by connecting the black and blue float terminals. The level regulator contact closes the lower circuit at minimum level and opens the circuit when the float reaches the upper maximum level. The MIN and MAX levels can be adjusted by varying the distance between counterweight and float.

Emptying function

This function is achieved by connecting the black and brown float terminals. The level regulator contact closes the upper circuit at maximum level and opens the circuit when the float reaches the lower minimum level. The MIN and MAX levels can be adjusted by varying the distance between counterweight and float.

General characteristics

Float switches are used in the automation of electrical equipment, such as: pumps, solenoid valves, alarms, motorised sluice gates, etc. All versions feature an internal changeover contact operated in accordance with the level of liquid where the float is located. The cables used are high-quality and offer excellent mechanical or chemical resistance over time.

The cables are 3x1 type, that is 3 wires with section 1mm². This allows the user to choose the filling and emptying function during regulator wiring.

They are used for the civil and industrial control of levels of grey water, e.g. rainwater, groundwater or cooling water from industry. They are available with PVC and neoprene cables of various lengths.

Operational characteristics

- Upper switching angle: 30° ±5°
- Lower switching angle: 30° ±5°
- 130g external counterweight included
- Float casing material: polypropylene
- Cable A05 VV-F3X1 (PVC) available in lengths of 3, 5, 10, 15 and 20m/3.28, 5.47, 10.94, 16.40 and 21.87yd and cable H07 RN-F3X1 (Neoprene) available in lengths of 3, 5, 10, 15 and 20m/3.28, 5.47, 10.94, 16.40 and 21.87yd
- Rated cable diameter: 9mm/0.35" (PVC and Neoprene)
- Relay with changeover contact 10(8)A 250VAC 50/60Hz
- Maximum installation depth: 20m/21.26yd
- Maximum pressure: 2bar
- Operating temperature: 0...+50°C
- Storage temperature: -20...+80°C
- IEC degree of protection: IP68
- Insulation class: II.

Certifications and compliance

Certifications: TÜV-SUD.
Compliant with standards: IEC/EN/BS 60730-1, IEC/EN/BS 60730-2-15.

LVFSA1D10	PVC ACS+AD8	10	Yes	1	1.430
LVFSA1D15	PVC ACS+AD8	15	Yes	1	1.950
LVFSA1D20	PVC ACS+AD8	20	Yes	1	2.400

Filling function

This function is achieved by connecting the black and blue float terminals. The level regulator contact closes the lower circuit at minimum level and opens the circuit when the float reaches the upper maximum level. The MIN and MAX levels can be adjusted by varying the distance between counterweight and float.

Emptying function

This function is achieved by connecting the black and brown float terminals. The level regulator contact closes the upper circuit at maximum level and opens the circuit when the float reaches the lower minimum level. The MIN and MAX levels can be adjusted by varying the distance between counterweight and float.

For dirty water

Filling function

This function uses two floats and is achieved by connecting the black and blue float terminals. The MIN and MAX levels can be adjusted by varying the position of the floats.

Emptying function

This function uses two floats and is achieved by connecting the black and brown float terminals. The MIN and MAX levels can be adjusted by varying the position of the floats.

It is possible to use even a single float for black water, adjusting the level in a fixed range of 10cm max, a solution which is not advisable for turbulent waters.

General characteristics

Float switches LVFSA A1 D type are suitable for drinking water and foodstuffs applications such as aqueducts, fountains, aquariums, drinks, fish hatcheries, swimming pools, etc. They are realised with a non-toxic polypropylene outer shell, a stainless steel untreated sphere, and an AD8 cable with health certification ACS (Attestation de Conformité Sanitaire) with outer sheath with PVC suitable for drinkable water immersion and use with food products. They are provided with stainless steel counter weight AISI 316. All versions, which differ in the length of the cable, feature an internal changeover contact operated in accordance with the level of liquid where the float is located. The cables are 3x1 type, that is 3 wires with section 1mm². This allows the user to choose the filling and emptying function during regulator wiring.

Operational characteristics

- Upper switching angle: 30° ±5°
- Lower switching angle: 30° ±5°
- Stainless steel counterweight AISI 316 included
- Float casing material: polypropylene
- PVC cable ACS + AD8 certified
- Microswitch with changeover contact: 10(8)A 250VAC 50-60Hz
- Maximum installation depth: 20m/21.87yd
- Maximum pressure: 2bar
- Operating temperature: 0...+50°C
- Storage temperature: -20...+80°C
- Degree of protection: IP68
- Insulation class: II.

Certifications and compliance

Certifications: Health certification ACS (Attestation de Conformité Sanitaire) for the cable. Compliant with standards: IEC/EN/BS 60730-1, IEC/EN/BS 60730-2-15.

General characteristics

These float switches are used for the civil and industrial control of levels of dirty water, e.g. sewage or waste water from industry. The float switches comprises of a one-piece external blow-moulded polypropylene casing, with fixed internal counterweight located in the cable exit area. The regulator contact is positioned centrally in its own watertight chamber. This is insulated from the external casing by injecting closed-cell foam. This solution further increases protection against moisture leakage and heat insulates the watertight chamber housing the contact, eliminating the creation of condensation.

Operational characteristics

- Upper switching angle: 30° ±5°
- Lower switching angle: 20° ±5°
- Internal counterweight
- Float casing material: polypropylene
- Cable H07 RN-F3X1 (Neoprene) available in lengths of 5, 10, 15 and 20m/5.47, 10.94, 16.40 and 21.87yd
- Rated cable diameter: 9mm/0.35"
- Relay with changeover contact 10(4)A 250VAC 50/60Hz
- Maximum installation depth: 100m/109.36yd
- Maximum pressure: 10bar
- Operating temperature: 0...+40°C
- Storage temperature: -20...+80°C
- IEC degree of protection: IP68
- Insulation class: II.

Certifications and compliance

Certifications: TÜV-SUD. Compliant with standards: IEC/EN/BS 60730-1, IEC/EN/BS 60730-2-15.

HR10

- Slim electromechanical relay with
- Socket width 6.2mm
- 1 changeover contact
- lth rated current 6A
- Sockets with built-in LED
- Sockets with screw or spring terminals
- Control voltage from 12 to 230VAC/DC
- 20 poles parallel busbars
- Available version with relay factory assembled on the socket.

Page 21-4

HR20

- Slim solid state relay (SSR)
- Socket width 6.2mm
- 1 solid-state (SSR) output
- Output current 2A in AC and 4A in DC
- Sockets with built-in LED
- Sockets with screw or spring terminals
- Control voltage 24VDC
- 20 poles parallel busbars
- High switching speed
- Theoretically infinite electrical life
- Zero crossing.

Page 21-5

HR30

- Miniature relay
- Socket width 15.8mm
- 1 or 2 changeover contacts
- lth rated current:
 - 1 contact: 10A (16A on PCB)
 - 2 contacts: 8A
- AC or DC control voltage
- Sockets with screw, spring or pins for PCB terminals
- 8 poles parallel busbars
- Small dimensions
- Can be used for direct mounting on PCB
- Snap-on surge suppressor filters.

Page 21-6

HR40

- Miniature relay in clear enclosure
- Socket width 15.8mm
- 1 or 2 changeover contacts
- lth rated current:
 - 1 contact: 10A (16A on PCB)
 - 2 contacts: 10A
- AC or DC control voltage
- Sockets with screw, spring or pins for PCB terminals
- 8 poles parallel busbars
- Clear enclosure for contacts visibility
- Can be used for direct mounting on PCB
- Snap-on surge suppressor filters.

Page 21-6

HR50

- Miniature relay with LED status indicator and mechanical actuator
- Socket width 15.8mm
- 1 or 2 changeover contacts
- lth rated current:
 - 1 contact: 10A (16A on PCB)
 - 2 contacts: 8A
- LED and mechanical status indicator
- Mechanical test actuator with latch option
- AC or DC control voltage
- Sockets with screw, spring or pins for PCB terminals
- 8 poles parallel busbars
- Can be used for direct mounting on PCB
- Snap-on surge suppressor filters.

Page 21-7

HR60

- Industrial relay with LED status indicator and mechanical actuator
- Socket width 27mm
- 2 or 4 changeover contacts
- lth rated current:
 - 2 contacts: 7A
 - 4 contacts: 5A
- LED and mechanical status indicator
- Mechanical test actuator with latch option
- AC or DC control voltage
- Sockets with screw or spring terminals
- Snap-on surge suppressor filters.

Page 21-8

HR70

- Industrial relay with LED status indicator and mechanical actuator
- Socket width 38mm
- 8-pin and 11-pin industrial relay
- 2 or 3 changeover contacts
- lth rated current: 10A
- LED and mechanical state indicator
- Mechanical test actuator with latch option
- Versions with AC or DC control.

Page 21-8

HR80

- Power relays with Atex certificate
- In 30A
- 2 normally open or 2 changeover contacts
- Faston terminals
- Screw fixing.

HR1XS230S	220...240V	Spring	Use with relay HR101CE060	10

General characteristics

Slim-type relays have a reduced width that permits considerable optimisation of space. All sockets are equipped with supply indicator LED and retain/release clips. The availability of electromechanical and solid-state (SSR) versions permits the installation of the most technically suitable solution in accordance with system requirements. The socket terminals can be screw or spring type.

The parallel busbars make for quick wiring.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Relay control voltage: 12, 24, 60VDC
- Relay control voltage + socket: 12, 24, 110...125, 220...240VAC/DC
- Max controllable power in AC-1: 1500W
- Max controllable power in AC-15: 360VA.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC, VDE for electromechanical relays HR10..., cURus, TÜV for SSR relay HR20....

Compliant with standards: IEC/EN/BS 61810-1 for electromechanical relays, IEC/EN/BS 62314 for SSR.

General characteristics

HR1X... sockets are equipped with supply indicator LED and retain/release clips. The socket terminals can be screw or spring type. Parallel busbars can be fitted to the sockets, for quick wiring. These busbars plug in, on both the screw and spring sockets, leaving the cable entry terminals free.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Relay control voltage: 12, 24, 60VDC
- Relay control voltage + socket: 12, 24, 110...125, 220...240VAC/DC
- Green indication LED
- Fitting on DIN rail
- Operating temperature: HR1XS024 -40...+70°C, HR1XS110 and HR1XS230 -40...+55°C.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC, VDE for electromechanical relay HR10..., cURus, TÜV for SSR relay HR20....

Compliant with standards: IEC/EN/BS 61810-1 for electromechanical relays, IEC/EN/BS 62314 for SSR.

HR302CA230	230VAC	2 C/O	8	Fitting on socket HR5XS2...	20

General characteristics

Miniature relays have compact dimensions but high functional performance. It's the ideal device for those looking for a cost-effective solution without compromising performance.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Relay control voltage: 12, 24 and 48VDC - 24, 110/120 and 230VAC, 50/60Hz
- Max controllable power in AC-1 (1C/2C): 4000/2000W
- Max controllable power in AC-15 (1C/2C): 300/150VA
- Maximum current (1C/2C): 16A/8A.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC, VDE (VDE except for HR301CA...).

Compliant with standards: IEC/EN/BS 61810-1.

HR5XS22	Screw terminals. Fitting on DIN rail or with screws	10
HR5XS21S	Spring terminals. Fitting on DIN rail or with screws	10
HR5XS21P	PIN terminals for Printed Circuit Board	40

General characteristics

HR5X... series sockets can have screw terminals or spring terminals for quick wiring. A socket with pins for PCB is also available. Screw terminals are available in 2 versions: with contact terminals separated from the coil terminals or with NC contact terminals near the coil terminals. Surge suppressor filters, parallel busbars and tags for wiring can be snap-fitted to the sockets.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Maximum current: 10A
- Terminal layout see page 21-10
- Operating temperature: -40...+70°C.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC (PCB socket is cURus only).

Compliant with standards: IEC/EN/BS 61810-1.

HR5X9002	Bus jumper for A2 terminals; for spring terminal sockets only	10

General characteristics

HR40... and HR50... miniature relays have reduced dimensions and, in addition to the high electrical performance. HR40... has a clear enclosure that allow contacts visibility for wear and tear check. HR50... is equipped with the following functions: LED to indicate voltage on the coil, mechanical contact state indicator and mechanical test actuator. The mechanical actuator is particularly useful for performing functional tests; it can also keep the relay closed continuously.

Operational characteristics

- Rated insulation voltage: 250V (400V with pollution degree 2)
- Relay control voltage:
 - HR40... and HR50...: 12 and 24VDC (48VDC for HR50... only)
 - HR50...: 12, 24, 110/120 and 230VAC 50/60Hz
- Max AC-1 controllable power (1C/2C):
 - HR40...: 3840/2500W
 - HR50...: 4000/2000W
- Max AC-15 controllable power: 150VA
- Maximum current (1C/2C):
 - HR40...: 16/10A
 - HR50...: 16A/8A.

Certifications and compliance

Certifications obtained: HR401C... cURus; HR402C... cURus, TÜV; HR501C... and HR502C... cURus, CSA, EAC, VDE. Note: HR502CA012 no certification. Compliant with standards: IEC/EN/BS 61810-1.

General characteristics

HR5X... series sockets can have screw terminals or spring terminals for quick wiring. A socket with pins for PCB is also available. Screw terminals are available in 2 versions: with contact terminals separated from the coil terminals or with NC contact terminals near the coil terminals. Surge suppressor filters, parallel busbars and tags for wiring can be snap-fitted to the sockets intended for DIN rail mounting.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Maximum current: 10A
- Terminal layout see page 21-10
- Operating temperature: -40...+70°C.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC (PCB socket is cURus only). Compliant with standards: IEC/EN/BS 61810-1.

HR5XS21S socket with Push-in technology

Push-in wiring without using a screwdriver for cables with end lugs. They guarantee fast wiring and clamping force maintained over time even in the presence of vibrations and / or shocks. To connect cables without end lug and for cables removal, a screwdriver needs to push the handy buttons.

HR604CA230	230VAC	4 C/O	5	Fitting on socket HR6XS4...	10

General characteristics

HR60... type industrial relays are available in 2/4-changeover-contact versions. They are equipped with LEDs that indicate control voltage, a mechanical contact state indicator and a mechanical actuator. The actuator is particularly useful for performing functional tests; it can also keep the relay closed continuously.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Relay control voltage: 12, 24 or 48VDC - 12, 24, 110/120 and 230VAC, 50/60Hz
- Max controllable current in AC-1 (2C/4C): 7/5A
- Maximum current (2C/4C): 7A/5A.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC, VDE. Compliant with standards: IEC/EN/BS 61810-1.

HR703CA230	230VAC	3 C/O	10	Fitting on socket HR7XS2	10

General characteristics

HR70... type industrial relays are available in 2 or 3 changeover versions. They are equipped with LEDs that indicate control voltage, mechanical contact state indicator and mechanical actuator. The actuator is particularly useful for performing functional tests; it can also keep the relay closed continuously. HR70... has high electrical endurance performance and lends itself to the most heavy-duty applications.

Operational characteristics

- Rated insulation voltage: 250V
- Rated impulse withstand voltage: 4kV
- Relay control voltage: 24 and 48VDC- 24, 110/120 and 230VAC, 50/60Hz
- Maximum current: 10A.

Certifications and compliance

Certifications obtained: cURus, CSA, EAC.
Compliant with standards: IEC/EN/BS 61810-1.

Power relays with Atex certificate

HR80...

new

Order code	Control voltage ^②	Contacts	Rated current	Characteristics	Qty per pkg
			[A]		no.

- ① 3A for NC contact.
- ② Other voltages available on request: 24, 120, 208, 220, 277VAC - 5, 6, 12, 24, 48, 110VDC.

General characteristics

The HR80... power relays, thanks to the Atex certification, are particularly suitable for refrigeration systems that use propane gas. The compact structure and the front Faston terminals make them easy to install even in small spaces and speed up wiring.

Operational characteristics

- Rated insulation voltage: 250V (277V for UL)
- Rated impulse withstand voltage:
 - 4kV between contacts and coil
 - 1.5kV between open contacts
 - 2kV between poles
- Max current 30A for NO contacts; 3A for NC contacts
- Faston terminals 6.3x0.8mm.

Certifications and compliance

Certifications obtained: cURus, Atex.
Compliant with standards: IEC/EN/BS 61810-1.

MICRO PLC - EXCEPTIONAL PERFORMANCE!

- **SYSTEM CONTROL AND SUPERVISION**
 - Contact status viewing in simple pages on display
 - Possibility to add the micro PLC to data networks. By using **Synergy** supervision and energy management software, a multiclient structure can also be managed through Web interface.
- **QUICK CONTROL BOARD INSTALLATION**
 - Fewer number of components
 - Less wiring with minor number of connections.
- **REPETITIVENESS**
 - Less errors during panel assembly
 - Considerable time saving.
- **FLEXIBILITY**
 - Quick correction of abnormal conditions at final testing
 - Fast changes on control boards.

● **FUNCTION BLOCKS AND MEMORY**

● **PROGRAM SIZE**

Language	
LADDER (contact scheme)	300 lines
FBD (function blocks)	260 blocks

FUNCTIONS

● **PWM OUTPUT**

Pulse train generation with programmable pulse time and frequency

$$V_{out} = 24VDC \times \frac{T_{on}}{T}$$

● **HIGH SPEED INPUT**

● **PID**

IN: heating switch on and required temperature setting
 OUT: current room temperature
 INC: measured room temperature in an exact spot
 OUTc: temperature adjusting and controlling.

● **MULTIPLEXER**

Selection of 1 of 4 values according to the combination of two digital signals

● **SHIFT FUNCTION** - activation of pulsed outputs in sequence

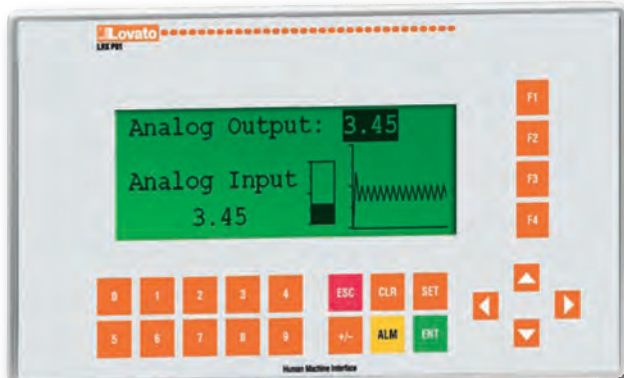

● **BOOLEAN LOGIC BLOCKS**

Output activation based on a series of digital signals

HMI OPERATOR PANEL L_RXP01

HMI INTERFACE

L_RXP01 is a HMI operator panel, used with many types of PLCs or other intelligent controllers equipped with communication port with Modbus-RTU protocol.

By using the HMI, the values of both PLC inner registers and relay status can be monitored or modified with the keys of the frontal keyboard. This enables the functioning of machinery and equipment to be simple and direct.

The L_RXSWP01 editor software permits to make dedicated screens by taking advantage of the graphic display to view bitmaps, bar graphs and trend lines.

<p>Images</p>			

COMMUNICATION MODES

L_RXP01 supports Modbus-RTU protocol and can be connected to devices via the integrated RS232 and RS485 communication ports.

General characteristics

FUNCTIONS

- Addition-Subtraction on variables
- Multiplication-Division on variables
- Comparator on variables
- HMI display for parameter viewing and programming
- PWM output
- High speed input (1kHz)
- PID function
- Multiplexer
- Analog ramp
- Register transfer (numerical variables and status)
- Shift function
- Boolean logic blocks
- LRD20RD024P1 with RS485 port onboard.

Operational characteristics

- 8A lth current relay outputs for AC and DC versions
- 0.3A 24VDC transistor outputs for DC version
- 0...10V analog inputs for DC version
- Version: modular for mounting on 35mm DIN rail (IEC/EN/BS 60715) or M4x15mm/0.59" screw fixing
- Type of terminal: Screw
- IEC degree of protection: IP20.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E300049), as Programmable Controllers; EAC. Compliant with standards: IEC/EN/BS 61131-2, UL508, CSA C22.2 n°142.

Backup memory and power supply unit general characteristics

- The LRXM00 backup memory allows the saving of the user's program and to simply and quickly transfer it to other base modules.
- The LRX1V3D024 power supply produces a DC voltage to supply the LRD base and expansion modules when 24VDC is not available in the panel. The power supply can also be used to power eventual 24VDC auxiliary circuits.

HMI panel LRXP01 general characteristics

- 24VDC power supply
 - RS232 communication port:
 - Direct connection to LRD base modules using cable LRXC00
 - Connection to other devices using a standard D-SUB 9 serial cable
 - RS485 communication port
 - LRXSWP01 editor software for graphic pages configuration
 - IEC degree of protection: IP65.
- FUNCTIONS**
- Send commands
 - Read status
 - Static and dynamic texts
 - Write variables
 - Read variables:
 - Numerical values
 - Bar graphs
 - Trends.

Programming using software LRXSW

At any time and with extreme simplicity, LRD can be set up and reprogrammed to satisfy new requirements and improve the operation of a system.

Programming is simple and intuitive and can be done directly on the base module keypad or by personal computer, connected by LRXC00 (RS232) or LRXC03 (USB) interface and using the relative LRXSW software freely downloadable from www.LovatoElectric.com.

With a personal computer, two programming languages can be used: FBD (Function Block Diagrams) and LADDER (contact scheme).

Both of the following can be accomplished:

- Simulate the program directly "off-line" with a personal computer to test if it runs correctly.
- Use the supervision mode to check the project "on-line".

8 function keys on the front, dedicated to on-board adjustment, control and supervision of digital input and output status, analog input values, time and date entry and the operation status of the micro PLC itself.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E300049), as Programmable Controllers for power supply and HMI units and base module of kits, EAC. Compliant with standards: IEC/EN/BS 61131-2, UL508, CSA C22.2 n°142.

Maximum combinations

- 24 digital inputs (4 configurable as analog 0...10V input)
- 20 digital outputs (relay, transistor or mixed)
- 4 analog inputs for PT100 temperature sensors
- 4 analog outputs configurable as 0...10V or 0/4...20mA
- 4 analog inputs configurable as 0...10V or 0/4...20mA
- 1 RS485 communication module.

N.B. The sequence and the maximum number of the products given above must be respected for correct operation.

HMI LRH SERIES

● **HMI WITH COLOR TOUCHSCREEN DISPLAY**

The HMI LRH series have a graphic TFT display with 64k colors, touchscreen, easy to program and extremely flexible. They can be interfaced with different type of devices, from PLC to any kind of intelligent controller provided with communication port, like multimeters, drives, process controllers. The LRHSW programming software allows the configuration of the HMI in a simple and intuitive way, thanks to the graphical interface with which you can create customized screens to show images, trends, bar graphs, analog indicators, dynamic objects and other functionalities. The HMI LRH series are the ideal solution for the supervision and control of small and large automation scenarios that are more and more required in the world of Industry 4.0.

● **WIDESCREEN DISPLAY WITH HIGH VISIBILITY**

- TFT display with resistive touchscreen
- High brightness thanks to the LED backlighting
- 64k colors
- Available in formats 4.3", 7" and 10.1".

● **SIMPLICITY AND EFFICIENCY**

- Simple and elegant design with low energy consumption
- High robustness, thanks to the use of highly reliable industrial components
- Plastic enclosure, degree of protection IP66, Type 2 and 4X.

● **CONNECTIVITY FOR EASY INTEGRATION**

- 3 built-in communication ports: Ethernet, USB and serial (type RS232-RS485-RS422, configurable via software LRHSW)
- Support of communication protocols Modbus-RTU Master/Slave, Modbus TPC Client/Server, OPC UA Client/Server, Simatic S7 Ethernet and MQTT.

● **POWERFUL AND INTUITIVE PROGRAMMATION**

- High performance CPU
- Extensive gallery of widgets, objects and pre-configured scenarios for typical applications
- Data acquisition and display on numeric indicators, trends or graphical gauges
- Support of vector graphics, images, analog indicators, bar graphs
- Advanced functionalities: dynamic objects, alarms and events management, support of multilingual applications, recipes, tags editor, user and password management, script language
- Advanced properties of the objects: e-mail, events scheduler, etc
- Support of HTML5 and JavaScript
- Possibility to simulate the program by working off-line.

● **PRE-CONFIGURED SCENARIOS**

Preconfigured and ready to use scenarios for typical applications managed with LOVATO Electric products (remote control of a micro PLC, supervision of a pumping station with variable speed drive, monitoring of a photovoltaic system with energy meter, soft starter monitoring, control and supervision of a power factor correction plant, monitoring of an automatic transfer switch ATS panel, command and monitoring of a mains-generator application, etc.) freely downloadable from the website www.LovatoElectric.com, download section, software & upgrades.

General characteristics

- Widescreen display with resistive touchscreen
- Available in formats 4.3", 7" and 10.1"
- LED backlight
- Ethernet, USB and serial port (type RS232-RS485-RS422, configurable via software LRHSW)
- Lightweight and low-power design
- Highly reliable industrial components
- Powerful and intuitive programming with software LRHSW (downloadable from the website www.LovatoElectric.com or purchasable on Cd-rom), with 30-days trial license included
- Support of protocols Modbus-RTU Master/Slave, Modbus-TCP Client/Server, OPC UA Client/Server, Simatic S7 Ethernet and MQTT
- Support of vector graphics
- Rich library of preconfigured and ready to use graphical objects (widgets): static or dynamic images, buttons, sliders, lights, bar graphs, gauges, meters, media widgets, etc.
- Possibility to create custom widgets
- Tags editor to create, import or export tags
- Alarm handling with management of events and actions (e.g. alerts with pop-up messages, send email, write tags, etc.)
- Data-logging with presentation of the collected data in graphical trends and tables, with possibility to save the data in a .CSV file
- Recipe data handling
- Scheduler engine to execute specific actions at set intervals, or on a time basis
- Automatic generation of customizable reports
- Multilingual projects management with texts in True Type font
- Data transfer function to exchange data between the devices connected to the HMI
- Powerful script language with JavaScript editor
- Web access: support of HTML5 technology to allow users to access HMI projects from a remote web browser running on a computer or on a mobile device (smartphone or tablet)
- Advanced user management with possibility to configure different levels of authorizations and permissions on the access to pages or to the actions on the widgets of the projects, with dedicated credentials
- Monitoring and remote control of the project running on the HMI from a PC with the software LRHSW Client, installed together with the programming software LRHSW
- On-line and off-line simulation of the applications.

