Berker Integro
Design Classic

The classic in the Berker Integro family. Timeless design elements, such as rounded corners and smooth or structured surfaces, perfectly combined with modern design parameters such as flat surface geometry and a discrete radius on the corners. Thus the Design Classic installations advance to real eye-catchers.

The granite-black, silk-matt lacquered design guarantees a special operating experience. An innovative refined surface lacquer offers exceptional haptics for the connoisseur.

Sealing for IP44 applications

Material thickness	2.5 mm
Cut-out Ø	46.5 mm

New sealing material:
Cellular rubber, closed cell (EPDM-S),
permanently elastic whilst also higher strength.
For optimum sealing effect and improved material behaviour during installation.

Caution!

Not suitable for socket outlets with insulation-piercing terminals.

Not suitable for switches/push-buttons with split rocker.

– for SCHUKO socket outlets and socket outlets with earthing pin (frame with hinged cover "IP 44" and contact protection box required!)
– for rocker switch/rocker push-button (frame IP 44 and contact protection box required!)

Suitable for	Order no.	Page
