Warning Signals

Range Overview

Welcome to D G Controls Limited!

A core part of any company's strategy should be Creativity and Innovation. D G Controls Ltd and the deegee brand of Beacons and Sounders is no exception to this rule.

This brochure is an overview and it is designed to introduce you to the deegee Beacon and Sounder range, and to help you select the right product for your application. However we are always delighted to provide a personal service so please feel free to make contact if you need any further assistance with your purchasing decision.

The sales team at deegee provide outstanding technical assistance, so you can always be sure of purchasing the right beacon for the job.

The deegee website beaconlamps.com is available 24 /7. On the website you can obtain recommendations of beacons suitable for your application, photos of the products in use, news updates and technical data.

All of the deegee Beacons and Sounders are designed and manufactured in the UK at our purpose-built factory in Derbyshire.

We ship direct in the UK and through a portfolio of specialist distributors worldwide. We are committed to exemplary manufacturing and delivery schedules, and most of our products can be supplied ex-stock for same-day despatch.

The deegee Beacon and Sounder range is in reliable operation all over the world, in a diverse spectrum of applications. These include factory automation, aircraft obstruction warning, security and fire alarm systems, car-parking, logistics, vehicles; anywhere a visual or audible warning of a hazard is required.

D G Controls Ltd is committed to continuous improvement through the ISO 9001:2008 quality system. At heart, our mission is to provide you with a service with which you will be delighted. We hope we achieve this for you, and always welcome your comments.

- Our products are available the world over meaning you can specify the product once and **save time** sourcing for all of your installations.
- Reliable products that mean they work when you need them to and so **save you money** not needing to keep spares on hand.
- Our in-house product development team allows us to meet industry demands as they evolve. We are agile so **you can be confident** you are not specifying obsolete products.
- Our dedicated on-site production facility guarantees dispatches on-time and in-full. We get the product to you when you want it so **you save money** not needing to keep a buffer stock.
- Use our 44 years industry experience to be your signalling experts. Don't just guess what product to buy for your application, make full use of our technical team to find **your best signalling solution**.
- We'll save you effort, time and money in the long-run.