Operational characteristics

- Rated auxiliary power supply: 12-24VDC
- Operating range: 10...32VDC
- Operating temperature: 0...+50°C
- Storage temperature: -20...+70°C
- Humidity: 5-85% RH, non condensing
- Protection degree: IP66, Type 2 and 4X (front); IP20 (rear).

Preconfigured scenarios

Preconfigured and ready to use scenarios for typical applications managed with LOVATO Electric products (remote control of a micro PLC, supervision of a pumping station with variable speed drive, monitoring of a photovoltaic system with energy meter, soft starter monitoring, control and supervision of a power factor correction plant, monitoring of an automatic transfer switch ATS panel, command and monitoring of a mains-generator application, etc.) freely downloadable from the website www.LovatoElectric.com, download section software & upgrades.

PSL1M10024		4.2	100	1	0.380

General characteristics

Switching power supplies transform an AC input voltage into a DC output one. This type of equipment is used in industrial and domestic automation fields. The power supplies are equipped with switching technology offering very high efficiency in an extremely compact size. Dimensions are compatible with modular consumer panels and its plastic housing is suitable for building automation installations as well as industrial automation applications.

The wide range of power supply voltages and the choice of DC current outputs provide for the best adaptability to supply voltage needs of the most common electronic and electromechanical devices.

Protections:

- Short circuit
- Overload
- Input voltage peaks.

Indications:

- LED indicator for low voltage conditions
- LED indicator for power on.

Operational characteristics

- Rated supply voltage: 100...240VAC
- Rated output voltage: 12VDC for PSL1M...12 types; 24VDC for PSL1M...24 types
- Mains frequency: 50/60Hz
- Output voltage adjustment by front potentiometer (except for PSL1M010...)
- High efficiency up to 89%
- 35mm DIN rail (IEC/EN/BS 60715) mounting
- Screw connection terminals
- Modular DIN 43880 housing; number of modules:
 - 1 for PSL1M010...
 - 2 for PSL1M024...
 - 3 for PSL1M03312 and PSL1M03624
 - 4 for PSL1M05412 and PSL1M06024
 - 5 for PSL1M07212 and PSL1M10024
- IEC degree of protection: IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus-File E318016) as Power Supplies in power circuit and motor-mounted apparatus category; EAC, RCM. Compliant with standards: IEC/EN/BS 62368-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 n° 107-1.

PSE112024		5	120	1	0.610

General characteristics

The PSE1... power supplies have compact dimensions and are DIN rail mountable. They are used to supply electromechanical and electronic devices with DC control, such as contactors, time relays, sensors, PLCs, DC motors, displays, SSRs and other equipment normally found in automation systems.

Protections:

- Short circuit
- Overload
- Input voltage peaks.

Indications:

- LED indicator for power on.

Operational characteristics

- Rated supply voltage: 100...240VAC
- Rated output voltage: 24VDC
- Mains frequency: 50/60Hz
- Output voltage adjustment by front potentiometer
- High efficiency up to 89%
- 35mm DIN rail (IEC/EN/BS 60715) mounting
- Screw connection terminals
- IEC degree of protection: IP20 on terminals.

Certifications and Compliance

Certifications obtained: cULus (pending for PSE112024), EAC, RCM. Compliant with standards: IEC/EN/BS 62368-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 No. 107.1.

- For lead-acid batteries up to 50Ah rating
- Rated output current:
 - 2.5 and 4.5A at 12VDC
 - 1.25 and 2.5A at 24VDC
- Electronic lock for shorted battery, reverse polarity and output overload
- Automatic reset at end of alarm conditions
- Output for alarm remote indication.

Page 24-3

SWITCHING BATTERY CHARGERS

- For lead-acid batteries up to 150Ah rating
- Rated output current:
 - 6A and 12A at 12VDC
 - 5A and 10A at 24VDC
- Electronic lock for shorted battery, reverse polarity and output overload
- Automatic reset at end of alarm conditions
- Output for alarm remote indication.

Page 24-4

LINEAR BATTERY CHARGERS

- For lead-acid batteries up to 150Ah rating
- Rated output current:
 - 3A, 6A, 12A at 12VDC
 - 2.5A, 5A, 10A at 24VDC
- Electronic lock for shorted battery, reverse polarity, output overload and disconnected battery
- Output for alarm remote indication.

ⓘ Not replaceable.

General characteristics

- Switching technology
 - Wide auxiliary supply range
 - Screw fixing or 35mm DIN rail mount (IEC/EN/BS 60715).
- Protection:
- Mains input fuse
 - Battery output fuse
 - Electronic lock in case of short circuit on battery terminals, reverse battery polarity and output overload
 - Automatic reset at end of alarm conditions.

LED indications:

- Correct output voltage
- Reverse battery polarity.

Operational characteristics

- Auxiliary supply voltage: 100...240VAC ±10% 50/60Hz ±5%
- Fixed charging current
- Current limitation
- Charging current according to DIN 41773 standards
- Fixed clamping screw terminal block with captive screws
- IEC degree of protection: IP20.

Alarm output circuit

- Type of output: 3A 250VAC AC1 duty relay, normally energised.

Certifications and compliance

Certifications obtained: EAC; UL Recognized for USA and Canada (cURus - File E360865), as Power Supplies - Component.
Products having this type of marking are intended for use as components of complete workshop-assembled equipment. Compliant with standards: IEC/EN/BS 62368-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 60950-1, CSA C22.2 n°60950-1.

BCG1024	630	311	41	8

③ Not replaceable.

General characteristics

- Switching technology
- Wide auxiliary supply range
- High efficiency
- Two charging voltages selectable by DIP-switch
- Boost external control for full battery charging
- Hiccup function for battery recharging when its voltage is lower than 50% rated value
- Charging current limiting trimmer resistor
- Screw fixing or 35mm DIN rail mount (IEC/EN/BS 60715).

Protection:

- Input fuse on AC side
- Electronic lock in case of short circuit on battery terminals, reverse battery polarity and output overload
- Automatic reset at end of alarm conditions.

LED indications:

- Power on
- Charging operation (>30% I_c)
- Overload or short circuit conditions
- Reverse battery polarity.

Operational characteristics

- Auxiliary supply voltage: 110...240VAC ±10% 50/60Hz ±10%
- Charging voltage selectable by DIP-switch
- Maximum charging current can be set with a trimmer on the front: 20...100% of the rated current value
- Current limitation
- Charging cycle according to DIN 41773 standards
- IEC degree of protection: IP20.

Alarm output circuit

- Type of output: 5A 30VDC duty relay, normally energised.

Certifications and compliance

Certifications obtained: EAC; UL Recognized for USA and Canada (cURus - File E360865), as Power Supplies - Component.

Products having this type of marking are intended for use as components of complete workshop-assembled equipment. Compliant with standards: IEC/EN/BS 62368-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, UL 60950-1, CSA C22.2 n°60950-1.

❶ Not supplied; installed by customer.

General characteristics

- Linear technology
- Housing for internal panel mounting by screws.
- Protection:
- Mains input fuse (except for BCE2V5 and BCE03)
- Battery output fuse
- Electronic lock in case of short circuit on battery terminals, reverse battery polarity, output overload (<0.5 Ue) and disconnected battery.

LED Indications:

- Power on
- Charge (I > 0.2 Ic)
- Alarm for protection tripping.

Operational characteristics

- Auxiliary supply voltage: 220...240VAC ±10%, 50/60Hz ±5%
- Charging current: 30...100% Ie adjustable
- Charging cycle according to DIN 41773 standards
- Current limitation
- Clamping screw terminal block with captive screws:
 - Removable for BCE03 and BCE2V5
 - Fixed for BCE05, BCE06, BCE10 and BCE12
- IEC degree of protection: IP00.

Alarms

Possible causes of alarm include:

- Low battery voltage
- Battery fuse blown
- Battery not connected
- Battery polarity inverted (reverse polarity).

BCE2V524 - BCE0312

These types have a static alarm output for the control of a relay or indicator, maximum 300mA duty. If it is connected to a relay, this must be normally energised in absence of alarm. In alarm conditions with ALARM LED switched on or in absence of supply, the relay de-energises.

BCE0524 - BCE0612 - BCE1024 - BCE1212

These types have a normally energised relay alarm output. In alarm conditions with ALARM LED switched on or in absence of supply, the relay de-energises.

Alarm output circuit

BCE2V524 - BCE0312

- Type of output:
 - Negative static; NPN transistor❷
 - Maximum voltage applicable to load: +V battery terminal
 - Maximum output current: 300mA
 - Maximum overload current for 1 second: 2A
 - Dynamic over-voltage protection with inductive load.

BCE0524 - BCE0612 - BCE1024 - BCE1212

- Type of output
 - Relay: 1 changeover contact (SPDT)
 - Rated voltage: 250VAC
 - IEC rated capacity in AC1 duty: 5A 250VAC Ith
 - IEC rated capacity in DC13 or DC14 duty: 5A 30VDC
 - Electrical life: >10⁵ cycles
 - Mechanical life: >30x10⁵ cycles.

❷ The output is not overload or short-circuit protected. It is however capable of switching on a 3W filament bulb.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 60950-1.

POWER ANALYZERS WITH WIDESCREEN COLOUR LCD DMG SERIES

WIDESCREEN COLOR LCD

The large size of the colour LCD (4.3") allows for the optimal view of measures and parameters in a clear, simple and intuitive way.
The standard cutout dimensions (92x92mm) ensures a perfect compatibility with the usual front panel solutions.

10 LANGUAGES

The language shown can be selected from a large number of choices: English, French, German, Italian, Spanish, Portuguese, Polish, Russian, Czech, Chinese.

PROGRAMMABLE LEDs

3 front LEDs are programmable and let the user know the status of the device at any time: alarms programmed by the user, status of digital inputs or outputs, emission of pulses indicating energy consumption, communication in progress.

HIGH ACCURACY LEVEL FOR MEASUREMENTS

The measurements are verified according to the recognized international standards for measuring instruments: IEC 62053-22 (class 0.5s), IEC 62053-24 (class 1) and IEC 61557-12 (class 0.5).

NFC CONFIGURATION

Thanks to NFC technology, it is possible to configure and modify parameters (even when the device is not powered) through **NFC LOVATO** App, which can be downloaded for free from the Google Play Store and App Store for Android and iOS smart devices.

PLC LOGIC

Thanks to the built-in PLC logic, the power analyzers can perform simple automations related to timers and alarm states and digital inputs. Programming with "contacts" (**Ladder**) is simple and intuitive thanks to the use of **Xpress** configuration software.

EVERYTHING UNDER CONTROL!

MEASUREMENTS

DMG power analyzers display all the measurements useful for a complete check of the electrical network. The voltage measurement input does not require external transformers **up to 600VAC**.

CHARTS AND HARMONICS

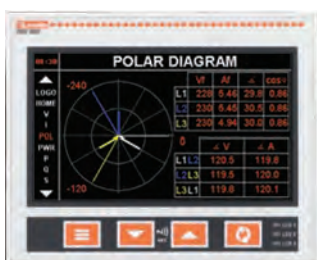

The electrical measurements are shown with waveform charts, polar diagrams and representations of the **harmonic spectrum up to the 63rd order** which is a useful tool to better understand the state of the system.

STATISTICS

The DMG9000 model also provides statistics on the quality of the network according to the **EN50160** standard - class C - (voltage dips, overvoltages, interruptions, low frequency noises and much more).

Waveforms

Polar diagram

Currents

Energy consumption control

EXPANDABILITY AND COMMUNICATION

EXPANDABILITY

Possibility to add **up to 3** EXP... series expansion modules (additional inputs, outputs and communication ports).

INTEGRATION WITH SIGNALS FROM THE FIELD

Thanks to the EXP... expansion modules it is possible to add **digital and analog inputs** by which field measurements such as gas or water consumption, tank levels, temperatures, pressures and much more are integrated into the data collection in order to obtain a complete energy management.

OPTICAL PORT

The optical port compatible with the communication devices CX01 and CX02 is available and allows, thanks to **Xpress** software, the parameter configuration, the electrical network diagnostics and the firmware update of the power analyzer.

DEGREE OF PROTECTION: IP65

Possibility of use in harsh environments thanks to the gasket on the back which guarantees the **IP65** degree of protection.

COMMUNICATION

Availability of models with built-in **RS485** and **Ethernet** communication ports.

EASY BRANCH POWER MONITORING SYSTEM

Thanks to the EXS... modules, a simplified and very fast wiring can be achieved in panels where it is necessary to read the electrical parameters of different loads, drastically reducing the costs and the installation times.

WEB-SERVER FUNCTION IN DMG8000 AND DMG9000

SETTING OF ALL PARAMETERS

The programming of the parameters, as well as from the front panel, can also be done through the browser on a PC. The built-in web-server also allows the setting of the parameters of the EASY BRANCH power monitoring system, such as the descriptions of the individual measurement points.

WEBSERVER AND BUILT-IN DATA MEMORY

A flash data memory allows archiving of historical data. Through the built-in webserver the user can:

- select the measures (up to 128);
- set the sampling frequency;
- download the .CSV file with the acquired informations.

For example, by sampling 20 measurements with 1 minute of sampling time, 10 days of data can be stored.

MEASUREMENT VIEW

Representation of the measured values by means of tables and charts.

EASY BRANCH POWER MONITORING SYSTEM

When inside an electrical panel the parameters of several loads have to be monitored, **EASY BRANCH** power monitoring system is a more efficient and simple alternative solution to install than the traditional one which requires an independent instrument for each measuring point. The electrical distribution panels in shopping centres or in the departments of a production facility represent ideal applications for **EASY BRANCH** system by LOVATO Electric.

SYSTEM COMPONENTS

DMG7500 - 8000 - 9000
Power analyzer

● **DMG7500, DMG8000, DMG9000 power analyzers.**

The power analyzers represent the heart of the system: they measure the electrical voltage in the switchboard and the input current, record the total measurements upstream of the distribution and the measurements of each individual monitored load available on their display. The electrical quantities can also be viewed via the built-in communication ports (RS485 or Ethernet).

On the **DMG8000** and **DMG9000** models, the system measurements can be viewed within a web page and can be recorded in the data memory to get historical trends.

EXS0000
Bus module

● **EXS0000 bus module**

Installed in one of the expansion slots of the power analyzer, by using a standard Ethernet cable (cat.6) it connects and supplies **up to 8 current measuring modules EXS4...** which are automatically recognized without the need for settings by the installer.

When connecting 5 or more EXS4 current modules ... the EXS0000 bus module requires a 24VDC - 0.2A power supply.

MAX 8 EXS4... current measuring modules can be connected to the EXS0000 bus module, to monitor up to:

- 33 three-phase loads;
 - 99 single phase loads.
- Including the loads connected to the power analyzer.

EXS4000
Current measuring module with 4 inputs for electronic RJ45 CTs

● **Current measuring module EXS4000**

The module collects the measurements of the loads monitored by the electronic current transformers EXS3... (three-phase or single-phase) or EXS1... (single-phase). Each module measures **up to 4 three-phase loads or 12 single-phase loads** or a mixed single-phase and three-phase configuration. The module automatically recognizes the connected electronic current transformer and highlights, through diagnostic LEDs, the correct self-configuration of the measurement points and the correct coupling with the power analyzer.

Correct self-configuration LED

EXS1... - EXS3...
Electronic current transformer

● **Electronic current transformers EXS1... and EXS3...**

They are current transducers suitable to be installed immediately downstream of the magnetic circuit breakers thanks to their compact size. Available **for single-phase or three-phase loads**, the diameter and pitch of the pass-through holes have been designed to be in line with the ones of the MCBs:

- for sizes up to 63A: Ø = 7mm and 18mm pitch;
- for sizes up to 125A: Ø = 12mm and 27mm pitch.

They connect to the EXS4000 current monitoring module via pre-wired **2 meter RJ45 cable**, thus making the connection fast and fail-safe.

EXS3 ... can be programmed to manage even single-phase loads.

Correct coupling signalling LED

25 Metering instruments and current transformers

INDEX

INDUSTRIAL MARINE RAILWAY

calpe

● Current measuring module EXS4001

It offers the possibility of connecting monitored measuring points with traditional current transformers within the EASY BRANCH system, managing for each module **up to 2 three-phase loads or 6 single-phase loads** or a mixed single-phase and three-phase configuration. Current transformers of any type with secondary /5A or /1A can be used. The module highlights the successful coupling with the power analyzer through diagnostic LEDs.

Correct coupling signalling LED

EXS4001

Current measuring module with 2 inputs for three-phase traditional CTs or 6 inputs for single-phase traditional CTs

DM...
Current transformers

● Traditional current transformer DM...

Current transformers (CTs) type DM... are mounted in an electrical system to reduce the line current to a secondary value of 5A and compatible with EXS4001 current measuring modules.

They are available in many versions:

- with wire-wound primary for reduced currents;
- solid core type;
- high precision for very accurate measurements;
- split-core and pre-wired types which are suitable for updating the panels;
- **primary current from 5 to 4000A.**

● Gateway data logger

A gateway data logger is the key device for the implementation of a modern and well-designed energy monitoring system.

It collects data from LOVATO Electric devices or from environmental sensors relating to any type of energy carrier (water, air, gas, electricity and steam) equipped with a compatible protocol.

The data collected, as well as being represented by the integrated web-server, can be transmitted to **Synergy** supervision software of LOVATO Electric or forwarded to remote servers in formats suitable for appropriate processing.

EXCGLA01
Gateway data logger

● Supervision software

All the data of the EASY BRANCH system are available on the central power analyzer and, through its communication ports, it is possible to collect them remotely by connecting directly with a browser if the model chosen is DMG8000 or DMG9000, or through **Synergy** software installed on a local server, or using **Synergy Cloud** if the gateway data logger EXCGLA01 is added to the system.

SYNERGY
Supervision software

EASY BRANCH PLUG & PLAY SYSTEM ADVANTAGES

● 4 COMPONENTS NEEDED

The EASY BRANCH system consists of a few elements to add to the power analyzer: EXS0000 module to get the communication bus, the EXS4... module to measure currents and the EXS1..., EXS3 electronic current transformers... or traditional /5A or /1A CTs.

Up to 33 three-phase or 99 single-phase measuring points can be obtained!

● DRAMATIC REDUCTION OF WIRING TIMES

In a monitoring system with traditional measuring instruments, 4 voltage and 6 current cables are required for each three-phase measuring point and two additional cables for the auxiliary power supply are added: a total of 12 cables to be connected for each measuring point.

With the EASY BRANCH system, for each additional current measuring module (EXS4000) only one cable with RJ45 terminal must be connected, getting 4 three-phase or 12 single-phase measurement points, each of which is connected with a cable with RJ45 terminal, drastically reducing the wiring time.

● STOP TO WIRING MISTAKES!

In a monitoring system with traditional measuring instruments, 12 cables to be connected for each three-phase measuring point can cause various wiring errors (phase sequence, phase correspondence between voltages and currents, current transformers sense) which cause errors in reading the electrical quantities and delay the commissioning of the switchboard.

The EASY BRANCH system, thanks to the **RJ45** connections of the electronic CTs, is foolproof!

● SETTING TIME REDUCTION

EXS1... and EXS3... electronic transformers have a **self-recognition** system with the current module to which they are connected, avoiding the installer the need to set the CT primary and the type of connection (single-phase, three-phase). A LED on the electronic transformers indicates the correct power supply, while a LED on EXS4000 current measuring module indicates the correct coupling.

● NO SPECIAL CABLES NEEDED

No special cable is needed to connect the current measuring modules to EASY BRANCH bus: **a standard Cat.6 Ethernet cable is enough.**

● COMPARISON BETWEEN EASY BRANCH AND TRADITIONAL MEASURING SYSTEMS

If 5 three-phase loads are to be monitored in an electrical panel:

- **EASY BRANCH SYSTEM:** 1 power analyzer, 1 display where to search for measurements, 1 EXS0000 bus module, 1 EXS4000 current measuring module, 4 three-phase electronic transformers and only 12 cables to be wired
- **TRADITIONAL SYSTEM:** 5 multimeters, 5 displays where to search for measurements, 15 current transformers and 60 cables to be wired.

The more the measuring points increase, the more the advantages in favour of the EASY BRANCH system are evident.

● MEASUREMENT ACCURACY

The EASY BRANCH system guarantees high measurement accuracy according to IEC61557-12 and IEC62053-22/23 standards.

ENERGY MANAGEMENT SOLUTION BY LOVATO ELECTRIC

For the purpose of monitoring and energy saving, LOVATO Electric provides a complete and integrated solution consisting of:

- **hardware devices** for energy measurement and control (power analyzers, multimeters, energy meters, variable speed drives, soft starters, automatic power factor controllers, gateway data loggers, etc.);
- **webserver software** to continuously monitor energy vectors via the Web.

Synergy by LOVATO Electric is an energy monitoring and analysis system with a professional, flexible and integrated approach from an Industry 4.0 perspective. Thanks to the LOVATO Electric **measurement devices** equipped with a communication port and through the web-based supervision platform, it is possible to monitor real time measurements, consult graphics, receive alarms, export customized reports and carry out commands and settings.

GATEWAY DATA LOGGER LOCAL WEBSERVER

LOVATO Electric **EXCGLA01** gateway data logger provides access to an integrated webservice which allows local consultation of the monitored data and acts as a gateway to **Synergy** supervision software.

Gateway data logger

Built-in webservice information view

Pre-defined live pages, charts and data logs

MONITORING AND SUPERVISION SOFTWARE

Synergy is a software which can be completely customized by the user who can thus have the key indicators of the monitored systems, be notified in the event of alarms for anomalies in consumption and monitor performance over time. It is open to the integration of third-party instrumentation thanks to the use of the MODBUS communication protocol and the ability to integrate any device equipped with analog or digital output.

DMED122	63A direct connection, 2U, M-Bus interface multi-measurements ①, 110...240VAC	1	0.148

General characteristics

The energy meters are instruments for energy consumption measurement in single-phase installations with direct connection.

Operational characteristics

- LCD meter: with 5+1 digit count for DMED100T1..., DMED110T1..., DMED111, DMED112; backlight with 6+1 digit count for DMED115T1, DMED120T1..., DMED121, DMED122, DMED130LM
- Direct connection
- Active energy measurement and accuracy: Class 1 (IEC/EN/BS 62053-21)
- Reactive energy measurement and accuracy: Class 2 (IEC/EN/BS 62053-23)
- Metrological LED with pulse emission for consumption indication
- Clearable partial energy measurement
- Built-in RS485 or M-Bus ports for pulse output models (except DMED130LM) compatible with Synergy and Xpress
- Modular housing: 1 module for DMED100T1, DMED110T1, DMED111 and DMED112; 2 module for all other types
- Sealable terminal blocks, standard supplied
- EN degree of protection: IP40 on front; IP20 at terminals.

Certifications and compliance

Certifications obtained: cULus (DMED100..., DMED110..., DMED120..., DMED121), EAC (for all DMED... type), RCM (for all DMED...type, DMED122 except). Compliant with standards: IEC/EN/BS 50470-1, IEC/EN/BS 61010-1 per tipi DMED....; UL 61010-1, CSA C22-2 n° 61010-1 for DMED100..., DMED110..., DMED120..., DMED121.

① Multi-measurements:

- Total and partial active energy
- Total and partial reactive energy
- Voltage
- Current
- Active and reactive power
- Power factor
- Frequency
- Total and partial hour counter
- Average active power (calculation made using the last 15 minutes of data)
- Maximum demand.

② Multi-measurements:

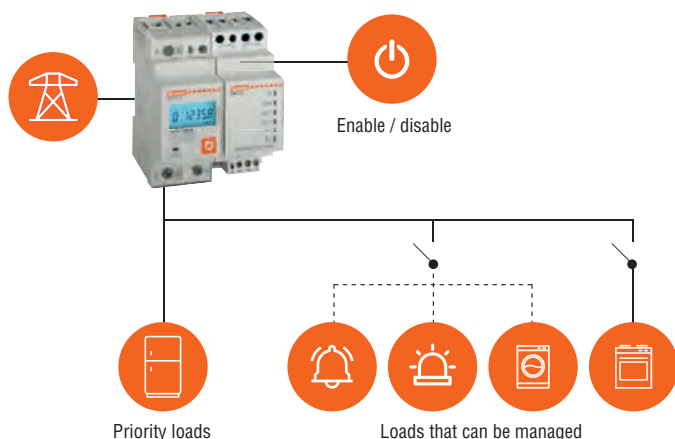

- Total and partial active energy
- Active power
- Average active power (calculation made using the last 15 minutes of data)
- Maximum demand.

General characteristics

The DME... series energy meters, MID certified, are needed for billing purposes between electricity suppliers and consumers and for energy consumption measurement in directly connected single-phase installations. MID is the Measuring Instruments Directive of the European Union; instruments must be certified accordingly whenever used for monetary transactions in this territory.

Operational characteristics

- LCD meter: DMED100/110/111/112T1MID; backlight with 6+1 digit count for DMED120/121/122MID
- Direct connection
- Active energy measurement and accuracy: Class B (EN 50470-3)
- Reactive energy measurement and accuracy: Class 2 (IEC/EN/BS 62053-23)
- Metrological LED with pulse emission for consumption indication
- Clearable partial energy measurements
- One output: pulse for DMED100T1MID; programmable static for other types
- Built-in RS485 or M-Bus ports for pulse output models compatible with Synergy and Xpress
- 70°C model ideal for electric vehicle charging stations
- Modular housing
- Sealable terminal blocks, standard supplied
- EN degree of protection: IP40 on front; IP20 at terminals.

DMED310F EXPANSION MODULES.
Inputs and outputs.

EXM1000	2 digital inputs and 2 static outputs, opto-isolated
EXM1001	2 opto-isolated digital inputs and 2 relay outputs rated 5A 250VAC
EXM1002	4 opto-isolated digital inputs and 2 relay outputs rated 5A 250VAC

Communication ports.

EXM1010	Opto-isolated USB interface
EXM1011	Opto-isolated RS232 interface
EXM1012	Opto-isolated RS485 interface
EXM1013	Ethernet interface with Web server function
EXM1020	Opto-isolated RS485 interface and 2 relay outputs rated 5A 250VAC

General characteristics

The UTF (Finance Technical Office) certification is required in Italy in case of applications where taxes have to be paid due to energy production (Italian regulations for plants >20kW). The certificates must be associated to the energy meter (MID version) and to each single current transformer is needed (see page 25-17 for selection).

DME... energy meters, MID version, for three-phase systems with or without current transformers can be supplied with the certificates included (DME...F). DMED310F... can be expanded up to 3 EXM... modules.

If required, the fifth certificate relevant to the meter and current transformer combination can be supplied as well (see page 25-17).

Operational characteristics

- LCD multifunction meter
- Nominal supply voltage: 230VAC (L-N); 400VAC (L-L)
- Voltage range: 187...264VAC (L-N); 323...456VAC (L-L)
- Active energy measurement and accuracy: Class B (EN 50470-3)
- Reactive energy measurement and accuracy: Class 2 (IEC/EN/BS 62053-23)
- Metrological LED with pulse emission for consumption indication
- Clearable partial energy measurements
- 1 programmable digital input
- Models with 2 programmable static outputs and built-in RS485 compatible with Synergy and Xpress
- Optical interface for EXM... expansion modules with DMED310F
- Modular housing 4 module
- Sealable terminal blocks, standard supplied
- EN degree of protection: IP40 on front; IP20 at terminals.

Multi-measurements

- Total and partial active energy
- Total and partial reactive energy
- Voltage
- Current
- Active and reactive power
- Power Factor
- Frequency
- Total and partial hour counter
- Average active power (calculation made using the last 15 minutes of data)
- Maximum demand.

Synergy supervision and energy management software
See Section 30.

Xpress configuration and remote control software
See Section 30.

EXM series expansion modules
See page 31-3.

Certifications and compliance

Certifications obtained: MID Class B (EN 50470-1, EN 50470-3), certifications per module B (type tests) + per module D (production conformity) for DMED300F and DMED310F energy meters.

UTF certificates are standard supplied.
Compliant with standards: EN 50470-1, EN 50470-3, TR 50579.

DM5TP3000FKIT	3 DM5TP3000, complete with UTF certificate	1	2.940

General characteristics

The UTF (Finance Technical Office) certification is required in Italy in case of applications where taxes have to be paid due to energy production (Italian regulations for plants >20kW). The certificates must be associated to the energy meter (MID version, see page 25-12 for selection) and to each single current transformer is needed.

The DM...TP type accuracy current transformers (CTs) can be provided in a kit version made by three CTs and relative UTF certificates.

If required, the fifth certificate relevant to the meter and current transformer combination can be supplied as well.

The DM...TP type accuracy current transformers (CTs) are installed in an electrical system to reduce the line current to a secondary value of 5A compatible with the ammeter inputs of the digital multimeters or protection relays.

DM...TP are accuracy current transformers in class 0.5s without a primary winding and are normally used for high primary current values starting from 60A.

The number of loops of the primary cable does not modify the accuracy but converts the primary current value proportional to secondary current (see page 25-33).

Operational characteristics

- Operating frequency: 50...60Hz
- Secondary output current: 5A
- Overload withstand: 120% I_{pn}
- Rated insulation voltage U_i: 720V
- Rated short time thermal current I_{th}: 40-60I_{pn} for 1 second
- Rated dynamic current I_{dyn}: 2.5I_{th} for 1 second
- Insulation (dry type): class E
- Screw fixing terminals
- Sealable terminal covers
- Fixing on 35mm DIN rail (IEC/EN/BS 60715) or by screws (fixing elements standard supplied with the product)
- EN degree of protection: IP30.
- Ambient conditions
 - Operating temperature: -25...+50°C
 - Storage temperature: -40...+80°C.
 - Relative humidity, non condensing: 90%.

Compliance

Compliant with standards: IEC/EN/BS 61869-2, IEC/EN/BS 61869-1.

DMECD	With 8 programmable digital inputs, expandable, for data collection + pulse count from DMED..., RS485 port	1	0.337

Order code	Description
------------	-------------

DME CD EXPANSION MODULES.
Inputs and outputs.

EXM1000	2 digital inputs and 2 static outputs, opto-isolated
EXM1001	2 opto-isolated digital inputs and 2 relay outputs rated 5A 250VAC
EXM1002	4 opto-isolated digital inputs and 2 relay outputs rated 5A 250VAC

Communication ports.

EXM1010	Opto-isolated USB interface
EXM1011	Opto-isolated RS232 interface
EXM1012	Opto-isolated RS485 interface
EXM1013	Opto-isolated Ethernet interface
EXM1020	Opto-isolated RS485 interface and 2 relay outputs, rated 5A 250VAC
EXM1030	Data storage, clock-calendar (RTC) with backup reserve energy for data logging

General characteristics

DMECD is equipped with 8 inputs, which can be increased up to a maximum of 14 with expansion modules EXM1000/1001/1002, that allow to indirectly interface devices without communication as long as they have at least one pulse output.

It is capable of pulse counting that comes in from the outputs of meters for energy, water, gas and other types of consumption: All data is viewed on its display or can also be available for PCs through its built-in RS485 interface using Synergy or Xpress software.

It can be expanded with up to 3 EXM... series modules by optical interface.

With the programmable functions, average values can be determined for instantaneous quantities, such as power, speed, production rate, gas and water consumption, etc.

Operational characteristics

- Backlight graphic LCD meter, multifunction
- Nominal supply voltage: 100...240VAC/110...250VDC
- Voltage range: 85...264VAC/93.5...300VDC
- 8 inputs, expandable with EXM... modules up to 14
- Built-in RS485 communication port
- Modbus-RTU, ASCII and TCP communication protocol
- Clearable total and partial counters for each channel
- Programmable general counters
- Calculation of derivative average values
- Mathematical operations among counters
- Modular housing, 4 module
- EN degree of protection: IP40 on front; IP20 at terminals.

Synergy supervision and energy management software
See Section 30.

Xpress configuration and remote control software
See Section 30.

EXM series expansion modules
See page 31-3.

CX02	Wi-Fi device for PC ↔ LOVATO Electric product programming, data download, diagnostics and cloning	1	0.090

General characteristics

DMG... power analysers display electrical values on their large colour LCD display with exceptional accuracy to enable precise monitoring of power grids. They are designed in flush-mount housing (cutout 92x92mm/3.62x3.62") with 3 slots for EXP series plug-in expansion modules to adapt them to a variety of applications.

The use of NFC technology allows the user to configure the unit and make settings with a smart device. The optical port on the back of the unit enables the user to make settings, run power grid diagnostics and update the unit's firmware. The graphic interface, available in 10 languages (English, French, German, Italian, Spanish, Portuguese, Polish, Russian, Czech and Chinese), has been designed to facilitate the display of data, including:

- Voltage (phase, phase-to-phase and system)
- Phase current (calculated neutral current, and measured neutral current on the DMG9000)
- Measurements on 4 quadrants
- Power (active, reactive and apparent phase and total power)
- Power factor (phase and total)
- Frequency
- Maximum (HIGH), minimum (LOW) and average (AVERAGE) of all measured values
- Peak power/current (max demand)
- Voltage and current asymmetry and active power unbalance
- Total harmonic distortion (voltage and current)
- Voltage and current harmonic analysis up to the 63rd order
- Active, reactive and apparent energy metering (partial and total)
- Hour meter (total and partial, programmable).

The EASY BRANCH multi-circuit measurement system

The DMG7500, DMG8000 and DMG9000 can also be used in multi-circuit applications when more than one load is to be monitored in the electrical switch board. All values are shown on the display or via the integrated communications interface.

Refer to page 25-20 for the components of the EASY BRANCH measurement system.

Operational characteristics

- Auxiliary power: 100...240VAC/110...250VDC
- Voltage measurement range: 50...720VAC L-L
- can be used in medium and high voltage systems using TV
- Nominal input current: 5A or 1A with an external current transformer
- Frequency measurement range: 45...66Hz
- Accuracy (IEC/BS 61557-12):
 - voltage: Class 0.5 (Vref = 400VAC L-L)
 - current: Class 0.5 (Iref = 5AAC)
 - power: Class 0.5 (active), Class 1 (reactive)
 - power factor: Class 0.5
 - frequency: Class 0.05
 - THD and harmonics V and I: Class 5
 - active energy: Class 0.5
 - active energy: Class 0.5s (IEC/EN/BS 62053-22)
 - reactive energy: Class 1 (IEC/EN/BS 62053-24)
- Integrated data memory (DMG8000, DMG9000)
- Integrated communications ports (RS485 or Ethernet)
- Communications protocols: Modbus-RTU, ASCII and TCP
- Compatible with Synergy, Xpress and App NFC
- Protection rating: IP65 for front panel.

Synergy supervision and energy management software
See Section 30.

Xpress configuration and remote control software
See Section 30.

Lovato App NFC
See Section 30.

EXP series expansion modules

Traditional current transformers.

See page 25-31 to 25-35.

① Configurable as single-phase current transformer (3 single-phase measure per each EXS3...).

new

General characteristics

The EASY BRANCH multi-circuit metering system is a modern solution to the need for electrical parameter metering when more than one load is to be monitored inside a single electrical enclosure. Each DIN rail mounting current metering unit can monitor 2 or 4 measurement points and display the values on the DMG7500, DMG8000 or DMG9000 power analysers to which it is connected, thus centralising the display of data, which includes:

- Phase current
- Measurements on 4 quadrants
- Power (active, reactive and apparent phase and total power)
- Power factor (phase and total)
- Maximum (HIGH), minimum (LOW) and average (AVERAGE) of all measured values
- Peak power/current (max demand)
- Current asymmetry and active power unbalance
- Total harmonic distortion (current)
- Current harmonic analysis up to the 63rd order
- Active, reactive and apparent energy metering (partial and total).

The RJ45 port on the EXS4000 metering module provides foolproof connection of EXS1... and EXS3... electronic current transformers.

The values can also be monitored using the communications ports of DMG... power analysers, to which up to 8 current metering modules can be connected in cascade thanks to the integrated communications bus with standard Ethernet cable (cat. 6), which also provides power.

Connecting 5 or more EXS4... current metering modules requires a 24VDC-0.2A power supply. Each measurement point can be configured as single- or three-phase, up to a total of 33 three-phase or 99 single-phase points.

Operational characteristics of EXS4... current measuring modules

- Power supplied by the bus cable (connecting 5 or more EXS4... current metering modules requires a 24VDC-0.2A power supply)
- nominal input current: EXS4000: 32A, 63A, 80A or 125A, depending on the connected EXS1... or EXS3... electronic transformer. EXS4001: 5A or 1A via external current transformer
- Accuracy (IEC/BS 61557-12):
 - current: Class 0.5 (Iref = 5AAC)
 - power: Class 1 (active), Class 2 (reactive)
 - power factor: Class 1
 - THD and current harmonics: Class 5
 - active energy: Class 1
 - active energy: Class 1 (IEC/EN/BS 62053-21)
 - reactive energy: Class 2 (IEC/EN/BS 62053-23)
- Diagnostics LED indicates correct power supply and electronic current transformer recognition
- Mounts to 35mm omega rail (IEC/EN/BS 60715).

Operational characteristics of EXS1... - EXS3... electronic current transformers

- Diagnostics LED to confirm connection
- Pre-wired cable: 2m
- RJ45 connector.

DMGKIT100250	Composed of one DMG100 multimeter and n°3 CTs 200/5A for Ø23mm cable	1	0.856

General characteristics

DMG... digital multimeters are available with a modular housing, 4 module size, and are equipped with a graphic backlight LCD (except DMG100/110 with icon display) capable of providing extremely clear, intuitive and flexible viewing of all electrical parameters of an installation.

For DMG110 and DMG210 versions, there is a built-in isolated RS485 interface.

Main measurements:

- Voltage: phase, line and system values
- Current: phase values (neutral current calculated)
- Power: apparent, active and reactive phase and total values
- P.F.: Power Factor per phase and total
- Frequency of measured voltage value
- HIGH-LOW-AVERAGE value functions of all measurements
- Maximum demand of power and current values
- Asymmetric voltage and current
- Total harmonic distortion (THD) of voltage and current values
- Energy meters for active, reactive and apparent values
- Hour counter (total and partial, 1 on DMG200/210, 4 programmable on DMG100/110)
- Phase energy (DMG100/110)
- Harmonic analysis up to the 15th order (DMG100/110).

Operational characteristic

- Auxiliary supply voltage range: 100...240VAC / 110...250VDC
- Maximum rated measurement voltage
 - 600VAC (DMG100/110)
 - 690VAC (DMG200/210)
- Voltage measurement range:
 - 50...720VAC phase-to-phase (DMG100/110)
 - 20...830VAC phase-to-phase (DMG200/210)
- Usage in medium and high-voltage systems with voltage transformers
- Rated input current: With external CT /5A (also 1A for DMG100/110)
- Current measurement range with CT up to 10,000A
- Frequency measurement range: 45...66Hz
- True RMS measurements for voltage and current values
- Accuracy:
 - Voltage: ±0.5% (50...720VAC for DMG1...)
 - (50...830VAC) for DMG2...
 - Current: ±0.5% (0.1...1.1In)
 - Power: ±1% f.s.
 - Frequency: ±0.05%
 - Active energy: Class 1 (IEC/EN/BS 62053-21)
 - Reactive energy: Class 2 (IEC/EN/BS 62053-23)
- Non-volatile memory for data storage
- Communication protocol Modbus-RTU and ASCII (only for DMG110 and DMG210)
- Programming and remote control by software (only for DMG110 and DMG210; compatible with Synergy and Xpress software)
- Modular housing, 4 module
- EN degree of protection: IP40 on front; IP20 at terminals.

CURRENT TRANSFORMERS OF DMG... KITS

- Operating frequency: 50...60Hz
- Secondary output current: 5A
- Overload withstand: 120% I_{pn}
- Rated insulation voltage U_i: 720V
- Rated short time thermal current I_{th}: 40...60I_{pn} for 1 second
- Rated dynamic current I_{dyn}: 2.5I_{th} for 1 second
- Insulation (dry type): class E
- Faston terminals
- EN degree of protection: IP30.

Synergy supervision and energy management software
See Section 30.

Xpress configuration and remote control software
See Section 30.

Certifications and compliance

Certifications obtained: cULus, EAC and RCM.
Compliant with standards: DMG100/110: IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 61010-1, CSA C22.2 n° 61010-1, UL 61010-2-030, CSA 22.2 n° 61010-2-030.
DMG200/210: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, UL 61010-1, UL508, CSA C22.2 n°14.

EXM1002	4 opto-isolated digital inputs and 2 relay outputs rated 5A 250VAC
Communication ports.	
EXM1010	Opto-isolated USB interface
EXM1011	Opto-isolated RS232 interface
EXM1012	Opto-isolated RS485 interface
EXM1013	Opto-isolated Ethernet interface
EXM1020	Opto-isolated RS485 interface and 2 relay outputs rated 5A 250VAC
EXM1030	Data storage, clock-calendar (RTC) with backup battery for data logging

General characteristics

DMG300... digital multimeters are available with a modular housing, 4 module size, and are equipped with a graphic backlight LCD capable of providing extremely clear, intuitive and flexible viewing of all electrical parameters of a system. The very accurate measurements combined with their extreme compactness provide an ideal solution for every type of application. Expandable with up to 3 module EXM... series by optical interface.

Main measurements:

- Voltage: phase, line and system values
- Current: phase values (neutral current calculated)
- Power: apparent, active and reactive phase and total values
- P.F.: Power Factor per phase and total
- Frequency of measured voltage value
- HIGH-LOW-AVERAGE value functions for all measurements
- Maximum demand of power and current values
- Voltage and current asymmetry
- Total harmonic distortion (THD) of voltage and current values
- Harmonic analysis of voltage and current up to 31° order
- Energy meters for active, reactive, apparent partial and total values, programmable tariff functions
- Hour counter for programmable total and partial hours
- Pulse counter for general use: consumption pulse counting for water, gas, etc. with expansion module only.

Operational characteristics

- Auxiliary supply voltage range: 85...264VAC / 93.5...300VDC
- Voltage measurement range: 20...830VAC phase-to-phase
10...480VAC phase-neutral
- Usage in medium and high-voltage systems with voltage transformers
- Rated input current: With external CT, 5A or 1A
- Current measurement range with CT up to 10,000A
- Frequency measurement range: 45...66Hz
- True RMS measurements for voltage and current values
- Measurements accuracy:
 - Voltage: ±0.2% (50...830VAC)
 - Current: ±0.2% (0.1...1.1In)
 - Power: ±0.5% f.s.
 - Power factor: ±0.5%
 - Frequency: ±0.05%
 - Active energy: Class 0.5s (IEC/EN/BS 62053-22)
 - Reactive energy: Class 2 (IEC/EN/BS 62053-23)
- Non-volatile memory for data storage
- Communication protocol Modbus-RTU, ASCII and TCP (only with communication expansion modules)
- Programming and remote control by software (only with communication expansion modules); compatible with **Synergy** and **Xpress** software
- Modular housing, 4 module
- EN degree of protection: IP40 on front; IP20 at terminals.

Synergy supervision and energy management software
See Section 30.

Xpress configuration and remote control software
See Section 30.

EXM series expansion modules
See page 31-3.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices - Multimeters; EAC and RCM for all.
Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, UL508, CSA C22.2 n° 14.

General characteristics

DMG6... digital multimeters are capable of viewing the measurements with high accuracy on the wide icon LCD, which allow to control energy distribution networks. They are available with a flush-mount housing, (96x96mm/3.78"x3.78") and 1 expansion slot to fit plug-in expansion modules, suitable for numerous applications. The main features include an extended power supply voltage range, high measurement accuracy, expandability and icon interactive interface for simple use. They are equipped with a front optical port for programming via USB (CX01) or Wi-Fi (CX02) communication devices to allow:

- Configuration of parameters
- Parameters copy
- Cloning of stored data.

Main measurements:

- Voltage: phase, line and system values
- Current: phase values (neutral current calculated)
- Power: apparent, active and reactive phase and total values
- P.F.: Power Factor per phase and total
- Frequency of measured voltage value
- HIGH-LOW-AVERAGE value functions for all measurements
- Maximum demand of power and current values
- Voltage and current asymmetry
- Total harmonic distortion (THD): voltage and current
- Harmonic analysis of voltage and current up to the 15th order
- Energy meters for active, reactive, apparent partial and total values
- Hour counter for programmable total and partial hours.

Operational characteristics

- Auxiliary supply voltage range:
 - 100...440VAC / 110...250VDC[Ⓜ]
- Voltage measurement range: 50...720VAC L-L
- Usage in medium and high voltage systems with voltage transformers
- Rated input current: By external CT 5A or 1A
- Current reading through Rogowski coils for DMG611...
- Frequency measurement range 45...66Hz
- True RMS measurements: for voltage and current
- Measurement accuracy:
 - Voltage: ±0.5% (50...720VAC)
 - Current: ±0.5% (0.1...1.1In)
 - Power: ±1% f.s.
 - Frequency: ±0.05%
 - Active energy: Class 1 (IEC/EN/BS 62053-21)
 - Reactive energy: Class 2 (IEC/EN/BS 62053-23)
- Measurement accuracy DMG615/620::
 - Voltage: ±0.2% (50...720VAC)
 - Current: ±0.2% (0.1...1.1In)
 - Power: ±0.5% f.s.
 - Frequency: ±0.05%
 - Active energy: Class 0.5 (IEC/EN/BS 62053-22)
 - Reactive energy: Class 2 (IEC/EN/BS 62053-23)
- Non-volatile memory for data storage
- Communication protocol Modbus-RTU, ASCII and TCP
- Compatible **Synergy** and **Xpress** software
- Flush-mount housing 96x96mm/3.78"x3.78"
- EN degree of protection: IP54 on front.

CX01	USB/optical device with PC ↔ LOVATO Electric product connecting cable, for programming, data download, diagnostics and firmware upgrade	1	0.090
CX02	Wi-Fi device for PC ↔ LOVATO Electric product programming, data download, diagnostics and cloning	1	0.090
CX03	GSM/GPRS penta-band antenna (850/900/1800/1900/2100Mhz)	1	0.090

General characteristics

Communication devices for connection of LOVATO Electric products to personal computers, smartphones and tablets.

CX01

The USB/optical device, complete with cable, allows the connection of products compatible with PCs without having to disconnect the power supply from the electric panel. The PC identifies the connection as a standard USB.

CX02

By Wi-Fi connection, compatible LOVATO Electric products can be viewed on PCs, smartphones and tablets with no need for cabling.

CX03

Antenna compatible with the major part of worldwide mobile networks thanks to the available frequencies at 850/900/1800/1900/2100MHz.

Degree of protection: IP67. Fixing by Ø10mm drilling. Cable length: 2.5mm

Protection covers

PA96X48

EXCCON01

Order code	Description	Qty per pkg	Wt
		n°	[kg]
EXCCON01	RS485/Ethernet 12...48VDC converter, including DIN rail fixing kit	1	0.400

General characteristics EXCCON01

The EXCCON01 converter allows "Slave" devices connected on an RS485 network to interface with a "Master" featuring Ethernet port:

- kit comprising converter and DIN rail mounting accessory;
- programming via web interface;
- power supply not included.

Certifications

Certifications obtained: cULus (UL 60950-1) Listed FCC CLASS A.

Gateway

EXCGLA01

EXCGLAX1

EXCM4G01

new

Order code	Description	Qty per pkg	Wt
		n°	[kg]
EXCGLA01	Gateway data logger for the data collecting via Modbus from the device in the field. Publishing of the data to supervision software, also in Cloud	1	0.600
EXCGLAX1	2G/4G modem communication module for EXCGLA01	1	0.160
EXCM4G01	4G Gateway with RS485 and Ethernet port, Modbus RTU/TCP protocol	1	0.300

EXCGLA01 and EXCGLAX1 general characteristics

EXCGLA01 gateway is able to collect data from devices which are connected through Ethernet or RS485 port. Modbus-RTU, ASCII and TCP protocols are supported. The data can be reviewed by a connection to Synergy Cloud service or to Ethernet local webserver and a browser. The access to internet for data sending can be achieved with Ethernet port or by adding EXCGLAX1 2G/4G modem.

- CPU ARM 1 GHz
- 2 Ethernet ports
- 1 RS232/RS422/RS485 serial port
- 24VDC (10...32VDC) power supply
- Operating temperature -20...+60°C
- Simplified connection to LOVATO Electric devices
- Compatible with Synergy and Synergy cloud software.
- LTE cat. 4 Global support, UMTS/DC HS DPA/HSUPA/WCDMA, GSM/GPRS/EDGE
- SIM slot for microSIM.

Reference standards

Compliant with standards: EN 60950-1.

EXCM4G01 general characteristics

The EXCM4G01 gateway allows "Slave" devices connected on an RS485 network to interface with a "Master" via 4G network:

- TCP server connection via 4G or 2G network;
- Transparent operating mode: the data is transferred from 4G side to serial side and vice versa with Modbus-RTU/TCP protocol conversion;
- Settable parameters: TCP server IP and remote port, network operator apn (with username and password), SIM card pin (with enabling), connection time-out, serial parameters (baud rate from 1,200 bps to 115,200 bps, stop bit, character length, parity)
- Programming via integrated webserver.

Reference standards

Compliant with standards for EXCGLA01: emissions EN/BS 61000-6-4, immunity EN/BS 61000-6-2, for installation in industrial environment.

Compliant with standards for EXCGLAX1: EN/BS 61000-6-4, EN/BS 61000-6-2, EN/BS 61000-6-3, EN/BS 61000-6-1, EN/BS 60945, ETSI EN/BS 301 489-1, ETSI EN/BS 301 489-52, EN/BS 301 511, ETSI EN/BS 301 908-1, ETSI EN/BS 301 908-2, EN/BS 62311, EN/BS 60950-1.

Compliant with standards for EXCM4G01: EN 60950-1.

For dimensions, wiring schemes and technical characteristics, refer to technical instructions in Downloads at www.LovatoElectric.com.

DM34T1500	1500	5	15	1	0.476
DM34T1600	1600	5	15	1	0.476

General characteristics

The current transformers (CTs) in the DM series are installed in an electrical system to reduce the line current to a secondary value of 5A compatible with the ammeter inputs of the digital multimeters or protection relays.

DM0TW... are instrument transformers in class 1/0.5 wound primary type and are normally used for low primary current values starting from 5A.

DM... are instrument transformers in class 1/0.5 without a primary winding and are normally used for high primary current values starting from 40A.

The number of loops of the primary cable does not modify the accuracy but converts the primary current value proportional to secondary current.

Operational characteristics

- Operating frequency: 50...60Hz
- Secondary output current: 5A
- Overload withstand: 120% I_{pn}
- IEC rated insulation voltage U_i: 720V
- IEC rated short-time thermal current I_{th}: 40...60 I_{pn} for 1 second
- IEC rated dynamic current I_{dyn}: 2.5 I_{th} for 1 second
- Insulation (dry type): Class E
- Terminals:
 - Faston for DM2T... and DM3T... types
 - Screw for DM0T... types
- Sealable terminal covers for DM4T..., DM33T, DM34T and DM35T... types
- Fixing on 35mm DIN rail (IEC/EN/BS 60715) or by screws (fixing elements standard supplied with the product)
- EN degree of protection: IP30
- Ambient conditions:
 - Operating temperature: -25...+50°C
 - Storage temperature: -40...+80°C
 - Relative humidity, non condensing: 90%.

Certifications and compliance

Certifications obtained: EAC.
Compliant with standards: IEC/EN/BS 61869-2, IEC/EN/BS 61869-1.

General characteristics

The DM...TA type current transformers (CTs) are installed in an electrical system to reduce the line current to a secondary value of 5A compatible with the ammeter inputs of the digital multimeters or protection relays.

DM...TA are instrument transformers in class 0.5/1 without a primary winding and are normally used for high primary current values starting from 250A.

Operational characteristics

- Operating frequency: 50...60Hz
- Secondary output current: 5A
- Overload withstand: 120% I_{pn}
- IEC rated insulation voltage U_i: 720V
- IEC rated short-time thermal current I_{th}: 40...60 I_{pn} for 1 second
- IEC rated dynamic current I_{dyn}: 2.5 I_{th} for 1 second
- Insulation (dry type): Class E
- Screw terminals
- Sealable terminal covers
- Screw fixing (fixing elements standard supplied with the product)
- IEC degree of protection: IP30
- Ambient conditions:
 - Operating temperature: -25...+50°C
 - Storage temperature: -40...+80°C
 - Relative humidity, non condensing: 90%.

Certifications and compliance

Certifications obtained: EAC.

Compliant with standards: IEC/EN/BS 61869-2, IEC/EN/BS 61869-1.

- Microprocessor supervision and control
- Accurate TRMS measurement circuit
- Automatic intelligent adjustment system
- Versions from 2 to 24 steps and up to 32 with Master-Slave function
- Versions with static outputs
- Versions for capacitive reactive power factor correction
- Use in cogeneration and medium-voltage systems
- Basic controller functionalities can be extended using the EXP series of expansion modules
- USB, serial, Ethernet communication interfaces
- Modbus-RTU and ASCII communication protocols
- Thyristor modules for dynamic correction.

DCRL SERIES (EXPANDABLE)

- Flush-mount housing: DCRL3 - DCRL5 (96x96mm/3.78x3.78") DCRL8 (144x144mm/5.67x5.67")
- 3/5/8 steps, expandable with EXP series modules (step increment, digital outputs, communication ports, etc.)
- Backlit icon LCD
- Ethernet communication interface (only for DCRL8)
- Alarm codes with scrolling texts, programmable in 6 languages (Italian, English, Spanish, French, German and Portuguese)
- Independent voltage measurement input
- Suitable for low and medium voltage systems
- Capacitor overload protection
- Internal panel temperature sensor
- Voltage and current harmonic-content measurement up to 15th order
- Front optical USB and Wi-Fi communication port for PC, smartphone and tablet connection
- Programmable alarms
- Protection via 2-level password to prevent all undesired access
- Compatible with **Synergy** and **Synergy^{cloud}**, supervision and energy management software, **Xpress** configuration and remote control software and with the **Sam1** application for Android/iOS.

Page 26-10

DCRG SERIES (EXPANDABLE)

- Flush-mount housing: DCRG8 - DCRG8F - DCRG8IND (144x144mm/5.67x5.67")
- 8 steps, expandable with EXP series modules (step increment, inputs and outputs, communication ports, GPRS/GSM modem, data memory, etc.) and with Master-Slave function
- 128x80 backlit graphic LCD, facilitating data reading even in poor lighting conditions and the display of system information clearly and intuitively
- Ethernet communication interface
- Texts in 10 languages: Italian, English, Spanish, French, German, Czech, Polish, Russian, Portuguese and one customisable
- Voltage measurement input independent from the supply input
- Suitable for low and medium voltage systems
- Capacitor overload protection
- Internal panel temperature sensor
- Voltage and current harmonic-content measurement up to 31st order
- Dynamic power factor correction (DCRG8F version).
- Power factor correction by single phase (SPPFC)
- Capacitive reactive power factor correction (DCRG8IND version)
- Front optical USB and Wi-Fi communication port for PC, smartphone and tablet connection
- Programmable alarms
- Protection via 2-level password to prevent any undesired access
- Calendar-clock with backup reserve energy
- Logging of up to 250 events
- Compatible with **Synergy** and **Synergy^{cloud}**, supervision and energy management software, **Xpress** configuration and remote control software and with the **Sam1** application for Android/iOS.

THYRISTOR MODULES DCTL SERIES

- Version for steps from 7.5kvar to 120kvar
- Version with rated voltage from 400 to 690VAC
- Suitable for dynamic power factor correction
- Zero-crossing controlled connection-disconnection
- Over-temperature protection
- Monitoring and protection of current, power and current harmonics of the capacitor bank
- NFC connectivity for parameter settings and programming of protection thresholds with APP **NFC**
- Optical port for programming and diagnostic with software **Xpress** and APP **Sam1**
- Optional RS485 port for the command and monitoring by **DCRG8F** controller.

DCRL series

INDEX

ESSENTIAL AND PERFORMANCE TOO! DCRL3 - DCRL5

OPTICAL COMMUNICATION PORT

The optical port on the front permits communication with PCs, smartphones and tablets through the USB and Wi-Fi standards for carrying out programming, diagnostics and data download without disconnecting power to the electrical panel.

USER INTERFACE

The backlit icon LCD ensures excellent legibility as well as the texts for the display of measurements and description of alarms. The 4 navigation buttons are for settings and functions.

AN EXPANSION SLOT FOR EXP... SERIES MODULES

EXPANDABLE UP TO 8 STEPS

COMPACT SIZE

The space taken by the housing does not increase (96x96x73mm / 3.78x3.78x2.87") even with the expansion module fitted.

FIXING SYSTEM

The fixing system with clips is simple, with a press to click into place and push to ensure retention over time. Correct application of the standard seal and clips in the panel ensures a front IP54 protection degree.

EXPANDABILITY

Basic controller functionality can be extended easily using the EXP series expansion modules:

- digital outputs
- relay outputs to increase number of steps
- opto-isolated USB interface
- opto-isolated RS232 interface
- opto-isolated RS485 interface.

SOFTWARE COMPATIBILITY

- **Sam1** Application for Android and iOS
- **Xpress** for configuration and remote control
- **Synergy** and **Synergy** for supervision and energy management.

CHARACTERISTICS OF THE DCRL SERIES

WIDE RANGE OF VOLTAGE MEASUREMENTS

The wide measurement range between 50...720VAC L-L and between 50...415VAC L-N allows the controllers to be used in most applications.

SUITABLE FOR LOW- AND MEDIUM-VOLTAGE SYSTEMS

The controllers can be used in medium-voltage systems thanks to the ability to set a voltage transformer ratio, obtaining measurements regarding the transformer primary value both for adjustment and for the display.

ALARM MESSAGES IN 6 LANGUAGES

The alarm texts can be displayed in Italian, English, French, German, Portuguese and Spanish.

DEFECTIVE STEP

The DCRL measures the percentage of residual power for each step, comparing it with the value set in the main menu. The defective step alarm is generated if this value is below the set limit.

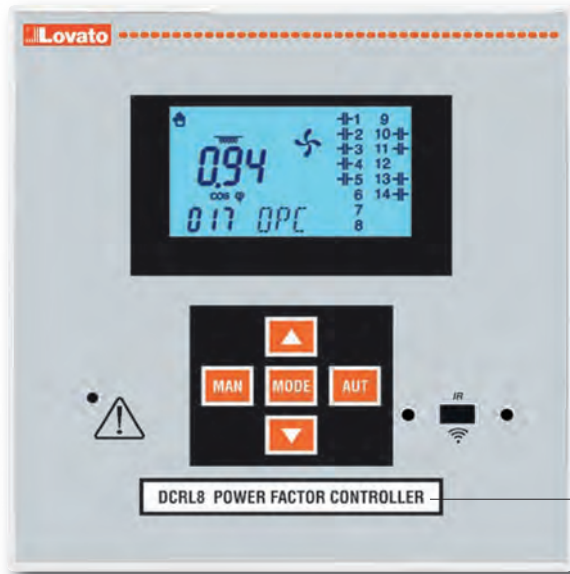

26 Automatic power factor controllers and thyristor modules

DCRL series

INDEX

DCRL8

● USER INTERFACE

The backlit icon LCD ensures excellent legibility as well as the texts for the display of measurements and description of alarms. The 5 navigation buttons are for settings and functions, while an LED indicates the alarms and the optical port for communication via USB and Wi-Fi.

● EXPANDABLE UP TO 14 STEPS

● OPTICAL COMMUNICATION PORT

The optical port on the front permits communication with PCs, smartphones and tablets through the USB and Wi-Fi standards for carrying out programming, diagnostics and data download without disconnecting power to the electrical panel.

● TWO EXPANSION SLOTS FOR EXP... SERIES MODULES

● ETHERNET COMMUNICATION INTERFACE

By using the expansion module [EXP1013](#).

● CUSTOMISATION

An insert for labels customised with text, logos, codes, etc. is available, to be fixed onto the controller frames.

● COMPACT SIZE

Reduced profile and depth simplify installation of the power factor controller even in very compact electrical panels.

The total depth of the controller is 73mm (2.87") inside the panel with the expansion modules installed.

● FIXING SYSTEM

The fixing system **with metal screws** guarantees excellent, lasting retention over time.

● HIGH PROTECTION RATING

The front of the controller and seal have been designed to ensure a front protection rating of **IP65**.

● EXPANDABILITY

Basic controller functionality can be extended easily using the EXP series expansion modules:

- relay outputs to increase number of steps
- digital outputs
- opto-isolated RS232 interface
- opto-isolated RS485 interface
- opto-isolated ETHERNET interface.

MAX 2

● SOFTWARE COMPATIBILITY

- **Sam1** Application for Android and iOS
- **Xpress** for configuration and remote control
- **Synergy** and **Synergy** for supervision and energy management.

● CHARACTERISTICS OF THE DCRL SERIES

- **5A OR 1A IN THE SAME CONTROLLER**
A parameter setting can easily allow to use 5A or 1A secondary current transformers.
- **WHITE BACKLIT DISPLAY**
It can be programmed to flash during alarm conditions.
- **HARMONIC ANALYSIS**
It includes voltage and current THD measurements and single harmonic measurement up to the 15th order and they can be shown on the display.

- **MAINTENANCE INTERVALS**
There are 2 counters: one to count the operating hours of the steps and the other for the number of interventions of each step. An alarm threshold can be set for both counters.
- **BUILT-IN TEMPERATURE SENSOR**
The internal temperature of the controller is monitored constantly by the built-in sensor.
The user can program the thresholds to activate and stop the cooling fan and/or generate the temperature alarm.

26 Automatic power factor controllers and thyristor modules

DCRG series

INDEX

THE SOLUTION FOR ALL APPLICATIONS! DCRG8

BACKLIT GRAPHIC LCD
High-legibility 128x80 pixels, with adjustable brightness.

3 VERSIONS AVAILABLE:

- DCRG8: for traditional power factor correction with contactors or dynamic (fast) power factor correction with EXP1001
- DCRG8F: for dynamic (fast) power factor correction
- DCRG8IND: for capacitive reactive power factor correction.

OPTICAL COMMUNICATION PORT
The optical port on the front permits communication with PCs, smartphones and tablets through the USB and Wi-Fi standards for carrying out programming, diagnostics and data download without disconnecting power to the electrical panel.

CUSTOMISATION
There is a customisation slot available on the front panel for the description of the controller by adding texts, logos, codes, etc.

COMPACT SIZE

Frame profile and reduced total depth simplify installation of the controller also in very compact electric panels.

FIXING SYSTEM

The fixing system with **metal screws** guarantees excellent retention over time.

HIGH PROTECTION DEGREE
The controller front and the rear seal have been designed to warrant an **IP54** protection degree.

EXPANDABILITY

Basic controller functionality can be extended easily using the EXP series expansion modules:

- Relay outputs to increase the number of steps
- Opto-isolated static outputs (also for dynamic correction)
- Capacitor protection
- Digital and analog inputs and outputs
- Expandable up to 24 mixed outputs
- Opto-isolated RS232 interface
- Opto-isolated RS485 interface
- Opto-isolated ETHERNET interface
- Opto-isolated Profibus-DP interface
- GPRS/GSM modem
- Data memory, calendar-clock with backup reserve power for data logging.

SOFTWARE COMPATIBILITY

- **Sam1** Application for Android and iOS
- **Xpress** for configuration and remote control
- **Synergy** and **Synergy.com** for supervision and energy management.

26 Automatic power factor controllers and thyristor modules

DCRG series

INDEX

calpe INDUSTRIAL MARINE RAILWAY

- SUITABLE FOR POWER FACTOR CORRECTION USING CONTACTORS AND THYRISTOR MODULES (WITH DCRG8F MODEL OR DCRG8 + EXP1001)
- INDEPENDENT POWER FACTOR CORRECTION FOR EACH SINGLE PHASE
- CAPACITIVE REACTIVE POWER FACTOR CORRECTION VIA INDUCTIVE STEP MANAGEMENT (WITH DCRG8IND MODEL)
- SMS SENDING FOR ALARM TRIGGERING
- DATA SENDING BY EMAIL OR FTP SERVER
- STREAMLINE DESIGN
The DCRG controller has an ergonomic design and, at the same time, particular care has been given to details.

● MASTER-SLAVE FUNCTION

The DCRG controller can control the outputs of other compatible controllers in addition to its own steps. In this way, it offers a **Master-Slave** architecture. Up to 8 slaves can be controlled to create a system with a maximum of 32 steps.

● CAPACITOR PROTECTION

By adding the dedicated EXP1016 expansion module, the DCRG controller can be equipped with additional capacitor protection functions. The module can measure the harmonic current values and the capacitor temperature on-site as well as detecting malfunction on any phase.

● 3 CURRENT INPUTS

- Independent power factor correction for each single phase
- Analysis of all electrical measurements in the system (multimeter).

● WIDE RANGE OF RATED VOLTAGE MEASUREMENTS

The wide measurement range between 100...600VAC allows the controller to be used in most applications.

● GSM/GPRS MODEM

With the EXP1015 expansion module, the controller is equipped with a GSM/GPRS modem, which it is automatically configured. This simplifies installation and wiring. Once a data-enabled SIM card is inserted, the controller can send alarm or event SMS and e-mails and data files can be transmitted to FTP servers.

● 5A AND 1A BOTH IN THE SAME CONTROLLER

By configuring a specific parameter, the controller can be enabled for use with either a 5A or 1A secondary current transformer.

● GRAPHS AND TEXTS IN 10 LANGUAGES

Display of waveforms, graphs and texts in 10 languages: Italian, English, Spanish, French, German, Czech, Polish, Russian, Portuguese and one customisable.

● SUITABLE FOR MEDIUM-VOLTAGE SYSTEMS

The controller can be used in medium-voltage systems thanks to the ability to set a voltage transformer ratio, obtaining measurements regarding the transformer primary value both for adjustment and for the display.

● DYNAMIC (FAST) POWER FACTOR CORRECTION

Thyristor-based dynamic power factor correction systems are necessary where the reactive load varies rapidly over time. DCRG8F has 8 built-in static outputs, while DCRG8 + EXP1001, by taking advantage of the built-in relay outputs as well, realizes a mixed traditional (relay) and dynamic system.

● INDEPENDENT POWER FACTOR CORRECTION FOR EACH SINGLE PHASE (SPPFC)

In highly unbalanced three-phase systems, power factor correction by single phase can be implemented. The DCRG controller can monitor the cosφ of each single phase and correct through the joint use of single- and three-phase capacitor banks.

● CAPACITIVE REACTIVE POWER FACTOR CORRECTION (DCRG 8IND).

The DCRG8IND version can connect both capacitors and inductors to achieve the desired cosφ should it be necessary to correct the capacitive reactive power factor as well.

26 Automatic power factor controllers and thyristor modules

Reactive current control relay

INDEX

DCRM series

DCRM2

Order code	Steps	Auxiliary supply voltage	Qty per pkg	Wt
	no.	[V]	n°	[kg]
Single and three-phase low-voltage systems.				
DCRM2	2	380...415VAC	1	0.284

General characteristics

The DCRM allows the reactive current of a system to be controlled.

It allows to reach the best $\cos\phi$ value possible, reducing the request for reactive current from the mains.

It can control the connection of two capacitor banks. Each one can be individually enabled and its power can be set through a dedicated trimmer.

It is also possible to adjust the time for connection and disconnection of the capacitors, thereby modifying the reaction speed of the system.

The controller can be used both in single-phase and three-phase wiring.

Operational characteristics

- Auxiliary supply voltage:
 - 380...415VAC standard
 - 220...240VAC and 440...480VAC on request
- Rated frequency: 50/60Hz
- 80...528VAC voltage measurement input
- Current measurement input:
 - By CT /5A
 - Measuring range: 0.1...6A
 - Measurement type: true root mean square (TRMS)
 - Automatic identification of CT connection polarity (straight / inverted)
- Relay outputs:
 - 2 relays (steps), each with 1 changeover contact
 - Rated current: 8A 250VAC (AC1)
 - Individual enablement of control of the two relays
- Modular DIN 43880 housing (3 modules)
- IEC degree of protection: IP40 on front (if placed in IP40 housing and/or electrical panel), IP20 terminals.

ADJUSTMENTS

"C/K Step 1"	C/K ratio step 1 (0.15...2)
"C/K Step 2"	C/K ratio step 2 (0.15...2)
"Connection delay"	Step connection delay 1...60s
"Disconnection delay"	Step disconnection delay 0.1...60s
"System configuration"	Single- or three-phase wiring selection.

INDICATIONS

- 1 green LED for power on and inhibition time
- 2 red LEDs for relay connection.

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (File E93601), as Auxiliary Devices-Modular ampere monitoring relays (with 415VAC maximum only); EAC.

Compliant with standards: IEC/EN/BS 60255-5, IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 n°14.

General characteristics

- The DCRL series has been developed with advanced functionality and produced with a dedicated ultra-compact housing. It combines modern front design with practical mounting and expandability (EXP... modules). Its main features are:
- Backlit icon LCD with excellent information display
 - Alarm codes with scrolling texts, programmable in 6 languages (Italian, English, Spanish, French, German and Portuguese)
 - Connection in single or three phase lines and co-generation systems with 4-quadrant operation
 - Voltage measurement input independent from the supply and which can be used in medium-voltage lines with VTs
 - Drastic reduction of the the number of switching operations
 - Balanced use of steps with same power rating
 - Measurement of reactive power installed for each step
 - Capacitor over-current protection
 - Panel over-temperature protection via internal sensor
 - Accurate micro-breaking protection
 - Vast choice of measurements available, including voltage and current THD with single harmonic analysis up to the 15th order
 - Wide voltage measurement range
 - High accuracy of true root mean square (TRMS) measurements
 - Front optical USB (CX01 dongle) and Wi-Fi (CX02 dongle) communication port for PC, smartphone and tablet connection
 - Compatible with Ethernet communication modules EXP1013 (only for DCRL8)
 - Compatible with Synergy and Synergy supervision and energy management software, Xpress configuration and remote control software and with the Sam1 application for Android/iOS
 - Customisation with label on front (only for DCRL8).

Operational characteristics

- Supply:
 - Auxiliary voltage: 100...440VAC
 - Frequency: 50/60Hz ±10%
- Voltage input:
 - Rated voltage: 600VAC L-L (346VAC L-N)
 - Frequency range: 45...65Hz
- Current input:
 - Single-phase connection
 - Rated current: 1A or 5A, configurable
- Measurements and control:
 - Power factor adjustment: 0.5ind...0.5cap.
 - Voltage measurement range: 50...720VAC L-L; 50...415VAC L-N
 - Current measurement range: 0.025...1.2A for 1A full scale; 0.025...6A for 5A full scale
 - Type of voltage and current measurement: true root mean square (TRMS)
- Relay outputs (steps):
 - DRCL3: 3 outputs
 - DCRL5: 5 outputs
 - DCRL8: 8 outputs
 - Contact arrangement: NO; the last is a changeover
 - Rated current: 5A 250VAC AC1
- Flush-mount housing:
 - DCRL3, DCRL 5 (96x96mm / 3.78x3.78");
 - DCRL8 (144x144mm / 5.67x5.67")
- IEC degree of protection:
 - DCRL3, DCRL5 IP54 and DCRL8 IP65 on front; IP20 on terminals for all.

Certifications and compliance:

Certifications obtained: UL Listing for USA and Canada (cULus - File E93601), as Auxiliary Devices - Power factor controllers, EAC, RCM. Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-3 (only for DCRL8), IEC/EN/BS 61000-6-4 (only for DCRL3-5), UL 508, CSA C22.2 n°14.

❶ For configuration via software, contact our Technical support.

General characteristics

The DCRG automatic power factor controller meets the technical requirements of modern electrical systems in industry. It is designed to comply and has the option to extend its functionality by using specific EXP series expansion modules. Mention should also be made of the optical communication port as standard, for programming the controller, diagnostics and data download.

The backlit graphic LCD facilitates data reading even in poor lighting conditions and permits the display of system information clearly and intuitively.

Its main features are:

- 128x80-pixel backlit graphic LCD with texts in 10 languages: Italian, English, Spanish, French, German, Czech, Polish, Russian, Portuguese and one customisable
- Connection in single and three-phase lines as well as three-phase lines with neutral control and cogeneration systems (4 quadrants)
- Capacitive reactive power factor correction (DCRG8IND only)
- Independent power factor correction for each single phase (SPPFC only for DCRG8 / DCRG8IND)
- Suitable for dynamic power factor correction with DCRG8F or DCRG8 + EXP1001
- Control of thyristor modules type DCTL... with static outputs or RS485 connection with DCRG8F controller
- Use with medium-voltage lines with VTs (DCRG8 / DCRG8IND only)
- Capability for correct operation even in systems characterised by high harmonic content
- Drastic reduction in the number of switching operations
- Balanced use of steps with same power rating
- Measurement of reactive power installed for each step
- Recording of the number of connections for each step
- Capacitor over-current protection on all three phases
- Panel over-temperature protection via internal sensor and external sensor
- Accurate micro-breaking protection
- Current and voltage harmonic analysis
- Quick CT programming function
- USB (CX01 dongle) and Wi-Fi (CX02 dongle) communication port for PC, smartphone and tablet connection
- Modbus-RTU TCP and ASCII communication protocol
- Compatible with Synergy and Synergy supervision and energy management software, Xpress configuration and remote control software and with the Sam1 application for Android/iOS
- Sending and reception of SMS, sending of e-mails with alarm diagnosis and data files, FTP Client function (with EXP1015 module).

Operational characteristics

- Voltage measurement circuit:
 - Auxiliary supply voltage: 100...415VAC
 - Rated frequency: 50/60Hz (±10%)
- Current measurement circuit:
 - Single and three-phase input
 - Rated current: 5A (1A programmable)
- Measurements and control:
 - Power factor adjustment: 0.5ind...0.5cap.
 - Voltage measurement range: 50...720VAC
 - Current measurement range: 0.025...6A
 - Temperature measurement range: -30...+85°C
 - Capacitor overload current measurement range: 0...250%
 - Type of voltage and current measurement: true root mean square (TRMS)
- Relay outputs:
 - 7 each with NO contact and the last as changeover
 - Rated current: 5A 250VAC AC1
- Flush-mount housing (144x144mm / 5.67x5.67")
- IEC degree of protection: IP65 on front; IP20 on terminals.

Certifications and compliance

Certifications obtained: UL Listing for USA and Canada (cULus - File E93601), as Auxiliary Devices - Electronic power factor regulator, RCM, EAC. Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, UL508, CSA C22.2 n°14.

INDUSTRIAL MARINE RAILWAY

“Master-Slave” power factor correction system with DCRG8

When the correction system is divided into several panels, a DCRG8 (Master) controller can control up to 8 DCRG8 (Slave) controllers. The “Slave” controllers act as remote outputs for the connection of capacitor banks that carry out the “Master” controller’s commands.

The single controllers are responsible for monitoring the electrical panel and the capacitor banks in particular, while the $\cos\phi$ reading is centralised in the “Master” panel where the line arrives.

Software and APP

Xpress configuration and remote control software

Synergy Supervision and energy management software

Sami APP

General characteristics

By using the Xpress software, the quick setup of the controllers can be carried out via PC, avoiding parameter programming errors.

The parameter programming of a DCR... or DCRG8... controller can also be saved on PC and quickly loaded into another device requiring the same programming.

It permits the following operations:

- System operation monitoring:
 - Graphical and numerical display of measurements
 - Controller status
- Capacitor efficiency control
 - Current kvar measurement for each step
 - Counters for the number of connections for each step
 - Total hour counter for connection time for each individual step
 - Access all setup parameters
 - Saving / loading parameters
 - Highlighting of changed values
 - Resetting to default values.

The Synergy software permits remote control and supervision of the DCR... and DCRG8... controllers. See section 30 for details.

This software has structures and applications based on MS SQL relational databases, and the data can be consulted using the most popular browsers.

It is a highly versatile system, simultaneously accessible to a large number of users/workstations via intranets, VPN or Internet.

APP for smartphone and tablet

The Sami application allows the user to program the controller, view alarms, send commands, read measurements, download statistical data and events and send retrieved data by e-mail. The connection is made by Wi-Fi with a smartphone or tablet using the CX02 device. It is iOS and Android compatible.

For details, consult section 30 or our Technical support; see contact details on inside front cover.

CX03

Order code	Description	Qty per pkg	Wt
		n°	[kg]
CX01	USB/optical device PC↔DCRL/DCRG, for programming, data download, diagnostics and updating firmware	1	0.090
CX02	Wi-Fi connection device for PC↔DCRL/DCRG, for downloading data, programming, diagnostics and cloning	1	0.090
For DCRG8... type only.			
CX03	GSM penta-band antenna (850/900/1800/1900/2100MHz)	1	0.090

General characteristics

Communication and connection devices to connect the DCRL and DCRG power factor controllers to personal computers, smartphones and tablets.

CX01

This USB device, complete with cable, permits connection of the power factor controller with a PC without needing to disconnect the electrical panel supply, in order to:

- Program parameters
- Copy the settings to external units
- Download data and events
- Carry out diagnostics
- Update the firmware.

The PC identifies the connection as a standard USB.

CX02

Via Wi-Fi connection, the power factor controllers can be viewed from PCs, smartphones and tablets without having to connect cables, in order to:

- Program parameters
- Download data and events
- Carry out diagnosis and cloning of the device.

CX03

Compatible with major worldwide mobile phone networks, thanks to the use of 850/900/1800/1900/2100MHz frequencies.

IEC degree of protection: IP67.

Fixing hole Ø10mm (0.40").

Cable length 2.5m/2.73yd.

Connection to the automatic power factor controller type DCRG8F via RS485

Alternatively to the standard command from static outputs, the thyristor modules type DCTL can be connected to the automatic power factor controller type DCRG8F with the RS485 optional port (code EXC1042), obtaining a simple and linear wiring.

In this configuration, it is possible to monitor from the display of the DCRG8F controller the status and measures of each DCTL module such as step power, currents, harmonics, temperature, working hours, etc.

General characteristics

- Suitable for dynamic (fast) power factor correction
- Silent operation
- Zero-crossing switching
- Monitoring and protection of the current, power and current harmonics of the capacitor bank: thanks to the presence of integrated current transformers, it is possible to monitor and protect the capacitor bank against overcurrents caused by events like the distortion of the voltage waveform. It is also possible to monitor electrical measurements of the capacitor bank such as the residual power three-phase voltages and currents, temperatures, THDI, morning hours, etc...
- Over-temperature protection via built-in sensor and input for the optional external temperature sensor NTC01 for the measure of the temperature in the area of installation of the capacitors
- Ready to work without need of any programming when used with standard features
- NFC connectivity for parameter settings and programming of the protection thresholds (overtemperature, overcurrent, overvoltage,...) with the App Lovato **NFC** freely downloadable from Google Play Store and App Store
- Optical port for programming and diagnostic with software **Xpress** and App **Sami**, connection with USB dongle (CX01) or Wi-Fi dongle (CX02)
- Command circuit made by 8...30VDC signal or dry contact (which allows to save the use of a power supply)
- Optional RS485 communication card (code EXC1042) for the command and monitoring from power factor controller type DCRG8F; from the display of DCRG8F is also possible to monitor the status and the measurements (temperature, power,...) of each DCTL
- 1 programmable relay output with changeover contact for the signalling of alarms or fan command
- Possibility to install the thyristor modules DCTL in both vertical and horizontal position without derating, thanks to the built-in fans
- Monitoring of the functioning of the fans with the analog measure of the current through integrated sensor, which allows to control the status of the fan and recognize automatically any fault like jamming or disconnection
- Power connections with double screw terminals (for sizes up to 60kvar), which simplify the wiring, in particular for the connection of more thyristor modules in parallel; it is also possible to decide to cable or not the central phase according to the layout of the power factor correction panel
- Panel fixing with screw or on DIN guide with the optional accessory EXP8003 (only for sizes up to 60kvar).

Operational characteristics

- Step power:
 - 7.5, 15, 30, 50 and 100kvar at 400VAC
 - 9, 18, 36, 60 and 120kvar at 480VAC
 - 30, 50 and 100kvar at 600...690VAC
- Rated operating voltage:
 - 400VAC (IEC and cULus) for version DCTLA400...
 - 400...480VAC (IEC and cULus) for version DCTLA480...
 - 600...690VAC (IEC), 600VAC (cULus) for version DCTLA690...
- Rated frequency 50/60Hz
- Auxiliary supply voltage: 100...240VAC ± 10%
- Command circuit: 8...30VDC or dry contact or RS485 connection from DCRG8F controller
- Controlled phases: 2
- Forced ventilation monitored from the control logic
- Operating temperature: -20...+45°C (up to 55°C with derating)

INDICATIONS

- LED POWER: presence of supply
- LED FAULT: alarm active (n° flashes = type of alarm)
- LED ON: command active.

Certifications and compliance:

Certifications obtained: cULus.
Compliant with standards: IEC/EN/BS 60947-4-3, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4.

THYRISTOR MODULES

DCTL

27 Automatic transfer switch controllers

- Supervision of two or three-phase power sources
- Emergency demand supervision for standby generating set
- Tie-breaker management
- Control of contactors, motorised circuit breakers and motorised changeover switches
- Closed transition
- Automatic non-priority load management
- Event logging
- Remote control and supervision
- Front optical port
- Built-in NFC technology
- Expandable with EXP modules
- Communication protocols Modbus-ASCII, RTU and TCP
- Real time clock
- Enclosed automatic transfer switches ATS.

Automatic transfer switch controllers for 2 power sources

ATL100 type modular version for controlling 2 power sources with single-phase control	27 - 7
ATL500 type non expandable with synoptic and NFC for controlling 2 power sources	27 - 7
ATL600 and ATL601 type non expandable for controlling 2 power sources.....	27 - 8
ATL610 type expandable with EXP modules for controlling 2 power sources	27 - 8
ATL800 type expandable with EXP modules for controlling 2 power sources and 1 tie breaker	27 - 9

Automatic transfer switch controllers for 3 power sources

ATL900 type expandable with EXP modules for controlling 3 power sources and 2 tie breakers	27 - 10
--	---------

Enclosed automatic transfer switches ATS

ATP series with ATL600 automatic transfer switch controller and contactors	27 - 11

Page 27-8

ATL610

- Management of two power sources
- AC and DC power supply
- 6 programmable digital inputs
- 7 programmable relay outputs
- Real time clock (RTC)
- Expandable with EXP series modules (inputs and outputs, communication ports).

Page 27-9

ATL800

- Management of 2 power sources and 1 tie breaker
- AC and DC power supply
- 8 programmable digital inputs
- 7 programmable relay outputs
- Built-in NFC technology for parameter settings with App **NFC**
- Real time clock (RTC)
- Non-priority load management
- Closed transition with brief parallel configuration
- Built-in RS485 communication
- Built-in PLC logic
- Expandable with EXP series modules (inputs and outputs, communication ports).

Page 27-10

ATL900

- Management of 3 power sources and 2 tie breakers
- AC and DC power supply
- 12 programmable digital inputs
- 4 current inputs
- 10 programmable relay outputs
- 1 programmable static output
- Built-in NFC technology for parameter settings with App **NFC**
- Real time clock (RTC)
- Non-priority load management
- Closed transition with brief parallel configuration
- Built-in RS485 communication
- Built-in PLC logic
- Expandable with EXP series modules (inputs and outputs, communication ports).

Page 27-11

ATP

- Enclosed automatic transfer switches from 45 to 160A
- Management of 2 power sources
- Four-pole interlocked contactors
- Automatic transfer switch controller type ATL600
- Dual power supply module type ATLDPS1 for the measurement and control of voltages present at supply inputs
- Miniature circuit breakers for the protection of the measuring lines
- Metallic enclosure IP65.

Page 27-12

ATLDPS1

- Module specifically designed to control power supply voltage of motorised circuit breakers and changeover switches
- Continuous monitoring of supply line status
- Management via microcontroller management.

27 Automatic transfer switch controllers

ATL500

INDEX

SIMPLE AND READY TO USE

SYNOPTIC

The frontal synoptic provides a simple and clear view of the status of the plant, signalling with LEDs the status of the power sources and the status of the changeover devices.

FRONTAL KEYBOARD

With the frontal keyboard it is possible to select the operating mode (manual or automatic) and command manually the switching between the power sources directly with the buttons I-O-II on the front, without need to program any setting on the controller.

SELF-SEEKING POWER SUPPLY

ATL500 has a self-seeking power supply, which automatically selects the best of the two available power sources for the internal supply, taken directly from the two measuring inputs (rated voltage 110...240VAC L-N), without the need of an external circuit or dual power supply module for the selection of the power for the auxiliary supply.

NFC CONNECTION

ATL500 is provided with built-in NFC connectivity for the programming via Android and iOS smart devices (smartphone and tablets) with the LOVATO NFC App in a simple, fast and innovative way, which does not need any connection cable and is able to operate even without power supply on the controller. With the LOVATO NFC App it is possible to configure:

- system parameters: rated system voltage, rated frequency, type of wiring, voltage control mode, etc.
- password for the protection of the access to the settings
- changeover settings: priority line selection, interlock times, feedback delays, etc.
- protection thresholds and tripping delays: min/max voltage, min/max frequency, phase sequence, asymmetry
- function of the programmable digital inputs and outputs
- function of the potentiometers
- alarms properties.

THREE-PHASE WITH NEUTRAL VOLTAGE MONITORING INPUTS

ATL500 is provided with three-phase with neutral voltage monitoring inputs for a complete monitoring of the voltage and frequency of both power sources. The controller can be configured to be used in three-phase with neutral, single-phase or two-phase systems.

PROGRAMMABLE DIGITAL INPUTS AND OUTPUTS

The function of the programmable digital inputs and outputs can be configured via NFC to satisfy different application needs.

HIGH PROTECTION DEGREE

The controller front and the optional frame seal have been designed to warrant an IP65 protection degree.

POTENTIOMETERS

ATL500 is provided with two potentiometers on the back, one for each power source, which can be used for the manual setting of the line presence delays (default setting) or to set the tripping delays of the protection thresholds, in alternative to the setting via NFC. The function of the potentiometers can be modified with the LOVATO NFC App.

For 2 power sources.
ATL600 - ATL601 - ATL610

INDEX

NON-STOP CONTROL!

- **BACKLIT GRAPHIC LCD DISPLAY**
128x80 pixel, with excellent legibility with adjustable brightness and display of events, alarms and measurements in 5 languages: English, Italian, French, Spanish and German.

- **OPTICAL COMMUNICATION PORT**

The optical port on the front, using a standard USB or Wi-Fi point, permits to communication with a PC, smartphone and tablet, to carry out programming, diagnostics and data download without removing power to the electric panel.

- **COMPACT SIZE**

Slim frame profile and reduced total depth simplify installation of the transfer switch controller also in very compact electric panels.

- **HIGH PROTECTION DEGREE**
The controller front and the optional frame seal have been designed to warrant an **IP65** protection degree.
- **MAINTENANCE COUNTERS**
ATL features two counters used for maintenance; the first monitors the operating time and the second counts the number of switching operations. Exceeding the limit set on the counters activates the corresponding alarm.

- **FIXING SYSTEM**

The fixing system with **metal screws** guarantees excellent, lasting hold over time.

- **STATISTICS AND EVENTS**
The recorded statistical data is available to the user for understanding how the system operates. A cyclical internal memory records up to 100 events.
- **EMERGENCY DEMAND SUPERVISION FOR STANDBY GENERATING SET**
In applications where one of the two supply sources is a generating set, the transfer switch controller has specific functions to supervise the generator starting and stopping operations.

- **INPUTS, OUTPUTS, INTERNAL VARIABLES, COUNTERS**

The inputs and outputs can be configured by the user to manage the various application requirements. Also available to the user are limit thresholds, counters, user alarms and remote control variables (**ATL610** only) to customise the control functions. The limit and counter statuses, if enabled, are shown in the appropriate pages on the display.

- **CALENDAR CLOCK (ATL610)**
Built-in calendar-clock with backup reserve power.
- **DUAL POWER SUPPLY (ATL610)**
110...240VAC and 12/24VDC supply.
- **EXPANDABILITY (ATL610)**
Basic functions of the transfer switch controllers can be easily extended using EXP series expansion modules:
 - Relay outputs
 - Digital and analogue inputs and outputs
 - Opto-isolated RS232 interface
 - Opto-isolated RS485 interface
 - Opto-isolated Ethernet interface.
 Using modules dedicated to communications the device can be controlled and supervised by the **Synergy** and **Synergy** softwares and controlled remotely and configured with the **Xpress** software.

12/24VDC battery supply input (only for **ATL601** and **ATL610**)

INDEX

VERSATILE CONFIGURATION

ATL800

- Management of 2 energy sources and 1 tie breaker.
- 6 preconfigured system layouts.
- Non-priority load management.
- Management of transition with brief parallel configuration.
- RS485 built-in.
- Built-in NFC technology for parameter settings with App **NFC**.
- App and software: **Synergy**, **Xpress**, **Sam1**, **NFC**.

NFC

WiFi

● GRAPHIC LCD AND 8 LANGUAGE TEXT

The backlit graphic display simplifies the user interface and permits good visibility in environments with poor lighting. For ATL800 and ATL900 the texts are available in 8 languages: English, Italian, French, Spanish, German, Portuguese, Polish and Russian.

The new interface allows the user to see, clearly and simply:

- System status
- Measurements
- Statistical data
- Threshold control
- Alarm pop-up windows.

● MAINTENANCE COUNTERS

Two counters can be used for scheduling maintenance on the transfer systems installed: the first for recording the operating time and the second for monitoring the number of switching operations. Exceeding the limit set on the counters activates the corresponding alarm.

● INPUTS, OUTPUTS, INTERNAL VARIABLES, COUNTERS

The input and output functions are preconfigured with the most frequently used settings; the user can easily modify the predefined configuration and adapt the switch to their application requirements. All the inputs and outputs can be configured. There are various types of programmable internal variables:

- Limit thresholds
- Remote control variables
- User alarms
- Programmable counters
- Timer.

The limit, counter and enabled timer statuses are available for display on dedicated pages.

● HIGH PROTECTION RATING

The controller front and the frame seal have been designed to warrant an **IP65** protection degree.

● STATISTICS AND EVENTS

The statistical data recorded by the transfer switch controller is available to the user for analysing the performance of the switching system. A cyclical internal memory records up to 250 events, providing useful information on the history of the system controlled.

● BUILT-IN CALENDAR CLOCK

A built-in calendar clock with backup reserve energy permits each event to be identified using the time and date on which it occurred.

● BUILT-IN RS485 COMMUNICATION

Thanks to the built-in RS485 communication port, ATL800 and ATL900 are already set up for remote supervision and control. In addition to this communication port, the user can install two further types of communication from those available in the EXP... expansion modules.

● DUAL AC/DC SUPPLY

ATL switches can deal with all supply solutions demanded by the market. The best and safest solution is the simultaneous use of AC and DC supply. The switches can then be supplied by the AC line available and, during switching, in the absence of the AC line, the switch will be supplied by the battery via the DC inputs. Non-stop control! AC supply ensures supply during system monitoring and DC supply guarantees constant supply during switching.

● PROGRAMMABLE PLC LOGIC

With the built-in PLC functions, new switching logic can be defined through appropriate combinations of input, output and internal variable signals.

● TIMER

8 timer variables are available for use in the system's PLC logic, in combination with the outputs or user alarms. Each timer variable has an input variable that controls it. When this variable changes state, so does the timer variable, but it remains in the new state only for the time specified then returns automatically to the starting condition.

● NFC CONNECTION

Programming the parameters via tablet and smartphone is now possible also through NFC wireless technology. Bringing a smartphone or tablet with NFC connection enabled close to the display of the ATL800-900 activates the **NFC** App LOVATO and the switch connected is recognised automatically. It will then be possible to modify the parameters and program the ATL.

● USB AND WI-FI COMMUNICATION INTERFACES

ATL800 and ATL900 feature a front optical port for programming via optional USB (CX01) or Wi-Fi (CX02) communication interface.

Advantages:

- Not necessary to disconnect the supply from the panel to connect to the switch
- Electrical safety (no physical connection)
- Convenience of operating on the front.

27 Automatic transfer switch controllers

For 2 and 3 power sources.
ATL800 - ATL900

INDEX

FULL OPTIONAL, FOR EVERY REQUIREMENT

ATL900

- Management of 3 energy power sources and 2 tie breakers.
- 4 current inputs for the three-phases and neutral.
- 14 preconfigured system layouts.
- Non-priority load management.
- Management of transition with brief parallel configuration.
- RS485 built-in.
- Built-in NFC technology for parameter settings with App **NFC**.
- App and software: **Synergy**, **Xpress**, **Sam1**, **NFC**.

● WI-FI COMMUNICATION INTERFACE (VIA CX02)

This connection can be used to:

- Copy the parameters
All the parameters of the ATL can be saved in the CX02 memory and if necessary loaded back into the same device (backup function) or a new switch (replication of the configuration).
- Clone the device settings
In addition to copying the parameters, the current values of the statistical data, counters and events can be saved in the memory in order to completely replicate an ATL on another device of the same type or restore the ATL to a previously saved state.

THREE TYPES OF TRANSITION AVAILABLE

Open transition

The switch transfers the load between the two sources, interrupting the supply for a period of time that can be programmed by the user.

In-phase transition

The switch transfers the load between the two sources, interrupting the supply for a period of time that can be programmed. In this case the load is passed to a new source if spontaneous synchronisation is found; the amplitude, phase and frequency of the two sources must not differ from the maximum value set.

Closed transition

With switches and external protections, configured appropriately, the two sources will be synchronised (where possible) or spontaneous synchronisation will be expected within a limit time. In presence of all synchronisation conditions the load will be transferred with closed transition and instantaneous parallel without interrupting supply.

ATL900: management of three sources and two tie breakers

A single transfer switch controller can be used to manage applications which in the past required several transfer switch controllers in a cascade connection. 24 system layouts are available.

4 current inputs

The current inputs permit the monitoring of the demand load and defining of the correct switching strategy. Knowing the power demanded by the system and the rated power of the sources, ATL900 can select the best source available that can supply the loads correctly.

● EXPANDABILITY

ATL800 and ATL900 functionality can be extended thanks to the EXP... series expansion modules. Three expansion slots are available, and while the switch is restarting the modules are recognised and configured entirely automatically. The following EXP... modules are available:

- Digital I/O modules
- Analogue I/O modules
- USB, RS232, RS485, Ethernet and Profibus communication modules
- GPRS/GSM modem

Since the additional modules are shared with other LOVATO Electric products, it is possible to save in management costs, guaranteeing flexibility and ease of installation, above all when the system has already been commissioned.

27 Automatic transfer switch controllers

For 2 power sources

INDEX

Non expandable modular

ATL100

Order code	Description	Qty per pkg	Wt
		n°	[kg]
ATL100	Automatic transfer switch controller for 2 power sources with single-phase control, modular housing, 110...230VAC supply	1	0.300

General characteristics ATL100

ATL100 is a single-phase automatic transfer switch controller in modular housing. It monitors 2 single-phase voltage inputs and it connects to the output the line that is within the limits. The priority line is the line 1. The 2 outputs can control contactors or motorized changeover switches to perform the transfer between the lines.

Operational characteristics ATL100

- Self-powered
- Input voltage range: 80...300VAC
- Frequency range: 45...66Hz
- 2 relay outputs with 1 NO contact 4A 250VAC
- 1 relay output with 1 NO contact 3A 250VAC.

Non expandable flush-mount

ATL500

new

Order code	Description	Qty per pkg	Wt
		n°	[kg]
ATL500	Automatic transfer switch controller with NFC technology and synoptic, for 2 power sources with three-phase control (144x144mm/5.7x5.7"), self-seeking power supply 110...240VAC	1	0.580

General characteristics ATL500

ATL500 is an automatic transfer switch controller for the automatic or manual switching of the load from the MAIN LINE to a stand-by or emergency SECONDARY LINE and vice versa.

With the integrated outputs, it is possible to control contactors or motorised changeover switches.

The main features are:

- Self-seeking power supply from the two measurement inputs
- Measurement inputs for three-phase + neutral voltage values, also suitable for 1 and 2 phase lines
- Synoptic on front with LEDs for a simple and clear visualisation of the status of the lines and the changeover devices
- Parameter programming via NFC technology and **NFC App LOVATO** downloadable from Google Play Store and App Store. With **NFC App LOVATO** is possible to set: rated system parameters, line control settings, changeover settings, password and I/O functions
- Frontal keyboard for the selection of the operating mode and the manual command of the changeover devices
- 2 programmable digital inputs
- 3 programmable relay outputs
- Potentiometers on the back for the manual setting of the line presence delays or the tripping delays of the protection thresholds.

Operational characteristics ATL500

- Power supply:
 - Self-seeking power supply from the measurement inputs 110...240VAC L-N (range: 90...300VAC L-N)
- Voltage measurement inputs:
 - Rated voltage Ue: 110...240VAC L-N / 190...415VAC L-L
 - Measuring range: 90...300VAC L-N / 155...519VAC L-L
 - Frequency range: 45...66Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 2 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 1 with 1 changeover contact (NO/NC - SPDT) rated 8A 250VAC
- Enclosure:
 - Flush-mount housing: 144x144mm/5.7x5.7"
 - IEC degree of protection: IP40 on front; IP65 with optional seal EXP8001; IP20 at rear.

Certifications and compliance

Certifications obtained: EAC, RCM (only for ATL500).
Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

EXP... expansion modules fixing on ATL610

General characteristics ATL600 - ATL601 - ATL610

The automatic transfer switch controllers ATL600 / ATL601 / ATL610 are used for the automatic or manual switching of the load from the MAIN LINE to a stand-by or emergency SECONDARY LINE and vice versa. They have two outputs for the "automatic" and/or "manual" control of contactors or motorised circuit breakers and switches.

The main features are:

- Supply input:
 - Single in AC for ATL600
 - Single in DC for ATL601
 - Dual in AC and DC for ATL610
- Measurement inputs for three-phase + neutral voltage values; also suitable for 1 and 2 phase lines
- 128x80 pixel backlit graphic LCD to view measurements, events and alarms in 5 languages (English, Italian, French, Spanish and German)
- 2 status indication LEDs
- 6 programmable digital inputs
- 7 programmable relay outputs
- Viewing of L-L and L-N voltage values of the controlled lines
- Status viewing of contactor or motorised circuit breakers and switches
- Configuration programming of lines, control and supervision parameters for emergency demand of generating set
- Event logging
- Microprocessor supervision of functions; including virtual real time clock for ATL610
- Communication interface by front optical port with CX01 or CX02 dongle using USB or Wi-Fi
- Compatible with **Synergy**, supervision and energy management software, **Xpress** remote control and configuration software and with the **Sami** application for Android/iOS
- Modbus-RTU, ASCII and TCP communication protocol.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency.

Operational characteristics ATL600 - ATL601 - ATL610

- Power supply:
 - Power supply voltage: 110...240VAC (ATL600); 12/24VDC (ATL601); 12/24VDC - 110...240VAC (ATL610)
- Voltage measurement inputs:
 - Rated voltage Ue: 100...480VAC (L-L)
 - Measuring range: 50...576VAC (L-L)
 - Frequency range: 45...66Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 6 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 1 with changeover contact (NO/NC - SPDT) rated 8A 250VAC
- Enclosure:
 - Flush-mount housing: 144x144mm/5.7x5.7"
 - IEC degree of protection: IP40 on front; IP65 with optional seal EXP8001; IP20 at rear.

Certifications and compliance

Certifications obtained: cULus, RCM, LOVAG (only for ATL600 - ATL610), EAC.
Compliant with standards: IEC/EN/BS 61000-6-3 (only for ATL601), IEC/EN/BS 61000-6-4 (only for ATL600 - ATL610), IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 n° 14.

MAX 3

General characteristics

The automatic transfer switch controller ATL800 is used for the automatic or manual switching of the load between two lines in accordance with the selected switching logic. It has outputs for the "automatic" and/or "manual" control of contactors or motorised circuit breakers and switches. It can also manage a third control device as tie breaker or non-priority load management. The layout and system status are displayed directly on the graphic LCD.

The main features are:

- AC and DC supply inputs
- Measurement inputs for three-phase + neutral voltage values; also suitable for 1 and 2 phase lines
- 128x80 pixel backlit graphic LCD to view measurements, events and alarms in 8 languages (English, Italian, French, Spanish, German, Portuguese, Polish and Russian)
- Active operating mode indicator LED
- Viewing of L-L and L-N voltage values of the controlled lines
- Viewing the status of contactors or motorised circuit breakers both via display and LED
- 6 system layouts available
- Management of a tie breaker
- 8 programmable digital inputs
- 7 programmable relay outputs
- Viewing of L-L and L-N voltage values of the controlled lines
- Configuration programming of lines, type of source (line/generator), control and supervision parameters for emergency demand of generating set
- Possibility of transferring load with closed transition and spontaneous or controlled genset synchronisation
- Non-priority load management
- Built-in programmable PLC logic
- Built-in RS485 communication
- Event logging
- Virtual calendar clock (RTC)
- Communication interface by front optical port with CX01 or CX02 dongle using USB or Wi-Fi
- Parameter programming via NFC technology and the App **NFC** downloadable from Google Play Store and App Store
- Compatible with **Synergy**, supervision and energy management software, **Xpress** remote control and configuration software and with the **Sam1** application for Android/iOS
- Modbus-RTU, ASCII and TCP communication protocol.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency.

Operational characteristics

- Power supply:
 - Power supply voltage: 100...240VAC; 12/24/48VDC
- Voltage measurement inputs:
 - Rated voltage Ue: 100...600VAC (L-L)
 - Frequency range: 45...66Hz
- Programmable digital inputs:
 - Negative inputs
- Programmable relay outputs:
 - 2 each with 1 normally open contact (NO - SPST) rated 12A 250VAC
 - 2 each with 1 normally open contact (NO - SPST) rated 8A 250VAC
 - 3 each with 1 changeover contact (NO/NC - SPDT) 8A 250VAC
- Enclosure:
 - Flush-mount housing: 180x240mm/7.09x9.45"
 - IEC degree of protection: IP65 on front; IP20 at back.

Certifications and compliance

Certifications obtained: cULus, EAC, RCM, LOVAG. Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, UL508 and CSA C22.2 n° 14.

EXP... expansion module fixing on ATL900

MAX 3

General characteristics

The automatic transfer switch controller ATL900 is used for the automatic or manual switching of the load between three lines in accordance with the selected switching logic. It has outputs for the "automatic" and/or "manual" control of contactors or motorised circuit breakers and switches. It can also manage two more control devices as tie breakers or non-priority load management. It has four current inputs for managing switching with power thresholds. The layout and system status are displayed directly on the graphic LCD. The main features are:

- AC and DC supply inputs
- Measurement inputs for three-phase + neutral voltage values; also suitable for 1 and 2 phase lines
- 4 current measurement inputs
- 128x112 pixel backlit graphic LCD to view measurements, events and alarms in 8 languages (English, Italian, French, Spanish, German, Portuguese, Polish and Russian)
- Active operating mode indicator LED
- Viewing of L-L and L-N voltage values of the controlled lines
- Viewing the status of contactors or motorised circuit breakers both via display and LED
- 6 system layouts available
- Management of a tie breaker
- 12 programmable digital inputs
- 10 programmable relay outputs
- 1 static output
- Viewing of L-L and L-N voltage values of the controlled lines

ATP0160T4A230C600A	160	111	600x400x250 (23.62x15.75x9.84")

General characteristics

The enclosed automatic transfer switches ATP series are provided in metallic enclosure IP65, complete with automatic transfer switch controller type ATL600, four-pole contactors BF series, dual power supply module type ATLDPS1 and miniature circuit breakers (MCB) type P1MB for the protection of the measuring lines.

They are used for the automatic or manual switching of the load between two lines ("MAIN LINE" and "SECONDARY LINE").

They are available in versions from 45 to 160A in four-pole configuration.

CONTROL FUNCTIONS OF THE LINES

- Phase sequence and phase loss
- Minimum and maximum voltage
- Voltage asymmetry
- Minimum and maximum frequency

Operational characteristics

- Power supply:
 - Auxiliary supply voltage: 230VAC (taken from the input lines)
- Voltage measurement inputs:
 - Rated voltage U_e : 100...480VAC (L-L)
 - Measuring range: 50...576VAC (L-L)
 - Frequency range: 45...66Hz
- 6 programmable digital inputs
- 7 programmable relay outputs:
 - 6 each with 1 normally open contact (NO-SPST) rated 8A 250VAC
 - 1 with 1 changeover contact (NO/NC - SPDT) rated 8A 250VAC
- Enclosure:
 - Metallic enclosure
 - Flanges for cable entries in the top and bottom sides
 - PVC locking system with double-comb tool insert
 - Opening with left hinges
 - IEC degree of protection: IP65.

Certifications and compliance

Certification obtained: EAC.
Compliant with standards: IEC/EN/BS 61439-2.

OK	ON	<MIN OR >MAX	OFF	OFF	OFF	Internal relays	Open	ON
<MIN OR >MAX	OFF	>MIN	ON	OFF	OFF	Internal relays	Open	ON

General characteristics

ATLDP51 is capable of measuring and controlling voltages at its inputs selecting the most ideal to connect to the output. It is suitable to supply motorised circuit breakers and changeover switches in automatic switching systems of 2 three-phase supply lines.

The two voltage inputs of the module are independent and insulated; each is capable of supplying the internal measuring circuit managed by the microcontroller. It reduces the number of components and improves installation safety.

Main ATLDP51 features include:

- Voltage value selectable via bypass terminals
- Minimum and maximum voltage tripping thresholds
- 2 single-phase L+N inputs
- 1 single-phase L+N output
- L1 priority line
- Use with motorised control units powered at 110VAC or 230VAC
- Output voltage monitoring
- Internal relay self-diagnosis
- Indicating LEDs for abnormal conditions and status of inputs and outputs.

Operational characteristics

- Rated supply voltage: 110...230VAC configurable
- Frequency: 50/60Hz
- Input voltage range: 80...300VAC
- Voltage tripping thresholds min / max: 80% and 120% of preset value
- 2 line inputs L1-L2: Single-phase, between phase and neutral
- Current output: 4A max.
- Priority line: L1 when both input values are within limits
- Fixed delay time between line switching: 0.5s
- 4 status indication LEDs for voltage of each line within limits, voltage present at output, relay output anomaly
- Mounting: 35mm DIN rail (IEC/EN/BS 60715) or screw-type by means of removable clips
- Modular housing, 3 module
- IEC degree of protection: IP40 on front; IP20 at rear.

Certifications and compliance

Certifications obtained: cULus, EAC, RCM, LOVAG. Compliant with standards: IEC/EN/BS 61010-2-030, IEC/EN/BS 61010-2, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, IEC/EN/BS 60947-1, IEC/EN/BS 60947-6-1, UL508 and C22.2 n° 14.

General characteristics

Communication devices for connection of LOVATO Electric products to personal computers, smartphones and tablets.

CX01

The USB/optical device, complete with cable, allows the connection of products compatible with PCs without having to disconnect the power supply from the electric panel. The PC identifies the connection as a standard USB.

CX02

By Wi-Fi connection, compatible LOVATO Electric products can be viewed on PCs, smartphones and tablets with no need for cabling.

CX03

Antenna compatible with major part of worldwide mobile networks thanks to the use of 850/900/1800/1900/2100MHz frequencies. Protection rating IP67. Fixing hole Ø10mm/3.94". Cable length 2.5mm/0.10".

For dimensions, wiring schemes and technical characteristics, refer to technical instructions in downloads section of local or global websites www.LovatoElectric.com or consult Technical support.

Software

By using the **Xpress** software, the quick setup of the switch controllers can be carried out via PC, avoiding parameter programming errors.

The parameter programming of ATL600/610/800/900 controllers can also be PC saved and quickly uploaded into another device requiring the same programming. It permits the correct operation of the system to be checked through graphic and numerical display of the measurements and controller status.

Synergy and **Synergy** softwares provide for the supervision of the ATL600/610/800/900 transfer switch controllers. This software has structures and applications based on MS SQL relational databases, and the data can be consulted using the most popular browsers.

It is a highly versatile system, simultaneously accessible to a large number of users/workstations via intranets, VPN or Internet.

See section 30 for details.

App for smartphone and tablet

The **Sami** (Setup And Maintenance 1) application allows the user to program the controller, view alarm conditions, send commands, read measurements, download statistical data and events and send retrieved data by email. The connection is made by Wi-Fi with a smartphone or tablet using the CX02 dongle.

It is iOS and Android compatible.

For more details consult our Technical support.

For ATL500, ATL800 and ATL900, featuring built-in NFC technology, the **NFC App** LOVATO application is available for parameter programming, downloadable from Google Play Store and App Store.

EXCCON01

The EXCCON01 converter allows "Slave" devices connected on an RS485 network to interface with a "Master" featuring Ethernet port:

- Kit comprising MOXA NPORT5230 converter and DIN rail mounting accessory DK35
- Programming via web interface
- Power supply not included.

See section 31 for details.

EXCM4G01

The EXCM4G01 gateway allows "Slave" devices connected on an RS485 network to interface with a "Master" via 4G network. See section 31 for details.

RGKRR

It is an expansion unit for remote status and alarms. RGKRR can be connected at a maximum distance of 1000m/39.37" using the static output of the ATL900.

RGK RR has 12 output relays, 7 normally open (2.5A 250VAC/C38) and 5 changeover contacts (5A 250VAC/B300).

See section 28 for details.

- Extensive selection of functions to satisfy all application requirements
- Power supply range 12-24VDC for each single product
- Totally programmable inputs, outputs and alarms
- RS232, RS485, USB, Ethernet communication interface
- Engine control by CANbus
- Setup and supervision software
- Modem control for sending alarm messages and emails.

STAND ALONE GEN-SET CONTROLLERS

- Generator voltage and current control
- Engine protection
- Programmable inputs and outputs
- Programmable alarm properties.

Page 28-7

AUTOMATIC MAINS FAILURE (AMF) GEN-SET CONTROLLERS

- Automatic starting of generator and load switching to stand-by emergency source in case of mains failure
- Management in “open transition” for contactors, motorised circuit breakers and motorised changeover switches
- Engine protection
- Programmable inputs, outputs and alarms.

Page 28-8

PARALLELING CONTROLLERS FOR MAINS-GENERATOR AND GENERATOR-GENERATOR

- Mains-generator synchronising “closed transition”
- Mains-generator load sharing with source peak demand control
- Generator paralleling management (island mode with load sharing).

Page 28-9

REMOTE UNITS

- Remote viewing and control panels
- Remote annunciator for alarm and status indication
- Digital outputs for alarm and status condition remotely.

28 Engine and generator controllers

RGK700 - 750 - 800 - 900

INDEX

A SUPERIOR CLASS!

CUSTOMISING OPTION

There is a customising slot available on the front to show controller brand name, logo, trademark, part number, brief indication or wording, etc.

PROGRAMMING OPTICAL PORT

The optical port on the panel front, using a standard USB or Wi-Fi point, allows communication with a PC, smartphone and tablet, to carry out programming, diagnostics and data download, without removing power to the electric panel.

COMPACT SIZE

RGK700
RGK800
RGK900

Slim frame profile and reduced total depth simplify installation of the controllers in very compact electric panels.

RGK800
RGK900

IP65 DEGREE OF PROTECTION

The controller front and the internal display frame seal have been designed to warrant an **IP65** protection degree. This with the **UV film** also allow outdoor installation.

INSTALLATION

The fixing with **metal screws** guarantees excellent adhesion over time.

CABLING AND EXPANSION MODULE FIXING SYSTEM

The controller rear has 4 fitting slots to secure cables connected to the terminals with cable ties, in an orderly way inside the electric panel. In addition, a plastic retainer is supplied as standard to keep the expansion modules in place when installed in applications with strong vibrations.

EXPANDABILITY

Basic RGK750, RGK800 and RGK900 controller functions can be easily extended using up to 4 EXP series expansion modules:

- Digital and analog inputs and outputs
- Opto-isolated static outputs
- Relay outputs
- Opto-isolated RS232 interface
- Opto-isolated RS485 interface
- Opto-isolated Ethernet interface
- GPRS/GSM modem.

RGK750 (2 modules)
RGK800 (3 modules)
RGK900 (4 modules)

28 Engine and generator controllers

RGK700 - 750 - 800 - 900

INDEX

INDUSTRIAL MARINE RAILWAY

calpe

- EXPANDABILITY**
 An extensive selection of modules is available to increase the controller functionality.
- GPRS/GSM MODEM**
 Among the expansion modules, there is a GPRS/GSM modem, automatically configured by the genset controller.
- MAINTENANCE**
 Maintenance supervision at programmed intervals.
- STREAMLINE DESIGN**
 The controller has an ergonomic design and, at the same time, particular care has been given to details.

GPRS/GSM MODEM

Once a data-enabled SIM card is inserted, RGK750 - RGK800 - RGK900 controllers can send SMS with alarm and event conditions as well as the latest logged events to a FTP server.

CANBUS COMMUNICATION PORT
 Most models are standard equipped with CAN-J1939 communication port.

PLC FUNCTION

Capability to combine together internal status of controllers with signals incoming from the field to activate outputs and generate alarms.

LOAD MANAGEMENT
 There are different methods of controlling the load conditions; each controller has special parameters functions as follows:
 - RGK700 - RGK750 - RGK800 types: load shedding and dummy load modes
 - RGK900 types: base-load and peak shaving modes.

PARALLELING
 RGK900 and RGK900SA controllers can control the switching between the mains and generators without having to switch off the power supply to the load. In addition, they can control the paralleling connection of two or more generators sharing in this way the load on more than one source. The RGK900MC can control and synchronise mains parallel operation with a power bus composed by a series of generating sets.

REMOTE UNITS
 Remote display panels

There are "mirror" display units available to remotely operate as if in front of the generating set.

Remote annunciator

A remote display can view alarm conditions and can be operated for silencing them.

Alarm-state relay unit
 The relay unit allows to transmit, on voltage-free contacts, the status and alarms of RGK... controllers.

SUPERVISION SOFTWARE
Synergy is web-based and provides for an easy and efficient way to monitor and control electrical installations as well as field equipment.

It is a server-multiclient system based on MS SQL RDBMS with web-browser interface. Simultaneous management of different communication channels with independent configuration (protocols, speed rate, RS232, RS485, Ethernet, modem) is possible. Live page view, data log tables, charts and alarms are available.

CLOUD SOLUTION
 The supervision software is ready as **Synergy.com** solution as well, so that the user does not have to install any package on its own servers.

CONFIGURATION AND REMOTE CONTROL SOFTWARE
Xpress is a parameter configuration and remote monitoring software shared by the entire latest generation of RGK gen-set controllers with communication port.

STAND ALONE APPLICATION

General characteristics for RGK400SA - RGK420SA

- Key with 3 positions (OFF, local start, remote start), removable in OFF and remote start position (for RGK420SA)
- Power supply: 7...33VDC
- VAC inputs: Generator L1-L2-L3-N
- Single, two and three phase voltage control
- Rated measurement voltage range: 100...480VLL (3PH+N)
- Programmable VT ratio
- Frequency measurement range: 45...65Hz
- Current input: 1PH, /5A or /1A
- Display: LCD with icons (52x35mm/2.05x1.38")
- Programming port: IR with support of CX01 (USB) and CX02 (Wi-Fi) dongles
- NFC technology for parameter setup
- Powersave mode
- Inputs: 5 negative + 1 positive for emergency
- Outputs: 5 positive, 2A, protected
- Common pin dedicated to EV and START outputs to be used with emergency push button
- Engine running detection: "D+", Hz
- Engine speed inputs: "W" or Magnetic "Pick-up"
- 1 analog ohmic input for oil pressure, engine temperature or fuel level control
- Alarm and parameter text in 5 languages
- Customisable alarm text (2 alarms)
- Operating temperature: -30...+60°C
- Parameter configuration by NFC technology with NFC App freely downloadable from Google Play Store and App Store
- Compatible with Xpress software.

Certification and compliance

Certifications obtained: IEC/BS 61010-1, IEC/BS 61010-2-030, IEC/BS 61000-6-2, IEC/BS 61000-6-4, UL508, CSA C22.2 n. 14.

General characteristics for RGK600SA - RGK601SA - RGK700SA - RGK800SA

- Power supply: 7...33VDC
- VAC inputs: Generator L1-L2-L3-N
- Single, two and three phase voltage control
- Rated measurement voltage range:
 - 100...480VAC for RGK600SA and RGK601SA
 - 30...600VAC for RGK700SA and RGK800SA
- Programmable VT ratio
- Frequency measurement range: 45...65Hz
- Current input: 3PH, /5A or /1A
- Graphic LCD: 128x80 pixels with backlight
- Programming port: IR with support of CX01 (USB) and CX02 (Wi-Fi) dongles
- Common pin dedicated to EV and START outputs to be used with emergency push button
- Engine running detection: "D+", Hz
- Engine speed inputs: "W" or Magnetic "Pick-up" (RGK601SA excluded)
- 1 CANbus-J1939 port (RGK600SA excluded)
- 3 analog ohmic inputs for oil pressure, engine temperature and fuel level control
- 1 built-in alarm remote port
- Non-volatile memory for event storage
- Alarm, event and parameter text in 5 languages
- Customisable alarm text (8 alarms)
- Operating temperature: -30...+70°C
- Modbus-RTU and Modbus-ASCII protocols
- Compatible with Synergy, Synergy_{com} and Xpress software.

For RGK700SA - RGK800SA only

- PLC logic for inputs, outputs and internal status
- 1 communication port: RS232 for RGK700SA; RS485 for RGK800SA
- Degree of protection: IEC IP65 on front; suitable for use with UL/CSA Type 4X outdoor enclosure installation.

For RGK800SA only

- Neutral current measurement range: 0.050...6A or 0.050...1.2A
- 400Hz frequency support
- 1 programmable analog input
- Modbus-TCP communication protocol
- Current leakage control towards earth/ground
- Clock-calendar (RTC)

Certification and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices - Generator controllers; EAC. Compliant with standards for RGK600/601: IEC/BS 61010-1, IEC/BS 61010-2-030, IEC/BS 61000-6-2, IEC/BS 61000-6-3, UL508, CSA C22.2 n. 14.

Compliant with standards for RGK700 and RGK800: IEC/BS 61010-1, IEC/BS 61000-6-2, IEC/BS 61000-6-3, UL508, CSA C22.2 n. 14.

General characteristics for RGK600 - RGK601 - RGK610 - RGK700 - RGK750 - RGK800

- Power supply: 7...33VDC
- VAC inputs: mains and generator L1-L2-L3-N
- Voltage control for one, two and three phase systems with or without neutral
- Rated measurement voltage range:
 - 100...480VAC for RGK600, RGK601, RGK610 and RGK750
 - 30...600VAC for RGK700 and RGK800
- Frequency measurement range: 45...65Hz
- Programmable VT ratio
- Current measurement range (3 PH): 0.050...6A or 0.050...1.2A
- Graphic LCD: 128x80 pixels with backlight
- 1 USB/optical and Wi-Fi port on front for programming
- Engine running detection: “D+”, generator voltage and frequency
- Engine speed inputs: “W” or Magnetic “Pick-up” (RGK601 excluded)
- 1 CANbus-J1939 port (RGK600 and RGK610 excluded)
- 3 analog ohmic inputs for oil pressure, engine temperature and fuel level control
- 1 built-in alarm remote port
- Non-volatile memory for event storage
- Alarm, event and parameter text in 5 languages
- Alarm text customisable (8 alarms)
- Event log
- Modbus-RTU and Modbus-ASCII communication protocols (RGK600 and RGK601 excluded)
- Compatible with Synergy, Synergy_{cloud} and Xpress software
- 1 slot for EXP modules for RGK610
- 2 slots for EXP modules for RGK750
- 3 slots for EXP modules for RGK800.

For RGK700 - RGK750 - RGK800 only

- PLC logic for inputs, outputs and internal status
- Degree of protection: IEC IP65 on front.

For RGK700 - RGK800 only

- 1 communication port: RS232 for RGK700; RS485 for RGK800
- Degree of protection: IEC IP65 on front; suitable for use with UL/CSA Type 4X outdoor enclosure installation.

For RGK800 only

- Neutral current measurement range: 0.050...6A or 0.050...1.2A
- 400Hz frequency support
- 1 programmable analog input
- Modbus-TCP communication protocol
- Current leakage control towards earth/ground
- Clock-calendar (RTC).

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus - File E93601), as Auxiliary Devices - Generator controllers except for RGK750; EAC (except for RGK750). Compliant with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL 508, CSA C22.2 n° 14.

EXP1011	Opto-isolated RS232 interface
EXP1012	Opto-isolated RS485 interface
EXP1013	Ethernet interface with web server function
EXP1015	GPRS/GSM modem

General characteristics

- Power supply: 7...36VDC
- VAC inputs: mains L1-L2-L3-N (not RGK900SA)
- VAC inputs: generator L1-L2-L3-N
- Voltage measurement rated value: 600VAC (UL/CSA)
- Voltage measurement range: 30...720VAC
- Frequency measurement range: 45...65Hz or 360...440Hz
- Programmable VT ratio
- Current measurement input (3 PH+N): 0.05...6A or 0.05...1.2A
- Fourth CT for neutral measurement or earth/ground leakage detection
- Graphic LCD, 128x112 pixels with backlight
- 13 digital inputs
- 3 relay outputs rated 8A 250VAC
- 6 static outputs rated 2A, protected
- 1 static output 50mA
- Engine running detection: "D+" generator voltage and frequency
- 1 engine speed input: "W" or "Magnetic Pick-up"
- 3 analog ohmic inputs for oil pressure, engine temperature and fuel level control
- 1 programmable analog input
- 2 analog outputs for engine speed control (governor) / voltage regulator (AVR)
- Alarm-event-parameter text in 5 languages
- Alarm text customisable (16 alarms)
- Event log
- Modbus-RTU, Modbus-ASCII and Modbus-TCP communication protocols
- PLC logic for inputs, outputs and internal status
- Compatible with Synergy, Synergy_{net} and Xpress software
- Degree of protection: IEC IP65 on front; suitable for use with UL/CSA Type 4X outdoor enclosure installation
- Built-in buzzer
- Multi-level passwords
- Sleep function (power saving mode)
- Synchronising and load sharing.

MAIN FUNCTIONS

- Menus for quick selection of rated parameter settings
- Mains / Generator controls: phase sequence, phase loss, max and min voltage and frequency, voltage asymmetry
- Programmable maintenance at various intervals
- Current leakage control towards earth/ground
- Mains-generator synchronising (ATS closed transition)
- Base-load or peak shaving management
- Paralleling supervision of generators (island mode)
- Generating set start scheduling.

Certifications and compliance

Certifications obtained: UL Listed for USA and Canada (cULus - File E93601), as Auxiliary Devices, Generator controllers; EAC.
Compliant with standards for RGK900: IEC/BS 61010-1, IEC/BS 61010-2-030, IEC/BS 61000-6-2, IEC/BS 61000-6-3, UL508, CSA C22.2 n. 14

Synergy, Synergy_{net}, and Xpress software
See Section 30.

MAINS-GENERATOR PARALLELING	ISLAND MODE	ATS AND PARALLELING OF MAINS WITH MULTIPLE GENSETS
<p>RGK900 is designed for mains-generator synchronising applications, such as:</p> <ol style="list-style-type: none"> Single generator in maintained parallel with the mains in "base-load" mode (generator power supplied at a steady rate) Single generator in maintained parallel with the mains, in peak-shaving mode (import-export - mains power is limited to constant value and load peaks during heavy demand for power are supplied by generator) Single generator in AMF with temporary parallel with the mains (for emergency, with AMF in closed transition). 	<p>RGK900SA is designed for applications with load sharing on an isolated bus, without mains:</p> <ol style="list-style-type: none"> Parallel among generators working together in island mode on power bus with load shared among them Generators connected together to maintain the power reserve (total power available minus load power) within a preset range, switching on and off generators according to a priority level. 	<p>Combination of RGK900SA and RGK900MC units is designed for load govern controls with multiple generators in parallel on power bus and mains. In these circumstances, the RGK900MC unit controls, in base-load or peak-shaving mode, the mains and power bus composed by multiple generators, each controlled by an RGK900SA.</p>

RGK900RD	Remote display panel for RGK900 controllers	1	0.980
RGKRA	For RGK7..., RGK8..., RGK9..., controllers graphic LCD, touch screen 128x112 pixels	1	0.360

Order code	Description	Qty per pkg	Wt [kg]
		n°	[kg]
RGKRR	Alarms-status relay unit 12/24VDC, 12 relay outputs, pulse input, CANbus communication port	1	0.420

Remote display panel RGK...RD characteristics

For remote controller supervision and viewing, the user operates the remote display panel as if directly in front of the generating set.

- 12/24VDC battery power supply
- Graphic LCD with backlight:
 - 128x80 pixels for RGK800...
 - 128x112 pixels for RGK900...
- 13 function and setting keys
- 10 Indication LEDs for operating modes and status
- Built-in buzzer
- 4 digital inputs
- 2 digital outputs
- Front degree of protection: IEC IP65; UL/CSA Type 4X outdoor enclosure installation
- Serial interface ports: opto-isolated RS485 (RGK...RD).

Remote display panel RGKRA characteristics

Alarm conditions can be viewed on the remote display and alarm silencing can also be activated.

- Dual 100-240VAC / 12-24VDC power supply
- Touch screen 120x112 pixel backlight graphic LCD
- Built-in buzzer
- Static (SSR) output for global alarm signalling
- Opto-isolated RS485 interface port
- Front degree of protection: IEC IP54; UL Type 1.

Alarm-status relay unit RGKRR characteristics

External relay expansion unit for alarm and status remoting.

Fixing on 35mm DIN rail (IEC/EN/BS 60715).

Communication with RGK... controllers by CANbus or pulse inputs:

- 12 relay outputs of which 5 with changeover (SPDT) contact rated 5A 250VAC / B300 and 7 N/O (SPST) contact rated 2.5A 250VAC / C300
- 12/24VDC power supply
- Up to 2 RGKRR units can be connected in cascade for a total of 24 relays
- Maximum installation distance from the RGK6... and RGK700... RGK900 controllers:
 - CANbus: 30m/33yd (high speed)
 - Inputs/Outputs: 1,000m/1,094yd (low speed).

Certifications and compliance

Certifications obtained: UL Listed, for USA and Canada (cULus – File E93601), as Auxiliary Devices, Generator controllers remote and relay units; EAC.

Comply with standards: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/BS 61000-6-3, UL508, CSA C22.2 n° 14.

For wiring schemes and technical characteristics, refer to technical instructions in Downloads area of local or global website www.LovatoElectric.com or consult Technical support; see contact details on inside front cover.

28 Engine and generator controllers

INDEX

Communication devices for RGK4... - RGK6... - RGK7... - RGK8... - RGK9...

CX01

CX02

CX03

Order code	Description	Qty	Wt
		per pkg	
		n°	[kg]
CX01	USB/optical device with PC↔controller connecting cable for programming, data download, diagnostics and firmware upgrade	1	0.090
CX02	Wi-Fi dongle for PC ↔ controller programming, data download, diagnostics, project upload/download and controller cloning	1	0.090
CX03	GSM/GPRS penta-band antenna (850/900/1800/1900/2100MHz)	1	0.090

General characteristics

Communication and connection devices for generator set controllers RGK4... - RGK6... - RGK7... - RGK8... - RGK9... for personal computers, smartphones, tablets, modems, bus drives.

CX01

The USB/optical device, complete with cable, allows to connect RGK4... - RGK6... - RGK7... - RGK8... - RGK9... controllers to a PC without having to disconnect the power supply from the electric panel and to carry out parameter programming, data and event download, diagnostics and firmware upgrade. The PC identifies the connection as a standard USB.

CX02

By Wi-Fi connection, RGK4... - RGK6... - RGK7... - RGK8... - RGK9... controllers can be viewed by PC, smartphone and tablet with no need for cabling and to carry out parameter programming, data and event download, diagnostics project upload/download and controller cloning.

CX03

Antenna compatible with the major part of worldwide mobile networks thanks to the available frequencies at 850/900/1800/1900/2100MHz. IP67 IEC protection degree. Fixing by Ø10mm/0.39" drilling. Cable length 2.5m/7.23yd.

For wiring schemes and technical characteristics, refer to technical instructions in Downloads area of local or global website www.LovatoElectric.com or consult Technical support; see contact details on inside front cover.

Gateway.			
EXCM4G01	4G Gateway with RS485 and Ethernet port, Modbus RTU/TCP protocol	1	0.300
EXCGLA01	Gateway data logger for data collecting via Modbus from the device in the field. Publishing of the data to supervision software, also in Cloud	1	0.600
EXCGLAX1	2G/4G modem communication module for EXCGLA01	1	0.160
GSM Modem (modular - 4U). IP69K exterior aerial with 2.5m cable. RJ45-USB programming cable (included).			
EXCGSM01	100...240VAC, 1 digital input, 1 analogic input (0...10V, 0...20mA, NTC), 1 relay output, receiving and sending SMS messages for remote controls and alarm signals	1	0.340
For RGK600..., RGK601... and RGK610 controllers.			
EXP8001	IP65 144mm/5.67" housing gasket		
For RGK4...SA.			
EXP8005	IP65 110mm/4.33" housing gasket		

General characteristics

For general characteristics of converters and gateway see section 31.

28 Engine and generator controllers

Software

INDEX

Synergy Supervision and Energy management software

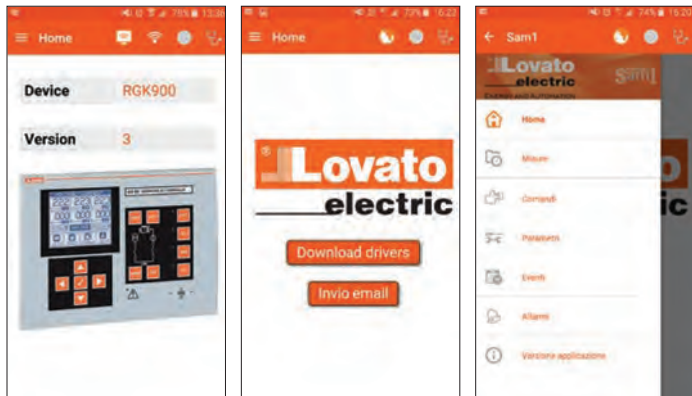

Synergy

Xpress Parameter configuration and remote control software

Sam1 APP

NFC APP

Supervision and Energy management software

The **Synergy** and **Synergy_{cloud}** softwares provides for the remote control and supervision of the RGK... controllers. See details given in Section 30.

Its structure and applications are based on MS SQL relational database management system. Consulting is made through popular programs for Internet browsing available across different platforms and operating systems.

It is a highly versatile system, simultaneously accessible to a large number of users/workstations via intranets, VPN or Internet.

Parameter configuration and remote control software

The **Xpress** at the beginning and just say "Express is a parameter configuration and remote monitoring software shared by the entire latest generation of RGK gen-set controllers with communication port. It can be installed in the Windows® environment and connect individually (one node at a time) to the RGK gen-set controller connected to the network.

- Supports connection via CX01 (USB) or CX02 (Wi-Fi) dongle, USB, RS232, RS485, Ethernet and modem
 - Product configuration:
 - Parameter setting
 - Project file management
 - Product firmware upgrade (via CX01)
 - Remote control:
 - Monitoring of main measurements
 - Sending commands to products
 - Reading alarms and events memory.
- See details given in Section 30.

APP for smartphone and tablets

Sam1 application allows the user to program the controller, view alarm conditions, send commands, read measurements, download statistical data and events and send retrieved data by email. The connection is made by Wi-Fi with a smartphone or tablet using CX02 dongle. It is iOS and Android compatible. For more details, see Section 30 or consult Technical support; see contact details on inside front cover.

NFC App for RGK4...SA, with integrated NFC technology, allows remote parameter configuration.

The parameters can be saved in a file for archive purposes. It is Android and iOS compatible. For more details, see Section 30 or consult Technical support; see contact details on inside front cover.

EXP10...

FFL800DP

General characteristics

FFL...DP controllers integrate all the functions required by the EN/BS 12845 standard regarding the diesel engine fire pump management and help the user to monitor and maintain the performance of the entire firefighting system. The backlit graphic 128x80 pixel LDC display ensures high visibility in low light conditions. Inputs and outputs are programmable and the number can be increased with the I/O expansion modules, moreover they can be managed by the integrated PLC logic. This all means a complete solution with less wiring, less components and less programming to set up the firefighting system. Within the main page, it is possible to see all the information about the engine fire pump. Functions for the maintenance and the test of the firefighting system are available directly on the display. Furthermore there is the possibility to receive remotely this information by the digital outputs or the Modbus communication through the built-in RS485. The controller monitors constantly the temperature inside the pump room using the integrated or an external temperature sensor and the status of the auxiliary voltage with the single-phase AC voltage measurement input.

Features

- Engine control, monitoring and protection
- Backlit graphic LCD display with multilingual text and synoptic
- Texts in 5 languages (ENG, ITA, FRA, SPA, DEU)
- Customizable texts via **Xpress** software (see section 30)
- Dedicated page for LED test and commissioning
- Dedicated page for jockey pump monitoring
- Dual DC power from two separate batteries 12/24VDC
- Input of single-phase AC voltage measurement for charger power supply monitoring
- 9 LED indicators: mode selection, batteries selection, battery status, pump activated, warning indication
- 2 password levels
- Built-in RS485 port
- Built-in real time clock
- Built-in NTC temperature sensor
- Storage of last 128 events
- Automatic starting sequence according to EN/BS 12845
- Communication interface by front optical port with CX01 and CX02 device using USB or Wi-Fi connections
- NFC contactless interface for programming via **NFC** App freely downloadable from Google Play Store and App Store
- Isolated RS485 serial port for supervision (compatibility with **Synergy** and **Synergy.com** software)
- Expandability with EXP... modules tropicalized PCB (only FFL800DP)
- Compatibility with FFLRA... remote alarm panels.

Operational characteristics

- Power supply voltage: 12 or 24VDC
- Voltage measurement inputs:
 - Rated voltage Ue: 100...240VAC
 - Measurement range: 50...264VAC
 - Frequency range: 45...65Hz
- Input to monitor the starter pinion
- NTC probe input:
 - measuring range: -40...+85°C
- Engine running input (D+)
- Programmable digital inputs: 10 - Negative
- Programmable relay outputs: 10
- Programmable static outputs: 1
- 3 programmable resistive sensors
- Compatible software: **Sam1**, **Xpress**, **NFC**, **Synergy** and **Synergy.com** software (see section 30)
- Degree of protection: IP65 on front. IP20 at rear
- PCB tropicalized
- Operating temperature: -25...+70°C.

Synergy, **Xpress** and **Sam1** software, **NFC** App
See Section 30.

EXP... series expansion modules
See Section 31, page 2.

Compliance

Compliant with standards: UNI EN/BS 12845, IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

Electric fire pump controllers

FFL...EP

Order codes	Description	Qty per pkg	Wt
		n°	[kg]
FFL700EP	Controller for electric fire pumps in accordance with EN/BS 12845, power supply 24VAC, built-in RS485	1	0.980
FFL800EP	Controller for electric fire pumps in accordance with EN/BS 12845, power supply 24VAC or 110...240VAC, built-in RS485, expandable with EXP... expansion modules	1	0.980

The app can be downloaded from Google Play Store and App Store.

Order code	Description
EXPANSION MODULES. Inputs and outputs.	
EXP1008T	2 opto-isolated digital inputs and 2 relay outputs rated 5A 250VA, tropicalized PCB
EXP1042T	6 digital inputs, tropicalized PCB
EXP1043T	4 digital inputs and 2 static outputs, tropicalized PCB
EXP1004T	2 opto-isolated analog inputs 0/4-20mA or PT100 or 0-10V or 0...±5V, tropicalized PCB
Communication ports.	
EXP1012T	Opto-isolated RS485 interface, tropicalized PCB
EXP1013T	Ethernet interface, tropicalized PCB
EXP1015	GPRS/GSM modem

EXP10...

FFL800EP

Max 2

Single phase pump applications:

- Skyscrapers
- Residences
- Civil Buildings.

3-phase pump applications:

- Industry
- Shopping malls
- Hospitals
- Warehouses.
- Etc.

General characteristics

FFL...EP controllers integrate all the functions required by the EN/BS 12845 standard regarding the electric fire pump management and help the user to monitor and maintain the performance of the entire firefighting system.

The backlit graphic 128x80 pixel LDC display ensures high visibility in low light conditions.

Inputs and outputs are programmable and the number can be increased with the I/O expansion modules, moreover they can be managed by the integrated PLC logic.

This all means a complete solution with less wiring, less components and less programming to set up the firefighting system. Within the main page, it is possible to see all the information about fire pump and the electrical engine.

Functions for the maintenance and the test of the firefighting system are available directly on the display. Furthermore there is the possibility to receive remotely this information by the digital outputs or the Modbus communication through the built-in RS485.

The controller monitors constantly the temperature inside the pump room using the integrated or an external temperature sensor.

Features

- Possibility of single phase or 3-phase connection of the electric fire pump controller.
- Electric motor control, monitoring and protection
- Backlit graphic LCD display with multilingual text and synoptic
- Texts in 5 languages (ENG, ITA, FRA, SPA, DEU)
- Customizable texts via Xpress software (see section 30)
- Dedicated page for LED test and commissioning
- Dedicated page for jockey pump monitoring
- 8 LED indicators: electric pump running, main status, electric motor status, starting request, global alarm, failure to start, stop enabled, automatic start excluded
- 2 password levels
- Built-in RS485 port
- Built-in real time clock
- Built-in NTC temperature sensor
- Storage of last 128 events
- Communication interface by front optical port with CX01 and CX02 device using USB or Wi-Fi connections
- NFC contactless interface for programming via NFC App freely downloadable from Google Play Store and App Store
- Isolated RS485 serial port for supervision (compatibility with Synergy and Synergy software)
- Expandability with EXP... modules tropicalized PCB (only FFL800EP)
- Compatibility with FFLRA... remote alarm panels.

Operational characteristics

- Power supply voltage: 24VAC (FFL700EP), 24VAC and 110...240VAC (FFL800EP)
- Voltage measurement inputs:
 - 1 phase or 3 phases
 - Rated voltage Ue: 100...600VAC
 - Measurement range: 80...720VAC
 - Frequency range: 45...65Hz
- 1 phase or 3 phases current measurements inputs: 1/5A
- NTC probe input:
 - measuring range: -40...+85°C
- Programmable digital inputs: 8 - Negative
- Programmable relay outputs: 7 (FFL700EP), 9 (FFL800EP)
- Programmable static outputs: 1
- Compatible software: Sam1, Xpress, NFC, Synergy and Synergy software (see section 30)
- Degree of protection: IP65 on front. IP20 at rear
- Tropicalized PCB
- Operating temperature: -25...+70°C.

EXP10...

Order code	Description
EXPANSION MODULES FOR FFLRA400 (2 AVAILABLE SLOTS) Inputs and outputs.	
EXP1000	4 opto-isolated digital inputs
EXP1001	4 opto-isolated static outputs
EXP1002	2 digital inputs and 2 static outputs, opto-isolated
EXP1003	2 relay outputs 5A 250VAC
EXP1008	2 opto-isolated digital inputs and 2 5A relay outputs 250VAC
EXP1042T	6 digital inputs, tropicalized PCB
EXP1043T	4 digital inputs and 2 static outputs, tropicalized PCB
Communication ports.	
EXP1010	Opto-isolated USB interface
EXP1011	Opto-isolated RS232 interface
EXP1012	Opto-isolated RS485 interface
EXP1013	Opto-isolated Ethernet interface
EXP1015	GPRS/GSM modem

General characteristics FFLRA200

FFLRA200 is a simple remote annunciator: the buzzer will sound in case of alarm and the LEDs will indicate the presence of the relative alarms. The labels for LEDs descriptions are included in the package. A template can be downloaded from www.LovatoElectric.com, products section for alarms labels model. The communication between the remote annunciator and the FFL controller is performed by means of a pulsed signal and up to 2 FFL controllers can be connected. Using the front buttons, it is possible to silence the alarm occurred and test the LEDs. The alarms notified on the remote panel are configurable directly on FFL controllers. No setup on the remote panel is required. 2 LEDs display the status of the communication and the remote panel power supply.

Operational characteristics

- Power supply voltage: 100...240VAC
- AC voltage range: 90...264VAC
- Frequency range: 45...66Hz
- Arrangement for internal battery support is built-in (battery is not included)
- Compatible software: **NFC** App freely downloadable from Google Play Store and App Store
- Degree of protection: IP40
- Operating temperature: -25...+50°C.

Compliance

Compliant with standards: UNI EN/BS 12845, IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

General characteristics FFLRA400

FFLRA400 is an advanced remote annunciator with backlit graphic LCD display. It is expandable with 2 EXP modules to increase its features in terms of communication, digital inputs and digital outputs. The communication between the remote panel and the FFL controller is performed by means of a pulsed signal or through RS485 if the EXP1012 expansion module is added. Up to 3 FFL controllers can be connected to one FFLRA400 with RS485 communication. On the front of the remote alarm panel, LEDs and a buzzer are present to display and notify the alarms and to see them from a distance; at the same time a complete description of the alarms is available on the graphic LCD display. The texts are available in 10 different languages: English, Italian, French, Spanish, German, Portuguese, Russian, Polish, Czech and Turkish. By fitting the EXP1015 expansion module, the remote annunciator is automatically equipped and configured with a GSM/GPRS modem. Once a data-enabled SIM card is inserted, SMS with alarms or events and email messages can be transmitted by the remote annunciator.

Operational characteristics

- Power supply voltage: 100...240VAC
- AC voltage range: 90...264VAC
- Frequency range: 47...63Hz
- Arrangement for internal battery support (battery not included) is built-in
- 5 digital inputs
- 2 digital outputs
- Expandability with EXP... modules (2 available slots)
- Optical port on front for CX01 and CX02 device
- Compatible software: **S_{am1}**, **X_{press}**, **NFC**, **S_{synergy}** and **S_{synergy}** software (see section 30)
- Degree of protection: IP40
- Operating temperature: -25...+50°C.

S_{synergy}, **X_{press}** and **S_{am1}** software, **NFC** App
See Section 30.

EXP... series expansion modules
See Section 31, page 2.

Compliance

Compliant with standards: UNI EN/BS 12845, IEC/EN/BS 61010-1, IEC/EN/BS 61010-2-030, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3.

29 Fire pump controllers

Communication devices, software and accessories

INDEX

Communication devices

CX01

CX02

CX03

Order code	Description	Qty	Wt
		per pkg	
		n°	[kg]
CX01	USB connection device PC↔FFL... with optical connector for programming, data download, diagnostics and firmware upgrade	1	0.090
CX02	Wi-Fi connection dongle PC↔FFL... for data download, diagnostics and firmware upgrade, project upload/download and controller cloning	1	0.090
CX03	GSM/GPRS penta-band antenna (850/900/1800/1900/2100MHz)	1	0.090

General characteristics

Communication and connection devices for fire pump controllers FFL700... - FFL800... - FFLRA400 for personal computers, smartphones, tablets, modems, bus drives.

CX01

The USB/optical device, complete with cable, allows to connect fire pump controllers to a PC without having to disconnect the power supply from the electric panel and to carry out:

- Parameter programming
- Settings copy to external units
- Data and event download
- Carry out the diagnostics
- Firmware upgrade.

The PC identifies the connection as a standard USB.

CX02

By Wi-Fi connection, FFL700..., FFL800... controllers and FFLRA400 remote alarm panel can be viewed by PC, smartphone and tablet with no need for cabling and to carry out:

- Parameter programming
- Data and event download
- Diagnostics project upload/download and controller cloning.

CX03

Antenna compatible with the majority of worldwide mobile networks thanks to the available frequencies at 850/900/1800/1900/2100MHz.

- IP67 IEC protection degree.
- Fixing by Ø10mm/0.39" drilling.
- Cable length 2.5m/2.73yd.

For dimensions, wiring schemes and technical characteristics, refer to technical instructions in downloads of local or global website or consult Technical support; see contact details on inside front cover.

Technical characteristics

TYPE	FFL...DP	FFL...EP
SUPPLY		
Rated voltage	12...24VDC	24VAC (FFL700EP); 24VAC/110...240VAC (FFL800EP)
MAIN VOLTAGE INPUT		
Rated voltage Us	100...250VAC	100...600VAC
Measuring range	90...264VAC	80...720VAC
Frequency range	45...66Hz	
ENGINE RUNNING INPUT (D+) FOR PRE-EXCITED ALTERNATOR		
Voltage range	0...36VDC	—
Maximum input current	0.5mA	—
Maximum voltage at D+ terminal	12 or 24VDC (battery voltage)	—
Excitation current	210mA 12VDC / 130mA 24VDC	—
ENGINE SPEED INPUT: "PICK-UP/W" INPUT		
Input type	AC	—
Minimum reading frequency voltage: high sensitivity	≥2.8Vpp (1Vrms) at 40Hz ≥10Vpp (3.5Vrms) at 2000Hz	—
Minimum reading frequency voltage: low sensitivity	≥3.7Vpp (1.3Vrms) at 40Hz ≥7Vpp (2.5Vrms) at 2000Hz	—
Measurement input impedance	> 100kΩ	—
Maximum voltage	84Vpp (30Vrms)	—
PINION INPUT		
Voltage range	0...33VDC	—
Current input	≤8mA	—
Threshold	Adjustable	—
Input delay	Adjustable	—
NTC PROBE INPUT		
Type of sensor	NTC (LOVATO code NTC01)	
Measuring range	-40...+85°C	
Maximum connection length	3m	
DIGITAL INPUTS		
Input type	Negative	
Input current	≤6mA	
Low input signal	≤1.25V (typical 1.9V)	
High input signal	≥4.9V (typical 3.8V)	
Input signal delay	≥50ms	
OUTPUTS		
Outputs 1-2	2 x 1NO - 12A 30VAC/DC	—
Battery voltage output	2NO + 1 common terminal	—
Output 3	8A 30VDC (DC1); 30VDC 1A pilot duty	—
Output 4	4A 30VDC (DC1)	—
Outputs 5-10	6 x 1C/O - 8A 250VAC (AC1); 1.5A 250VAC (AC15)	—
Alarm outputs	—	4 x C/O - 8A 250VAC (FFL700EP) 6 x C/O - 8A 250VAC (FFL800EP)
Motor command output	—	3NO - 16A 250VAC
STATIC OUTPUT		
Output type	NO	
Rated voltage	10...30VDC	
Maximum current	50mA	
RS485 SERIAL INTERFACE		
Interface type	Isolated	
Baud-rate	Programmable 1200...115200bps	
Insulation voltage (RS485 – V Batt.)	1kV=	
AMBIENT CONDITIONS		
Operating temperature	-25...+70°C	
Storage temperature	-30...+80°C	
Relative humidity	<80% (IEC/EN/BS 60068-2-78)	
CONNECTIONS		
Terminals type	Removable screw-type	
Wire cross-section (min. and max.)	0.2...2.5mm ² (24...12AWG)	
Tightening torque	0.56Nm (5lb.in)	
HOUSING		
Installation	Flush-mount	
Material	Polycarbonate	
Degree of protection	IP65 Frontal; IP20 on terminals	

- Multiclient web based monitoring software, Cloud and on premises solutions.
- Software to monitor and configure LOVATO Electric devices.
- APP for monitoring and configuration via Wi-Fi or NFC.

Software

Synergy : supervision and energy management software	30 - 2
Xpress : configuration and remote control software	30 - 5

APP

Page 30-2

SUPERVISION AND ENERGY MANAGEMENT SOFTWARE

- Windows services and web applications to collect and publish device data on the most popular browsers
- Data management in MS SQL database
- Multi-user access either in local area networks or internet
- Cloud service available on LOVATO Electric portal.

Xpress

Page 30-5

CONFIGURATION AND REMOTE CONTROL SOFTWARE - FREE OF CHARGE

- Parameter setting
- Point-by-point monitoring
- Memory module management
- Free of charge.

Page 30-6

APP FOR SMARTPHONES AND TABLETS

- Users can program the device, view alarm conditions, send commands, read measurements, download statistical data and events and send retrieved data by email
- iOS and Android compatible
- Free of charge.

Page 30-7

APP FOR PROGRAMMING VIA NFC TECHNOLOGY

- Parameter setting with NFC technology
- Access without the need to power up the LOVATO Electric device
- iOS and Android compatible
- Free of charge.

Synergy

Synergy is a supervision and energy management web-based software that provides the monitoring and control of the electrical installation, from every computer or mobile device through the most popular web browsers in a simple and efficient way. It is valid software to sustain the activities indicated by the standard EN ISO 50001 "Energy management systems. Requirements with guidance for use". In addition to electrical quantities, it allows to check all environmental and process information (operating status, alarms, etc.), acquired from LOVATO Electric products, equipped with communication port, and thereby to carry out commands and parameterising. It is possible to create, without limitations, browsable pages with widgets for charts, data tables, measure indicators and alarm conditions. Data is available to be downloaded to user's computers and possibly to be sent to either a list of e-mail recipients or to FTP servers. Users can configure the exported files according to their needs. Synergy's flexibility lets third party devices which are able to exchange data through Modbus protocol be included in the monitoring system and third party softwares gather data for further elaborations by connecting to web API service. Third party softwares are able to access **Synergy** database by means of web API call. Third party Modbus devices are able to access to **Synergy** by means of customizable interface drivers.

FUNCTIONALITY

- Communication with all LOVATO Electric measurement and control devices, via serial ports, Ethernet or modem
- Integration of third party devices with Modbus
- Reading of instantaneous values
- Definition of custom pages with charts, data tables, measure indicators and alarm conditions
- Data tables which can be exported to customisable files, for example to generate reports with user's logo and post-processing elaborations
- Data access through web API service
- Energy consumption, minimum, maximum and average values of the instantaneous measures divided per time slots
- Alarm management with e-mail notification
- Parameter changing of devices in the field
- User's access level management.

ALARMS

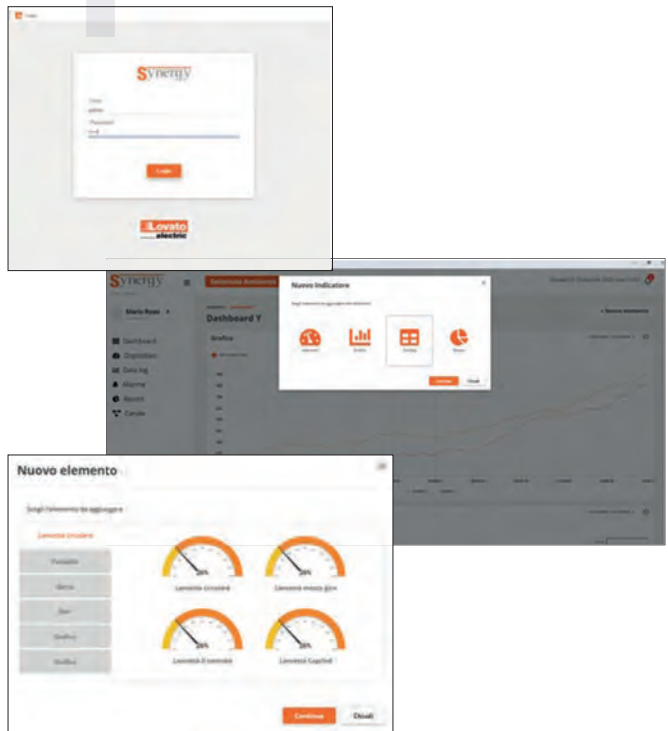

Each value recorded in the archives (datalogs) can be associated with one or more alarms, defining for each one: an upper and lower limit, a reference calendar (for enabling/disabling), any representation in trend graphs and the option of automatically sending an e-mail. If the limits are exceeded, **Synergy** records the anomaly and reports it in the software header. A specific menu allows the display of detailed information, silencing of alarms and consultation of the datalog.

SIMPLE, GUIDED, INTUITIVE CONFIGURATION

Programming **Synergy** does not require any particular computer knowledge since specific configuring instruments have been developed to guide through the configuration of product networks, graphic pages, datalog reports and charts, in a simple and intuitive way.

SERVER-MULTICLIENT SYSTEM

Synergy structure and applications are based on a MS SQL relational database management system. **Synergy** is consulted through the most popular browsers, so it's available on various platforms and operating systems. These characteristics make **Synergy** a highly versatile system, simultaneously accessible to a large number of users/workstations via intranets, VPN or Internet.

FURTHER INFORMATION

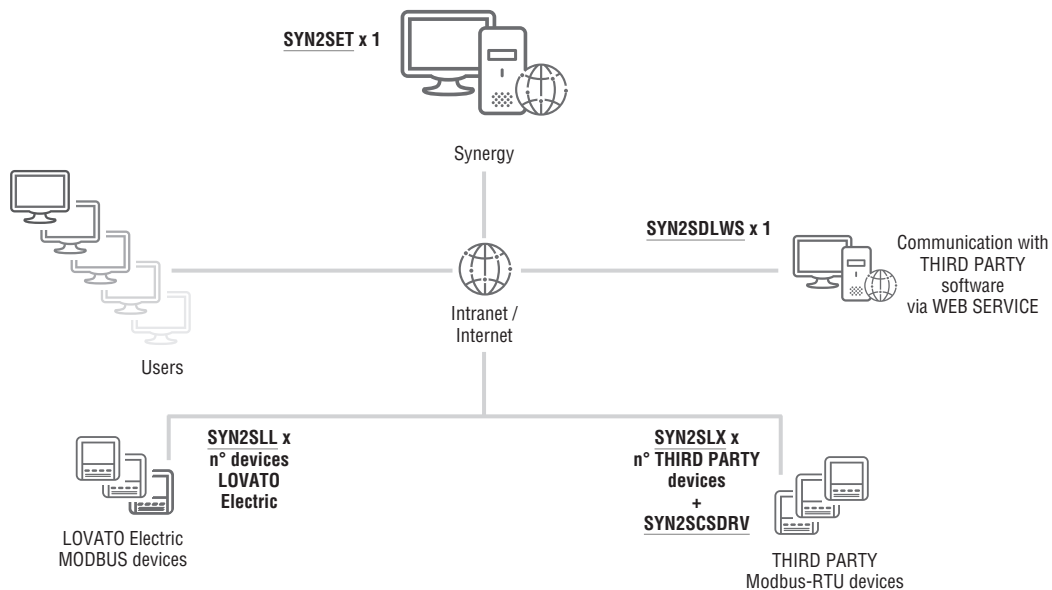

For further information on the software, consult the site:
<http://em.LovatoElectric.com>

Synergy Software

Order code	Description	Details	Provisioning
Software.			
SYN2SET	Supervision and energy management software	Installation on PC with server function and Windows operating system. Customization, measurement, monitoring and control via web by sending e-mail notifications or FTP file. Monitoring of one LOVATO Electric device included	Permanent licence
Licence.			
SYN2SLL	Synergy licence for LOVATO Electric device	Monitoring function for each LOVATO Electric device equipped by Modbus communication port	Permanent licence for single device
SYN2SLX	Synergy licence for THIRD PARTY devices	Monitoring function for each THIRD PARTY device equipped by Modbus communication port	Permanent licence for single device
SYN2SDLWS	Licence to access to Synergy database	Access function by WEB API to Synergy MS SQL database by THIRD PARTY software	Permanent licence
SYN2SLM	Licence to access to Synergy updates	Access to Synergy updates (e.g. compliant with new operating systems and new Synergy features for each LOVATO Electric or THIRD PARTY devices)	Annual subscription licence for single device
SYN2UPG	Update to Synergy2	Update from Synergy to Synergy2	Permanent licence for single device
Technical support and training.			
SYN2SCS00	Synergy technical support	Synergy technical support by phone or team viewer	Hourly rate
SYN2SCS11	Synergy on site commissioning	On site Synergy technical support: - check on field devices configuration - SYN2SET setup on customer PC - check of exchanging data between Synergy and on field devices - Synergy configuration based on customer needs - travel costs and labour hours to setup Synergy and on field devices	On site cost
SYN2SCSDRV	Interface driver development for THIRD PARTY devices	Synergy support to develop the interface driver between Synergy and THIRD PARTY devices for a maximum of 5 measurements and feasibility study by LOVATO Electric Technical support (Tel. + 39 035 4282422; E-mail: service@LovatoElectric.com)	Cost for each driver
SYN2TRAINING	Synergy training sessions (basic and advanced courses)	Introduction to energy management topics. Measurement devices: range and selection criteria with case studies. Synergy software key features for monitoring and supervision: architecture and access, channels, tools, graphs, data logs, pages and access criteria. Practical exercises. For further information visit EVENTS section on www.LovatoElectric.com	Confirmed

Example of a **Synergy** on premises solution:

Synergy cloud

Synergy Cloud is a subscription service that allows the supervision and control of systems via LOVATO Electric Cloud server accessible from any computer or mobile device through the most common web browsers. The functions of the **Synergy Cloud** software are the same as those made available with the local installation of the **Synergy** software but without the need to install any software and without the need of a dedicated server at company premises. The costs of purchase, configuration and maintenance of the hardware and software necessary for energy monitoring are saved.

The devices in the field send the monitored data to the Gateway Data Logger (EXCGLA01) device which collects and represents them at the integrated web server.

Synergy Cloud lets the user remotely view the instantaneous monitored data, receive reports about alarms via email and execute commands (SYN2CLRW licence). With the appropriate licence for supervision and energy management (SYN2CCL licence), **Synergy Cloud** periodically receives via Internet (either wired or mobile network) the data collected by the Gateway Data Logger in order to store historical data, process and represent them graphically as well.

SECURITY

The security of the data is guaranteed by HTTPS encryption with certificate between server and client PC, by daily backup of the data collected and by state-of-the-art firewall for server access.

The **Synergy Cloud** solution:

FEATURES

- Extremely intuitive interface: no particular technical background required
- Data access from all over the world thanks to the Internet and common browsers
- Specific design for client requirements (selection of measurement scenarios)
- Low data traffic thanks to the extreme economy of the protocol used (Modbus)
- Instantaneous data acquisition from various devices that can even be located in different sites
- Simple and clear reporting of all energy data
- No investment in software database or server
- Extremely secure data thanks to HTTPS and daily backup
- Automatic updates included
- Limited subscription cost.

Order code	Description	Details	Provisioning
Licence.			
SYN2CLRW	Licence for basic remote view	Remote view of instantaneous data, creation of alarms and relevant mail sending, execution of commands	Annual subscription licence (365 days) for each device

For further information visit EVENTS section on www.LovatoElectric.com	Confirmed

Note: every monitored device has a defined set of measures that are stored and available for a customizable period. Further information available on: <http://em.LovatoElectric.com>.

Xpress

Xpress is parameter configuration and remote monitoring software shared by the entire latest generation of LOVATO Electric products with communication port. It can be installed in the Windows environment and connected individually (one node at a time) to the LOVATO Electric products.

- Supports connection via CX01 (USB) or CX02 (Wi-Fi) device, USB, RS232, RS485, Ethernet or modem.
- Product configuration:
 - Parameter setting
 - Project file management.
- Product firmware update (via CX01)
- Remote control:
 - Monitoring of main measurements
 - Measurements graphic trends
 - Sending commands to products.
- Reading alarms and events memory
- Memory modules management EXP1030, EXM1030, EXP1031.

Consult the www.LovatoElectric.com site for the list of products supported by Xpress.

Xpress can be ordered using code SYN1XP00 or downloaded for free from: <http://www.LovatoElectric.com/xpressdownload.aspx>

MONITORING

The measurements of the product connected are divided into context menus to make searching for the right value easy and shown on appropriate graphical gauges. It is also possible to show measurements trends.

COMMANDS

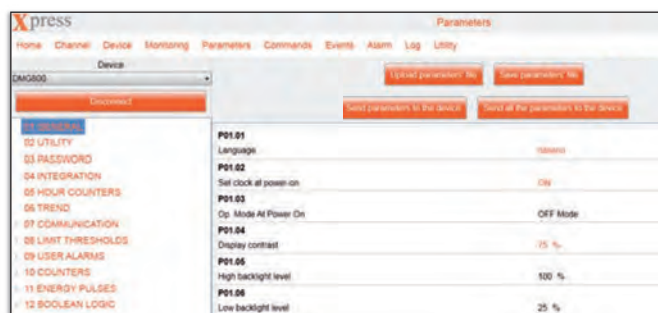

A command can be sent to the product connected to energise outputs or reset energy consumption or operating time counters for maintenance.

PARAMETERS

The options in the setup menu and parameters on the product connected are replicated in the software to allow the user to operate using the terms that they already know. Parameters that differ from the factory values are highlighted in a different colour.

The parameters can be saved to a file and recalled in subsequent installations, or defined even in the absence of a connection to the product, to permit preparation of a project to send later.

EVENTS

If the product connected features an event memory, the complete list can be downloaded for saving as an external file, in text or spreadsheet format.

DATA-LOGGER MEMORY MANAGEMENT

Xpress can be used to configure and manage the EXP1030, EXP1031 or EXM1030 memory modules, in order to create tables indicating the history of the measurements selected by the user.

In particular, the software can be used to set:

- The measurements to be sampled
- The sampling time
- The event that triggers and ends sampling
- Memory capacity management (FIFO or stop when memory is full).

The software can show the waveforms stored in EXP1031 Energy Quality module as well.

The data acquired can be displayed in graphs and exported to text files or spreadsheets.

ALARMS

The alarms active on the product connected can be displayed in the software, for a single screen with the complete list of the faults detected.

APP Sām1

General characteristics

Configuration and maintenance operations, often done in intolerable or awkward environments due to weather or noisy conditions or narrow places, are now easier to do for all LOVATO Electric devices with communication interface on the front, compatible with CX02 device. Tablets and smartphones with Android or iOS operating systems can connect to them using the new application called **Sām1**. Therefore, it is no longer necessary to connect and switch on a PC using cables to change configurations, setup parameters etc.

With this APP, a file previously saved can be uploaded; commands can be sent; measured quantities can be read from LOVATO Electric devices. The events can be viewed and saved in a text file and later shared.

The **Sām1** App LOVATO can be downloaded from Google Play Store or App store.

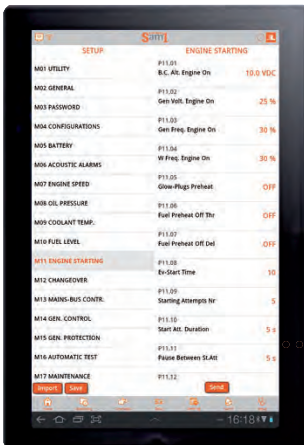

Updating driver

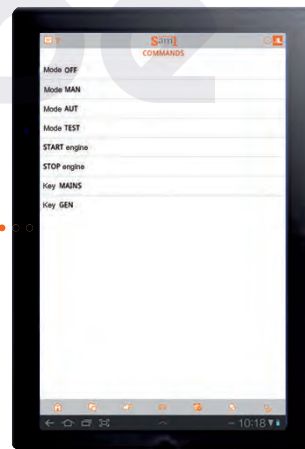

Sending e-mail (events, parameters)

PARAMETERS SETTING

SENDING COMMANDS

EVENT LOG VIEWING

MEASUREMENTS VIEWING

ALARMS VIEWING

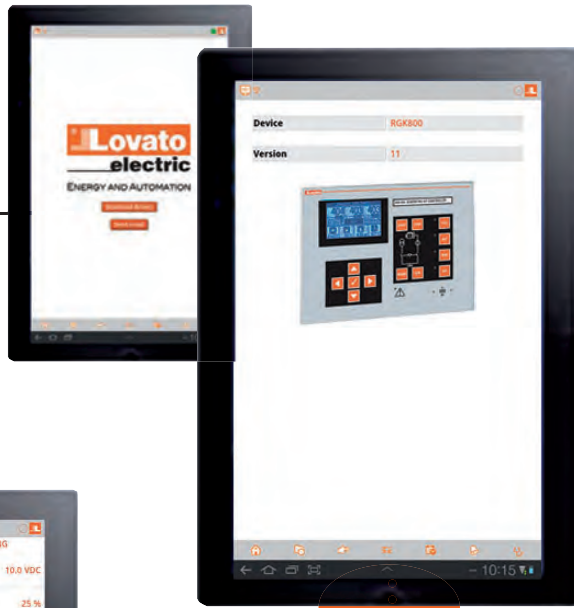

APP

NFC

Updating driver

Sending e-mail (parameters)

General characteristics

The parameter setting for some LOVATO Electric products is now possible via tablet and smartphone through NFC wireless technology.

Bringing the display of a smartphone or tablet (with NFC connection enabled) in close proximity to a LOVATO Electric product, activates the LOVATO NFC App and the device connected is recognised automatically.

The parameters can be set without powering up the LOVATO Electric device.

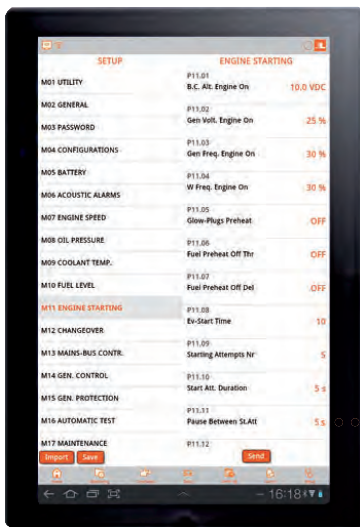

The application allows you to:

- Set the parameters for the product connected
- Save the parameters in a file and share it
- Load a parameter file saved previously
- Simple, fast and intuitive programming
- Very high accuracy and repeatability of the settings.

The app can be downloaded from Google Play Store and App Store.

PARAMETERS SETTING

31 Expansion modules and accessories

- Digital inputs and outputs
- Analog inputs and outputs
- Communication interfaces
- Data storage with clock-calendar
- Communication devices and cables to connect LOVATO Electric products to personal computers, smartphones and tablets
- Gateway data logger.

General characteristics

EXP series expansion modules can increase the functionality of the LOVATO Electric products, such as:

- Digital inputs
 - Relay outputs
 - Static outputs
 - Analog inputs
 - Inputs for PT100 temperature sensor
 - Thermocouple inputs "J" or "K" types
 - Analog outputs
 - Communication interface
 - GPRS/GSM modem (without antenna, see page 31-4)
 - Data storage.
- Powered directly by the base product
 – Automatic identification by the base product
 – Rear base product mounting with no need of tools
 – **T suffixed versions have tropicalized PCB.**

Certifications and compliance

- Certifications obtained: UL Listed, for USA and Canada (cULus File E93601), as Listed Accessory under Auxiliary Devices; EXP1018 excluded, EAC.
- Compliant with standards:
- For EXP1018: IEC/EN/BS 61850 and Italian CEI 0-16, CEI 0-21
 - For EXP1004, EXP1010 and EXP1013: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-4, UL508, CSA C22.2 n° 14
 - For EXP1015: IEC/EN/BS 61010-1, IEC/EN/BS 62311, ETSI EN 301 489-1, ETSI EN 301 469-7, EN 301 511, USA/FCC 47 CFR part 15, Subpart B, CAN/ICES-003
 - For all other types: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC/EN/BS 61000-6-3, UL508, CSA C22.2 n° 14.

For overall dimensions, wiring diagrams and technical characteristics, consult the technical instructions in Downloads of the local or global websites; see details on inside front cover.

Expansion module fixing

Ⓢ IEC/EN/BS 61850 protocol

The module will be made available only when the competent authorities have established the exact terms of the supervision and control of the specific commands (at the time of catalogue printing, currently under study as specified in the Italian CEI 0-16 and CEI 0-21 standards).

Ⓢ PCB tropicalized.

CX03

Order code	Description	Qty per pkg	Wt
		n°	[kg]
CX01	PC ↔ LOVATO Electric device, with USB optic connector for programming, data download, diagnostics and firmware upgrade	1	0.090
CX02	PC ↔ LOVATO Electric device Wi-Fi device for programming, data download, diagnostics and firmware upgrade	1	0.090
CX03	GSM penta-band (850/900/1800/1900/2100MHz)	1	0.090

General characteristics

Communication devices to link LOVATO Electric products to:

- Personal computers (PC)
- Smartphones
- Tablets.

CX01

This USB/optical device, complete with cable, allows to connect compatible LOVATO Electric products with a PC without having to disconnect the power supply from the electric panel.

The PC identifies the connection as a standard USB.

CX02

This Wi-Fi point connection lets LOVATO Electric products be viewed by a PC, smartphone and tablet without having to connect cables.

CX03

Antenna compatible with major part of worldwide mobile networks, thanks to the 850/900/1800/1900/2100MHz frequencies.

IEC degree of protection: IP67. Fixing by Ø10mm/0.39" drilling. Cable length 2.5m/2.73yd.

Compliance for CX02

Compliant with standards: EN/BS 60950-1, EN 62311, EN 301 489-1 V2.2.0, EN 301 489-17 V3.2.0, EN300 328 V2.1.1.

Remote display unit

EXCRDU1

		n°	[kg]
EXCRDU1	Remote display unit, graphic LCD, touchscreen 128x112 pixels, IP65 protection NEMA 4X. Compatible with ADXL... soft starter and VLB3... variable speed drives. Cable length 3m/10ft	1	0.360

General characteristics

Alarm conditions can be viewed on the remote display and alarm silencing can also be activated.

- Dual 100...240VAC / 12...24VDC power supply
- Touch screen 128x112 pixel backlight graphic LCD
- Built-in buzzer
- Static (SSR) output for global alarm signalling
- Opto-isolated RS485 interface port
- Conductor cross section: 0.2...2.5mm² (24...12 AWG; 18...12 AWG per UL/CSA)
- Tightening torque: 0.56Nm (4.5lb.in)
- Compatible with ADXL... soft starter and VLB3... variable speed drives.

Certification and compliance

Certification obtained: cULus, EAC.

Compliant with standard: IEC/EN/BS 61010-1, IEC/EN/BS 61000-6-2, IEC 61000-6-3, UL508, CSA C22.2 n° 14.

EXCCON01

Order code	Description	Qty per pkg	Wt
		n°	[kg]
EXCCON01	RS485/ Ethernet converter, 12...48VDC, including DIN rail fixing kit	1	0.400

EXCCON01 general characteristics

The EXCCON01 converter can interface "Slave" devices connected in a RS485 bus with a "Master" equipped with an Ethernet interface port:

- Kit consisting of a converter and DIN rail mounting accessory
- Web interface programming
- No power pack included.

Certifications

Certifications obtained: cULus (UL 60950-1) Listed, FCC CLASS A.

Gateway

EXCGLA01

EXCGLAX1

new

Order code	Description	Qty per pkg	Wt
		n°	[kg]
EXCGLA01	Gateway data logger for data collecting via Modbus from the device in the field. Publishing of the data to supervision software, also in Cloud	1	0.600
EXCGLAX1	2G/4G modem communication module for EXCGLA01	1	0.160
EXCM4G01	4G Gateway with RS485 and Ethernet port, Modbus RTU/TCP protocol	1	0.300

EXCGLA01 and EXCGLAX1 general characteristics

EXCGLA01 gateway is able to collect data from devices which are connected through Ethernet or RS485 port.

Modbus-RTU, ASCII and TCP protocols are supported. The data can be reviewed by a connection to Synergy Cloud service or to Ethernet local web server and a browser. The access to internet for data sending can be achieved with Ethernet port or by adding EXCGLAX1 2G/4G modem.

- CPU ARM 1 GHz
- 2 Ethernet port
- 1 RS232/RS422/RS485 serial port
- 24VDC (10...32VDC) power supply
- Operating temperature -20...+60°C
- Simplified connection to LOVATO Electric devices
- Compatible with Synergy and Synergy^{4G} softwares
- Supports LTE cat. 4 Global, UMTS/DC HS DPA/HSUPA/WCDMA, GSM/GPRS/EDGE
- SIM slot for microSIM.

Compliance

Compliance with standards for EXCGLA01: EN/BS 61000-6-4 emissions,

EN/BS 61000-6-2 immunity, for installations in an industrial environment.

For EXCGLAX1: EN/BS 61000-6-4, EN/BS 61000-6-2, EN/BS 61000-6-3, EN/BS 61000-6-1, EN/BS 60945, ETSI EN 301 489-1, ETSI EN 301 489-52, EN/BS 301 511, ETSI EN 301 908-1, ETSI EN 301 908-2, EN/BS 62311, EN/BS 60950-1.

EXCM4G01 general characteristics

The EXCM4G01 gateway can interface "Slave" devices connected in a RS485 with a "Master" using a 4G network:

- Connection to TCP server through 4G or 2G network
- Operating mode either as transparent or Modbus-RTU/TCP protocol conversion from serial side to wired or mobile network
- Settable parameters: TCP server IP and remote port, network operator apn (with username and password), SIM card pin (with enabling), connection time-out, serial parameters (baud rate from 1,200 bps to 115,200 bps, stop bit, character length, parity)
- Programming via built-in web server
- 1 Ethernet port 10/100Mbps
- 1 RS485 port
- Supply 9...36VDC
- Operating temperature -40...75°C.

Compliance

Compliance with standards: EN/BS 60950-1.

Remote control and monitoring GSM modem via SMS

Compliant with Italian CEI 0-16 Standard, paragraph 8.8.6.5 and annex M, resolution 421/2014 of the ARERA

EXCGSM01

Order code	Description	Qty per pkg	Wt
		n°	[kg]
	GSM Modem (modular - 4U). IP69K outside aerial with 2.5 m cable. RJ45-USB programming cable (included).		
EXCGSM01	100...240VAC, 1 digital input, 1 analog input (0...10V, 0...20mA, NTC), 1 relay output, receiving and sending SMS messages for remote controls and alarm signals	1	0.340

Application requirements

With EXCGSM01 it is possible to remotely operate a relay output and obtain information on the system by sending programmable SMS. Using the configuration software (available for download free of charge from www.lovatoelectric.com) the user can control the relay output and both the digital and analog inputs.

The logic is based on events (for example, the activation of the digital input or the arrival of an SMS with specific text), to which the user can decide specific actions (reply either by SMS or voice message, or by switching the relay output).

The analog input can be connected to detectors of physical measures like pressure, fluid tank level or temperature to allow remote reading of values or sending text messages via SMS or alarms.

The EXCGSM01 modem interfaces with the cellular network to regularly update its internal clock and dawn/dusk settings, so that it can manage time-scheduled events properly.

Information can be retrieved from phone network cells relative to the position of the modem (reading position information and sending alarms via SMS).

Applications:

- Detection of boiler temperature thresholds
- Fluid tank level alarms
- Time and date based load management
- Remote lighting and air conditioning system control
- Detection of moving of rental equipment.

Use with CEI 0-16

The CEI 0-16 standard in paragraph 8.8.6.5 and in attachment M prescribes that the electricity production plants powered by wind or solar photovoltaic sources with power greater than or equal to 100KW, connected or to be connected to medium voltage grids, are equipped with GSM modem.

Thanks to this modem it is possible to manage the disconnection of the generation through the messages sent by the energy distributor.

Functional characteristics

- Connection to the GSM network for sending and receiving SMS messages
 - Programmable message texts
 - Command output piloted by SMS or internal logic, for example to send the remote disconnection command to the interface switch CEI 0-16
 - Programmable digital input, for example to detect the status of the Interface switch (IS) and sending of successful IS opening and closing SMS
 - POD management (active user code)
 - Management of the list of caller IDs (CLI) up to 5000 callers enabled
 - Detection of mobile network coverage
 - Full compatibility with medium-voltage IP LOVATO Electric PMVF30: no software/hardware updates or programming required
 - **Compatibility with third-party IPs where the remote disconnection signal is transmitted via digital input (dry contact)**
- For additional information contact our Technical support
Tel. + 39 035 4282422; E-mail: service@LovatoElectric.com.

Operational characteristics

MODEM

- 35mm DIN (IEC/EN/BS 60715) rail fixing
- 4 modules
- Supply: 100...240VAC
- Consumption: 5VAC
- 1 digital output 3A 250VAC
- 1 self-supplied digital input
- 1 analog input 0...10V, 0...20mA, NTC
- Housing for 3V and 1.8V SIM card
- SIM PIN management
- Temperature sensor
- Update time, sunrise and sunset via GSM network
- Position update via GSM
- Certified according to FCC rules, part 15B
- Operating temperature: -20...+60°C
- Protection rating: IP40 on front; IP20 on terminals.

AERIAL

- Quad band 850/900/1800/1900MHz
- Degree of protection: outside IP69K
- 2.5m cable
- Fixing via M10 hole:
 - with adhesive seal
 - with threaded pin and nut.

Compliance

Compliant with electrical safety standards: EN/BS 62368, EN/BS 62311.

Software

To configure the EXCGSM01 modem (using the RJ45-USB programming cable included), the EXCGSMSW software must be used. This can be downloaded for free from the www.LovatoElectric.com website.

- The software allows you to set:
- The users enabled to exchange messages with the modem
 - The identifier of the modem, for example the active customer code (POD) in CEI 0-16 applications;
 - The functions assigned to the digital output and input and to analog input;
 - The texts of the SMS associated with the commands
 - The logic of the actions taken following the SMS arrival, change of input status, alarm situations.
- Configuration is also possible off-line, creating a file to transfer to the modem at another time.
